7.2.4 Additional Majors from other Faculties

Students may choose to use their elective credit points to combine their science major with a second or co-major from outside of the Faculty as follows:

1. Co-major from another Faculty

A co-major combines a Science major with an approved major from another Faculty.

The co-majors available are:

- Computer Science
- Human Resource Management
- Management
- Marketing
- Mathematics/Applied Statistics
- Nutrition
- Physics
- Psychology

In this category the requirement for the BSc of at least 90 credit points from the Science Schedule is waived in lieu of one of the above approved majors.

In most cases these majors combine with any Science major with no need for any further adjustment to credit points but there are some exceptions as follows:

**Nutrition:** As this major, offered by the Faculty of Health and Behavioural Sciences requires the full 144 credit points, a combined program with Biological Sciences or Chemistry must be negotiated with the Sub-Dean of Health and Behavioural Science, Dr Deanne Condon-Paoloni (Room 41.152, Telephone 4221 3492).

**Computer Science:** Special 60 credit point major studies are available in Biological Sciences, Geography, Geology or Geosciences for combining with Computer Science. Refer to the appropriate Academic Unit for details. The normal 60 credit point Chemistry major may be combined with a Computer Science major.

Students wishing to take a major from outside of the Faculty of Science must first obtain the approval of the Head of the relevant Department or School as well as the Associate Dean of the Faculty of Science, Associate Professor Ted Bryant, and verify their planned study program.
