Development of a ranking of refereed journals in which Australia & New Zealand nursing and midwifery researchers publish their work

Researchers: Professor Sandra Jones, Professor Patrick Crookes, Dr Samantha Reis, Ms Chris Brewer

Funding: Australia & New Zealand Council of Deans of Nursing & Midwifery

PROJECT OVERVIEW:

The overarching objective of this project was to systematically derive a tool to rank refereed journals where researchers in the disciplines of nursing and midwifery publish. The project developed the Journal Evaluation Tool through extensive consultations with experts in the fields of nursing and midwifery. The new tool will now be disseminated to nursing and midwifery bodies in Australia and New Zealand, along with instructions for use and recommendations for future research.
