

Mac OS 10.5 Wireless Setup Guide

This guide is for new connections to the UOW network.

Note: You must be in range of the UOW network to configure your device. A map of the wireless networks is available at <http://www.uow.edu.au/its/network/wireless/coverage-map/index.html>

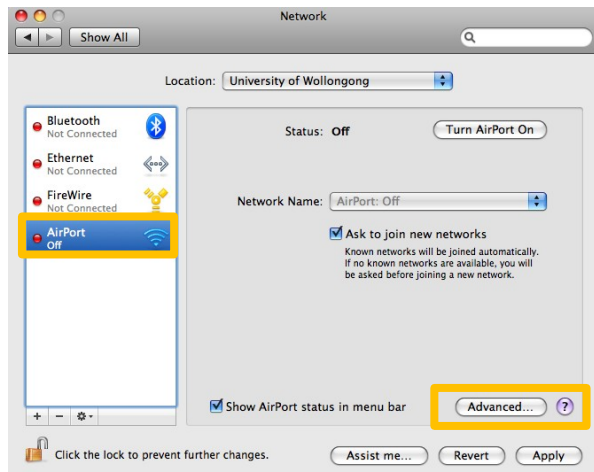

1. Under the Apple menu, click System Preferences

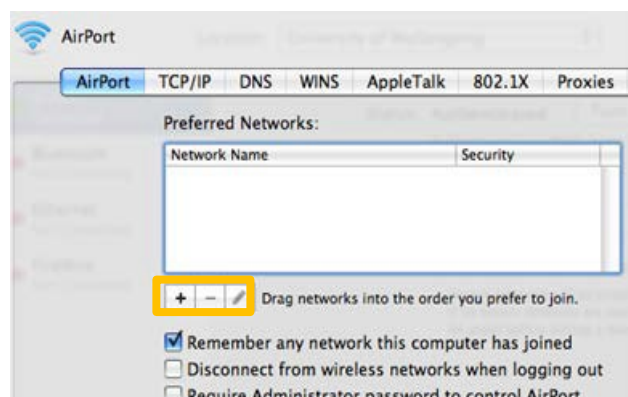

2. Under Internet & Network, click Network

3. Select Airport
4. Turn Airport Off
5. Click Advanced

6. Add a new network by clicking the plus symbol.

7. Enter the following details:

Network Name: **UOW**
Security: **WPA2 Enterprise**
Type in your **UOW username and password**

8. Click Add

9. Click the 802.1X tab

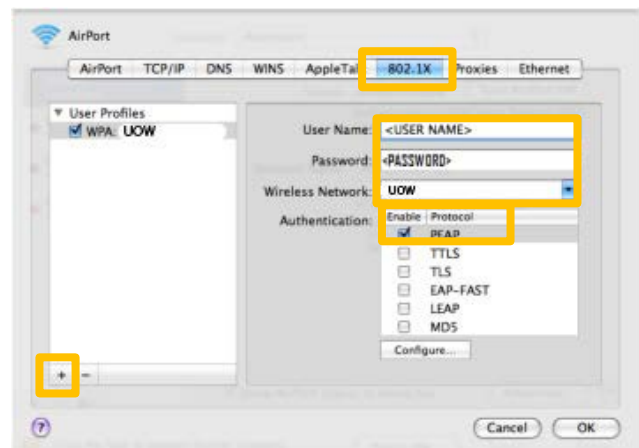

10. Below User Profiles, click the plus (+) and add User profile

11. Enter your UOW Username and Password

12. In Wireless Network field, type UOW

13. In Authentication field, choose PEAP

14. Click OK and then Apply on all menus that are open

15. Turn Airport ON

16. If prompted for 802.1x authentication, enter your UOW username and password and click OK

17. Click Show Certificate and tick Always Trust

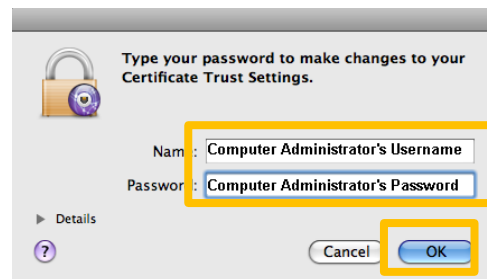

Please note that before accepting the certificate you should confirm that it contains the following details:

Certificate Name: wireless.uow.edu.au

Issued by: QuoVadis Global

18. When prompted for a password to change your certificate trust settings, enter the **computer administrator's password**

For further assistance accessing the wireless network please see the Service Desk located at ITS Central Labs in Building 17, Level 1 or telephone 4239 2000.
