2009 Postgraduate Handbook
About this Handbook

Course and Subject information is provided under separate Faculty chapters.

Course information includes: Faculty; campus; course code; duration; total credit points; mode of delivery; course description; course program; entry requirements; advanced standing; and information about honours.

Subject information includes: subject description; subject code; credit points; session of offer; campus; and pre-requisites.

For information on the Rules and Policies of the University which govern many aspects of study and other activities at the University, please see the Calendar of Governance, Rules and Policy.

More Course and Subject Information Online

The University website (www.uow.edu.au) contains comprehensive information for prospective and current students. Course and subject information online is more detailed and current than the information contained in this Handbook because it is updated regularly throughout the year.

The Course Finder Database

The primary source of information for prospective students, the CourseFinder database provides additional information than that contained in this Handbook, including information about employment opportunities, the UAI required for entry, language requirements, scholarships etc. The CourseFinder database can be assessed online at www.uow.edu.au/prospective/.

Course Information

The primary source of information for current students, the online Course Handbook 2008 can be assessed at www.uow.edu.au/handbook/ or via the Current Students homepage at www.uow.edu.au/student/.

This online version provides more detailed information about how to design your program of study, as well as current information on course rules and policies. You can also access detailed subject descriptions through this web page.

Subject Database

The online subject database contains more detailed information about individual subjects. Additional details include: subject objectives, lecturer details, co-ordinator details and textbook information. Enter via www.uow.edu.au/handbook/.

How to Find Subject Information online

Current Students

Choose Course Handbook from the menu

Choose Subject Descriptions, then nominate year and choose either postgraduate or undergraduate

Search Method 1

Choose Faculty and then School/Department then click on the subject name.

Search Method 2

If you know the subject code for the subject you are looking for (eg CHEM103) then enter the whole subject code in the search field and then click on subject name.

Timetable Information

You can find out when your subjects have been scheduled and the teaching facility in which your class is located by searching online at www.uow.edu.au/student/timetables/.

Individual timetables are provided for each campus. In addition, you can use SOLS to nominate your tutorial and practical preferences for most subjects at www.uow.edu.au/student/tps/.

Disclaimer

This publication was correct at time of printing (November 2008). Please refer to www.uow.edu.au/handbook for the most current information.
Faculty of Arts

Member Units
School of English Literatures, Philosophy and Languages
School of History and Politics
School of Social Sciences, Media and Communication
The Centre for Asia Pacific Social Transformation Studies (CAPSTRANS)

Courses Offered

Research Degrees
Doctor of Philosophy
Master of Arts - Research
Master of Social Change and Development - Research

Coursework Degrees
Master of English Literatures
Master of International Studies
Master of International Studies Advanced
Graduate Diploma in Arts (Japanese)*
Graduate Diploma in Arts (Modern Languages)
Graduate Certificate in Social Change and Development

*Please note: this degree has an interview selection process conducted in August/September prior to the year of study.

Faculty Research

UOW Strength
Asia-Pacific Studies (includes the ARC Key Centre for Asia-Pacific Social Transformation Studies – CAPSTRANS)

Faculty Research Priority Areas
Citizens, States and Power
Innovation in Cultural Research
Literature, Identity and Culture

**Doctor of Philosophy**

**Testamur Title:** Doctor of Philosophy  
**Abbreviation:** PhD  
**Home Faculty:** Faculty of Arts  
**Duration:** 3 years full-time or part-time equivalent  
**Total Credit Points:** 48 per year  
**Delivery Mode:** Supervised individual research  
**Starting Session(s):** Autumn or Spring  
**Location:** Wollongong  
**UOW Course Code:** 201  
**CRICOS Code:** 003065C

**Overview**

The PhD is a research degree leading to a significant contribution to a field of knowledge. Students work with supervisors to complete a substantial research thesis (80,000 – 100,000 words). The PhD is the qualification normally required for academic employment at a university or research institute. Candidates without previous research training deemed sufficient may be required to undertake up to 24 credit points of coursework before they start working on the thesis.

**Entry Requirements**

To enrol in the PhD, students need a BA (Honours) or equivalent qualification, with Honours Class II, division ii or higher, or MA – Research with a strong performance in the research thesis. Candidates with other qualifications may be required to undertake a coursework subject in research training. Students enrolled in the Master of Arts – Research degree may apply for an upgrade to PhD.

All applications must be approved by the Head of Postgraduate Studies (HPS) in the relevant School. Approval depends on the availability of supervision for the proposed thesis topic. Priority is given to topics related to the areas of research strengths in Priority Areas in the Faculty of Arts:

- CAPSTRANS (Centre for Asia Pacific Social Transformation Studies)
- Citizens, States and Power
- Innovations in Cultural Research
- Literature, Identity and Culture

**Course Requirements**

Students will complete a substantial thesis (80,000 to 100,000 words) reporting on an independent research topic in their field of study. The precise thesis topic will be determined in consultation with supervisors and the HPS.

Each PhD candidate has two supervisors. Before accepting a PhD candidate, the Faculty will ensure that adequate supervision and facilities for the proposed research are available.

**Time Limits**

A full time candidate will normally complete the PhD in three years. The minimal time in which to complete the degree is four (4) consecutive sessions (not including Summer Sessions) for full time students, the maximum is eight (8) sessions (not including Summer Sessions). Part time students should complete the course in a minimal time of eight (8) sessions and a maximum of sixteen (16) sessions. Under special circumstances, a candidature may be extended beyond the maximum time following a satisfactory review of progress.

**Fields of Study**

The PhD is offered in the following fields of study:

- Aboriginal Studies
- Asia-Pacific Studies
- Communications
- Employment Relations
- English Literatures
- French
- Gender Studies
- Global Labour Studies
- Global Studies
- History
- International Studies
- Italian
- Japanese
- Media and Cultural Studies
• Philosophy
• Politics
• Science, Technology and Society
• Social Change and Development
• Sociology
• Spanish
• Interdisciplinary topics as negotiated with the relevant Head(s) of Postgraduate Studies are also available for study.

Assessment

On commencement of candidature, candidates and their supervisors complete a Confirmation of Candidature Form that identifies the topic, a plan and timetable for the thesis, resource needs and skills required to complete the project. Students meet regularly with their supervisors to ensure that their progress is in line with the agreed plan. Towards the end of the first year of candidature the student will meet with supervisors and the HPS for a First Year Proposal Review. Students and supervisors must also submit an Annual Progress Report (APR). The APR is the means by which the University assesses the progress of the candidature and decides whether it will continue into the following year. Supervisors who have concerns about a student’s progress may also initiate a progress review at other times during the candidature. When the thesis is submitted it is examined by two external supervisors chosen from a list prepared by the supervisors in consultation with the student.

Students are advised to consult the University’s Code of Practice – Supervision at the following web address: www.uow.edu.au/handbook/codesofprac/cop_supervision.html
For further information about the Faculty’s areas of research strength, please consult the Faculty’s website at www.uow.edu.au/arts/

For more technical information about the degree progress, please consult the website of the University’s Office of Research at www.uow.edu.au/research/rsc/

Master of Arts - Research

Testamur Title: Master of Arts - Research
Abbreviation: MA-Res
Home Faculty: Faculty of Arts
Duration: 1-1.5 years full-time or part-time equivalent
Total Credit Points: 72 (or 48 with entry from BA (Honours) or equivalent)
Delivery Mode: Supervised research (with entry from BA (Honours) or equivalent). With entry from BA (Pass), 24 credit points of coursework will be required
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 1301
CRICOS Code: 042530D

Overview

For candidates holding a Bachelor of Arts (Honours) degree or equivalent (a degree which includes a significant research training component), the Master of Arts – Research is a research-only degree. Students work with a supervisor to complete a substantial research thesis (40,000 – 50,000 words). Candidates without previous research training will normally undertake 24 credit points of coursework before they start working on the thesis.

Entry Requirements

Students will normally have an undergraduate degree with a major in the discipline area of the proposed research thesis.

There are two entry points for this degree:

Bachelor of Arts (Pass). Students entering the degree from a Bachelor of Arts (Pass) will complete a 72 credit point degree, consisting of 24 credit points of coursework (ARTS901 Master of Arts Research Methods or other research training coursework deemed equivalent) and, subject to satisfactory completion (see below), a 48 credit point research thesis on a disciplinary or interdisciplinary topic.

Bachelor of Arts (Honours) or Master of Arts by coursework (including a research training component). Students holding the degree of Bachelor of Arts (Honours) with Honours Class II, division ii or higher, or Master of Arts by coursework with an average of at least 70%, may apply for admission into the Master of Arts – Research degree with Advanced Standing for the 24 credit points of coursework. They will complete the 48 credit point research thesis on a disciplinary or interdisciplinary topic.

All applications must be approved by the Head of Postgraduate Studies (HPS) in the relevant School. Approval depends on the availability of supervision for the proposed thesis topic. Priority is given to topics related to the areas of research strengths and Priority Areas in the Faculty of Arts:

CAPSTRANS (Centre for Asia Pacific Social Transformation Studies)
Citizens, States and Power
Innovations in Cultural Research
Literature, Identity and Culture

Course Requirements

1. Entry from a Bachelor of Arts (Pass):

Students will complete 24 credit points of coursework (ARTS901 Master of Arts Research Methods or equivalent) and a 48 credit point thesis in their chosen field of study. Students who achieve 70% or higher in the coursework component will proceed to the research thesis. The precise thesis topic will be determined in consultation with supervisors and the HPS. Students who achieve a Pass result lower than 70% will either need to re-enrol in the coursework subjects before proceeding to the research thesis, or they may withdraw from the Master of Arts – Research and enrol in a relevant Master of Arts by coursework degree, where they can apply for Advanced Standing for 24 credit points of coursework.

The 24 credit point coursework subject ARTS901 Master of Arts Research Methods provides students with training in the theories and methodologies which inform research in the humanities and social sciences. This training includes theoretical perspectives as well as an introduction to research techniques and the preparation of a detailed research proposal leading up to the thesis. Other coursework subjects may be accepted by the HPS as equivalent to ARTS901.

2. Entry from a Bachelor of Arts (Honours) or equivalent:

Students will complete a 48 credit point thesis in their chosen field of study. The precise thesis topic will be determined in consultation with supervisors and the HPS.

Time limits

Full time students will normally complete the 72 credit point degree in three (3) sessions and the 48 credit point degree in two (2) sessions. The minimal time in which to complete the Master of Arts – research degree is two (2) sessions (not including Summer Session) for full time students, the maximum is four (4) sessions (not including Summer Session). Part time students should complete the course in a minimal time of four (4) sessions and a maximum of eight (8) sessions.

Fields of Study

The Master of Arts – Research is offered in the following fields of study:

• Aboriginal Studies
• Asia-Pacific Studies
• Communications
• Employment Relations
• English Literatures
• French
• Gender Studies
• Global Labour Studies
• Global Studies
• History
• International Studies
• Italian
• Japanese
• Media and Cultural Studies
• Philosophy
• Politics
• Science, Technology and Society
• Social Change and Development
• Sociology
• Spanish
• Interdisciplinary topics as negotiated with the relevant Head(s) of Postgraduate Studies are also available for study.

Assessment

Coursework

The 24 credit point coursework component (ARTS901 or equivalent) will be assessed by written assignments (essays, literature reviews) and seminar papers.

Thesis

On commencement of the research component of the course, candidates and their supervisors complete a Confirmation of Candidature Form that identifies the topic, a plan and timetable for the thesis, resource needs and skills required to complete the project. Students meet regularly with their supervisor(s) to ensure that their progress is in line with the agreed plan. Within the first six months of candidature, the student will meet with supervisor(s) and the HPS for a Proposal Review. If the candidature goes over more than one year, students and supervisors must submit an Annual
Progress Report (APR). The APR is the means by which the University assesses the progress of the candidature and decides whether it will continue into the following year. Supervisors who have concerns about a student’s progress may also initiate a progress review at other times during the candidature. When the thesis is submitted it is examined by two supervisors chosen from a list prepared by the supervisor(s) in consultation with the student.

Students are advised to consult the University’s Code of Practice – Supervision at the following web address: www.uow.edu.au/handbook/codesofprac/cop_supervision.html

For further information about the Faculty’s areas of research strength, please consult the Faculty’s website at www.uow.edu.au/arts/

For more technical information about the degree progress, please consult the website of the University’s Office of Research at www.uow.edu.au/research/rsc/

Overview

The purpose of the program is to provide students with the opportunity to undertake research at an advanced level and to gain the knowledge and skills to understand the processes of social change and development. The Faculty’s teaching program complements the research programs in the Centre for Asia-Pacific Social Transformation Studies (CAPSTRANS) so that all courses are informed by the most recent high quality research. Students are offered the opportunity to study in a research and teaching faculty with extensive international networks staffed by some of the best scholars in their respective fields.

The Master of Social Change and Development – Research provides students with a new approach to comparative Asia-Pacific studies that transcends the limited focus of conventional development studies. Social transformation studies are innovative in terms of thinking and research, and the Asia-Pacific region offers unique insights into social change triggered by national and international development policies and their effects at local, regional and transnational levels. Unlike traditional development studies courses that provide a largely econometric analysis of development, we focus on a critical sociology and critical political economy of social change.

All subjects are oriented to developing problem-solving skills grounded in specific processes within the general rubric of social transformation; increasing research and policy analysis skills through subjects in policy and program evaluation; and an emphasis on student-directed learning via the use of online learning. We prepare our graduates to work in a broad range of development-related areas.

The Master of Social Change and Development – Research can be a research-only degree, where the candidate holds an undergraduate degree with a substantial research component, normally Honours or equivalent. Where the candidate has an undergraduate Pass degree, s/he will undertake 24 credit points of coursework in areas aimed at research training. The candidate must complete a substantial thesis (40,000 – 50,000 words).

Entry Requirements

There are two entry points for this degree:

1. From the Bachelor of Arts. Students entering the degree from the Bachelor of Arts (Pass) degree will complete a 72 credit point degree, consisting of 24 credit points of coursework chosen from CAPSTRANS subjects listed below, and subject to satisfactory completion of the coursework component, a 48 credit point thesis in a discipline or interdisciplinary area.

2. From the Bachelor of Arts (Honours) or the Master of Arts by Coursework (or equivalent qualification). Students having a Bachelor of Arts with Honours Class II, division ii or higher, or a Master of Arts by Coursework (or equivalent) with an average of at least 70% may apply for admission into the Master of Social Change and Development – Research degree with Advanced Standing for the 24 credit points of coursework. They will then complete a 48 credit point thesis in a discipline or interdisciplinary area.
Course Requirements

1. Entry from a Bachelor of Arts (Pass degree) or equivalent: Students will complete one 48 credit point thesis in a field of study and 24 credit points of coursework to be chosen from the subjects listed below. Students who achieve 70% or higher in the coursework component of the degree will proceed to the thesis component of the degree. Students who achieve a Pass average in this subject will be offered the opportunity to transfer to the Master of Social Change and Development by Coursework with 24 credit points of Advanced Standing. The thesis topic will be determined by discussion between the student and the Postgraduate Co-ordinator.

2. Entry from a Bachelor of Arts (Honours) or equivalent: Students who have completed a Bachelor of Arts (Honours) degree with Class II division ii or higher, or appropriate research subjects in the coursework Masters degree, may apply for Advanced Standing for the 24 credit points of coursework. They will then complete a 48 credit point thesis in a discipline or interdisciplinary area.

Time Limits

Full time students should complete the 72 credit point degree in no fewer than two (2) sessions (not including Summer Session) and no more than four (4) sessions (not including Summer Session). Full-time students should complete the 48 credit point course in no fewer than two (2) sessions (not including Summer Session and no more than four (4) sessions (not including Summer Session). Part-time students should complete the course in no fewer than four (4) sessions and no more than eight (8) sessions.

Each research candidate has two supervisors. Before accepting a research candidate, the Faculty will ensure that two supervisors with appropriate expertise are available.

For further information about the Faculty's research themes and researchers, please consult the Faculty website at: www.uow.edu.au/arts/

For more technical information about the degree process, please consult the website of the University's Office of Research at: www.uow.edu.au/research/rsc/

Coursework Subjects

</tbody>
</table>

*The course co-ordinator may recommend the substitution of other subjects to the Sub-Dean.

Assessment

Coursework: Where students must complete the 24 credit point coursework component, assessment of that part of the degree will depend on the modules chosen, but it will normally be by essays and seminar papers.

Thesis: Students meet regularly with their supervisors to ensure that they are proceeding to plan. On commencement of the research component, candidates and their supervisors complete a Confirmation of Candidature Form that identifies key milestones, resource needs and skills required for completion of the research project. This is followed by a proposal review within the first six months of the thesis. In addition, each year, the student and supervisors must submit a progress report. The annual progress report is the means by which the University assesses whether the candidate will continue into the following year. Supervisors who are concerned about a student's progress may also initiate a progress review at other times during a student's candidature.

When the thesis is submitted, it is examined by two examiners chosen from a list prepared by the supervisors in consultation with the student.

Students are advised to consult the University's Code of Practice – Supervision at the following web address: www.uow.edu.au/handbook/codesofprac/cop_supervision.html
Master of English Literatures

Testamur Title: Master of English Literatures
Abbreviation: MEngLit
Home Faculty: Faculty of Arts
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: Mostly face-to-face
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 1555
CRICOS Code: 053880B

Overview
The Master of English Literatures provides an opportunity for students to extend and deepen their knowledge of
textual analysis. Breadth is provided in geographical coverage, with classes in American, Australian and British writing plus texts from across the English-speaking world. Depth comes through consideration of theoretical issues such as constructions of canons and literary histories, gender and indigeneity, and through study of specific genres subject areas and periods.

Entry Requirements
Entry to the degree is normally from a Bachelor of Arts degree with a major in literary studies, but students with an equivalent qualification will also be considered.

Course Requirements
Students take six subjects from the schedule of subjects below (48 credit points).

Master of International Studies

Testamur Title: Master of International Studies
Abbreviation: MIntlSt
Home Faculty: Arts
Duration: 1 year FT or equivalent
Total Credit Points: 48
Delivery Mode: Lectures and seminars
Starting Session(s): Autumn/Spring
Location: University of Wollongong
UOW Course Code: 1592
CRICOS Code: 064299B

Overview
The Master of International Studies is an interdisciplinary coursework degree grounded in theoretical and professional perspectives. The course seeks to explain, debate, critically analyse and apply key concepts and ideas in international studies to give its graduates a strong understanding of the dynamics of internationalisation and globalisation.

Entry Requirements
Students will normally have an undergraduate degree with a major in the social sciences or cognate areas of study.

Course Requirements
Students need to pass 32 credit points of core subjects and 16 credit points of electives from the schedule given below.

Master of International Studies Advanced

Overview

The Master of International Studies Advanced is an interdisciplinary coursework degree grounded in theoretical and professional perspectives. The course seeks to explain, debate, critically analyse and apply key concepts and ideas in international studies to give its graduates a strong understanding of the dynamics of internationalisation and globalisation. It includes either a supervised research thesis or an internship. The internship provides graduates with professional experience in the field of international studies. Supervision of the research thesis and placement for the internship will be negotiated with the program coordinator.

Entry Requirements

To enter the Master of International Studies Advanced, students must have completed the coursework program of the Master of International Studies.

To enrol into the Research or Internship subjects, students will require a WAM of 70% plus two Distinctions across six subjects required for the Master of International Studies (Coursework).

Course Requirements

Students need to pass 32 credit points of core subjects and 16 credit points of electives from the schedule given below plus either the research thesis or the internship. Neither the thesis nor the internship can be undertaken before the 48 credit point coursework component of the course has been completed.

**Overview**

The Graduate Diploma in Arts (Japanese) is a twelve-month, 48 credit point, Study Abroad Japanese language program.

The purpose of the Graduate Diploma in Arts (Japanese) is to provide candidates with one year as a full-time student at a Japanese university with which the University of Wollongong has an exchange agreement. The Diploma is awarded after successful completion of the exchange university's course, and examination upon return to the University of Wollongong.

**Entry Requirements**

Minimum requirement for entry: a degree at Bachelor level, preferably in Japanese language. (This degree is not intended for students whose first language is Japanese). Please note, this degree has an interview selection process conducted in August/September prior to the year of study. Please contact the Japanese Section before this time.

**Course Requirements**

Full-time students accepted for entry into the Graduate Diploma in Arts (Japanese) take the following subject:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Title</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>JAPA551</td>
<td>Japanese Studies Abroad</td>
<td>Autumn and Spring</td>
<td>24 per session</td>
</tr>
</tbody>
</table>

**Assessment**

Assessment is conducted at the exchange university in Japan and will depend on the program of study each student selects. After one year of study at the exchange university, candidates will be required to pass an exit examination at the University of Wollongong. The Graduate Diploma from the University of Wollongong will be awarded upon successful completion of these requirements.

</table>

**Overview**

The purpose of the Graduate Diploma in Arts (Modern Languages) is to provide, in a recognised university course, a means for graduates with no previous or limited acquaintance with European or Asian languages, thought and culture to acquire competence in these areas at university level.

The Graduate Diploma in Arts (Modern Languages) is currently offered for:

- French
- Italian
- Japanese
- Spanish

For further information, contact the convenor of the language of interest.

Students who have studied Japanese previously at university level may wish to consider the Graduate Diploma in Arts (Japanese).
**Entry Requirements**

Minimum requirement for entry: a degree at Bachelor level.

**Course Requirements**

Students are required to complete 28 credit points from Undergraduate Language subjects (e.g., for a student with no prior knowledge of French: FREN151, FREN152, FREN251 and FREN252). The remaining 20 credit points may be chosen from subjects listed under Modern Languages or other Programs in the Arts Course Structures. These will be approved by the Head of the Modern Languages Program.

**Assessment**

Assessment is by individual subject and will depend on the student's pattern of study. The Modern Languages program uses continuous assessment in all its subjects to ensure that students' progress is monitored throughout the course.

**Overview**

This course is designed to provide students with fundamental knowledge and skills to understand the processes of social change and development, and provide academic training in the area of development studies.

