

## SELECTED PAPERS OF CHAO ZHANG

- Junfeng Liu, Zhongshui Ma, C. Zhang, *Transverse current response in armchair graphene ribbons*, J. Appl. Phys. **110**, 034313 (2011)
- Yee Sin Ang, Chao Zhang, C. Kee, *Energy loss rate of a fast particle in graphene*, Appl. Phys. Lett. **99**, 053111 (2011), [Selected for **Virtual Journal of Nanoscale Science & Technology**, August 15, 2011]
- Junfeng Liu, Bo Wang, Zhongshui Ma, C. Zhang, *Two-colour terahertz response in armchair bilayer graphene nanoribbons with  $\pi$ -orbit interaction*, Appl. Phys. Lett. **98**, 061107 (2011)
- Yee Sin Ang and Chao Zhang, *Subgap optical conductivity in semi-hydrogenated graphene*, Appl. Phys. Lett. **98**, 042107 (2011), [Selected for **Virtual Journal of Nanoscale Science & Technology**, February 7, 2011]
- Yee Sin Ang, Shareef Sultan and Chao Zhang, *Nonlinear optical spectrum of bilayer graphene in the terahertz regime*, Appl. Phys. Lett. **97**, 243110 (2010), [Selected for **Virtual Journal of Nanoscale Science & Technology**, January 3, 2011]
- A. R. Wright, T. E. O'Brien, D. Beaven and C. Zhang, *Gapless insulator and a band gap scaling law in semi-hydrogenated graphene*, Appl. Phys. Lett. **97**, 043104 (2010)
- X. G. Xu, J. C. Cao, S. Sultan, and C. Zhang, *Nonlinear optical conductance in a graphene pn junction in the terahertz regime*, Appl. Phys. Lett. **97**, 011907 (2010)
- G. J. Xu, X. G. Xu, B. H. Wu, J. C. Cao, and C. Zhang, *The resonant tunneling through a graphene multi-quantum well system*, J. Appl. Phys. **107**, 123718 (2010)
- A. R. Wright and C. Zhang, *Dynamic conductivity of graphene with electron-LO-phonon interaction*, Phys. Rev. B **81**, 165413 (2010)
- X. L. Wang, S. X. Dou and C. Zhang, *Zero-gap materials for future spintronics, electronics, and optics*, NPG Asia Materials **2**, 31 (2010)
- L. Chen, Z. S. Ma, C. Zhang *Vertical absorption edge and temperature dependent resistivity in semi-hydrogenated graphene*, Appl. Phys. Lett. **96**, 023107 (2010)
- A.R. Wright, J.C. Cao, and C. Zhang, *Enhanced optical conductivity of bilayer graphene nanoribbons in the terahertz regime*, Phys. Rev. Lett. **103**, 207401 (2009), [Selected for **Virtual Journal of Nanoscale Science & Technology**, November 16, 2009], highlighted in **Nature Nanotechnology**, [Nature Nanotechnology 20 November 2009 — doi:10.1038/nnano.2009.380]

- A. R. Wright, C. Zhang, *Stretching induced Hall current and conductance anisotropy in graphene*, Appl. Phys. Lett. **95**, 163104 (2009), [**Selected for Virtual Journal of Nanoscale Science & Technology, November 2, 2009**]
- A. R. Wright, X. G. Xu, J. C. Cao, C. Zhang, *Strong nonlinear optical response in graphene in terahertz regime*, Appl. Phys. Lett. **95**, 072101 (2009), [**Selected for Virtual Journal of Nanoscale Science & Technology, August 31, 2009**]
- A. R. Wright, F. Liu, C. Zhang, *Effect of next-nearest neighbor coupling on the optical spectra in bilayer graphene*, Nanotechnology **20**, 405203 (2009),
- Xiaolin Wang, Germanas Peleckis, Chao Zhang, Hideo Kimura, Shixue Dou, *Colossal Electroresistance and Giant Magnetoresistance in Doped PbPdO<sub>2</sub> Thin Films*, Advanced Materials **21**, 2196 (2009)
- C. Wang, J. C. Cao, Chao Zhang, *Noise temperature spectrum of hot electrons in semiconductor superlattices*, J. Appl. Phys. **105**, 013717 (2009)
- F. Gao, G. X. Wang, C. Zhang *Strong photon-mixing of terahertz waves in semiconductor quantum wells induced by Rashba spin-orbit coupling*, Nanotechnology **19** 465401 (2008)
- Junfeng Liu, A. R. Wright, C. Zhang, and Zhongshui Ma, *Strong terahertz conductance of graphene nanoribbons in a magnetic field*, Appl. Phys. Lett. **93**, 041102 (2008), [**Selected for Virtual Journal of Nanoscale Science & Technology, August 11, 2008**]
- Chao Zhang, Lei Chen, and Zhongshui Ma, *Orientation dependence of the optical spectra in graphene at high frequencies*, Phys. Rev. B. **77**, (Rapid Commun.) 241402 (2008) [**Selected for Virtual Journal of Nanoscale Science & Technology, June 30, 2008**]
- Zhou Li, Zhongshui Ma, Chao Zhang, *Temperature dependence of the intrinsic spin Hall effect in Rashba spin-orbit coupled systems*, Europhys. Lett. **82**, 67003 (2008)
- Jun-Feng Liu, Zhongshui Ma, A. R. Wright, Chao Zhang, *Orbit magnetization of graphene and graphene nanoribbons*, J. Appl. Phys. **103**, 103711 (2008)
- Jun-Feng Liu, Zhi-Cheng Zhong, Lei Chen, Dingping Li, Chao Zhang, Zhongshui Ma, *Enhancement of polarization in a spin-orbit coupling quantum wire with a constriction*, Phys. Rev. B **76**, 195304 (2007) [**Selected for Virtual Journal of Nanoscale Science & Technology, November 19, 2007**]
- P. Lyu, C. Zhang, *Magnetic-field-induced charge current in quantum wells with spinorbit coupling*, Nanotechnology **18**, 475403 (2007)
- P. Lyu, N. N. Liu and C. Zhang, *Gate-tunable RKKY interaction mediated by low-dimensional electrons with Rashba spin-orbit coupling*, J. Appl. Phys. **102**, 103910 (2007)

- Lei Chen, Zhongshui Ma, J. C. Cao, T. Y. Zhang, Chao Zhang, *Phonon-limited mobility in two-dimensional semiconductors with spin-orbit coupling*, Appl. Phys. Lett. **91**, 102115 (2007)
- T. Y. Zhang, W. Zhao, X. M. Liu and C. Zhang, *Nonlinear optical properties of semiconductor quantum wells under intense terahertz radiation*, Appl. Phys. Lett. **91**, 041909 (2007)
