Proxy Settings for UOW Wireless Setup

Internet Explorer and many other applications use these proxy settings to gain access to the internet. Some applications may require additional configuration.

**Via Automatic Configuration Script**

http://www.uow.edu.au/autoproxy.pac

**Via Manual Proxy Configuration**

- **Proxy Type:** HTTP Proxy
- **Host:** proxy.uow.edu.au
- **Port:** 8080
- **Authentication**
  - **User:** Your University Username
  - **Password:** Your University Password

**Note:** Using Manual Proxy Configuration will impact your internet access outside the university network. Disabling manual proxy settings may be required for normal browsing.

A typical set up for Automatic Configuration Script, using Internet Explorer is shown below:

1. Open Internet Explorer and click Tools and then select Internet Options
2. Click the **Connections** tab

3. Select **LAN Settings**

4. Tick use automatic configuration script

5. In the Address field type:

   http://www.uow.edu.au/autoproxy.pac

6. Click OK on this window

7. Click OK to close the Connections window

You should now have access to external websites through the proxy.

For further assistance accessing the wireless network please see the Service Desk located at ITS Central Labs in Building 17, Level one or telephone 4239 2000