The Graduate Certificate in Social Change and Development focuses on social transformation in the Asia Pacific region. The course provides an innovative approach by offering unique insights into social change triggered by national and international development policies and their effects at local, regional and transnational levels. Unlike traditional development studies courses that provide a largely econometric analysis of development, the focus of this course is on a critical sociology and critical political economy of social change.

The majority of subjects are oriented to developing problem-solving skills grounded in specific processes within the general rubric of social transformation; and increasing research and policy analysis skills through subjects in policy and program evaluation. We prepare our graduates to work in a broad range of development-related areas.

**Entry Requirements**

A Bachelor degree from a recognised institution with a relevant minor study sequence.

**Course Requirements**

This is a 24 credit point program. Students will complete three subjects.

* With the approval of the Course Coordinator, students may select another relevant subject.
SUBJECT DESCRIPTIONS

CAPS918 Special Project A
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides students with an opportunity to engage in detailed research on a particular aspect of social change and development approved by the Course Co-ordinator. The project may focus on an issue, a policy, or a theoretical or methodological question which the student has previously encountered through reading or practical experience. Enrolment requires the Co-ordinator's approval, and may be determined by the availability of suitably qualified staff.

ELL 901 English for Postgraduate Studies 1
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ELL 902
Subject Description: This subject provides an overview of the kind of English used in the academic context, particularly in Postgraduate studies. It is designed for Non-English Speaking Background (NESB) postgraduate students who are wanting an induction into writing and speaking for postgraduate studies. This subject aims to identify and discuss important issues related to the culture of postgraduate education; to develop academic skills relevant to postgraduate studies and thesis writing. Students will develop a critical and analytical stance to research and learning, an understanding of how the grammatical resources of English are employed to achieve different purposes within postgraduate studies; and expertise and confidence in using a range of resources for learning.

ELL 902 English for Postgraduate Studies 2 (Arts)
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ELL 903
Subject Description: This subject provides an overview of the kind of English used in the academic context, particularly in Postgraduate studies. It is designed for Non-English Speaking Background (NESB) postgraduate students who are wanting an induction into writing and speaking for postgraduate studies. This subject aims to identify and discuss important issues related to the culture of postgraduate education; to develop academic skills relevant to postgraduate studies and thesis writing. Students will develop a critical and analytical stance to research and learning, an understanding of how the grammatical resources of English are employed to achieve different purposes within postgraduate studies; and expertise and confidence in using a range of resources for learning.

ENGL903 Research Methods
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Designed as a series of workshop seminars in parallel with research projects in other subjects. Enrolment, selection of appropriate subject or themes and readings, are subject to the approval of the Convenor of Program.

ENGL906 Modernism’s Others
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject focuses on writing from England, Europe and the Americas produced in the early 20th century - a period marked by radical questioning of the categories that defined and often determined social and self construction. Writers questioned what is meant to be human, to be civilized; they raised questions about the validity of rudimentary classification of individuals by gender, class, race, sexuality; they were fascinated with the allure of the other - against which the self and its community of
belonging is defined. Some writers felt themselves to be othered by western modernity; many writers feeling disaffected or disenchanted with ‘the west’ searched for ways to ‘make it new’ by looking to other cultures as represented by ‘the east’ or ‘the primitive’; a number of modernists wrote from the position of ‘the other’.

ENGL913 Literature, Memory and Forgetting

Autumn Wollongong On Campus

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: This subject examines the role of memory in the creation of literature, and the role of literature in the creation of personal and cultural memory. Beginning with a consideration of the notion of writing as a form of memory, it goes on to examine memory and history, identity, and national mythologies, amnesia in fiction, and futuristic memories. It examines a historically and culturally diverse range of texts, but emphasises more recent writings. The subject also covers a range of theoretical and historical perspectives on memory and writing, such as those offered by poststructuralist, feminist, and postcolonial theorists.

ENGL916 US Literature: Modernity and Postmodernity

Not on offer in 2009

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: This subject examines a variety of twentieth and twenty-first century U.S. fictional, autobiographical and journalistic prose works in relation to generic, cultural and political developments. A particular focus of the course is critical examination of the concepts of modernity, modernism, postmodernity, and postmodernism. Other topics of discussion include: the construction and articulation of racial, classed, sexual, and gendered identities; contexts of the production and consumption of individual texts; realism and non-realist as modes of writing practice; the relations of literary genres to other media such as film and TV.

ENGL918 Special Topic

Spring Wollongong On Campus

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: Directed reading, research and other investigative activities at an advanced level in a field of study selected by the student in consultation with the English Studies Postgraduate Co-ordinator and approval prior to enrolling from the Convenor of Program.

ENGL921 Turning Points: An Introduction to Post-colonial Literary History

Autumn Wollongong On Campus

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: The course will survey novels that are the first in their field or which have become key points of reference in discussions of post-colonial writing. The subject asks such questions as: How does newness occur? What are the possibilities for post-colonial texts ‘intervening’ in literary practice and/or social thought to imaginatively effect cultural liberation? What are we doing when we write literary history, design courses? What use do we make of reading texts? Can we institutionalise ‘reading (and writing) against the grain’?

ENGL930 History and Romance in Early Modern Britain

Spring Wollongong On Campus

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: The subject focuses on texts which deal with history and romance in late Stuart and late Stuart England, looking particularly at the way such texts deliberately lend themselves to varying readings, how they become part of the ideology of a culture, legitimating or questioning the powerful, and how both well-known and less familiar men and women writers (and readers) dealt with issues presented in the trappings of history and romance.

ENGL933 Early Women Writers

Not on offer in 2009

Credit Points: 8

Pre-requisites: None

Co-requisites: None

Subject Description: This subject looks at the work of selected women writers from the late-sixteenth century to the early eighteenth century. The texts represent a variety of different types of writing: fiction, poetry, drama, diaries, letters and autobiographical writings. The subject will examine the establishment of the female writing self within the appropriate cultural structure and historical context, and the engagement of that self with the social and literary conventions of the time. The genres and writers studied are: Fiction- Margaret Cavendish, Aphra Behn. Drama- Elizabeth Cary. Letters- Dorothy Osborne, Mary Wortley Montagu. Autobiography- Alice Thornton, Anne Clafford, Margaret Hoby, Anna Trapnel, Katharine Evans and Sarah Cheevers, Hannah Allen, Mary Carleton. Poetry- Amelia Lanyer, Mary Wroth, Isabella Whitney. The subject can be seen as a logical follow-up for interested students from two 300 level subjects in the English Major, ENG1356 Nineteenth Century Women’s Writing and ENG1345 Twentieth Century Women Writers.

ENGL945 Contemporary Life Writing

Spring Wollongong On Campus

Credit Points: 8

Pre-requisites: Entry to Masters or Honours in English

Co-requisites: None

Subject Description: The category of life writing covers a number of literary and popular genres from traditional biography and autobiography to memoirs, diaries, auto/biographical fiction, testimonial writing, collaborative and ghost-written life stories, therapeutic writing and gossip about the rich and famous. This subject explores a range of such genres in light of recent theorising relating to the narrative construction of the self, the boundaries between fiction and non-fiction, the relationship between individuals and history and the workings of celebrity culture. We also consider the role of life writing in contemporary literary culture: publishers, the media, authors and readers.
ENGL946  Text and Context in Contemporary African Writing
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to a contrasting range of representations of Africa, both by visitors to the continent and by Africans themselves. Specifically, it will juxtapose the tension and contradictions inherent in the 'idea of Africa' as it appears in literary work of writers working at the end of the 19th and in the 20th centuries. Students will read the work of some of the most influential contemporary African writers working in European languages. Although all texts will be read in English, the subject includes Francophone and Lusophone African works.

MIST900  International Law and Diplomacy
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: Entry in the INTR Program
Co-requisites: None
Exclusions: INTR900
Subject Description: This subject examines the foundations of international law, how it operates and how the representatives of states and international organisations ply their craft. It explores what diplomats do, and what are the limits of diplomatic action. The initial lectures provide students with the theoretical tools to understand how the system of international law has evolved and how international instruments are constructed and ratified. Specific topics that may be addressed in terms of their effect on diplomacy include: the sources of international law; the structure of the international legal system; the relationship between domestic law and international law; the law of treaties; statehood, state jurisdiction and state responsibility; personality, statehood and recognition, human rights and refugee laws.

MIST900  International Law and Diplomacy
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: INTR900
Subject Description: This subject examines the foundations of international law, how it operates and how the representatives of states and international organisations ply their craft. It explores what diplomats do, and what are the limits of diplomatic action. The initial lectures provide students with the theoretical tools to understand how the system of international law has evolved and how international instruments are constructed and ratified. Specific topics that may be addressed in terms of their effect on diplomacy include: the sources of international law; the structure of the international legal system; the relationship between domestic law and international law; the law of treaties; statehood, state jurisdiction and state responsibility; personality, statehood and recognition, human rights and refugee laws.

MIST901  Politics of International Relations
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: INTR910
Subject Description: Major theoretical traditions examined include realism, liberalism, neo-realism and neo-liberalism, rationalism, Marxist and neo-Marxist variants, critical theory, post-modernism, constructivism, and feminism. The subject then examines the end of the cold War, the demise of bipolarity, the emergence of unipolarity, and assesses the effectiveness of the United Nations, explores the north/south divide and ponders some of the causes of terrorism. It examines modern peacekeeping, rouge states and the prosecution of the War on Terror. Interspersed in the subject will be arguments over the alleged decline of the nation state, the structures and institutions that regulate the international economy, and some current opinions on hegemony.

MIST903  Politics in the South Pacific
Not on offer in 2009
Credit Points: 8
Pre-requisites: Entry to MA INTR programme
Co-requisites: None
Subject Description: In this subject we will consider the policies adopted by the governments of a number of Pacific Island nations (including the Solomon Islands, Samoa, Vanuatu, Tonga and Fiji Islands). The governments of these nations find that they now must manage in a globalising world that has adopted the free market principles. Their nations often lack institutional capacity; are in receipt of substantial amounts of aid; and are short of capital and human resources while having access to various levels of natural resources. The sustainable management of the latter has proved difficult.

MIST904  Diplomatic History
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: INTR905
Subject Description: This subject deals with important examples of modern international diplomatic behaviour. It presents an overview of diplomatic practice including various theoretical and historiographical concerns. The subject examines how diplomats write and how they present national positions.

MIST905  Transforming Asia
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: SMAC910
Subject Description: Over the past decade, globalization has been an important driving force for change in Asia. This subject examines and critiques the globalization of Asia, highlighting the uneven nature of the globalization process by revealing the ‘winners’ and ‘losers’ of contemporary social, economic and cultural change. Case studies examine inequalities based on gender, class and sexuality in particular countries (Taiwan, India, Japan, Indonesia, Singapore and Bangladesh), as well as in comparative Asian contexts. Topics to be covered include: regional social movements and political change; sex and gender discrimination; marginal labourers; transnational and migrant identities; media and identity; rapid urbanization, slum development and inequality.

MIST907  Principles of Social Impact Assessment
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: SOC904
Subject Description: This subject introduces students to the basic principles and practices of social impact assessment (SIA). The subject includes: the history and theory of SIA; preparation and planning for SIA; scoping studies: implementing and undertaking SIA; the role of the SIA professional; and project evaluation.

MIST908  Globalisation and Citizenship
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: CAPS910

Subject Description: This subject examines the effects of globalisation on representations of identity and citizenship in the Asia Pacific. We will discuss contemporary challenges to state authority coming from grassroots movements for democracy and universal human rights; women’s groups; gay rights; ethnic minorities and indigenous peoples seeking self-determination; and the mass migration of workers and refugees. We will consider issues such as the conflict in Aceh, the plight of refugees, the role of organised crime, and the sexual reproduction of the nation.

MIST910 International Economic Relations
Spring Wollongong On Campus
Credit Points: 8

Pre-requisites: None
Co-requisites: None
Exclusions: INTR920

Subject Description: In this subject we will assume that ‘globalization represents a decisive configuration of social, economic, political, and cultural changes which consequentially has transformed key institutions and practices of the modern world’ (See Robert O’Brien and Marc Williams, Global Political Economy, Palgrave, 2004, p. 9). It is in this context that we will examine a range of issues central to international political economy. We will discuss the effect of globalisation, distribution, free markets, neo-liberal ideology, protectionism, labour migration and global security on both developed and developing countries and we will examine the role international organisations including the World Bank, the International Monetary Fund (IMF), and the World Trade Organisation (WTO).

MIST913 Labour and Migration
Spring Wollongong On Campus
Credit Points: 8

Pre-requisites: None
Co-requisites: None
Exclusions: CAPS915

Subject Description: This subject is concerned with the ways in which migration and labour mobility have influenced social transformation in the Asia-Pacific region. It examines these issues at the conceptual level and through case studies in specific countries. Labour migration is analysed both in terms of individual migration experiences and in relation to the broader social, political and economic effects on sending and receiving countries. Themes raised include the formation of multi-ethnic societies, the development of labour movements, citizenship rights for workers and increased women’s migration. Cross-disciplinary approaches will be introduced to offer a range of theoretical approaches to these issues.

MIST914 Comparative Public Policy
Not on offer in 2009
Credit Points: 8

Pre-requisites: None
Co-requisites: None
Exclusions: INTR931

Subject Description: This subject examines a broad range of policy areas in the (post) modern world. Students are expected to select issues for study from a range of policies including: media, industrial restructuring, political economy, education, health care, transport, defence, policing, urban and regional renewal, housing and the arts. Students are encouraged to study the impact of Globalisation and global trends on the creation and execution of public policy in advanced industrial countries. The subject offers an approach to policy studies, which focuses on quality of life issues and outcomes. An emphasis on recent developments in Australian public policy is maintained within a comparative perspective.

MIST920 Social Change and Development
Autumn Wollongong On Campus
Credit Points: 8

Pre-requisites: None
Co-requisites: None
Exclusions: CAPS911

Subject Description: This subject will examine the development experience of people in the new global order. It will introduce students to the debates on development that emerged following the break up of European colonial empires. It will examine the ensuing interaction between rich and poor nations, and theoretical explanations for the emergence of international disparities of wealth. The subject will pay particular attention to the ways in which neo liberal development and globalisation affect people at the local level. Focussing on the Asia-Pacific region we will explore the power laden international context in which development discourses are produced. A number of case studies will be utilised to explore local understanding of what constitutes development.

MIST991 Thesis in International Studies
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24

Pre-requisites: Master of International Studies (Coursework) with a WAM of 70% or better and two distinctions in any of the six subjects undertaken in the Master of International Studies.
Co-requisites: None

Subject Description: This is a research thesis of 15,000-20,000 words conducted under supervision on a topic agreed to by the supervisor(s), student and the relevant School Head of Postgraduate Studies. It allows students to develop their research skills in areas of policy, theory and issues in International Studies based on their studies in the Master of International Studies (Coursework). The thesis will be examined by both an internal and external examiner. It also offers a pathway into further postgraduate research degrees offered by the University.

MIST992 Internship in International Studies
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24

Pre-requisites: Master of International Studies (Coursework) with a WAM of 70% or better.
Co-requisites: None

Subject Description: The Internship offers students the chance to extend their coursework studies by combining practical experience with additional coursework. Successful applicants may work with government and/
or NGO groups both within Australia and outside Australia. Placements and required coursework are subject to negotiation with the subjects coordinators.

**MIST999  Advanced Topics in International Studies**

- **Autumn**  Wollongong  On Campus
- **Spring**  Wollongong  On Campus
- **Credit Points:** 8
- **Pre-requisites:** Average credit grade and above and the approval of MIS co-ordinator.
- **Co-requisites:** None
- **Exclusions:** INTR940
- **Subject Description:** The work done for this subject is expected to include a detailed analysis of a significant issue, period or actor in international relations (global governance and development). The student is expected to draw on relevant primary and secondary sources, bodies of theory and/or comparative materials. Enrolment requires the prior approval of the MIS co-ordinator and may depend on the availability of appropriate sources and suitably qualified staff.

**PHIL905  Research Project**

- **Not on offer in 2009**
- **Credit Points:** 16
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** Identification, development and execution of a directed research project under the supervision of a member of the Philosophy program on topic in Applied Ethics. Students will pursue an extended research project that applies ethical concepts and theory to significant problems in applied ethics. The student will develop students’ capacities for critical analysis, ethical evaluation and conceptual analysis in relation to a specific ethical issue. This will deepen their understanding of concepts and theories taught in the MA (Applied Ethics) subjects, through using them in directed research. This subject may be a valuable addition to a student’s professional portfolio.

**SMAC910  Transforming Asia: Trends, Issues and Problems**

- **Autumn**  Wollongong  On Campus
- **Credit Points:** 8
- **Pre-requisites:** MIST905
- **Co-requisites:** None
- **Subject Description:** Over the past decade, globalization has been an important driving force for change in Asia. This subject examines and critiques the globalization of Asia, highlighting the uneven nature of the globalization process by revealing the ‘winners’ and ‘losers’ of contemporary social, economic and cultural change. Case studies examine inequalities based on gender, class and sexuality in particular countries (Taiwan, India, Japan, Indonesia, Singapore and Bangladesh), as well as in comparative Asian contexts. Topics to be covered include: regional social movements and political change; sex and gender discrimination; marginal labourers; transnational and migrant identities; media and identity; rapid urbanization, slum development and inequality.

**SOC 904  Principles of Social Impact Assessment**

- **Spring**  Wollongong  On Campus
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject introduces students to the basic principles and practices of social impact assessment (SIA). The subject includes: the history and theory of SIA; preparation and planning for SIA; scoping studies: implementing and undertaking SIA; the role of the SIA professional; and project evaluation.

**STS 929  Studies in Resource and Environmental Policy**

- **Autumn**  Wollongong  On Campus
- **Credit Points:** 8
- **Pre-requisites:** Approval of Convenor of Program or Subject Coordinator
- **Co-requisites:** None
- **Subject Description:** This subject examines the social, economic and political processes through which environmental policy is developed. Case studies will be used to understand environmental impacts of technological development. Theoretical perspectives may include the politics and sociology of scientific controversy, global, national and regional developments in environmental regulation, theories of state regulation and intervention, and the choice and negotiation of different environmental strategies.
Faculty of Commerce

Schools
School of Accounting and Finance

Overview

Candidates with demonstrated research potential, exhibited usually by a Bachelor Honours, Masters by Research degree or other Masters degree that includes a research project, can apply to take a Doctor of Philosophy in the Faculty. Full-time study of three years, or the part-time equivalent, is normally required. Candidates will be expected to work under supervision on research projects related to their thesis area and may be required to complete coursework classes in order to acquire theory and develop methodological skills necessary for their doctoral research. Candidates for this degree enroll in the subject THES924 (full-time) or THES912 (part-time).

The following areas of research are some of the topics available to candidates undertaking the Doctor of Philosophy degree:

**School of Accounting and Finance**

Accountancy
- Accounting and Information Systems
- Accounting and EDI
- Auditing
- Controllership
- Critical Accounting Theory
- External Financial Reporting and Standard Setting

Master of Commerce

Testamur Title of Degree: Master of Commerce
Abbreviation: MCom
Home Faculty: Commerce
Duration: 1 year or part-time equivalent
Total Credit Points: 48
Delivery Mode: On Campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1572
CRICOS Code: 060472D

Overview

This course is ideal for those who want to change their career to the commerce sector. Businesses and industries today are looking for graduates who have a broad commerce perspective; this course provides the fundamental skills which will allow non-Commerce graduates to obtain a stand-alone qualification in preparation for a career in either small- or large-scale business contexts, as well as facilitating entry to a more specialised professional degree offered through the Faculty’s Double Masters programs.

Entry Requirements

Applicants must have a Bachelor degree from a recognised tertiary institution or equivalent.

Course Program

The core program comprises four (4) subjects which should be taken in the first semester of study:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCY901 Accounting Foundations For Professionals</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>

<tr>
<td>MARK922 Marketing Management</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>MGMT901 Foundations of Management</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
</tbody>
</table>

Master of Commerce – No Specialisation

Students must complete the four (4) compulsory subjects above plus four (4) 900 level Commerce subjects (24 credit points). Alternatively, students may complete one of the Major Studies listed below.

Major Studies

Electronic Commerce

Compulsory Subjects

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>

MGMT940 Innovation and Entrepreneurship Spring 6
MGMT941 Small Business Management I Autumn 6

Students who hold a recognised degree in business or commerce may be permitted to substitute the core subjects in the Master of Commerce with other subjects approved by the course coordinator.

Students intending to enrol in a specialised Commerce Masters coursework program on completion of the Master of Commerce will not be permitted to take any elective subjects in the Master of Commerce which are also contained in the relevant specialised Masters program without the approval of the relevant Course Coordinator.

Students who are unable to complete the Master of Commerce may exit with a Graduate Certificate in Commerce.

Credit Towards Other Courses
Depending on subjects completed in the Master of Commerce students may receive a maximum of 25% of advanced standing for a second specialised Commerce Masters program.

Graduate Certificate in Commerce
Testamur Title of Degree: Graduate Certificate in Commerce
Abbreviation: GradCertCom
Home Faculty: Commerce
Duration: 6 months full-time or part-time equivalent
Total Credit Points: 24
Location: Wollongong
Starting Session(s): Autumn, Spring
UOW Course Code: 1154
CRICOS Code: 055108M

Overview
This program is targeted at students who do not meet the direct entry requirements for Commerce Masters degrees. It will enable them to not only gain the necessary skills and knowledge in a range of essential Commerce subjects, but also allow them to gain the required entry into Commerce Masters programs.
Entry Requirements

Applicants should hold a Bachelor degree or equivalent from a recognised tertiary institution. Those applicants with a combination of academic or professional qualifications and at least three years’ relevant full-time equivalent work experience may also be considered. Applicants must also meet the University’s English language requirements for this certificate.

Applicants must also meet the University’s English Language requirements for this certificate (refer to the University’s website at http://www.uow.edu.au/prospective/international/english/index.html for details).

Course Requirements

Students will undertake 24 credit points consisting of the following subjects:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCY901 Accounting for Professionals</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>ECON910 Economics for Professionals</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>MARK922 Marketing Management</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>MGMT901 Fundamentals of Management</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
</tbody>
</table>

Applicants who have been offered a Master of Professional Accounting subject to successful completion of the Graduate Certificate in Commerce will be required to substitute ACCY901 and ECON910 with subjects determined by the MPA Coordinator.

