The Robert Hope Memorial Prize

2008 Winner

Cameron Ferris graduated from his Bachelor of Nanotechnology Advance in December 2008. Cameron has accomplished an outstanding academic standard throughout his degree, achieving a WAM of 90. Cameron has achieved a High Distinction grade in every subject in his degree and has received a variety of Academic Awards.

On a University level, Cameron has been an active volunteer for the Siemens Science Experience for high school students. Cameron has been a student representative for the Faculty of Science during orientation events. In addition to faculty-based activities, Cameron has worked as a tutor for Disability Services.

In the local community, Cameron has been passionately involved in youth issues. Cameron runs a weekly youth group in his local church for high school aged students. Cameron has also been an active participant of the Your Dream organisation, where he travelled to high schools running activities to empower young people to make positive lifestyle choices. Cameron volunteers at Reiby Juvenile Justice Centre in Campbelltown participating in life-skills sessions and one-on-one tutoring with youth in detention. Cameron participated in the ‘Maximising Potential in Macarthur’ leadership program, where he developed a “youth café”; a safe fun environment for youth to enjoy spare time.
