

Framework of Re-usable learning design

The table shows a range of learning designs that have been successfully used and re-used across different disciplines depending on the teaching context. In many cases the use or re-use has been facilitated by the staff of CEDIR's Learning Design Unit. For more information please contact Sarah Lambert, Manager, Learning Design Unit, slambert@uow.edu.au.

Teaching context/ Learning Designs	Case (From the Case Database)	Features of the re-usable learning design
Redesign postgraduate curriculum for eTeaching,	Block/online delivery in Law, Engineering and Health Sciences	Authentic (workplace related) groupwork tasks with F2F and online components
Multilocation teaching – repeat subjects at different locations	Undergraduate programs in Arts, H&BS	Collaborative knowledge construction, large and small group videoconference discussions, online discussion
Multilocation teaching – blending different cohorts of students	International perspectives on science	Enquiry or PBL –based group activities with students from different locations, videoconference
International multilocation teaching – “fly-in” model	Law TNCP, HKBU,	Face-to-face orientation, local tutor support, online communications.
Work integrated learning, Practicum, Internship	Environmental Sciences Honours, Postgrad engineering and Law	Synthesise various learning experiences, develop ePortfolio for reflection and evidence of skills development
Supporting Graduate Qualities	Using Evidence and Referencing Resource (Marketing), Research and Sources resources (Informatics) Academic Integrity (Nursing)	Read/listen to audio/text information specific to discipline, review good practice samples, quiz for formative assessment.
Role-based Learning	IACT451 Informatics Project Management, Understanding teaching and assessment	Understanding complex issues by seeking and incorporating a wide-range of stakeholder views, role-play or debate tasks
Preparing students for face-to-face classes	Chemistry and Engineering Pre-lab or pre-prac	Pre-class simulations, quizzes, worksheets which

	simulations, Arts and Science quiz, Commerce tutorial worksheet	scaffold and structure out of class preparation time
Authentic learning	OH&S; Mental Health Collaborative Recovery Model	Video testimonies provide information to stimulate further assessment tasks