Credit Towards other Courses

Students who successfully complete the Graduate Certificate in Commerce with an overall average of 60% will be able to articulate into the Master of Commerce.

Applicants who hold a degree in business or commerce from a recognised tertiary institution and achieve an overall average of at least 60% in the Graduate Certificate of Commerce may be eligible for credit towards a specialised Commerce Masters program other than the Master of Commerce. The amount of credit to be awarded will depend on the Masters program which they intend to take and will be determined by the relevant Course Coordinator.

School of Accounting and Finance

Master of Accountancy - Research

Testamur Title of Degree: Master of Accountancy – Research
Abbreviation: MAccy-Res
Home Faculty: Commerce
Duration: 1.5 years or part-time equivalent
Total Credit Points: 72
Delivery Mode: On Campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1330
CRICOS Code: 042547F

Overview
The Master of Accountancy – Research degree comprises 24 credit points of coursework and a 48 credit point thesis. In the coursework component, students develop their capacity to conduct rigorous independent research, as well as undertaking advanced coursework that integrates conceptual and practical issues within the Accounting discipline. In the thesis component, students complete substantial and extended research into an applied or theoretical issue in accounting. The topic is selected in line with the student’s research interests and is subject to approval by the Associate Head of School (Accounting). The thesis is completed under the supervision of individual members of staff and culminates in the production of a substantial written thesis.

Entry Requirements / Assumed Knowledge
This degree is primarily a research degree for those who have completed a Bachelors Honours at a standard of Class II, Division 2 or higher in accountancy, economics, finance or management. Applicants who have completed a coursework Masters degree at an appropriate standard may be admitted to the program.

Advanced Standing
Advanced Standing of up to 24 credit points may be awarded for the coursework component of this degree to students who have completed research related subjects at an appropriate standard as assessed by the Associate Head of School (Accounting). A candidate may not undertake subjects for this degree that are similar in content to subjects included in their Honours or Masters course.

**Master of Accountancy**

**Testamur Title of Degree:** Master of Accountancy  
**Abbreviation:** MAccy  
**Home Faculty:** Commerce  
**Duration:** 1 year or part-time equivalent  
**Total Credit Points:** 48  
**Delivery Mode:** On Campus  
**Starting Session(s):** Autumn/Spring  
**Location:** Wollongong  
**UOW Course Code:** 1530  
**CRICOS Code:** 042526M

**Overview**

The Master of Accountancy builds on the accounting knowledge and skills acquired at the undergraduate level. It develops in-depth understanding and capacities to critique the research and practice of accounting.

**Entry Requirements / Assumed Knowledge**

Applicants must have an undergraduate degree with a major in Accountancy from a recognised tertiary institution, with an average mark of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

**Course Program**

Students will undertake 48 credit points consisting of any eight subjects from the following list:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCY903</td>
<td>Theoretical Foundations of Accounting</td>
<td>Autumn/Spring</td>

<tr>
<td>ACCY968</td>
<td>Accounting Regulation</td>
<td>Spring</td>
</tr>
</tbody>
</table>

With permission of the Associate Head of School (Accounting), it is possible for students to substitute subjects listed above with ACCY985 Special Topic in Accounting A or ACCY986 Special Topic in Accounting B.

**Professional Recognition**

Recognised by CPA Australia as a Specialist Masters Degree.

**Other Information**

Further information is available at [http://coursefinder.uow.edu.au/](http://coursefinder.uow.edu.au/) or email: accfin@uow.edu.au

**Master of Professional Accounting**

**Testamur Title of Degree:** Master of Professional Accounting  
**Abbreviation:** MProfAccy  
**Home Faculty:** Commerce  
**Duration:** 1.5 to 2 years or part-time equivalent  
**Total Credit Points:** 72  
**Delivery Mode:** On Campus  
**Starting Session(s):** Autumn/Spring  
**Location:** Wollongong  
**UOW Course Code:** 1515  
**CRICOS Code:** 036454F

**Overview**

The program is designed to build on the learning experience of the students and to extend that experience to an appreciation and understanding of matters relating to the practice of accounting. Students will have an appreciation of the theoretical issues underpinning the practice of accounting, as well as the legal and practical issues surrounding that practice.

**Entry Requirements / Assumed Knowledge**

Applicants must have a Bachelor degree from a recognised tertiary institution or equivalent.
Course Requirements
The course is designed to be taken over three or four semesters on a full-time basis or a part-time equivalent basis. The program consists of twelve subjects totalling 72 credit points.

Further information is available at http://coursefinder.uow.edu.au/ or email: accfin@uow.edu.au

Master of Forensic Accounting

Testamur Title of Degree: Master of Forensic Accounting
Abbreviation: MForAccy
Home Faculty: Commerce
Duration: 1 year or part-time equivalent
Total Credit Points: 48
Delivery Mode: Modular – compulsory 2-3 full days intensive program per subject (Fri and/or Sat and Sun)
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 1541
CRICOS Code: N/A

Overview
The Master of Forensic Accounting emphasises a forensic rather than a control-based or risk management approach to the analysis of corporate governance and the possibility of fraud.

Students will be given a broad-based introduction to the nature and purpose of forensic accounting. The scope and content of all subjects extend well beyond a ‘legal’ focus and provide an opportunity to study and acquire skills in investigative techniques and the collection of data as well as the skills necessary to not only identify poor management but also unethical and fraudulent activities.

Entry Requirements / Assumed Knowledge
Applicants must have an undergraduate degree with a major in accountancy from a recognised tertiary institution with an average mark of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

Advanced Standing
Advanced standing for ACCY950 will be offered to applicants who have completed the CPA Australia or ICAA Program.

OR
The program is designed for business graduates who wish to substantially develop their advanced, applied and comprehensive knowledge of either banking, investing or managing at the graduate level. The core part of the program provides students with an advanced understanding of financial decision-making in one of three areas. The banking specialisation has a focus on bank management and lending, the investing specialisation addresses investment analysis and portfolio management, and the managing specialisation is concerned with the financial decisions made by corporate managers. In the elective part of the program students can enhance their understanding of finance through the study of corporate finance, banking and lending, investment analysis and portfolio management, international finance, risk management, entrepreneurial finance and statistical methods in finance.

Entry Requirements / Assumed Knowledge

Applicants must have an undergraduate degree with a major in finance from a recognised tertiary institution with an average of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

Course Requirements

Students are required to undertake the 24 credit points in the Banking, Investing or Managing specialist stream and 24 credit points in electives.

**Overview**

This course aims to provide graduate students, who have completed an Economics major in an undergraduate degree, with the opportunity for advanced study in Economics including a major research thesis.

**Entry Requirements / Assumed Knowledge**

Entry level will normally be by an Honours Bachelor of Commerce or Arts degree or equivalent at a standard of Class II, Division 2 or higher in Economics. Students who hold a Pass Masters degree in Economics or equivalent will be admitted, although additional coursework may be required at the direction of the Associate Head of School.
Advanced Standing
Students who hold an Honours Class II, Division 1 or higher in Economics may be awarded up to 24 credit points advanced standing for the coursework component of the program.

Course Requirements
Students normally undertake a 72 credit point program consisting of 24 credit points of coursework plus 48 credit points of research thesis.

Overview
The Master of Management - Research provides graduates with the opportunity for further study of advanced topics in management.

Entry Requirements / Assumed Knowledge
Applicants must have completed the requirements for the award of Bachelor of Commerce (Honours) or equivalent at a standard of Class II, Division 2 or higher, or an equivalent degree. Candidates who have completed a Masters degree may be admitted to the program. Candidates may be awarded advanced standing of up to 24 credit points for the coursework component of this degree on the basis of previous research-related subjects. Candidates who hold a Bachelor of Commerce degree at credit level or above may be admitted to the program after an appropriate program of preliminary study prescribed by the Head of School.

Overview
Human resource managers are now focused on the achievement of effective learning organisations in a world of rapid local and global change. The emphasis on these aspects, with more traditional areas of concern, will equip the successful graduate with advanced human resource management skills for organisations in the 21st Century.
This program presents powerful tools for analysing strategic alignment, managing employment relationships and identifying leadership and team dynamics skills essential to orchestrate organisational change. It provides critical perspectives on the roles and functions of HR executives as change agents.

**Entry Requirements / Assumed Knowledge**

Applicants must have a Bachelor degree in commerce, business or equivalent from a recognised tertiary institution with an average mark of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

The English language entry criteria will be as indicated on the UOW website.

**Professional Recognition**

The HRM major is accredited by the Australian Human Resources Institute. Students are eligible for membership of the Institute.

**Course Requirements**

Students will undertake eight (8) subjects (48 credit points) and are required to formalise an intended program with the Postgraduate Coordinator.

**Overview**

The Master of Marketing - Research provides graduates with the opportunity to undertake further in-depth study in marketing, in preparation for a professional career as a marketing expert.

**Entry Requirements / Assumed Knowledge**

This program is primarily a research program for those who have completed an Honours Bachelor degree in the Faculty of Commerce at a standard of Class II, Division 2 or higher, or an equivalent degree. Candidates who have completed a Masters program may be admitted. Honours and Masters candidates may be awarded advanced standing of up to 24 credit points for the coursework component of the program on the basis of previous research-related subjects. Candidates who hold a Bachelor of Commerce degree at credit level or above may be admitted to the program after an appropriate program of preliminary study prescribed by the Head of School.
Course Requirements

The Master of Marketing - Research is a 72 credit point program, comprising 24 credit points of coursework and a 48 credit point thesis. Candidates will be expected to undertake the following subjects.

Overview

The program is designed to enhance graduates’ career opportunities in the marketing field. Students will have the opportunity to study in-depth a wide range of advanced topics in marketing and gain both generalist and specialist marketing skills that are professionally-oriented.

Entry Requirements / Assumed Knowledge

Applicants must have a bachelor degree in commerce, business or equivalent from a recognised tertiary institution with an average mark of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

Course Requirements

Students are required to formalise an intended program with the Postgraduate Coordinator. Programs are tailored for individual students, based on their previous study and areas of interest. Subjects will generally be selected from the following list. Subject availability may vary each session and year, depending on demand.

Course Program

Candidates are to take three (3) compulsory subjects as follows:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>MARK922 Marketing Management</td>
<td>Autumn/Spring</td>

Double Masters Programs

Master of Commerce - Master of Applied Finance*

Testamur Title of Degree: Master of Commerce
Master of Applied Finance (Banking/Investing/Managing)

Abbreviation: MCom-MAppFin
Home Faculty: Commerce
Duration: 2 years or part-time equivalent
Total Credit Points: 84
Delivery Mode: On Campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1588
CRICOS Code: 061860F

*Please note that this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview

This double degree program allows students to undertake complementary study in related fields and gives them the opportunity to develop generalist business skills in commerce and expertise in applied finance.

The Master of Commerce is ideal for those who want to change their career to the commerce sector. Businesses and industries today are looking for graduates who have a broad commerce perspective and this course provides the fundamental skills which will allow non-Commerce graduates to obtain a qualification in preparation for a career in either small or large scale business contexts.

The Master of Applied Finance is designed for business graduates who wish to substantially develop their advanced, applied and comprehensive knowledge of either banking, investing or managing at the graduate level. The core part of the program provides students with an advanced understanding of financial decision-making in one of three areas. The banking specialisation has a focus on bank management and lending, the investing specialisation addresses investment analysis and portfolio management, and the managing specialisation is concerned with the financial decisions made by corporate managers.

Entry Requirements / Assumed Knowledge

Applicants must have a Bachelor degree from a recognised tertiary institution or equivalent.

Professional Recognition

The Master of Applied Finance (Banking/Investing/Managing) is recognised by the Financial Services Institute of Australasia (FINSIA) and is recognised by CPA Australia as a Specialist Masters Degree.

Course Program

Students will undertake 48 credit points (8 subjects) from the Master of Commerce schedule plus a further 36 credit points (6 subjects) from the Master of Applied Finance schedule as listed below:

<table>
<thead>
<tr>
<th>Subjects</th>

*Please note that this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

**Overview**

This double degree allows students to undertake complementary study in related fields and gives the opportunity to develop generalist business skills in commerce and expertise in management.
The Master of Commerce is ideal for those who want to change their career to the commerce sector. Businesses and industries today are looking for graduates who have a broad commerce perspective and this course provides the fundamental skills which allow non-Commerce graduates to obtain a qualification in preparation for a career in either small or large scale business contexts.

The Master of Strategic Management provides an opportunity for career advancement for managers. This rigorous and intellectually challenging program will assist in the development of key personal and technical skills.

Entry Requirements / Assumed Knowledge
Applicants must have a Bachelor degree from a recognised tertiary institution or equivalent.

Course Program
Students will undertake 48 credit points (8 subjects) from the Master of Commerce schedule plus a further 36 credit points (6 subjects) from the Master of Strategic Management schedule as listed below:

| Subjects Session Credit Points |
|-------------------------------|------------------|
| MASTER OF COMMERCE            |                  |

### Overview

This double degree program allows students to undertake complementary study in related fields and gives them the opportunity to develop expertise in both human resource management and marketing.

Human resource managers are now focused on the achievement of effective learning organisations in a world of rapid local and global change. The emphasis on these aspects, with more traditional areas of concern, will equip the successful graduate with advanced human resource management skills for organisations in the 21st Century. The Master of Strategic Human Resource Management presents powerful tools for analysing strategic alignment, managing employment relationships and identifying leadership and team dynamics skills essential to orchestrate organisational change. It provides critical perspectives on the roles and functions of HR executives as change agents.

The Master of Strategic Marketing is designed to enhance graduates’ career opportunities in the marketing field. Students will have the opportunity to study in-depth a wide range of advanced topics in marketing and gain both generalist and specialist marketing skills that are professionally-oriented.

### Entry Requirements / Assumed Knowledge

Applicants must have a Bachelor degree in commerce, business or equivalent from a recognised tertiary institution with an average mark of at least 60%. Applicants with a combination of other university qualifications plus relevant professional experience may also be considered.

### Professional Recognition

The HRM major is accredited by the Australian Human Resources Institute. Students who have completed the Master of Strategic Human Resource Management are eligible for membership of the Institute.
Course Program

Students will undertake 48 credit points (8 subjects) from the Master of Strategic Human Resource Management schedule plus a further 36 credit points (6 subjects) from the Master of Strategic Marketing schedule as listed below:

SUBJECT DESCRIPTIONS

ACCY901  Accounting Foundations
For Professionals
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ACCY101, ACCY190 or ACCY100 and ACCY102
Subject Description: This subject is an introduction to the principles of both financial and management accounting. Students will gain an understanding of the preparation, interpretation and utilisation of the major types of reports and the analyses prepared by accountants for management decision making.

ACCY902  Applied Financial Accounting
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: ACCY901
Co-requisites: None
Exclusions: ACCY908
Subject Description: This subject examines the practical aspects of financial accounting including issues in external reporting, accounting for groups of companies and the taxation of companies. It also includes an analysis of reporting theory as it relates to legal and economic factors and professional ethics.

ACCY903  Theoretical Foundations of Accounting
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject critically analyses the nature of theory, research and theory formation. It includes a study of the methods used in theory formation and attempts to formulate theories of accounting.

ACCY904  Financial Accounting
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject covers an in-depth study of the basis of external financial reporting, including asset valuation and periodic profit measurement. The subject also includes a study of the elements of financial accounting and their communication in accounting reports.

ACCY905  International Accounting
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines differences in accounting thought and standards between countries. Topics include influence of national outlook and policies and of economic infrastructure on accounting practice, uniform systems of accounting, corporate growth and its impact on accounting and auditing, comparative study of auditing and reporting standards, and international aspects of public accounting practice. The subject also covers multi-national corporation and the effect of changing price levels on accounting for international operations.

ACCY907  Empirical Research Methods
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject provides an overview of the ways accounting and finance researchers identify, formulate and investigate empirical questions in accounting and finance. Subjects include the criteria adopted to select research projects, issues of experimental design, validity threats, measurement problems and statistical analysis. Selected published accounting and finance research will be used to illustrate established methods of empirical research.

ACCY913  Management Accounting
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject deals with the conceptual basis of management accounting and information systems including an examination of traditional and alternative theories and approaches shaping organisational and behavioural aspects of management accounting. Topics covered include the contingency approach, the agency approach, control system theories, activity based accounting and critical accounting approaches.

ACCY914  Management Planning and Control Systems
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject presents an in-depth analysis of selected aspects of the design and evaluation of management accounting, planning and control systems in both the private and public sectors.

ACCY918  Applied Management Accounting
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: ACCY901
Co-requisites: None
Subject Description: ACCY918 examines traditional and innovative techniques used by management accountants to accumulate, analyse and use accounting and other quantitative information to aid management in planning, control and decision-making within business organisations. A primary concern is the ability of, and need for, management accounting to adapt to the rapidly changing global business environment to ensure that management has the decision tools to be effective.
ACCY936 Management and Information Systems
Autumn: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject deals with the effective use and control of information systems, particularly computer-based information systems, and the likely impact of developments in this area on management functions and how managers carry out those functions.

ACCY944 Issues in Auditing
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides an in-depth examination of contemporary topics in auditing with emphasis on controversial and theoretical issues, including social and ethical issues, the role of quantitative techniques in the audit function, continuous auditing concept, uncertainty reporting, audit performance evaluation, extension of the attest function and public sector auditing.

ACCY950 Introductory Forensic Accounting
Autumn: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides a broad based overview of investigative audits within a corporate governance and accountability framework and is designed for progression to more specific topics. Subject content will deal with Australia’s corporate regulatory framework including relevant legislation and accounting and audit standards. Students will also be introduced to the accounting and audit compliance framework, the nature and purpose of financial reports and financial statement analysis and interpretation. An integral part of the subject will be the audit risk model including the efficiency and effectiveness of internal controls, corporate governance issues such as corporate culture (setting the tone at the top and internal environment) and the environment in which an entity operates and the relevance of these matters in the planning and execution of an investigative audit.

ACCY951 Forensic and Litigation Framework
Autumn: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will address the role of law in dealing with cases of fraud or misconduct and the legal framework within which the forensic accounting process, from preliminary stages, to investigation and ultimately to prosecution or litigation. In particular, the subject will address the legal framework (at the state, national and international level) within which allegations of fraud are addressed; the concept of the corporation and the scope for abuse; the duties, roles and responsibilities of the key players in corporations and in the investigation of corporate misconduct; and the legal obligations of professionals such as auditors, and the implications of these for the forensic accountant.

ACCY952 Fraud and Failure
Autumn: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The focus of this subject is on the application of theories of criminology to past corporate and regulatory failures. The purpose is to use the past to identify the drivers of fraud, other forms of management and employee abuse, financial statement manipulation and corruption. The subject also examines other forms of fraud and abuse including ponzi and pyramid schemes, identity theft and credit card fraud, money laundering and tax evasion and the factors that have contributed to the commission of such activities. These drivers are in turn used to help develop strategies for the detection, investigation and prevention of misconduct by individual members of society and at all levels of corporate, government and not-for-profit entities. This material will be used to develop the skills necessary to identify and analyse suspicious or irregular activities, development of a fraud hypothesis and planning of an investigation to prove or refute allegations or suspicions of misconduct. The subject matter will take a global approach and include an analysis of corporate governance and best practice issues.

ACCY953 Investigative Processes
Autumn: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject adopts an interdisciplinary approach to introduce the investigative processes used by forensic accountants to identify, examine and prevent fraudulent financial activity. Students are provided with the opportunity to learn the specific elements involved in a financial investigation from the moment of predication through to case profiling and the investigation processes, including the process of setting, testing, adjusting and eliminating the case hypothesis. The subject focuses on both qualitative and quantitative investigative procedures including investigative interviewing and data mining techniques. In addition, students are exposed to forensic accounting issues beyond financial statement and employee fraud, to also understand and appreciate the roles and responsibilities of a forensic accountant when investigating a case and working alongside members of various regulatory bodies, including the legal ability and limitations faced by a forensic accountant.

ACCY954 Advanced Investigative Techniques
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject explores complex qualitative investigation techniques utilised by a forensic accountant to further gather evidence in order to adequately and appropriately detect and investigate the existence of financial crime. Students will learn how to apply sophisticated investigation techniques to complex investigations of both domestic and off-shore financial crimes. Advanced study of investigative interviewing and human behaviour analysis is undertaken to correctly detect deception and understand a subject’s motives and rationalisation for committing financial crime utilising
The student. The topic is to be selected in consultation with the subject coordinator but must have a global or transnational focus drawn from subject areas such as financial wrong doing, regulatory issues and corruption. While this is an independent research project, students will be required to consult on a regular basis with their supervisor throughout the session of enrolment. Research Projects are to be 12000 words in length.

**ACCY957 Independent Accounting Expert Reports**

- **Spring Wollongong On Campus**
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject draws on professional guidelines, judicial reviews and documented experiences and outcomes of the preparation and defence of independent expert reports in a wide range of litigation and dispute resolution matters. The subject material will deal specifically with acceptance of engagement as an independent expert especially issues of appropriateness of expertise, training and independence, professional guidelines dealing with conducting an investigation, documentation of the investigation and the product of the investigation in the form of the independent expert report. Attention will also be given to the experiences of practitioners in the defence of expert reports in a court of law or similar forum. Common mistakes and pitfalls of acceptance of an independent expert engagement, investigation and preparation of an expert report and appearance as an expert witness will also be addressed. Materials will specifically draw on judicial and similar reviews of the appropriate role, duties and obligations of the independent expert.

**ACCY958 Evidence and the Forensic Accountant**

- **Spring Wollongong On Campus**
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject will focus on the law of evidence as it applies to the forensic accountant and investigator, from the inception of an investigation through to presentation of evidence in court, including expert evidence. Students will explore the implications of law for the identification of sources of evidence, collection of evidence and presentation of evidence in a manner most suitable for the purposes of their investigation and/or role in the litigation of a relevant matter. Adjudging evidence, admissibility of evidence and specific issues of expert evidence will be considered. Communication issues will be an underlying theme throughout specifically accountant - lawyer communication.

