1 Purpose of Policy
The University of Wollongong is committed to the dissemination and promotion of its research findings as widely as possible. A significant mechanism to do this is through the deposit of publication metadata and final manuscripts into the University’s institutional research repository, in accordance with the objectives and principles of Open Access, and in particular those underpinning Green Open Access.

This policy supports the Australian Research Council (ARC) Open Access Policy, the National Health and Medical Research Council’s (NHMRC) Revised Policy on the Dissemination of Research Findings and the expectations described by the Australian Code for Responsible Conduct of Research. The University of Wollongong Authorship Policy and the University of Wollongong Research Code of Conduct should be read in conjunction with these documents.

<td>Open Access</td>
<td>Open Access provides the means to maximise the visibility, and thus the uptake and use, of research outputs. Open Access is the immediate, online, free availability of research outputs without restrictions on use commonly imposed by publisher copyright agreements. Variants: Green Open Access - the author can self archive, via the institutional repository, accepted manuscripts at the completion of the publication submission process. Gold Open Access – a specific fee is paid to the publisher in order to make the material available ‘free’ (open access) at the point of publication.</td>
