| Title (<i>approximate</i>) Using intelligent fabrics to assist lymphoedema patients |
| Supervisors Name: Julie Steele &/or Bridget Munro Email: julie_steele@uow.edu.au ; bmunro@uow.edu.au ; |
| Project Details (<i>Brief Description of the Project</i>) Unique collaborative research between the BRL and the Intelligent Polymer Research Institute at the University of Wollongong has lead to patented “smart” fabric systems for use in biomonitors and biofeedback. This project aims to determine whether these intelligent fabrics can be made into a wearable garment and assist during treatment and recovery in lymphoedema patients. |
| Number of Students: 1 |
| Special requirements Flexible hours Other requirements to be determined once project has been finalised |
| Skills required Good communication skills A passion for research |