**ACCY959 Research Project**

- **Autumn Wollongong On Campus**
- **Spring Wollongong On Campus**
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** The purpose of this subject is to provide students with an opportunity to undertake independent research in a specialised area of interest to the student. The topic is to be selected in consultation

Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject is designed to provide research students in the Faculty of Commerce with a background to the methodology and practice of social science research. A major goal of the subject is to provide a ‘kick-start’ for students who are beginning, or are planning to carry out their first major research study on a Commerce-related topic (this would cover, for example, the fields of management, marketing, employment relations, business systems, organisational studies and accounting). The subject will provide an introduction to philosophical underpinning of social science research, the practical issues associated with the conduct of research (including project management and research ethics), as well as an overview of the main qualitative and quantitative methods used to collect and analyse social research data.

ECON901  Monetary Economics  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: Not to count with ECON301  
Subject Description: This subject focuses on the monetary aspects of the macro-economy. It comprises two parts. The first focuses on a comparison of the monetary transmission mechanism and policy implications arising from the Classical, Keynesian, Monetarist and New Classical theories. The second section analyses the money supply and its control, the conduct of monetary policy, money in the open economy, inflation and the Australian financial system.

ECON902  Advanced International Monetary Economics  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: Not to count with ECON307  
Subject Description: This subject is a study of monetary aspects of international economics. It comprises two parts. In Part A we examine theoretical approaches to the balance of payments and exchange-rate determination. In Part B we analyse selected issues in international monetary economics.

ECON903  Public Finance  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: Not to count with ECON301  
Subject Description: This subject focuses on the monetary aspects of international economics. It comprises two parts. In Part A we examine theoretical approaches to the balance of payments and exchange-rate determination. In Part B we analyse selected issues in international monetary economics.

ECON904  Trade, Growth and Development  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The following topics will be covered: The WTO as an international organisation; capital-skill complementarity between new investment and technical progress; concerns about the role of international trade on growth and development; the role of multinational corporations in trade and technology.
transfers; human development, economic democracy and shared growth; international economic institutions (IBRD,IMF,WTO) and the national economies. Examples will be cited from developing and developed countries.

**ECON906 History of Economic Thought**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON316
Subject Description: This subject is designed to introduce students to the main developments in economic theory from the 17th to 20th centuries. Internal changes in theories, relationships between successive theories and external influences on this development will be examined. Students will be expected to read widely in both primary and secondary sources.

**ECON907 Cost-Benefit Analysis**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON310
Subject Description: This subject involves the study of the theoretical foundations and practical techniques of cost benefit analysis (CBA). Theoretical considerations include the study of Pareto optimality and the Pareto criterion, the concept of a social welfare function, the Kaldor-Hicks compensation principle, theories of market failure, shadow pricing, consumer and producer surplus, and social time preference. Methods of valuing benefits and costs will be studied including the use of market values and techniques that might be used when market prices are not appropriate or not available (such as contingent valuation and hedonic pricing). Alternative CBA decision criteria will be evaluated and compared. Methods of sensitivity analysis will be studied and evaluated. Cost benefit case studies will be reviewed. Spreadsheet skills will be developed and applied to complex situations where cost benefit methods are appropriate. The practical limitations of cost benefit analysis will be studied.

**ECON908 Advanced Topics in the Economics of Development**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON303
Subject Description: The subject provides an in-depth analysis of economic development in both theory and experience. Topics include economic growth versus economic development; poverty and inequality; population growth; unemployment and rural-urban migration; technological change; peasant agriculture and agricultural productivity; human capital and development; the role of capital; credit and institutions; as well as the international dimensions of development and development policy.

**ECON909 Econometric Theory**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON308
Subject Description: This subject studies labour supply, labour demand and wage rate determination in a market-orientated economy. The subject emphasizes the development and application of economic theory rather than an institutional approach to analyse labour markets. Several areas of application are drawn from
the following and analysed in some detail. The effects of welfare programs on labour-market participation and hours of work; the effects of imposing a minimum wage in both competitive and non-competitive labour markets; the theory of human capital and its use in explaining observed earnings differentials; an explanation for occupational wage differentials, discrimination in the labour market; the rationale for labour unions; the economic impact of labour unions; and the causes of unemployment. Examples relate mostly to the Australian and US labour markets although some comparisons are drawn with labour markets in other countries.

**ECON913 Industrial Organisation**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON312  

**Subject Description:** This subject provides the theoretical basis for the analysis of firm structure, conduct and performance. It focuses on issues related to the implementation of competitive policy from both national and international perspectives.

**ECON915 Electronic Commerce and the Economics of Information**

**Autumn** Wollongong On Campus  
**Spring** Wollongong On Campus  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON319  

**Subject Description:** This subject analyses the impact of electronic commerce on the markets for consumer goods and services and factors of production. Reasons for the dramatic increase in the use of electronic commerce and its effects on consumers, business firms and the wider community will be explored. Special attention will be given to the implications for small and medium-sized firms and the impact of electronic commerce on the globalisation of markets. The subject develops the theory of the economics of information, technology and transaction costs and investigates the role and value of information in decision making.

**ECON916 Economics of Education, Health and Welfare**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON315  

**Subject Description:** Several areas of microeconomic theory will be selected for advanced treatment. Within each topic contemporary applications will be explored after the development of a theoretical base.

**ECON918 Economics of Health Care**

**Autumn** Wollongong Distance  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON318 or ECON317  

**Subject Description:** The subject surveys economic aspects of the Australian health care system. Topics covered will include the supply and demand for health services, health care delivery systems, health insurance, social statistics and medical decision making. Government policies influencing all aspects of health care will be analysed and evaluated.

**ECON921 Econometric Models**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** ECON221 or equivalent subjects approved by Head of Discipline  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON327  

**Subject Description:** This subject develops the foundations of econometric models. Both time series analysis and simultaneous equation models will be studied. The subject will emphasise suitable model building with economic content, obtaining estimates with desirable properties, testing procedures, model evaluation and selection, and the application of econometric models. Examples from current Australian econometric models will be critically examined.

**ECON924 International Economic Relations**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with INTR920 and ECON982  

**Subject Description:** The subject will examine policy issues in the international economy, especially as they affect the Asia-Pacific region. The role of international economic organisations such as the IMF, World Bank, and GATT will be emphasised as well as issues such as free trade, protectionism, exchange rate determination and international capital flows. Options available to individual countries for international economic policy will be explored.

**ECON927 Innovation and Technology in the New Economy**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON227 or ECON229  

**Subject Description:** This subject provides economic conceptual frameworks in which to think systematically about the economy, technology, innovation and related policy issues. The course does not include theory for the theory’s sake, but presents and uses theoretical tools as a means to the end of gaining better understanding of the role of innovation-related policy issues in the context of a creative economy. Although the concepts and tools developed are relevant to all countries, special attention will be given to Australian and other OECD economies.

**ECON933 Conflict and Cooperation**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** ECON111 and ECON122  
**Co-requisites:** None  
**Exclusions:** Not to count with ECON333  

**Subject Description:** This subject provides study of
advanced topics in game theory. The subject builds on traditional analytical techniques in economics based on assumptions of certainty and competitive markets. Using game theory, the analysis is extended to settings that traditional economic analysis is unable to cope with. These typically involve incorporating risk and uncertainty, asymmetric and incomplete information and strategic situations where the assumptions of competitive markets do not apply. The emphasis is on theoretical developments and the application of the central tools of game theory to real world problems of business and economics involving strategic interactions between parties.

ECON935 Advanced Managerial Economics and Operations Research
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON332
Subject Description: This subject provides study of advanced quantitative techniques applicable to economic and managerial decision-making. This subject covers a wide range of quantitative analyses such as forecasting techniques, Bayesian analysis, Markov process models, PERT, CPM and specialised network algorithms, risk preference analysis, transportation and assignment models and quadratic and nonlinear programming.

ECON936 Graduate Macroeconomics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON205
Subject Description: This subject analyses the major factors which determine macroeconomic behaviour and associated policy prescriptions. The effects of consumption and investment, international factors, monetary and fiscal policies on aggregate demand are examined. The determination of wages and prices, inflation and unemployment are also considered in terms of aggregate supply.

ECON937 Graduate Microeconomics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides study of the demand for, and the supply of, goods and services, and price determination in a market-orientated economy. This subject develops, from its axiomatic foundations, the economic theory of consumer choice and market demand, and the economic theory of the firm and market supply. The subject provides students with a strong foundation in microeconomic theory in order to facilitate further post-graduate study in both theoretical and applied fields of economics.

ECON938 Environmental Economics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON309
Subject Description: This subject will provide a comprehensive analysis of environmental issues utilising the theory of economic externalitys and the theory of ecologically sustainable development. Methods used to correct environmental problems and to measure externalities will be analysed. The subject will also evaluate environmental policies in Australia, developing countries and in the international economy.

ECON939 Quantitative Economic Analysis
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON221
Subject Description: This subject develops the fundamental concepts of econometrics used in applied economic work in the academic, business and government sectors. The subject covers the standard and non-standard econometric models based on time series, cross-section and qualitative data. Emphasis will be on applications of the econometric methodologies to empirical research.

ECON940 Statistics for Decision Making
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject develops principles of descriptive and inferential statistics, and their applications in the business environment. A foundation of descriptive statistics and probability is first developed, followed by discussion of the concepts and principles of statistical inference. Several topics in statistical inference are then examined including confidence intervals, hypothesis testing, statistical quality control, regression analysis and forecasting. Case studies are used to demonstrate the application of statistical methodology to aid business decision-making.

ECON941 Advanced Topics in Economics - A
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics for this subject may be drawn from any area of economics which the Head of the Discipline considers to be suitable preparation for a higher degree and appropriate to the student’s special interests.

ECON942 Advanced Topics in Economics - B
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics for this subject may be drawn from any area of economics which the Head of the Discipline considers to be suitable preparation for a higher degree and appropriate to the student’s special interests.

ECON943 Advanced Topics in Economics - C
Spring Wollongong On Campus
Credit Points: 6
ECON944 Smalls Firms and the Economy
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: ECON910
Co-requisites: None
Subject Description: This subject will provide students with a solid foundation for understanding the role and contribution of small firms to the contemporary Australian economy, at both the national and regional levels. Key topics to be discussed will include: why small firms exist; the role and importance of entrepreneurship; the contribution of e-commerce, the role of networking and innovation in small firm competitiveness; small firms and their contribution to regional development; small firms and the global economy; public policy and small firm development; and small firm development strategies in other countries.

ECON945 Regional Development
Autumn Loftus On Campus
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: ECON910
Co-requisites: None
Subject Description: This subject will provide students with a solid foundation for understanding the role and contribution of small firms to the contemporary Australian economy, at both the national and regional levels. Key topics to be discussed will include: why small firms exist; the role and importance of entrepreneurship; the contribution of e-commerce, the role of networking and innovation in small firm competitiveness; small firms and their contribution to regional development; small firms and the global economy; public policy and small firm development; and small firm development strategies in other countries.

ECON982 International Economic Relations
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON924 or INTR920
Subject Description: The subject will examine policy issues in the international economy, especially as they affect the Asia-Pacific region. The role of international economic organisations such as the IMF, World Bank, and GATT will be emphasised as well as issues such as free trade, protectionism, exchange rate determination and international capital flows. Options available to individual countries for international economic policy will be explored.

ECON983 Trade and Industry in East Asia
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON251
Subject Description: This subject studies the neo-classical, structuralist and culturalists views on industrialisation in Asia using country specific examples. It examines trade and industry policy, investment flows, economic integration and the international monetary system. The causes of Asian growth and meltdown are analysed. The strategies to overcome the main economic problems and the recent developments in the Asia-Pacific region are emphasised.

ECON984 Financial Economics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with ECON331
Subject Description: This subject provides advanced study of the theory of efficient acquisition, financing and composition of assets and production activities with applications in the fields of economics of the firm, agricultural economics and international economics. Optimal control methods and phase-plane diagrams are used for analysing efficient trajectories of capital investment and borrowing. Investors' portfolio choices and producers' activity sets will be analysed within a mean-variance expected utility maximisation framework.

ECON991 Project
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None

ECON992 Research Report
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None

ECON993 Thesis
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None

ECON996 Advanced Macroeconomic Theory
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject attempts a critical review of advanced contemporary macroeconomic theories and their policy prescriptions. In doing so the subject stresses the need to consider four important concepts, namely the international orientation of macroeconomics, the role of expectations and their formation, the importance of dynamics and
speeds of adjustments and finally, the difficulty of formulating and implementing consistent, optimal macroeconomic policy in a changing world.

**ECON997 Advanced Microeconomic Theory**

*Autumn Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** The subject provides a bridge between microeconomics at the undergraduate level and microeconomics in a good-quality PhD program. The subject extends and deepens the student’s understanding of the theory of consumer behaviour and the theory of the firm and covers some new topics such as economic behaviour under conditions of uncertainty and the economics of information.

**FIN 920 Advanced Risk and Insurance**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject deals with the concepts and technical description of risk, risk attitudes and preferences, and insurance. Conceptual models and tools discussed include those used to protect against portfolio risk in investments, other financial risks, such as exchange rate risk, and more general corporate risks, like regulatory risk. Specific risk management tools are learned by way of hypothetical application. These include share portfolio insurance using derivatives and hedging against currency exchange rate and interest rate movements in spot and derivative markets.

**FIN 921 Managerial Finance**

*Autumn Wollongong On Campus*  
*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY921 and TBS 907  
**Subject Description:** This subject presents the tools necessary for any finance professional, with an emphasis upon the management decision matrix and recognition of the professionalism necessary in modern industry contexts. Specific topics include financial ratio analysis, capital budgeting, long-term financial planning, current asset management, risk and return, investment decisions, financial policy and capital structure decisions, investment valuation, basic derivatives, and mergers and acquisitions.

**FIN 922 Investment Management**

*Autumn Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY922  
**Subject Description:** This subject is about the tools and logical frameworks with which decision makers choose their investments in a world characterised by uncertainty (risk). Emphasis is on investment in financial assets such as shares, bonds and futures rather than on real assets. Particular subjects covered include portfolio choice, allocations of investments between risky and riskless assets, the term structure of interest rates, asset pricing models, options pricing and hedging with derivatives.

**FIN 923 Portfolio Management**

*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY923  
**Subject Description:** This subject examines advanced topics in the modern theory of optimal investment decision-making, portfolio theory, capital and derivative markets. The subject explores several major areas of interest including market efficiency models in valuing portfolios and securities, bond analysis, portfolio management and performance evaluation. The subject provides a theoretical framework within which all derivative securities can be valued and hedged and also examines the way in which they are traded.

**FIN 924 Financial Statement Analysis For Business**

*Autumn Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY924  
**Subject Description:** This subject examines the framework for financial statement analysis with discussion of the role of accounting information and intermediaries. Emphasis is on the appraisal and prediction of corporate financial performance from publicly available information such as accounting numbers, industry and economic statistics as well as other stock market data. Cases and problems are gradually introduced, provoking an analytical and creative thinking process ending with the evaluation and preparation of appropriate business strategies.

**FIN 925 Banking Theory and Practice**

*Autumn Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY925  
**Subject Description:** This subject examines bank management theory as applied to the practice of bank operations within the banking sector. It entails comprehensive discussion on issues that are commonly involved within the banking environment such as the regulatory structure, risk management, commercial and consumer lending, capital adequacy analysis, banking financial futures and forwards, the cheque clearing system and the latest information technology within the banking world.

**FIN 926 Advanced Managerial Finance**

*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** Not to count with ACCY926  
**Subject Description:** This subject examines advanced aspects of financial controllership and corporate finance within the contemporary business environment. The subject first analyses the impact of less-than-ideal capital
markets, information asymmetries and principal-agent conflicts on practical decision-making in the firm. It then investigates several specialised areas receiving increased scrutiny from corporate stakeholders including financial distress and restructuring, corporate governance, organisational architecture and risk management, debt and equity strategies, and mergers and acquisitions.

**FIN 927 Entrepreneurial Finance**  
*Subject Description:* This subject deals with the financial management tools and techniques appropriate for small and medium-sized business enterprises. It includes study of potential investors and their mindset at various stages in the firm’s life cycle, thus covering sources, uses and management of funds from pre-purchase to public listing. A case study approach is employed. Issues addressed include valuation, performance measurement, obtaining and organizing finance, financial planning, and cost of financial capital and exit strategies.

**FIN 928 Multinational Financial Management**  
*Subject Description:* This subject examines international trade, foreign exchange markets, international political risk analysis and international taxation. Multinational corporation investment decision making, techniques, currency futures and options, swaps, markets, internal and external exposure management, monetary system, the Euromarkets, foreign exchange studied include various aspects of the international perspective of the multinational corporation. Topics topically examined include valuation, performance measurement, obtaining and organizing finance, financial planning, and cost of financial capital and exit strategies.

**FIN 955 International Banking**  
*Subject Description:* The subject includes comprehensive discussion on issues concerning lending within the banking environment, including regulation of security offerings, principles of good lending, documents involved in lending, lending and the consumer credit code, new developments in lending and securities and their impact on the banking sector.

**FIN 957 Portfolio Simulation**  
*Subject Description:* This subject provides students with realistic stock market simulations and they are able to trade shares, options, bonds, managed funds, and international stocks. The core of the subject is in the construction and administration of a simulated investment portfolio using online method. Students are introduced to financial markets, order placement techniques, trading strategies and portfolio theory. Students experience the pressure of live markets and learn how to manage a portfolio. The subject bridges classroom theory with real-world practical experience.

**FIN 987 Special Topic in Finance**  
*Subject Description:* In this subject, students learn how to manage a portfolio. The subject bridges classroom theory with real-world practical experience. Students experience the pressure of live markets and learn how to manage a portfolio. The subject bridges classroom theory with real-world practical experience.

**FIN 993 Research Essay 1**  
*Subject Description:* This subject provides students with an opportunity for students to study a topic of interest within the theory and application of finance. The program of study comprises a combination of coursework and/or research with subject objectives and assessment approved by the Associate Head of School.

**FIN 994 Research Essay 2**  
*Subject Description:* This subject provides students with an opportunity to extend and synthesise knowledge from their study of finance into a major research study, subject to approval by the Associate Head of School. The subject is particularly designed to enable students to develop their research potential.
This is achieved by applying marketing techniques and from indifference to action and ultimately maintenance.

MARK901 Internet Applications for Marketing
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The issues facing buyers and sellers online will be applied to marketing subject areas like relationships, community and customer information systems as well as the basic 4Ps of marketing. The focus will be at a people and process level to get an understanding of what happens in organisations. Internet applications are reviewed from the perspective of value that electronic networks and data processing can bring to areas of marketing practice. The underlying theme across all areas is how value is added to create overall customer satisfaction in the different areas of marketing practice.

MARK917 Business to Business Marketing
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject will deal with customer relationship management and services and relationships are interrelated, the subject aims to introduce the graduate student to a theoretical and practical perspective of the service industry, its marketing implications, and managing buyer-seller relationships. The subject is intended for students who are interested in how to cope with service competition in a customer-oriented manner. The subject will not only deal with issues relating to managing customers in service firms, but is equally intended for manufacturers of physical goods operating in business-to-business or consumer markets because the importance of service to success is constantly growing for such firms. Because services and relationships are interrelated, the subject will deal with customer relationship management and relationship marketing as well as services management.

MARK922 Marketing Management
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: WBS904
Subject Description: This is the introductory postgraduate Marketing subject. It examines the contemporary view of marketing and focuses on the following areas: identification of market opportunities, segmentation and target marketing, marketing mix decisions, service marketing and international marketing.

MARK935 Marketing Strategy
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: With the use of case studies, this subject will examine the development and implementation of marketing plans and strategies at the organisational level. Key issues may include: marketing’s strategic role in the organisation, marketing strategy and competitive advantage, including marketing mix strategies, marketing strategy formulation, implementation and control.

MARK936 Consumer Behaviour
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject will focus on product management and innovation as a source of competitive advantage. There is also a far greater focus on logistics and distribution functions as reliability of supply is a key need of customers, particularly when product delivery has to interface directly with customer operations. The central role of personal selling in the promotional mix is also dealt with in depth as it is critically important in generating sales and maintaining relationships with customers.

MARK938 Managing Services and Relationship Marketing
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The aim of the subject is to introduce the graduate student to a theoretical and practical perspective of the service industry, its marketing implications, and managing buyer-seller relationships. The subject is intended for students who are interested in how to cope with service competition in a customer-oriented manner. The subject will not only deal with issues relating to managing customers in service firms, but is equally intended for manufacturers of physical goods operating in business-to-business or consumer markets because the importance of service to success is constantly growing for such firms. Because services and relationships are interrelated, the subject will deal with customer relationship management and relationship marketing as well as services management.
MARK940 Marketing Communications
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide both a theoretical and a practical perspective on Marketing Communications and Promotion Strategy. Students will learn to use communication tools such as advertising, sales promotion, point-of-purchase materials, sponsorship programs and publicity, to optimise intervention on organisational issues.

MARK954 Special Topic in Marketing A
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A special topic selected from any area of marketing. The selection would be made by the Head of the Discipline, taking into account the expertise of academic staff, including visiting staff, and the interest of students.

MARK956 Creating and Marketing New Products
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject approaches the management of new products from the perspective of the Marketing function. Taking a holistic view of new product development and introduction, it covers the organisation and management of processes across the product life cycle with an emphasis on the role that Marketing plays in these. The key elements here are: identifying opportunities and generating new product concepts, obtaining customer inputs throughout the product cycle, developing an effective product innovation strategy, the test marketing of new products, developing marketing strategies (including pricing) for new products, and managing new product launches.

MARK957 International Marketing Strategy
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will present various concepts and tools for analysing international marketing strategies, and evaluating the marketplace (competitors, external environment: cultural, economic, technological, political/legal, marketing opportunities, etc.). Specifically, the focus will be on developing, evaluating and implementing international marketing strategy at the corporate, regional and local levels. By learning the theory and practice, the student will obtain a good conceptual understanding of the field of international marketing as well as become firmly grounded in the realities of the global marketplace.

