

I. Professional Training and Qualifications

I have expertise in assessing the vulnerability of the coastal zones to climate change using several tools, including but not limited to:

1. Application of Dynamic Interactive and Vulnerability Analysis (DIVA) tool
2. Application of Coastal Sensitivity Index (CSI)
3. Application of Geomorphic Stability Mapping (GSM) approach ('Smartline')
4. Application of Digital Shoreline Analysis System (DSAS)
5. Application of Marine MIKE DHI for sediment volumetric analyses
6. Sediment analysis and beach profiling
