What should I study….

Do you already have a degree or equivalent?

NO → You need an undergraduate course
Do you want to actually design computer hardware?

YES → Try SECTE: the School of Electrical, Computer and Tele-communications Engineering

NO → Do you want to develop really technical computer software like operating or network systems?

YES → Consider a Bachelor of Computer Science degree (BCompSc) in the School of Computer Science and Software Engineering (SCSSE)

NO → If you would like to work with business people to solve business problems using technology, then you could try:
Bachelor Business of Information Systems
Bachelor of Information Technology

Contact the School of Information Systems and Technology (SISAT)

YES → You need a **postgraduate** course

Is your degree in IS, IT, Computer Science or Electrical Engineering?

NO → You should look at the MITS or a course at Wollongong College Australia

YES → Do you want to do a major research project as part of your degree?

YES → Try the MICT or MITM (1 year)
or MICT(Adv) (2 years)
or MHI (suits a medical background)

NO → Try a Masters by Research or a PhD.
You can also do a small project in most coursework Masters (see NO path above)