MARK959 Sales Management
Not on offer in 2009
Credit Points: 6

Pre-requisites: None
Co-requisites: None
Subject Description: This course involves organising and planning the company's overall personal selling efforts and integrating these efforts with the other elements of the firm's marketing strategy. It also includes the selecting of appropriate sales personnel and designing and implementing policies and procedures that will direct their efforts towards the firm's desired objectives. The final part of the course involves developing procedures for monitoring and evaluating sales force performance so that adjustments can be made to either the sales program or its implementation when performance is unsatisfactory.

MARK970 Contemporary Issues in Marketing
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This course will focus on advanced topics in marketing and strategic issues relating to marketing. Emphasis will be placed on reviewing contemporary readings in the academic and professional literature, together with a focus on practical issues affecting marketing.

MARK977 Research For Marketing Decisions
Spring Wollongong On Campus
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This course will provide an overview of marketing research as an applied practice and will emphasize the practical aspects of doing research to meet client needs. It will cover the marketing research process beginning with client consultation and research design, as well as data collection, data analysis and report preparation.

MARK980 Marketing Special topic
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: A program of coursework and reading as prescribed by the Head of School. This subject is normally available only to MCom(Honours) students.

MARK990 Minor Thesis
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
advantage of organisations, by building up the intellectual Development (HRD) in enhancing the competitive advanced perspective on the use of Human Resource. This subject provides an
Subject Description: This subject introduces, discusses and analyses issues unique to the marketing of tourism products. The focus of this subject is the application of marketing principles and theory in the development of strategic marketing plans for tourism products. The application of strategic tourism marketing planning to the destination, accommodation and tour operator sectors of the tourism industry at the regional, national and international level are critically analysed. In addition, the subject identifies and discusses contemporary issues in tourism marketing including the impact of e-commerce, database marketing and environmental based tourism.

MARK997 Retail Marketing Management
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will include a background to retailing, the scope of retailing, retailing strategies, merchandise and store management. Particular emphasis will be placed on case analysis in order to bring as much of the real world as possible into the classroom.

MGMT901 Fundamentals of Management
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides an overview of the principles of management, viewed in the context of western management literature. Students also develop competence in a range of academic skills at tertiary level. Chief management topics include: Management theories; The external environment, ethics and corporate social responsibility; The internal environment and organisational culture; Managing diversity; Strategy and structure; Leadership, Motivation; Managing information; Decision making; Managing people; Managing in a global environment. Chief academic skills topics include: Locating academic material; Referencing and use of other people's intellectual property; Summarising journal articles - what is important? Identifying the problem in a management case; Writing a research report.

MGMT908 Human Resources Development
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides an advanced perspective on the use of Human Resource Development (HRD) in enhancing the competitive advantage of organisations, by building up the intellectual and learning system capacities of the organisation to cope with a rapid change, customer focused environment. The concept of the Learning Organisation will be developed through the perspective of the HRD policies and actions required to develop and change organisations through their human capital and capabilities.

MGMT910 Strategic Management
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to theories, concepts and practical issues associated with the strategic management. Topics examined include strategy formulation, choice and implementation; strategy and structure and the organisational context; industry analysis; strategy and competitive advantage.

MGMT911 Organisational Behaviour
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject presents and discusses major theories and concepts in organisational behaviour, with a view to using this knowledge to enhance management and leadership skills. The main topics for discussion include: diversity, communication, conflict, motivation, job design, groups, teamwork, culture, leadership, decisionmaking, power, politics and ethics. There will be an emphasis on case study analysis and skill development exercises.

MGMT915 Management of Change
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject analyses how managers can conceptualise and lead the process of organisational change. Issues under discussion will be: organisational change theories and models; forces for change; resistance to change; coping with change; recognising, diagnosing, planning and implementing change; organisational development; contingency approaches to change; and aspects of cultural change management.

MGMT920 Organisational Analysis
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides students with an understanding of the main theoretical frameworks and conceptual tools used to analyse organisations. The subject approaches organisational analysis using four perspectives: bureaucratic, contingency, political, and cultural. Emphasis is placed on understanding the basis in theory and metaphorical roots of each perspective, as the foundation for using a multiple perspectives approach to identify the key dynamics of organisations.
MGMT930  Strategic Human Resource Management  
Autumn  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject examines strategic management concepts and frameworks, and explores the links between strategic management and human resource management. A number of models of strategic HRM are considered, in terms of their theoretical foundations and practical utility. The overall focus is on using the conceptual and analytical frameworks of strategic HRM to develop and implement effective human resource strategies.

MGMT940  Innovation and Entrepreneurship  
Spring  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: True Entrepreneurship and Innovation are key to the future economic development in many nations. This subject investigates the Innovation and Entrepreneurial processes, including New Venture Creation (small firms) and Intrapreneurship (established firms). Students will learn how to differentiate between a good idea and a real business opportunity. A key part of this subject is the development of a realistic written business plan for an innovative business opportunity and its presentation via an action learning process utilising teams.

MGMT941  Small Business Management I  
Autumn  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The smaller enterprise is becoming increasingly important to the economic well being of many nations. This subject has both a theoretical and practical focus by giving students an opportunity to develop their awareness and understanding of the key factors in successfully starting, operating and growing a SME. Detailed investigation of realistic SME scenarios as well as the growth area of franchising is undertaken by students.

MGMT946  Personal Learning: The Reflective Manager  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject covers a range of theories and skills to assist the manager in developing their capacities as a ‘reflective’ practitioner. Topics include: personality types; interpersonal psychology; perceptions of self and others; risk perception and locus of control; issues of ethics, guilt, shame and responsibility.

MGMT949  Performance Management  
Spring  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject examines the area of performance management, which is defined as an ongoing communication process that involves both the performance manager and employee. Key aspects of this process are examined. Topics include: identifying and describing essential job functions and relating them to the mission and goals of the organisation; developing performance standards; giving and receiving feedback about performance; writing and communicating constructive performance evaluations, and planning education and development activities to maintain and improve or build on employee work performance.
critically evaluated in the context of differing cultural expectations and practices. A range of practical skills in recruitment and selection processes will also be developed.

**MGMT975 Negotiation Advocacy and Bargaining**

*Not on offer in 2009*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Exclusions: Not to count with ECN975*

*Subject Description: The subject develops concepts and techniques for the choice and evaluation of strategies and tactics in collective bargaining and advocacy. Much of the subject will involve case studies and role playing.*

**MGMT978 Cross Cultural Management**

*Wollongong On Campus*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: The subject addresses key issues and problems associated with managing across cultural boundaries in a context of increasing global contact. Topics include: cross cultural communication, technology, comparative management practices, managing with multicultural policies, and the challenges cultural differences posed for international/global managers.*

**MGMT983 Leading Organisations: Politics, Power and Change Agency**

*Not on offer in 2009*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: This subject provides students with the ability to reflect upon and improve their capacity to act effectively as an innovator and change agent. It introduces students to the nature of power and politics in organisations, how this dimension of organisational life impacts upon individual careers and organisational success, commonly recommended approaches and techniques for managing politics, and the personal and ethical issues involved in either participating in or abstaining from politics. The subject reviews current management research on organisational politics and change management, and provides checklists, case studies, guidelines and exercises for improving the students practical knowledge and experience.*

**MGMT986 Special Topics A**

*Spring Wollongong On Campus*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: Approved program of study agreed with the Head of the Department of Management.*

**MGMT987 Management Special Topic**

*Annual Wollongong On Campus*

*Spring Wollongong On Campus*

*Credit Points: 12*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: Approved program of study agreed with the Head of Discipline for Management.*

**MGMT990 Minor Thesis**

*Annual Wollongong On Campus*

*Credit Points: 24*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: Approved program of study agreed with the Head of the Department of Management or Course Director.*

**MGMT991 Major Thesis**

*Annual Wollongong On Campus*

*Credit Points: 48*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: Approved program of study agreed with the Head of the Discipline for Management Course Director.*

**PRMM901 Corporate Identity and Branding**

*Spring Wollongong On Campus*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: Brands are intangible assets that communicate organizational strategies and value systems. This subject will provide students with an understanding of the role of corporate identities and brands in maximising corporate reputation and shareholder value. The focus will be on analysing successful corporate identity and brand strategies and applying lessons to contemporary brand challenges. Students will learn conceptual frameworks for creating and managing corporate identities and brands and develop appropriate strategies for planning, communicating, implementing and evaluating brand systems and brand equity.*

**PRMM902 Interactive Public Relations**

*Spring Wollongong On Campus*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: An integrated approach is adopted to provide students with knowledge of communication concepts and the public relations campaign strategies associated with traditional and new media; from interpersonal communication to interactive technologies. Students will learn how to plan public relations, sponsorship, donor and media campaigns; manage issues and crises; and resolve ethical dilemmas. This subject will focus, in particular, on the interpersonal and organisational communication strategies and tactics required for a range of new media technologies, including blogs, wikis and social networking sites.*

**PRMM903 Public Relations for Innovation and Change**

*Spring Wollongong On Campus*

*Credit Points: 6*

*Pre-requisites: None*

*Co-requisites: None*

*Subject Description: The aim of this subject is to provide students with a critical understanding of
public relations strategies and relationship management processes. It will examine how public relations can strengthen and add value to innovation and change-related communication practices such as launching businesses and products, communicating change during mergers and acquisitions, and inspiring social innovation. Key topics covered include: strategies for encouraging innovation, communicating and responding to change; persuasion and publicity; the strategic design of meanings, and collaborative decision making.
Faculty of Creative Arts

Member Units

Doctor of Philosophy

Testamur Title of Degree: Doctor of Philosophy
Abbreviation: PhD
Home Faculty: Faculty of Creative Arts
Duration: 3 years full-time or part-time equivalent
Total Credit Points: 48 per annum
Delivery Mode: Supervised individual research/creative project
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 201
CRICOS Code: 028401G

Overview
The Doctor of Philosophy is for those individuals with a track record of high-level professional or academic experience who wish to extend their practice within a scholarly context.

The Doctor of Philosophy is based on submission of a thesis in a scholarly field or a combination of scholarly thesis and creative work presentation. The course is intended for scholars or artist-scholars who have a solid academic and/or artistic background and who wish to develop either or both fields to a doctoral level. Such candidates may have limited artistic experience, but should demonstrate high levels of promise and an appropriate standard of preparation.

It may be possible for individuals with appropriate expertise to undertake studies that involve more than one discipline area. Interested applicants should contact the Faculty’s Professional Officer.

Entry Requirements / Assumed Knowledge
Applicants should have an Honours Bachelor degree of at least four years duration in an appropriate discipline at Class II, Division 1 or higher or equivalent qualifications. Applicants wishing to submit a combination of thesis and creative work should demonstrate that both their academic and artistic backgrounds equate with the above minimum standard. In certain circumstances, students may be required to commence their enrolment in the Master of Arts – Research and seek transfer to the Doctor of Philosophy (PhD) when they achieve a suitable standard.

It is important that applicants submit adequate material to demonstrate the quality and standing of their work.

Course Requirements
Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time).
Submission will be in the form of:
• scholarly thesis (100%); or
• scholarly thesis (50%) combined with creative work (50%).

The submission for the PhD will normally be a thesis in the range of 60,000 to 90,000 words, or an equivalent workload where submission is by thesis and creative work. The exact nature of each submission will vary according to the students’ educational and professional background and will be negotiated in consultation with the supervisor(s) and the Head of Postgraduate Studies. Examples of creative work submission include a folio of compositions or writing, exhibitions of artwork and musical or dramatic performances. As a guide, the scale of the submission of creative work would normally not constitute significantly less than for the Doctor of Creative Arts.

Assessment is by two external assessors.

Major Study Areas
School of Art and Design
Graphic Design
• Print and Publication Design
• Web, Interactive Multimedia and Motion Design
• Graphic Design and New Media Theory

Media Arts
• Photography, Film, Video and Animation
• Software and Electronic Art
• Contemporary Media and New Media Theory

Visual Arts
• 2D and 3D Studio Practice [photography, printmaking, textiles, painting and sculpture]
• Art History and Contemporary Theory [focussing particularly on issues of creative practice]
• Curatorial Theory and Practice

School of Journalism and Creative Writing
Creative Writing
Overview

The Doctor of Philosophy (Journalism) is for individuals with a track record of high level professional practice who wish to extend their work within a scholarly context. It is a flexible degree that allows students to pursue a detailed research project through either traditional thesis research or through a significant practical journalism project with a theoretical exegesis.

Innovative approaches to journalism and journalism studies that explore interdisciplinary academic approaches or extend journalism practice into areas such as creative non-fiction and multimedia documentary are encouraged.

Entry Requirements / Assumed Knowledge

Applicants should have a relevant first degree with Honours Class II, Division 1 or higher, or a Masters degree either in Journalism or in a related area, or possess equivalent or professional qualifications. Graduates in other disciplines at Masters level may also be considered if they can provide evidence of professional practice and research interests in specialist areas relevant to journalism theory and practice.

Applicants must submit a one page statement detailing their research history and professional experience and a comprehensive proposal of 2,500 words. Applicants will be assessed on the relevance of the proposal to the research interests of the journalism program. Other topics will be considered against the research expertise available in the Faculty. Applicants applying on the basis of professional media experience must include work samples and verification of employment from their employer(s). Guidelines for submitting the research proposal are at: www.uow.edu.au/crearts/ under Postgraduate Studies.

In certain circumstances students may be required to commence their enrolment in the Master of Arts - Research (Journalism) and seek transfer to the Doctor of Philosophy (PhD) when they achieve a suitable standard.

Course Requirements

Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time).

This subject requires the submission of a scholarly thesis in the range of 80,000 to 100,000 words which involves both empirical data collection and theoretical analysis. Alternatively, submission may take the form of a significant practical journalism project in any combination of media. The length and other requirements of such a project will be determined during the proposal development process. For example, a significant print project would usually require the submission of approximately 50,000 words and could take the form of an inter-related series of features or a single piece of narrative non-fiction. A project undertaken as an audio or audiovisual documentary would usually be of 60 – 90 minutes duration depending on the complexity of material and style. The parameters of equivalent combined multimedia projects will be determined on an individual basis. An exegetical component situates the practical work in the theoretical context of contemporary journalism studies and will usually be approximately 30,000 words.
The exact nature of each submission will vary according to the student's educational and professional background and will be negotiated in consultation with the supervisor(s) and the Head of Postgraduate Studies. Assessment is by two external examiners.

**Major Study Areas**

**Overview**

The Doctor of Creative Arts is for those individuals with a track record of high level professional experience, who wish to extend their practice within a scholarly context.

The Doctor of Creative Arts is based on presentation of creative work and supported by written documentation of the context and theories underpinning the work. Assessment is by two external examiners. It may be possible for individuals with appropriate expertise to undertake studies which involve more than one discipline area. Interested applicants should contact the Faculty's Professional Officer.

**Entry Requirements / Assumed Knowledge**

Applicants must possess an Honours Bachelor degree of at least four years duration in an appropriate discipline at Class II, Division 1 or higher (or its equivalent) and be able to demonstrate evidence of high artistic attainment. Examples of high artistic attainment include publication or professional dissemination of work; grants, fellowships and prizes; critical acclaim; a track record of sustained high level professional activity; and various indicators relevant to the specific discipline.

As a guide, students completing the MCA will need to achieve at or near a high distinction in the two coursework subjects and a satisfactory pass in the Major Presentation to be considered for entry to the DCA. Likewise, students who have completed coursework Masters programs at other universities should be aware that such qualifications might not be regarded as adequate preparation for immediate entry to the DCA program. In certain circumstances, students may be required to commence their enrolment in the Master of Arts – Research or Master of Creative Arts – Research, and seek transfer to the DCA, when and if they achieve the required standard. Outstanding arts practitioners without the required formal qualifications may be allowed to enrol in the DCA provided they can demonstrate a sustained period of artistic activity at the highest level.

It is important that applicants submit adequate material to demonstrate the quality and standing of their work.

**Course Requirements**

Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time).
The submission for the DCA will normally be by exhibition, performance or publication of creative work in the area of major, supported by written documentation (approximately 20,000 to 30,000 words) focusing on aspects such as origins of the work, structures and techniques used, and artistic theories underpinning the work. It may be appropriate to support written material with documentation in other forms, for example, photographs or sound and video recordings. In all cases, the dissertation is intended to be an integrated part of the full submission and, wherever possible, to argue the case for the merit and originality of the creative work. The Faculty is keen that the dissertation should be a vital and engaging document. It therefore permits some flexibility in the style of its submission. Nonetheless, the dissertation should be presented in a well-researched form that demonstrates an understanding of scholarly method.

In all cases, the submission should demonstrate originality and high levels of artistry and specialist skill. The written work should be of a high standard, show an engagement with artistic and intellectual ideas and have a strong artistic and academic focus. The exact nature of each student’s program will be finalised in consultation with the supervisor(s) and the Head of Postgraduate Studies.

The Faculty requires Creative Arts research students to submit their dissertation at no later than the date of the examination of their final exhibitions and performances, except under extraordinary circumstances approved by the supervisor and Head of Postgraduate Studies. Students presenting folios, for example, literary manuscripts or music compositions should place their dissertation and folio together in one submission for examination.

Assessment is by two external examiners who normally assess all parts of the submission. The following is intended as a guide to the scale and style of creative work submission:

Creative Writing: Substantial folio of creative writing which may take the form of a large-scale project such as a novel (75,000 words), poetry collection (80 single-spaced pages) or play script (90 minutes duration), or a combination of smaller pieces.

Graphic Design: Graphic design portfolio/exhibition and/or website/CD-Rom.

Media Arts: Major solo exhibition of new media artwork plus documented preliminary exhibitions.

Music Composition: Folio of up to 10 compositions and several works that employ large resources or performance media.

Performance – Theatre: Direction of a production, the substance and duration of which will be negotiated with the supervisor(s) and Head of Postgraduate Studies; significant dramaturgical analysis and portfolio of a full-length theatrical performance; or performance in a major role demonstrating high levels of technical assurance and artistry.

Visual Arts: Major solo exhibition of artwork plus documented preliminary exhibitions.

**Major Study Areas**

Refer to listing under Doctor of Philosophy entry.

**Master of Arts - Research**

</table>

**Overview**

The Master of Arts – Research is a course for high-level practitioners who wish to extend their practice within a scholarly context.

The Master of Arts – Research consists of one 24 credit point coursework subject and a thesis in a scholarly field (or a combination of thesis and original creative work). In some cases, it may be possible to apply to transfer to a doctoral program (DCA or PhD) after a suitable period of study (normally at least the equivalent of nine months of full-time enrolment). It may be possible for individuals with appropriate expertise to undertake studies which involve more than one discipline area. Interested applicants should contact the Faculty’s Professional Officer.

**Entry Requirements / Advanced Standing**

Applicants with an Honours Bachelor degree in an appropriate discipline at Class II, Division 1 or higher, or its equivalent, may be granted advanced standing for CREA921 (Research Topics in Creative Arts) and be admitted directly into the Thesis subject.
Applicants without appropriate qualifications or research background may be admitted to the course by undertaking CREA921 (Research Topics in Creative Arts) and, on successful completion at credit level or better, may be permitted to proceed into the Thesis.

**Course Requirements**

Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time) under which they submit a scholarly thesis, or a combination of scholarly thesis and presentation of creative work. As a guide, submission by thesis only will be in the range of 40,000 to 50,000 words, with an equivalent workload where submission is by thesis (20,000 to 25,000 words) and creative work. MA-Res students must also complete CREA921 (Research Topics in Creative Arts).

Examples of creative work submission include a folio of compositions or writing, exhibition of artwork and musical or dramatic performances. As a guide, the submission of creative work would normally not constitute less than the expectations in the subjects MUS914, THEA913, VISA913, DESN913 or WRIT913 as applicable. The exact nature of each submission will vary according to the student’s educational and professional background and will be negotiated in consultation with the supervisor(s) and Head of Postgraduate Studies. A brief explanatory annotation may be submitted to support the creative work submission.

Where the submission is a combination of thesis and creative work, the Faculty requires that students submit their thesis no later than the date of examination of their final exhibitions and performances, except under extraordinary circumstances approved by the supervisor and Head of Postgraduate Studies. Students presenting folios, for example literary manuscripts or music compositions, should place their thesis and folio together in one submission for examination. Assessment for the Master of Arts – Research is by two external assessors.

**Overview**

The Master of Arts-Research (Journalism) is a flexible degree that allows students to pursue a detailed research project through either traditional thesis research or through a significant practical journalism project with a theoretical exegesis. Innovative approaches to journalism and journalism studies that explore interdisciplinary academic approaches or extend journalism practice into areas such as creative non-fiction and multimedia documentary are encouraged.

**Entry Requirements / Advanced Standing**

To qualify for entry into the MA-R(J) program applicants will have either an Honours Bachelor degree in an appropriate discipline at Class II, Division 1 or higher, or equivalent qualifications, or significant professional experience in journalism.

Applicants with an honours degree may be granted advanced standing and admitted directly into the Thesis subject. Applicants without the appropriate qualifications or research background but who have significant professional experience may be admitted to the course by undertaking JOUR992 (Research Topics in Journalism) and, on satisfactory completion may be permitted to proceed directly into the Thesis subject.

In some cases it may be possible to apply to transfer to a PhD after a suitable period of study (normally at least the equivalent of nine months of full-time enrolment) and establishing the research is at the PhD level.
Applicants must submit a one-page statement detailing their research history and a proposal of 2,000 words. Applicants will be assessed on the relevance of the proposal to the research interests of the program in journalism. Other topics will be considered against the research expertise available in the Faculty.

Applicants applying on the basis of professional media experience must include work samples and verification of employment from their employer(s). Guidelines for submitting the research proposal are at: www.uow.edu.au/crearts/under Postgraduate Studies.

**Course Requirements**

Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time). This subject requires the submission of a thesis of approximately 50,000 words which involves both empirical data collection and theoretical analysis. Alternatively, submission may take the form of a significant practical journalism project undertaken in any combination of media. The length and other requirements of such a project will be determined during the proposal development process. For example, a significant print project would usually require the submission of approximately 30,000 words and could take the form of an inter-related series of features or a single piece of narrative non-fiction. A project undertaken as an audio or audiovisual documentary would usually be of 30-60 minutes duration depending on the complexity of material and style. The parameters of equivalent combined multimedia projects will be worked out on an individual basis. An exegetical component situates the practical work in the theoretical context of contemporary journalism studies and will usually be approximately 20,000 words.

