2007 Re-enrolment Information

On 23 November 2006 the Spring Semester subject results will be released to students.

On 27 November 2006 the University’s timetable for 2007 will be released to aid students in choosing their 2007 subjects.

This information is not needed by most nursing students as all nursing subjects are compulsory. If you have passed all your subjects and you are continuing with full-time study in 2007 then your re-enrolling subjects for 2007 are already set. If you are an atypical progression student then you will need to contact Dr Peter Thomas about your choice of subjects for 2007.

Students are meant to re-enroll in their 2007 subjects from 27 November until 28 January 2007 on SOLS on the WWW without late fee (11 March for late re-enrolment with fee).

Details about the School of Nursing, Midwifery and Indigenous Health’s packaging of the 2007 timetable will progressively appear on this website: Nursing Online Autumn 2007 on WebCT Vista. Access to this website is restricted to students enrolled in Autumn Semester 2007 nursing subjects.

Lecture times will largely be set from December 2006. Tutorial times & packaging may not be largely finalised till early February 2007.

Information about submitting a tutorial group preference form for Autumn Semester 2007 will progressively appear on these restricted websites.

Tutorial group allocation will occur BEFORE Autumn Semester 2007 starts. There may very well be introductory tutorial classes starting 0830 Mon 26/2/07.
