

**School of Health Sciences
Honours Research Project**

Title (*approximate*)

Using intelligent fabrics to assist lymphoedema patients

Supervisors Name: Julie Steele &/or Bridget Munro

Email: julie_steele@uow.edu.au; bmunro@uow.edu.au;

Project Details (*Brief Description of the Project*)

Unique collaborative research between the BRL and the [Intelligent Polymer Research Institute](#) at the University of Wollongong has lead to patented “smart” fabric systems for use in biomonitoring and biofeedback. This project aims to determine whether these intelligent fabrics can be made into a wearable garment and assist during treatment and recovery in lymphoedema patients.

Number of Students: 1

Special requirements

Flexible hours

Other requirements to be determined once project has been finalised

Skills required

Good communication skills

A passion for research