MA-Res(Journalism) students must also complete JOUR992 (Research Topics in Journalism). Assessment is by two external assessors.

**Overview**

The Master of Creative Arts – Research is a course for high level creative arts practitioners who wish to extend their practice within a scholarly context and whose work is at a standard beyond that required for the Pass Masters (MCA) but who do not possess the requirements for entry to the Doctoral program. It normally consists of two 12 credit point coursework subjects plus a major presentation. In some cases, it may be possible to apply to transfer to the Doctor of Creative Arts after a suitable period of study (normally at least the equivalent of nine months of full-time enrolment). It may be possible for individuals with appropriate expertise to undertake studies that involve more than one discipline area. Interested applicants should contact the Faculty’s Professional Officer.

**Entry Requirements / Assumed Knowledge**

Applicants should hold an appropriate Bachelor degree with Honours Class II, Division 1 or higher (or its equivalent) and be able to demonstrate evidence of strong artistic attainment/potential. Examples of artistic attainment and potential include publication or professional dissemination of work; grants, fellowships and prizes; high-level professional activity; and various indicators relevant to the specific discipline.
Advanced Standing

Applicants who have completed other relevant qualifications deemed to be equivalent may be granted advanced standing for one or both of the 12 credit point coursework subjects.

Course Requirements

Students enrol in THES924 Thesis (full-time) or THES912 Thesis (part-time) under which they complete a major presentation of creative work. The submission of creative work will normally be by exhibition, performance or presentation in the area of the major, supported by written documentation (approximately 5,000 words) focusing on aspects such as origins of the work, structures and techniques used, and artistic theories underpinning the work. The Faculty requires that research students submit their written documentation no later than the date of examination of their final exhibitions and performances, except under extraordinary circumstances approved by the supervisor and Head of Postgraduate Studies. Students presenting folios, for example literary manuscripts or music compositions, should place their dissertation and folio together in one submission for examination.

Students must also complete two 12 credit point coursework subjects in their discipline area.

The following is intended as a guide to the scale and style of creative work submission.

Creative Writing: Substantial folio of creative writing which may take the form of a large-scale project such as a novel (50,000 words), poetry collection (64 single-spaced pages) or script (75 minutes duration), or a combination of smaller pieces.

Graphic Design: Graphic design portfolio/exhibition and/or website/CD-Rom. As an example of content, designers would submit 10 to 15 graphic design works. Web designers would submit a major interactive web site or at least three smaller sites on the net. Multimedia designers would submit a substantial interactive CD-Rom that demonstrates an innovative and professional design approach. All students must submit design roughs and supporting material for exhibition.

Media Arts: Major solo exhibition of new media artwork plus documented preliminary exhibitions.

Music Composition: Folio of compositions including up to five compositions and at least one work that employs large resources or performance media.

Performance – Theatre: Demonstration of proficiency and artistry in one of the following: directing, dramaturgy or performance in a production of 45 to 60 minutes duration.

Visual Arts: Major solo exhibition of artwork plus documented preliminary exhibitions. As an example of content, painters should submit at least eight to 12 major pieces, plus drawings and supporting material of exhibition standard. Equivalent amounts of work will be expected of students working in other areas of the visual arts.

Assessment for the MCA-R is by two external assessors.

Graduate Certificate in Journalism

Testamur Title of Degree: Graduate Certificate In Journalism
Abbreviation: GradCertJour
Home Faculty: Faculty of Creative Arts
Duration: 6 months full-time or part-time equivalent
Total Credit Points: 24
Delivery Mode: On Campus
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 1174
CRICOS Code: 064113F

Overview
The Graduate Certificate in Journalism is designed to suit people who are seeking a career in Journalism or a cognate discipline. The program provides students with an understanding of the industry and the basic skills they will need to be able to produce news stories. They will also gain an understanding of the legal and ethical issues that impact on journalism as practised in a western liberal democracy. Students who complete the Graduate Certificate program of study with a credit average or higher may articulate into the Master of Journalism with the approval of the Head of School.

Entry Requirements / Assumed Knowledge
It is anticipated that most applicants will have completed a degree in a non-related discipline, or may have recently commenced work as a journalist and are seeking a professional qualification.

Qualified journalists who do not have a university degree are eligible for consideration on the basis of documented evidence of at least two years full-time experience.

Applicants with an undergraduate degree must provide certified academic transcripts and curriculum vitae (CV) outlining work history and/or academic study. Applicants with experience in journalism or a media related industry must provide details of their employment history (CV).

Applicants must provide an 800 word opinion article on the topic “Journalists – who are they really?” If applying on basis of industry experience, samples of work published in the print or electronic media are required, as well as letter(s) from employer(s) to verify details of employment.

All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong’s English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html. Selected applicants may be required to attend an interview.

Advanced Standing
Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter seeking advanced standing must be accompanied by verified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.

Graduate Certificate in Broadcast Journalism

Tentative Title of Degree: Graduate Certificate in Broadcast Journalism
Abbreviation: GradCertBroadcastJour
Home Faculty: Faculty of Creative Arts
Duration: 6 months full-time or part-time equivalent
Total Credit Points: 24
Delivery Mode: On Campus
Starting Session(s): Autumn and Spring (depending on enrolments)
Location: Wollongong
UOW Course Code: 1173
CRICOS Code: 064115D

Overview
This program is designed to suit people who have some experience in Journalism or a cognate discipline (either through professional experience or through undergraduate study) and are seeking a career in broadcast or convergent media. The program provides students with the skills they will need to be able to produce news stories for broadcast and online media. Students who complete the program of study with a credit average or higher may articulate into the Master of Journalism program with the approval of the Head of School.

Entry Requirements / Assumed Knowledge
It is anticipated that most applicants will have completed a degree in a non-related discipline, or may have recently commenced work as a journalist and are seeking a professional qualification.

Qualified journalists who do not have a university degree are eligible for consideration on the basis of documented evidence of at least two years full-time experience.

Applicants with an undergraduate degree must provide certified academic transcripts and curriculum vitae (CV) outlining work history and/or academic study. Applicants with experience in journalism or a media related industry must provide details of employment history (CV).

Applicants must provide an 800 word opinion article on the topic “Journalists – who are they really?” If applying on basis of industry experience, samples of work published in the print or electronic media are required, as well as letter(s) from employer(s) to verify details of employment.

All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong’s English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html. Selected applicants may be required to attend an interview.

Advanced Standing
Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter seeking advanced standing must be accompanied by certified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.

Plus one elective chosen from the Journalism schedules
Master of Creative Arts

Testamur Title of Degree: Master of Creative Arts
Abbreviation: MCA
Home Faculty: Faculty of Creative Arts
Duration: 1 year full-time or 1.5 to 2 years part-time
Total Credit Points: 48
Delivery Mode: Mostly face-to-face plus supervised creative work
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 564
CRICOS Code: 000290G

Overview
The Master of Creative Arts (MCA) is an intensive course focusing on the attainment of high level practical skills. It normally consists of two coursework subjects plus a Major Presentation of creative work.

Each student is allocated a supervisor(s) responsible for the Major Presentation who advises on development of the creative work and its documentation.

It may be possible for individuals with appropriate expertise to undertake studies which involve more than one discipline area. Interested applicants should contact the Faculty’s Professional Officer.

Entry Requirements / Assumed Knowledge
Normally applicants should hold a Bachelor degree from a recognised institution in an appropriate area of study. Students without adequate formal qualifications may be required to complete up to 48 credit points of additional study, incorporating relevant subjects; 48 credit points is the maximum number that can be completed in an academic year. Applicants should have professional experience in their chosen area of study.

Course Requirements
Students are required to complete 48 credit points of 900 level subjects consisting of two 12 credit point coursework subjects plus a 24 credit point Major Presentation. The following is intended as a guide for the Major Presentation:

DESN913 Major Presentation – Graphic Design:
As an example of content, graphic designers would submit 10 graphic design works; interactive designers would produce a major interactive web site or multimedia piece, or several smaller sites or multimedia works.

MUS914 Major Presentation – Music Composition:
Students will submit a major compositional project or portfolio, the substance and duration of which will be determined in consultation with the supervisor(s) accompanied by an analytical commentary of at least 2,000 words including appropriate citation.

THEA913 Major Presentation – Theatre:
The Major Presentation is the planning and implementation of a practical demonstration of the student’s work. Students will give a public presentation accompanied by a 2,500 word analysis of the process undertaken with appropriate annotation and commentary. The parameters of the presentation must be negotiated with the supervisor(s).

VISA913 Major Presentation – Visual Arts:
As an example of content, painters should submit at least eight major pieces, plus drawings and supporting material of exhibition standard. Equivalent amounts of work will be expected of students working in other areas of the visual arts.

WRIT913 Major Presentation – Creative Writing:
Students will present either a work of short prose fiction (25,000 words); or collection of poetry (48 single-spaced pages); or a (60-minute) theatre/film/television script.

All students must submit a detailed outline of their proposed work for the Major Presentation to the supervisor(s) by the fourth week of enrolment. A cross-disciplinary approach may be possible. Assessment will be by two internal assessors and students will be awarded a ‘satisfactory’ or ‘unsatisfactory’ grade for the major presentation.

**Master of Journalism**

Testamur Title of Degree: Master of Journalism  
Abbreviation: MJour  
Home Faculty: Faculty of Creative Arts  
Duration: 12 months full-time or part-time equivalent  
Total Credit Points: 48  
Delivery Mode: On Campus  
Starting Session(s): Autumn or Spring  
Location: Wollongong  
UOW Course Code: 573  
CRICOS Code: 026812E

**Overview**

The Master of Journalism (MJ) is a practical coursework program, designed to provide critical educational and vocational training in journalism. It assists students in adapting to structural and technological change and promotes critical evaluation of professional journalism processes through its teaching and research.

**Entry Requirements / Assumed Knowledge**

The MJ is available only to students who have completed the Graduate Certificate in the relevant stream or individuals with considerable industry experience.

Direct entry is also available to the following groups of Journalists: In the case of the Master of Journalism program, direct entry will be available to people with between 3 and 5 years experience. For the Advanced Master of Journalism program, a minimum of 10 years experience is required. Entry is also dependent on the provision of a portfolio of work and an interview.

To complete the MJ students are required to undertake 48 credit points of study either within the School of Journalism and Creative Writing or in combination involving Journalism and other Faculties. Students will be required to have completed at least 60% of their program of study in the School of Journalism and Creative Writing to qualify for the Master of Journalism and Master of Journalism Advanced degrees.

Qualified journalists who do not have an undergraduate qualification are eligible for consideration on the basis of documented evidence of at least five years full-time experience.

Qualified journalists who possess an undergraduate degree will be considered for entry with three years professional journalism experience.

Applicants with an undergraduate degree must provide certified academic transcripts and curriculum vitae (CV) outlining work history and/or academic study. Applicants with experience in journalism or a media-related industry must provide details of employment history (CV).

Applicants must provide an 800 word opinion article on the topic “Journalists – who are they really?” If applying on basis of industry experience, samples of work published in the print or electronic media are required, as well as letter(s) from employer(s) to verify details of employment.

All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong's English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html. Selected applicants may be required to attend an interview.

**Advanced Standing**

Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter seeking advanced standing must be accompanied by verified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.
Course Structure/Requirements

Students are required to undertake a program of study totalling 48 credit points made up of a combination of subjects offered within the Journalism Schedule or in combination with other Faculties. The program of study must be discussed with the Journalism Program Coordinator prior to enrolment.

Master of Journalism Advanced

Testamur Title of Degree: Master of Journalism Advanced
Abbreviation: MJourAdv
Home Faculty: Faculty of Creative Arts
Duration: 18 months full-time or part-time equivalent
Total Credit Points: 72
Delivery Mode: On Campus
Starting Session(s): Autumn and Spring
Location: Wollongong
UOW Course Code: 1593
CRICOS Code: 064109B

Overview

This program is reserved for a small number of outstanding students. It is anticipated that students accepted into this program will have a well-established career as industry professionals behind them and will be seeking a qualification that not only reflects their standing within the industry, but also enables them to undertake a course of study that enables them to apply that experience and knowledge in either a practical or theoretical context.

Direct entry into this program will be highly competitive and will reflect the standing of the individuals accepted. The program length relative to other postgraduate offerings reflects the fact that students will be able to negotiate advanced standing based on their industry experience.
Entry Requirements / Assumed Knowledge

Students who achieve outstanding results in the first six months of study in the Master of Journalism program may apply to upgrade to the Advanced Masters.

Direct entry into the Advanced Masters program will only be available to people who have considerable Journalism experience (generally a minimum of 10 years). Entry will also be dependent on the provision of a portfolio of work and an interview.

Applicants will be able to negotiate a program of study that involves a combination of subjects (selected from Journalism and other programs across the University). At least 60% of the program of study completed by direct entry students must be offered by the School of Journalism and Creative Writing.

Applicants must provide an 800 word opinion article on the topic “Journalists – who are they really?” If applying on basis of industry experience, samples of work published in the print or electronic media are required, as well as letter(s) from employer(s) to verify details of employment.

All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong’s English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html. Selected applicants may be required to attend an interview.

Advanced Standing

Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter requesting advanced standing must be accompanied by certified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.

Course Structure/Requirements

The exact program of study must be negotiated with the Head of School, and will generally include 48 credit points from the Master of Journalism (see Schedule below) plus a 24 credit point thesis or creative project (any medium). Students are able to include subjects offered across the University, with a minimum of 60 percent being selected from the Journalism schedule.

University of Wollongong
Graduate Certificate in Professional Writing

Testamur Title of Degree: Graduate Certificate in Professional Writing
Abbreviation: GradCertProfWrit
Home Faculty: Faculty of Creative Arts
Duration: 6 months full-time or part-time equivalent
Total Credit Points: 24
Delivery Mode: On Campus
Starting Session(s): Autumn *
Location: Wollongong
UOW Course Code: 1175
CRICOS Code: 064112G

*Not on offer in 2009. First intake will be in 2010.

Overview
The Graduate Certificate in Professional Writing will suit students seeking careers in industry, business or government with a writing focus. The two Professional Writing subjects are designed to provide students with the capacity to produce a range of written materials (reports, media releases, position papers, annual reports, speeches and brochures). Students who complete the program with a credit average or higher may enrol in the Masters in Professional Writing.

Entry Requirements / Assumed Knowledge
Undergraduate degree or professional experience in a cognate discipline.
Qualified journalists are eligible for consideration on the basis of documented evidence of at least two years full-time experience.
Applicants with an undergraduate degree must provide certified academic transcripts and curriculum vitae (CV) outlining work history and/or academic study. Applicants with experience in journalism or a media-related industry must provide details of employment history (CV).
Applicants must provide an 800-word opinion article on the topic – 'Journalists – who are they really?' If applying on basis of industry experience, produced in a publishable format (either for in-house or industry publications) are required, as well as letter(s) from employer(s) to verify details of employment.
All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong's English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html.

Advanced Standing
Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter seeking advanced standing must be accompanied by certified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.

Course Program
Students who have completed a Bachelor of Communication and Media Studies with a Journalism stream could substitute JRNL911 and JRNL912 with other subjects from the elective stream, including subjects from the 200 or 300 level Bachelor of Journalism program.

2009 Postgraduate Handbook 77
Master of Professional Writing

Testamur Title of Degree: Master of Professional Writing
Abbreviation: MProfWrit
Home Faculty: Faculty of Creative Arts
Duration: 12 months full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: On Campus
Starting Session(s): Autumn*
Location: Wollongong
UOW Course Code: 1595
CRICOS Code: 064111G

*Not on offer in 2009. First intake will be in 2010.

Overview
This program is designed for two cohorts of students: (1) those who have completed the Graduate Certificate in Professional Writing and wish to further upgrade their skills; and (2) people working in a cognate field who wish to obtain professional qualifications that recognise their skill set.

Entry Requirements / Assumed Knowledge
Available to students who have completed the Graduate Certificate in Professional Writing with a credit average or higher.
Qualified journalists are eligible for consideration on the basis of documented evidence of at least three to five years full-time industry experience.
Students who complete this option will have undertaken 48 credit points of study either within the School of Journalism and Creative Writing or in combination involving Journalism and other Faculties. Students will be required to complete at least 60% of their program of study in the School of Journalism and Creative Writing to qualify for the Master of Professional Writing degree.
Applicants with an undergraduate degree must provide certified academic transcripts and curriculum vitae (CV) outlining work history and/or academic study. Applicants with experience in journalism or a media related industry must provide details of employment history (CV).
Applicants must provide an 800 word opinion article (refer to application form). If applying on basis of industry experience, samples of work published in the print or electronic media are required, as well as letter(s) from employer(s) to verify details of employment.
All applicants must be able to provide documented proof of English language proficiency. The University of Wollongong’s English Language Requirements are outlined at www.uow.edu.au/prospective/international/english/index.html. Selected applicants may be required to attend an interview.

Advanced Standing
Advanced standing may be granted for a particular subject(s) on the basis of previous education, training or professional experience. A letter seeking advanced standing must be accompanied by certified copies of documents or other evidence to substantiate the request. Evidence may include academic transcripts, samples of published work, letters from employers verifying experience and length of service.

Course Structure/Requirements
Students are required to undertake a program of study totalling 48 credit points made up of a combination of subjects offered within the Journalism Schedule or in combination with other Faculties. The program of study is to be approved by the Program Coordinator and/or Head of School.

Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Spring2009/Autumn2010  Wollongong  On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides students enrolled in the Master of Arts-Research degree with training in the theories and research methodologies current in their chosen discipline areas. This training involves three modules of study: 1. a specific theory and methods module; 2. an advanced content-based module in the student's discipline area; and 3. a module in which the student writes a detailed research proposal for the Master of Arts-Research thesis. The precise content of these modules will be determined on a case-by-case basis, with the student and the supervisor. It will be approved by the Head of Postgraduate Studies.

DES910  Graphic Design Theory and Industry Research Methodologies
Autumn  Wollongong  On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject explores key aspects of contemporary graphic design theory and practice in both national and transnational contexts. It allows students to develop their own research within specific theoretical frameworks and with knowledge of historical design movements. The subject overviews production processes and emerging technologies of visual communications at both an individual and industrial level. As opportunity permits, guest designers and industry representatives will lead discussion on relevant design issues.

DES911  Studies in Process and Analysis - Graphic Design
Spring  Wollongong  On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Students will develop a design concept based on relevant research, technical issues and design process. The concept will demonstrate research and critical analysis of the issues involved in producing a creative design work and may refer to examples of similar work by recognised designers or design movements. Students will be expected to work independently and at an advanced level and consult with their Subject Co-ordinator at specified benchmark times in the development of their work.

DES913  Major Presentation - Graphic Design
Annual  Wollongong  On Campus
Spring2009/Autumn2010  Wollongong  On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: Students will develop a substantial portfolio presentation that demonstrates original thinking, knowledge of the design area, and technical and production abilities that are required to produce a major piece of design work in a sustained thematic and cohesive way. As an example of content, graphic designers would submit 10 graphic design works; interactive designers would produce a major interactive website or multimedia piece, or several smaller sites or multimedia works. A detailed outline of the proposed creative project must be submitted within the first 6 weeks of the program. A cross-disciplinary approach may be possible.

JOUR992  Research Topics in Journalism
Annual  Wollongong  On Campus
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Spring2009/Autumn2010  Wollongong  On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide students enrolled in the Master of Arts-Research (Journalism) degree with training in the theories and research methodologies current in their chosen discipline areas. This training involves three modules of study: (1) a specific theory and methods module. 5,000 - 7,000 words, possibly one short and one long essay. Seminar participation if determined necessary, will also be assessed (2) an advanced content-based module in the student's discipline area requiring the completion of the contents of an existing subject and (3) a module in which the student writes a detailed research proposal for the thesis covering - an annotated bibliography 40% - the development of the thesis question and rationale for chapter divisions, involving exposition of thesis argument 40% and - an oral presentation of the thesis proposal 20% The precise content of these modules will be determined on a case by case basis, with the student and the supervisor. It will be approved by the Program Coordinator.

JRNL910  Journalism and Society
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject begins by posing a number of questions: What is journalism? And what is it that journalists actually do? The discussion then moves on to consider a number of questions about news practice. For example, how do journalists decide what information should be converted into news? What is gatekeeping? Who wields power within media organisations? How are journalists socialised and do they have the capacity for independent action? What is the Janus view of the media? The discussion then turns to the question of media effects. This can be summed up in the following questions: To what extent does the media influence the views of individuals (or society as a whole)? How can such influence, if it exists, be measured? Finally, the discussion turns to the relationship between the media organisation and their audience. It focuses on a number of questions to do with building and maintaining relationships, market research etc.
University of Wollongong

---

**JRN911  News Writing Fundamentals**
Autumn  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: JOUR901 News and Feature Writing

Subject Description: This foundation subject develops basic skills in straight news reporting for print news. Attention will be given to objective and subjective aspects of news interviewing, structuring and writing. News story areas covered will include writing hard news, court reporting, writing for police rounds as well as colour stories, human interest stories and writing news stories for the arts. Students will apply news writing techniques to news feature writing and explore some of the issues and stylistic devices that inform longer news related features and news packages. Attention will be paid to interviewing and information gathering techniques and the application of conventional news values to reporting.

---

**JRN912 Legal and Ethical Issues**
Autumn  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Exclusions: JOUR903 Ethics, Law and Standards

Subject Description: This subject examines the legal and ethical framework which governs the work of journalists. It considers the nature, efficacy and administration of ethical codes relevant to journalism, particularly the Media Entertainment and Arts Alliance (MEAA) Code of Ethics and the Australian Press Council's Statement of Principles. Other aspects of professional conduct and professional standards considered include guarding against defamation actions; libel laws; breach of privacy; confidentiality; protection of sources; standards of accuracy, fairness and subjectivity in journalism.

