

## DR BILL BUTTEMER

# ANIMALS IN THE ENVIRONMENT

Dr. Bill Buttemer uses physiological techniques to address ecological and evolutionary questions concerning animals in the context of their natural environment.

### *Examples of ongoing research by Bill & students:*

- ◆ Evaluating the immunocompetence handicap hypothesis
- ◆ Nutritional ecology of Wandering Albatross
- ◆ Evaluating sublethal effects of pesticide exposure in native vertebrates
- ◆ Physiological consequences of avian life history tradeoffs
- ◆ Conservation biology of amphibians and birds