---

**JRN913 Introduction to Convergent Journalism**
Autumn  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Exclusions: JOUR932 on-line and Research Journalism

Subject Description: This subject introduces students to the notions of convergent journalism. Students begin by exploring changes in journalism inspired by the development of the internet and other technologies. They will be introduced to the theories and practices of digital media. They will be introduced to photojournalism and simple audio techniques suitable for the production of online audiovisual packages. Other lectures cover a range of topics, including understanding and using hypertext, building a blog and podcasting. Students will develop and maintain a blog, learn to podcast and, using a combination of text and images, develop their own web-based publication.

---

**JRN916 Journalism Investigation and Research**
Autumn  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: JOUR933 On-Line and Research Journalism

Subject Description: This subject is designed to develop a range of research and journalism investigative methods. It will include the use of online data bases, the Internet, library and archive work and other sources of public information. The use of survey material in journalism will be studied, particularly the presentation of this data in a news format. The organisation of news investigation teams, the techniques that they use, and what they produce will be analysed. Part of the subject will be devoted to news design and presentation on the World Wide Web.

---

**JRN917 Feature Writing for Journalists**

Spring  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Exclusions: JOUR902 Journalistic Method and Practice

Subject Description: This subject focuses on extending news stories into feature writing, with consideration given to ethical and legal restraints. Topics covered include: feature story introductions; feature story structures; dialogue and characterisation; scene descriptions; feature length interviews; online and conventional research; and developing concepts. Different feature forms such as profiles, news features, historical features, reviews and opinion essays will be covered.

---

**JRN918 Radio Journalism**
Spring  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Exclusions: JOUR931 Radio Journalism

Subject Description: This subject provides advanced skills in script writing, editing, producing and presenting radio news and current affairs programs and features. The course has a strong practical component.

---

**JRN919 Television Journalism**

Spring  Wollongong  On Campus

Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: JOUR932 Television Journalism

Subject Description: This subject provides advanced skills in script writing, editing, producing and presenting television news and current affairs programs. A primary emphasis will be placed on techniques for gathering television news or documentary materials in the field.

---

**JRN920 Journalism Project**

Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: JOUR945 Advanced Journalism Project

Subject Description: This subject provides a shorter alternative project for final session students not wanting to undertake the major project, or electing to do additional course work, or wanting to develop vocational skills acquired in previous subjects. Project areas available include: news design and presentation on the World Wide Web; print media production; electronic news gathering and production; multimedia production or a short film or radio piece in the documentary and current affairs.
mode. Alternatively students wanting to cover broader aspects of news gathering and presentation can do so, in the following areas: environment; science and technology; public affairs; arts; lifestyle and leisure; economics and business; religion; and sports. Concepts and skills can focus on print production or the electronic journalistic genre.

**JRN922  Advanced Journalism Project**
- **Spring** Wollongong  On Campus
- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject is designed to allow students the opportunity to undertake either practical or theoretical projects (or a combination of the two). This could include an internships, a minor thesis or a combination of mini thesis and creative/practical project. Students undertaking this subject may work within a single medium (print, broadcast or online) or a combination of media. The subject also enables students to explore cross-program or cross-faculty options. The project brief will be formulated in consultation with an academic member of staff who has agreed to act as supervisor.

**JRN923  Advanced Convergent Journalism**
- **Spring** Wollongong  On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** In this subject students will build on the skills developed in JRN913 (Introduction to Convergent Journalism) and the broadcast subjects to hone the skills required to work in a convergent newsroom where staff work under tight deadline pressures and are expected to value-add to stories that might appear in a publication's hard-copy version. The subject focuses on the development of audio and audio-visual packages using commercial software programs like Flash and the production of simple websites through open source content management systems. They will produce their own portfolio site and also play a role in the development and editing of the School's on-line publication.

**JRN925  International Journalism**
- **Autumn** Wollongong  On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Exclusions:** JOUR991 Major Journalism Project

**Subject Description:** This subject focuses on international news flow in the context of the New World Information Order debates in the early 70s and news flow in the context of Internet communication; culture, values and ideology in international news production (discussions derived mainly from Australian reporting of Asia); media systems in selected Asia-Pacific countries; and renewed interest in community development oriented journalism. International journalism provides an historical, cultural and social background for students wanting to work in Australia's growing multicultural media.

**MUS 910  Music Analysis**
- **Autumn** Wollongong  On Campus
- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject explores contemporary compositional practice and theory, within a program of directed and independent reading and analysis. With an emphasis on understanding the student's own creative practice, the subject encourages the development of individual research strengths. Both textual and compositional research strategies are emphasised in presentation and writing.

**MUS 914  Major Presentation - Music Composition**
- **Annual** Wollongong  On Campus
- **Credit Points:** 24
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Students will undertake a programme of study leading to the development of a major compositional project or portfolio, the substance and duration of which will be determined in consultation with the student's supervisor/s. The Major Presentation will reflect their ability to develop, sustain and execute original ideas, supported by excellence in technical ability. The Major Presentation must be accompanied by an analytical commentary of at least 2,000 words including appropriate citation. Students must submit a detailed outline of their proposed work for the Major Presentation to the supervisor/s by the fourth week of enrolment.

**MUS 915  Studies in Composition Technique**
- **Spring** Wollongong  On Campus
- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject provides an overview of the contemporary processes and technical concerns employed in the development of original music composition. It emphasises an analysis of the processes, experimentation, technologies and themes of compositional work by individual composers, as well as the performance, production and distribution of contemporary music in relation to emerging technologies. Students will create a folio of short works in genres determined in consultation with their Subject Coordinator. Each student will document the research processes undertaken in the making of his or her creative work. Students will be expected to work at an advanced level and with a high degree of independence.
THEA910  Theatre Analysis  
Autumn  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject explores contemporary Australian performance and theatre practice and theory, within a program of directed and independent reading and analysis. With an emphasis on understanding the student's own creative practice within their own culture and history, the subject encourages the development of individual research strengths. Both textual and theatre/performance research strategies are emphasised in presentation and writing.

Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject overviews production processes and technical concerns of art in contemporary practice. It emphasises an analysis of the processes, experimentation, materiality and content of visual work by individual artists, and the presentation and installation of artwork in relation to emerging technologies. Each student will document the research processes in the making of his or her creative work in a visual journal. Students will be expected to work at an advanced level and with a high degree of independence in their chosen studio discipline.

VISA911  Advanced Techniques in Theatre  
Spring  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students will prepare to undertake a written exegesis around their creative work. Each student will document their research process through a reflective journal, as well as developing drafts and visual materials as appropriate and an annotated bibliography. Students will be expected to work at an advanced level and with a high degree of independence.

THEA913  Major Presentation - Theatre  
Spring  Wollongong  On Campus  
Credit Points: 24  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students will undertake a practical presentation of their creative work in theatre and/or performance. All aspects of the presentation including content and duration will be determined with the approval of the supervisor. The creative work should reflect the student's ability to develop, sustain and execute original ideas in a cohesive and capable way. It must be accompanied by a 2,500-word exegesis, describing and analysing the processes undertaken. Students must submit a detailed outline of their proposed work for the Major Presentation to the supervisor/s by the fourth week of enrolment. A cross-disciplinary approach may be possible.

VISA910  Visual Arts Theory  
Autumn  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject explores contemporary arts practice and theory in both national and transnational contexts. With an emphasis on placing the self within a specific culture and history, the subject encourages the development of individual research strengths. It refers to historical art and craft movements through current theoretical frameworks. Both textual and visual research strategies are emphasised in presentation and writing.

VISA911  Studies in Process and Analysis - Visual Arts  
Spring  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: In fortnightly seminars students will undertake a detailed study of relevant texts in their area of specialisation, in poetry, prose fiction or script writing. The subject aims to develop and refine the ability to trace in detail the relationship between the effects gained by a text and the techniques of writing used to achieve them.

WRIT910  Analysis of Texts  
Autumn  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: In fortnightly seminars students will undertake a detailed study of relevant texts in their area of specialisation, in poetry, prose fiction or script writing. The subject aims to develop and refine the ability to trace in detail the relationship between the effects gained by a text and the techniques of writing used to achieve them.

WRIT911  Literary Composition  
Spring  Wollongong  On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: In fortnightly seminars students will be required to develop and refine their awareness of the techniques and processes of literary composition and to demonstrate their control of these through the composition of a major piece of writing in a mode outside of their usual practice. Students will be required to discuss the effects they are seeking in their writing and to describe and evaluate the techniques they have employed to achieve those effects.
WRIT913  Major Presentation -
Creative Writing

Annual  Wollongong  On Campus
Spring2009/Autumn2010  Wollongong  On Campus

Credit Points: 24
Pre-requisites: None
Co-requisites: None

Subject Description: Students will present either a work of prose fiction (minimum 25,000 words); or a collection of poetry (48 pages); or a 60 minute theatre/film/television script. Students must submit a detailed outline of their proposed work for the major presentation to their supervisor/s by the fourth week of enrolment. A cross-disciplinary approach may be possible.

Doctor of Philosophy

Testamur Title of Degree: Doctor of Philosophy
Abbreviation: PhD
Home Faculty: Education
Duration: 3 years full-time or equivalent
Total Credit Points: 144
Starting Session(s): Autumn, Spring
UOW Course Code: 201
CRICOS Code: 001246C

Overview
The Doctor of Philosophy provides the opportunity for students to pursue in-depth research in a range of areas associated with those undertaken by the Research Units within the Faculty of Education. PhD candidates are encouraged to become involved in research group activities and the wider research culture of the faculty.

Entry Requirements
Entry to this degree is available to candidates who meet the University entry requirements for Doctor of Philosophy (PhD) candidature. In the first instance this requires the completion of a Bachelors degree with Honours Class II or higher in an appropriate area, or an equivalent qualification with an appropriate research component.

Interested candidates should contact the Associate Dean (Research) to discuss their area of research and supervision.

Course Requirements
Candidates for this degree enrol in a Doctoral Thesis (THES912/924). They may also be asked to audit or enrol in research preparation subjects (e.g. EDGZ930, 931, 932). See subject descriptions for further information. All new students enrolling in a research degree are expected to prepare a research proposal within the first year of their candidature and to become involved in activities such as student colloquia.

Doctor of Education

Testamur Title of Degree: Doctor of Education
Abbreviation: EdD
Home Faculty: Education
Duration: 3 years full-time or equivalent
Total Credit Points: 144
Delivery Mode: Flexible
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 205
CRICOS Code: 016127J

Overview
The Doctorate of Education (EdD) is a program to prepare professional leaders in Education. It is a doctoral level program completed by a combination of coursework and thesis, offered in the areas of:
- Adult Education/Vocational Education and Training/Higher Education
- Educational Leadership
- Information Technology in Education and Training
- Literacy Education
- Physical and Health Education
- Special Education (including Gifted Education)
- Teaching English to Speakers of Other Languages (TESOL, including TEFL)

Entry Requirements
Entry to this degree is available to candidates who:
1. meet the University entry requirements for Doctoral candidature. Normally this would be an appropriate Masters degree, completed at credit (65%) level or better or the completion of a Bachelors degree with Honours Class II or higher in an appropriate area, or an equivalent qualification, and
2. have completed a minimum of three years of relevant professional experience.

Advanced Standing
Advanced standing of up to 12 credit points may be granted for previous graduate study at MEd level.
Course Requirements

The program for the degree will require successful completion of:

1. 48 credit points of subjects including:
   a) at least 24 credit points selected from subjects in the Faculty's graduate schedule, which will provide specific preparation for the thesis component of the degree; and
   b) 24 credit points of research subjects to provide research preparation for the thesis component of the degree including
      EDGZ930 Advanced Research methods in Education
      EDGZ931 Research Proposal
      EDGZ932 Advanced Research Seminar

2. 96 credit points as a supervised thesis (THES912/924), to be examined externally. This thesis will contribute to two thirds of the total assessment for this award.

Each candidate will be required to select a program of study in consultation with their supervisor(s) and the Associate Dean (Research) to ensure that subjects chosen do not duplicate previous graduate work and form a coherent pattern of study.

Candidates will be required to pass all coursework subjects at the first attempt. The coursework component of the program must be completed with an average grade at not less than Credit (65%) level. Students who do not meet this requirement will have their doctoral candidature terminated.

Overview

The Master of Arts – Research is a specialised research degree for students who are not professionally qualified educators but who wish to pursue research careers in education.

Entry Requirements

Entry is available to candidates with a Bachelors Honours degree; a Masters degree by coursework or a Bachelors degree by coursework (or equivalent) where a Distinction average has been maintained, or a Bachelors degree by coursework including additional research experience deemed appropriate by the Faculty of Education.

Course Requirements

The degree program will comprise up to 72 credit points of study including:

a) 24 credit points of research subjects, which will provide research preparation for the thesis component of the degree, including

   (i) EDGZ930 Advanced Research Methods in Education
   (ii) EDGZ931 Research proposal
   (iii) EDGZ932 Advanced Research Seminar

b) 48 credit points as a supervised thesis (THES912/924), to be examined externally.

Candidates will be required to pass all coursework subjects at the first attempt. Students who do not meet this requirement will have their candidature terminated.

Overview

The Master of Education – Research is a specialised research degree for students who either wish to pursue research careers in education or whose future career will require them to interpret and apply the findings of educational research.
Entry Requirements

Entry is available to candidates with a Bachelors Honours degree with a major in Education; a Masters degree by coursework in Education, or a Bachelors degree by coursework majoring in Education (or equivalent) where a Distinction average has been maintained, or a Bachelors (degree) by coursework majoring in Education including additional research experience deemed appropriate by the Faculty of Education. It is expected that the candidate would have prior knowledge in an introductory research methods through a Bachelor or Masters degree program.

Course Requirements

The degree program comprises:

a) 24 credit points of research subjects which will provide research preparation for the thesis component of the degree, including
   (i) EDGZ930 Advanced Research Methods in Education
   (ii) EDGZ931 Research Proposal
   (iii) EDGZ932 Advanced Research Seminar

b) a supervised thesis to the value of 48 credit points (THES912/924), to be examined externally.

Candidates will be required to pass all coursework subjects at the first attempt. Students who do not meet this requirement will have their candidature terminated.

Overview

The Master of Arts specialising in Information Technology in Education and Training is aimed at those who wish to develop information and communication technology application for training and educational contexts. It is a professional development program which introduces the design process for multimedia and discusses issues such as how the Internet and other computer mediated learning can support learning.

Other topics covered in the program include: the design of CD-Rom products, digital media projects, cognition and interface design, using websites and networks for learning and the evaluation of technology-based learning systems. It differs from the MEd program in that no formal educational background is required for entry.

Entry Requirements

Students should hold a recognised Bachelor degree and have access to a training or educational context in which to undertake course projects.

Course Requirements

Subjects are chosen from those listed in the Information Technology specialisation listed under the Master of Education Program.

Course Program

48cp of subjects, chosen from the IT specialisation, in consultation with the specialisation co-ordinator.
Master of Education

Testamur Title of Degree: Master of Education
Abbreviation: MEd
Home Faculty: Education
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: On Campus, Distance
Starting Session(s): Autumn, Spring
Location: Wollongong, Distance
UOW Course Code: 576, DE576
CRICOS Code: 000289M

Overview
The Master of Education is an introductory higher degree for teachers and educators wishing to pursue advanced studies in their area of interest. Many subjects require the application of research and theoretical insights into actual practice, and it is desirable that students have some full-time workplace/teaching experience.

Entry Requirements
The degree is subject to the University's rules for the award of the degree of Master together with the following guidelines:

To qualify for admission as a candidate for the Master of Education, a student must have qualified for a Bachelor degree of the University, or an equivalent qualification from an approved institution, with a major study in Education, eg. BA plus G Dip Ed, provided that the degree or equivalent qualification has a minimum study duration of four years. Other qualifications or substantial professional experience may be considered as meeting these requirements and should be discussed with the Director – Graduate Teaching. Candidates with a three-year qualification in Education completed at Distinction level may be considered for admission to the MEd program.

A candidate may not include in this degree program any subject which the candidate has previously taken and had credited towards a qualification accepted for admission under Section 1 of these requirements.

Course Requirements
1. The MEd program will normally comprise 48 credit points of study, chosen as follows.
   a. EDGZ921 Introduction to Research and Inquiry (6 credit points) or equivalent. It is recommended that this subject be completed early in the program of study; and,
   b. at least 24 credit points from a single Program (major study). The core of subjects to be covered to complete a major study will vary from Program to Program; and
   c. up to 18 credit points of electives chosen from any Program. The amount of choice available will vary from program to program. Students wishing to proceed directly to MEd (Research) or Doctoral programs should include Advanced Research Methodology and project subjects in their Program, chosen in consultation with their Teaching Program coordinator.

   Students should discuss their proposed course of study with the relevant Program Coordinator. Teaching accreditation in specialist areas may depend on subject choice.

2. A candidate may be eligible to include a major study area on the final degree testamur (eg MEd majoring in Information Technology or MEd majoring in Special Education). In order to qualify for a major to be recorded on the degree testamur, a candidate must complete at least 30 credit points from the chosen program area. Joint majors will not be recorded.

3. Entry to Doctoral degrees (EdD or PhD) may be available to candidates who meet the University entry requirements for Doctoral candidature. Normally this would be an appropriate Masters degree, completed at credit (65%) level or better.

Advanced Standing
The Faculty of Education may approve up to 12 credit points of Advanced Standing in the Master of Education to currently enrolled candidates who have completed other accredited professional development courses run by employing bodies. For further information contact the Faculty, or check the Faculty of Education website, under Postgraduate Programs.

Major study requirements must still be met by the candidate, ie., normally this credit cannot be substituted for a compulsory subject within a program, or form part of a major study within a program. Candidates may claim a maximum of 12 credit points of advanced standing on this basis in one program of study.

* Compulsory subject in all MEd programs.

Overview

The Master of Physical and Health Education is for practitioners in sport, recreation and physical and health education related fields, to upgrade their qualifications and stay abreast of developments in their fields. Continuing students wishing to discuss their progression in the program should contact the PHE Program co-ordinator.

Entry Requirements

Students will have a four year undergraduate degree with a recognized teaching credential in Physical and Health Education. Special consideration may be given to students who have, for example, substantial experience in the field.

**Overview**

The Adult Education and Training postgraduate specialisation has been developed to respond to an emerging market in adult, vocational training and higher education and the need to respond to initiatives in education and training around online learning and flexible delivery. The program will capitalise on an environment of innovation and change in:

- Higher Education
- TAFE and VET in Schools programs
- Health and Community Services
- Military, police and security services
- Corrective services

The courses provide opportunity for students, who are most often mid-career professionals, to develop work-based projects to sustain innovation and change in their own organizations in their post graduate courses.

The program will incorporate a learning framework and a modular structure that provides opportunities for:

- Flexible entry and exit
- Customisation
- Multiple client groups to access the course in fee paying market

The program is offered in online mode and will have options for total online and mixed mode delivery depending on student and client needs.

Overview

The Graduate Diploma in Education (Primary) provides a professional course of pre-service education for intending primary school teachers. It also serves as an introduction to the study of education for those who wish to pursue further studies in the field, for example, at Masters level. The structure of the program seeks to combine the practical and theoretical elements of teaching by engaging students in professional aspects, including methods (Key Learning Areas-KLA) and classroom practice, from the beginning of the course. Underpinning and integrated within the professional aspects are curriculum studies and the “foundation” disciplines of education. Each component is intended to contribute to the development of concepts and skills relating to an understanding of, and competence in, teaching. It is expected that prospective teachers will develop as autonomous professionals who will be competent, innovative, and capable of contributing to the formulation of curriculum in schools and committed to their own continuous professional growth.

The course is a 72 credit point program accelerated into one extended calendar year, commencing mid January and concluding late November. It is not possible to study the course part-time, or to commence the course in the middle of the year.

The GDipEd program involves lectures, seminars, tutorials, individual assignments, group exercises and eleven weeks of full-time professional experience in schools. Students are advised that the structure of the course makes it essential that it be undertaken as full-time study.

Literacy Requirements

To satisfy the outcomes of all professional experiences students will require highly developed written and spoken English literacy skills. Students may be required to complete private tuition or courses in English literacy to develop their spoken and written English skills to a level of competency that will enable them to meet professional experience outcomes. These outcomes are required to satisfactorily pass this course.

Entry Requirements

Entry is available to graduates of this or another approved university who seek teacher qualifications. Entry to the course is based on academic merit and suitability of the first degree to teaching requirements. Preference will be given to graduates of the University of Wollongong. A statement of interests and experience in Education will be requested from applicants and will be considered as part of the selection process.

Prohibited Employment Legislation

Under the Child Protection (Prohibited Employment) Act 1998, all students enrolled in this degree are required to complete a Prohibited Employment Declaration before undertaking any professional experience that involves children or young people.

Course Requirements

Students must satisfactorily complete every subject and major component in their program of study before the Graduate Diploma in Education will be awarded. More specific details of assessment will be given in individual subject outlines. Students are required to successfully complete all subjects relevant to their particular area of study.
A letter from the Faculty of Education stating that the student’s undergraduate program is acceptable to the Department of Education and Training for employment as a teacher of Primary Education is compulsory for each student in their application.

**Overview**

The Graduate Diploma in Education (Secondary) provides a professional course of pre-service education for intending secondary school teachers. It also serves as an introduction to the study of education for those who wish to pursue further studies in the field, for example, at Masters level. The structure of the program seeks to combine the practical and theoretical elements of teaching by engaging students in professional aspects, including Methods work and classroom practice, from the beginning of the course. Underpinning and integrated with the professional aspects are curriculum studies and the “foundation” disciplines of education. Each component is intended to contribute to the development of concepts and skills relating to an understanding of, and competence in, teaching. It is expected that prospective teachers will develop as autonomous professionals who will be competent, innovative, and capable of contributing to the formulation of curriculum in schools and committed to their own continuous professional growth.

The course is for one year full-time, over an extended academic year of 36 teaching weeks from mid February to late November. It is not possible to study the course part-time, or to commence the course in the middle of the year.

The GDipEd program involves lectures, seminars, tutorials, individual assignments, group exercises and eleven weeks of full-time professional experience in schools. Students are advised that the structure of the course makes it essential that it be undertaken as full-time study.

**Literacy Requirements**

To satisfy the outcomes of all professional experiences students will require highly developed written and spoken English literacy skills. Students may be required to complete private tuition or courses in English literacy to develop their spoken and written English skills to a level of competency that will enable them to meet professional experience outcomes. These outcomes are required to satisfactorily pass this course.
Entry Requirements

Entry is available to graduates of this or another approved university who seek teacher qualifications. Entry to the course is based on academic merit and suitability of the first degree to teaching requirements. Preference will be given to graduates of the University of Wollongong. A statement of interests and experience in Education will be requested from applicants and will be considered as part of the selection process.

Prohibited Employment Legislation

Under the Child Protection (Prohibited Employment) Act 1998, all students enrolled in this degree are required to complete a Prohibited Employment Declaration before undertaking any professional experience that involves children or young people.

Course Requirements

Students must satisfactorily complete every subject and major component in their program of study before the Graduate Diploma in Education will be awarded. More specific details of assessment will be given in individual subject outlines.

Secondary Methods currently offered are: Commerce/Business Studies, Legal Studies, Geography, History, English, Computing Studies, Drama, French, Mathematics, Science, Art, Music, Physical and Health Education.

Students are advised to check with the Faculty regarding the availability of specific Methods subjects.

Students are also advised to check with the Faculty through the Faculty's Student Service Centre (Building 23, Room G21) regarding the combinations of methods which will satisfy the requirements of the NSW Department of Education. A letter from the Faculty of Education stating that the student's undergraduate program is acceptable to the Department for recognition as a teacher of the chosen methods area(s) is compulsory for each student in their application.

Course Program

Subjects Session Credit Points

For those students pursuing secondary school methods: 54cp Program, as below.

EDGD800 Professional Experience GDE Annual 0
EDGD803 Literacy Across the Curriculum GDE Annual 6
EDGD801 Learning and Behaviour GDE Autumn 6
EDGD802 Educational Sociology GDE Autumn 6
EDGD805 Professional Skills for PDHPE GDE Autumn 6

(For PHE students only)

EDGD806 Aboriginal Education GDE Autumn 6
EDGD804 Personal Development, Health and Physical Education (not PHE methods students) GDE Spring 6

EDGD807 Learners with Special Needs GDE Spring 6
EDGD808 Quality Teaching GDE Spring 6

Plus two Secondary Methods in an approved combination, chosen from the following list (6cp each)

Overview

The Graduate Diploma in TESOL provides a substantial specialist qualification for working in the English language teaching area. It meets the specific professional development needs of a broad range of English language teachers and educators. Participants can choose from a range of subjects which provide a foundation in second language teaching and learning. The course includes a supervised TESOL practicum - a requirement of most employers. Applicants are advised to check with potential employing bodies regarding employment requirements.

The course prepares participants to work in a wide variety of contexts in Australia and internationally with children, teenagers and adults. It provides students with in-depth understanding of areas such as second language development, systems of language and computer assisted language learning along with practical skills in second language teaching and learning. While it has a strong practical core, it has a greater emphasis on theory than the Graduate Certificate in TESOL.

The course may provide credit towards the Master of Education in TESOL and for those without a background in Education, may serve as an alternative entry into the Master of Education program.

This course is offered both on campus and through distance education (delivered primarily online).

Entry Requirements

Candidates must meet the normal University requirements for Graduate Diploma entry, i.e., a three-year Bachelor degree or equivalent.

It is assumed that students will have at least a three-year undergraduate degree, preferably including subjects related to the teaching of English (for example, TESOL, English Literature, Applied Linguistics). No teaching experience is required.

Students from a Non-English speaking background must also meet current Faculty English language requirements (6.5 IELTS).

Advanced Standing

Candidates who have completed a Certificate in English Language Teaching to Adults (CELTA) or equivalent qualification, in addition to the normal Graduate Diploma entry requirements, may be eligible for up to 12 credit points Advanced Standing.

Course Program

The GradDipTESOL consists of subjects chosen from the list below, including a Practicum/Project (48 credit points in total). It is recommended that students take EDGT930 early in their study program. On-campus students should consult the relevant timetable to plan their course of study, as not all subjects are offered each session.

Students must take 48cp chosen from the following subjects:

Overview

This program seeks to explore adult education in a broad cross-sectoral response and will also aim to have significant links with other programs in the Faculty of Education.

The program seeks to capitalise on an environment of innovation and change in:
• Higher Education
• TAFE and VET in Schools programs
• Health and Community Services
• Military, police and security services
• Corrective services

The course provides opportunity for students, who are most often mid-career professionals, to develop work-based projects to sustain innovation and change in their own organizations in their post graduate courses.

The program incorporates a learning framework and a modular structure that provides opportunities for:
• flexible entry and exit
• customisation
• multiple client groups to access the course in fee paying market

The program is offered in online mode and will have options for total online and mixed mode delivery depending on student and client needs.

Entry Requirements

Entry is available to candidates who satisfy the University’s entry requirements for Graduate Certificates (i.e. a three year degree or equivalent).

Advanced Standing

Students who wish to continue onto the MEd or GDipAdult Education programs can transfer 24 credit points for subjects completed in a Graduate Certificate program, provided the candidate has not formally graduated with the Graduate Certificate award. If the candidate has formally received the Graduate Certificate, up to 12 credit points of advanced standing will be granted towards the MEd or GDipAdultEd.

Course Program

Graduate Certificate in Educational Leadership

Overview
The Graduate Certificate in Educational Leadership is designed to provide an opportunity for mid-career professionals with a background in schools, tertiary education and adult education and training to undertake an intensive professional development program to address the changing nature of their work.

Entry Requirements
Entry is available to candidates who satisfy the University's entry requirements for Graduate Certificates (i.e. a three-year degree or equivalent).

Advanced Standing
Students who wish to continue onto the MEd program can transfer 24 credit points for subjects completed in a Graduate Certificate program, provided the candidate has not formally graduated with the Graduate Certificate award. If the candidate has formally received the Graduate Certificate, up to 12 credit points of advanced standing will be granted towards the MEd.

Up to 6cp of advanced standing may be granted in the GCertEdLeadership, for relevant study or professional development courses completed, that are in addition to the normal entry requirement for this program.

Graduate Certificate in TESOL (Teaching English to Speakers of Other Languages)

Testamur Title of Degree: Graduate Certificate in TESOL
Abbreviation: GCertTESOL
Home Faculty: Education
Duration: 1 session or equivalent part time
Total Credit Points: 24
Delivery Mode: On Campus, Distance
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 1164, D1164
CRICOS Code: 020199C

Overview
The Graduate Certificate in TESOL provides an accredited specialist qualification for teachers who want to teach English to speakers of other languages in Australia or internationally to children, teenagers or adults. The course is regarded as a highly practical qualification for those with little or no experience in second language teaching.

The course consists of a choice of four subjects and includes a supervised TESOL practicum required by employer bodies. Participants can choose from a range of subjects which provide a foundation in second language teaching and learning. Despite its emphasis on practice, all subjects are underpinned by the latest research and theory in the field. Participants learn how to develop teaching programs and lesson plans, how to assess students’ language, how to teach the skills of reading, writing, speaking and listening as well as grammar and vocabulary. Applicants are advised to check with potential employing bodies regarding employment requirements.

This course is offered both on campus and through distance education (delivered primarily online) for students who would otherwise not be able to undertake a postgraduate course at the University.

Entry Requirements
Entry is available to candidates who satisfy the University’s entry requirements for Graduate Certificates (i.e. a three-year degree or equivalent). It is expected that candidates have teaching experience or qualifications.

The GCertTESOL assumes an undergraduate background and some practical classroom experience in TESOL. It provides the formal theoretical component and supervised practicum experience required in a formal accredited teaching qualification. Those with no teaching experience should apply for the Graduate Diploma in TESOL.

International students must meet the current Faculty English Language requirements (6.5 IELTS).

Advanced Standing
Students who wish to continue onto the MEd program may transfer up to 12 credit points for subjects completed in a Graduate Certificate program, if these subjects are over and above the MEd entry requirements.

Course Program
Subjects are chosen from the list below to complete 24 credit points.

**Overview**

This program seeks to explore adult education in a broad cross-sectoral response and will also aim to have significant links with other programs in the Faculty of Education.

The program seeks to capitalise on an environment of innovation and change in:
- Higher Education
- TAFE and VET in Schools programs
- Health and Community Services
- Military, police and security services
- Corrective services

The courses provide opportunity for students, who are most often mid-career professionals, to develop work-based projects to sustain innovation and change in their own organisations in their post graduate courses.

The program incorporates a learning framework and a modular structure that provides opportunities for:
- flexible entry and exit
- customisation
- multiple client groups to access the course in fee paying market

The program is offered in online mode and will have options for total online and mixed mode delivery depending on student and client needs.

Students who successfully complete the Graduate Certificate in Adult Education would be eligible to enrol in the Graduate Diploma in Adult Education and Training with Advanced Standing for three subjects on condition that the applicant surrenders the Graduate Certificate.

**Entry Requirements**

Entry is available to candidates who satisfy the University's entry requirements for Graduate Certificates (i.e. a three year degree or equivalent).

**Advanced Standing**

Students who wish to continue onto the MEd program can transfer 24 credit points for subjects completed in a Graduate Certificate program, provided the candidate has not formally graduated with the Graduate Certificate award. If the candidate has formally received the Graduate Certificate, up to 12 credit points of advanced standing will be granted towards the MEd.

**Course Program**

Subjects are chosen from the list below in consultation with the course co-ordinator, to total 24 credit points.

SUBJECT DESCRIPTIONS

EDGA917 International & Intercultural Perspectives
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Learning and teaching is strongly influenced by international developments in education and by multicultural learning environments. Students will critically analyse issues of language policy, intercultural communication, ethnicity, culture, and power from contemporary international and intercultural perspectives. Students will explore concepts of international education, internationalisation, global education and socio-cultural contexts of teaching, including education in less industrialised regions of the world and education for minority groups.

EDGA971 Assessment and Evaluation of Language and Literacy
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines both past and current issues and theoretical underpinnings of evaluating student learning. It will critically examine these issues in terms of contemporary theories of language and literacy learning. It will draw on recent research and theory related to the areas of psychometrics, qualitative evaluation, and linguistics. Students will also be required to trial and evaluate a range of assessment and evaluation instruments and procedures. The current move to standards and benchmarks will be addressed.

EDGA987 Children’s Literature
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Students will be guided towards an appreciation, enjoyment, evaluation and critique of a broad range of children’s literature in the light of various theories of literary criticism. In addition, participants will become familiar with a number of strategies relating to children’s literacy for use in the classroom. Students will be asked to consider the apparent assumptions about children as readers in the texts examined and the relationship between new technologies and children’s literature.

EDGB914 School Counselling in Context
Annual Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The following areas will be addressed by students in on line lectures and forums, readings and assessment tasks. Counselling theories including Skilled Helper model; Interviewing skills; Development of a Portfolio that indicates knowledge of local community resources, observation and understanding of diversity of counsellor roles; Individual student management plans and report writing; Course involves residential sessions, on line learning, and support; Practicum assessed jointly by University staff and DET line supervisors.

EDGD800 Professional Experience
GDE Autumn Batemans Bay On Campus
GDE Autumn Bega On Campus
GDE Autumn Shoalhaven On Campus
GDE Autumn Wollongong On Campus
Credit Points: 0
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC800
Subject Description: This subject is the compulsory professional experience component of the program. It involves field experience in schools and practice teaching in schools. Emphasis is placed on lesson planning, classroom management, and catering for a diversity of learners in the classroom. Students will also be required to reflect on their roles and responsibilities in child protection and welfare.

EDGD801 Learning and Behaviour
GDE Autumn Batemans Bay On Campus
GDE Autumn Bega On Campus
GDE Autumn Shoalhaven On Campus
GDE Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject will focus on the psychology of learners with an emphasis on effective teaching and classroom management strategies. The theories of teaching and learning, as well as the models of classroom management, will inform pre-service teachers on planning for effective learning and thereby reducing teacher stress. This unit will assist with identifying common causes of behavioral problems in the classroom and will offer strategies for dealing with these problems.

EDGD802 Educational Sociology
GDE Autumn Batemans Bay On Campus
GDE Autumn Bega On Campus
GDE Autumn Shoalhaven On Campus
GDE Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC812
Subject Description: This subject focuses on ways in which a teacher can celebrate the diversity of school contexts and diversity among learners, and apply a philosophy of equity for student learning from K-12. It aims to provide students with an understanding of the role of education in issues such as gender, class, ‘race’, ethnicity and ability. It also aims to engage students in the debates around contemporary issues such as ‘inclusion’, issues in schools and families, perceptions of gender and sexualities, cultural diversity, and the use and critique of technology and mass media.
EDGD803  Literacy Across The Curriculum  
GDE Annual Batemans Bay  On Campus  
GDE Annual Bega  On Campus  
GDE Annual Shoalhaven  On Campus  
GDE Annual Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: EDGC812, EDGC822  
Subject Description: EDGD803 explores the teaching of Literacy in both the primary and secondary school classroom. It does so through developing an understanding of several key areas that impact upon the teaching of Literacy. Learning language is both social and functional that is made up of a set of symbols that children learn to control, interact with and use to make meaning. Teaching children about Literacy should be planned, systematic and balanced as process, strategies and skills are addressed in meaningful ways to develop understanding. Teachers need to constantly engage in a reflective cycle of assessment and evaluation as they develop and implement literacy opportunities for their students. These should be supported by an in-depth understanding of the support documents of the NSW Syllabus.

EDGD804  Personal Development, Health and Physical Education  
GDE Spring Batemans Bay  On Campus  
GDE Spring Bega  On Campus  
GDE Spring Shoalhaven  On Campus  
GDE Spring Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: EDGC822  
Subject Description: All teachers, primary and secondary, play a vital role in ensuring the health and welfare of students within the school setting. It is therefore part of the responsibility of teachers to promote the physical and emotional wellbeing of students by providing environments in which they feel safe, where they can communicate with others and can contribute in ways that are accepted and valued. In addition, schools have a responsibility to provide opportunities for students to be involved in safe, well structured sporting and physical activity programs where they are encouraged to develop skills that can lead to lifelong participation in physical activity.

EDGD805  Professional Skills for PDHPE (PDHPE Specialists Only)  
GDE Autumn  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: EDGC814  
Subject Description: This subject complements the teaching methods theory component within the Graduate Diploma in Education program and aims to provide a strong foundation in areas those areas that fall under the professional responsibilities of a Personal Development, Health and Physical Education (PDHPE) teacher. Those in the PDHPE Key Learning Area play a major role in maintaining the health and welfare of students in both a whole school and subject specific setting and those wishing to be effective teachers need to be able to apply their professional skills in a variety of contexts.

EDGD806  Aboriginal Education  
GDE Autumn  Batemans Bay  On Campus  
GDE Autumn  Bega  On Campus  
GDE Autumn  Shoalhaven  On Campus  
GDE Autumn  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The subject covers a range of selected topics that relate to Aboriginal education including: history, survival, health, Aboriginal perspectives and the impact of socio-cultural factors on teaching and learning and Quality Teaching. Students will examine best practice and case studies that identify what's working in schools. Overall the subject aims to build the capacity of students to engage and deliver Aboriginal pedagogies and make learning meaningful for Aboriginal students in a sensitive and culturally safe environment for all. Students will also be provided with Aboriginal peoples critical analysis on these constructions and more importantly our own worldviews on identities, culture(s), histories and educational experiences.

EDGD807  Learners With Special Needs  
GDE Spring Batemans Bay  On Campus  
GDE Spring Bega  On Campus  
GDE Spring Shoalhaven  On Campus  
GDE Spring Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The philosophy and implementation of inclusive practices rather than segregation is having a strong influence on the education of learners with exceptional needs. Students with widely ranging levels of ability are now educated in regular classrooms. It is critical, therefore, that all teachers understand and are able to respond to the special needs of these learners. This course aims at developing teaching skills which address the needs of students with a range of special educational needs who spend at least some time in regular classrooms. The emphasis throughout is on structuring the regular classroom and developing appropriate teaching strategies so that the needs of students with a wide range of abilities are addressed.

EDGD808  Quality Teaching  
GDE Spring Batemans Bay  On Campus  
GDE Spring Bega  On Campus  
GDE Spring Shoalhaven  On Campus  
GDE Spring Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students will critically examine contemporary contexts and issues regarding curriculum development, assessment, communication, planning and reflection, as well as the role of Information and Communication Technology as a professional tool for teaching and learning. This unit also considers
the roles and responsibilities of a classroom teacher, principles of quality teaching and the NSW Institute of Teachers Professional Teaching Standards.

EDGD810 English KLA

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: EDGD810 explores the teaching of the English Key Learning Area in the primary school classroom. It does so through developing an understanding of several key areas that impact upon the teaching of English (Language). Learning language is both social and functional that occurs across the four modes of language- Talking, Listening, Reading and Writing. Language is made up of a set of symbols that children learn to control, interact with and use to make meaning. Teaching children about language should be planned, systematic and balanced as process, strategies and skills are addressed in meaningful ways to develop understanding. Teachers need to constantly engage in a reflective cycle of assessment and evaluation as they develop and implement literacy opportunities for their students. These should be supported by an in-depth understanding of the support documents of the NSW English Syllabus.

EDGD811 Mathematics KLA

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: In this first subject of mathematics and pedagogy, students will gain knowledge and understanding of key aspects of Mathematics K-6 and develop effective teaching and learning strategies for successful classroom practice. The subject will also embed the pedagogy within major theoretical perspectives on mathematical learning and teaching. The unit will be specifically concerned with three strands of the NSW Mathematics K-6 syllabus (2002): Number, Measurement and Working Mathematically.

EDGD812 Science and Technology KLA

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: In this subject students develop an understanding about the K-6 syllabus for Science and Technology (curriculum) and the Science and Technology Outcomes and Indicators document (1999). In addition the students learn discipline knowledge (content) and about ways of teaching the subject (pedagogy).

EDGD813 Creative Arts KLA

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: This subject will prepare students to: research, compare and interpret music, visual arts, dance and drama in a variety of contexts including social, cultural and historical; identify and prepare appropriate arts education teaching materials and strategies for the primary classroom; identify the purpose and structure of the arts and its relationship to the NSW syllabus; engage in experiences whereby they come to understand the language of the arts; examine possibilities for integrating the arts with other subject areas; be involved in practical skills in listening, singing, playing, moving, and creating, as well as in the making of art works and develop and demonstrate sound reporting and assessing practices.

EDGD814 Human Society and Its Environment KLA

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: “The future wellbeing of human society and its environment depends upon the quality of people’s interactions with each other and with their cultural, social and physical environments as they strive to meet each other’s needs (NSW BOS HSIE K-6 syllabus 1998, p.7).” This subject introduces teacher education students to the concept of learning and teaching in the key learning area known as Human Society and Its Environment (HSIE). Through lectures, hands on tutorial workshops and practicum experience students will be provided with the knowledge and skills that will assist them to develop innovative and creative classroom programs in HSIE building on the NSW HSIE syllabus. The outcome of the subject will be the ability for student educators to plan and implement HSIE in classrooms in order to develop learners values, attitudes, skills and knowledge. This subject will also raise the awareness of students personal, community, national and global identity, but also enhance their understanding of the role that each of them play as responsible citizens in maintaining and improving our cultural, social and physical environment.

EDGD815 Numeracy

GDE Primary KLA Annual Batemans Bay On Campus
GDE Primary KLA Annual Bega On Campus
GDE Primary KLA Annual Shoalhaven On Campus
GDE Primary KLA Annual Wollongong On Campus
Credit Points: 5
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC861 and EDGC862
Subject Description: In this second subject on
EDGD820 Science Method 1
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC851
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD821 Science Method 2
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: EDGD820
Co-requisites: None
Exclusions: EDGC851
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD822 Mathematics Method 1
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC853
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD823 Mathematics Method 2
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: EDGD822
Co-requisites: None
Exclusions: EDGC854
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.
teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD828  Legal Studies Method
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC860
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD829  Music Method 1
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC871
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD830  Music Method 2
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC872
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD831  Visual Arts Method 1
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC873
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD832  Visual Arts Method 2
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC874
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD833  Drama Method
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC875
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD834  French Method
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC876
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

EDGD835  Computer Studies Method 1
GDE Annual Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC881
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of
the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

**EDGD836 Computer Studies Method 2**
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC882
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

**EDGD837 Personal Development, Health and Physical Education Method 1**
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC891
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

**EDGD838 Personal Development, Health and Physical Education Method 2**
GDE Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGC892
Subject Description: This subject will examine the theoretical and practical foundations of this teaching area including planning, programming and relevant teaching strategies in order to cater for the diverse range of learners students will encounter in their teaching career. Students will cover the content of the NSW syllabus, learning styles, assessment and reporting and will investigate current issues, theories and practices in this subject area in secondary schools.

**EDGE900 Introduction to Technology in Education**
Autumn Wollongong On Campus
Autumn Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: EDG911
Subject Description: EDGE 900 Introduction to technology in education provides a basic introduction to the strand: Information Technology in Education and Training. As such, it is an overview of the range of issues and topics that will be further elaborated upon in subsequent subjects; specifically it introduces students to current issues and trends, learning theory, instructional design, and research and evaluation. The subject explores the concept of information technology and the ways in which the educational enterprise is affected by it. The subject considers the theoretical and practical skills used in designing, developing, and evaluating teaching and learning environments using a variety of instructional systems.

**EDGE901 Emerging Issues in Educational Technology**
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The continuous development of information and communication technologies has influenced the ways we live, work and learn. With each new technological innovation comes renewed discussion about the role of technology in education and its impact on learning and teaching. Influences also come from developments in educational theory and philosophy, and changes in wider society. This subject will respond to the most recent innovations in technology and focus on emerging issues relevant to educational technology, engaging students in an analysis of these through a critical examination of the current research and debate. Students will also be expected to investigate and analyse the emerging issue in educational contexts of interest and relevance to them.

**EDGE902 Instructional Strategies and Design**
Autumn Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will enable students to develop their understanding of technology-based learning through the design of innovative and authentic learning environments using instructional design principles. The subject will focus on the design and development of technology-based learning environments using a variety of instructional strategies, as well as the tools that can be used to develop such environments. Students will design a technology-based learning environment, and outline planning decisions related to task design, assessment, instructional strategies, media selection, and program evaluation. Students will be able to choose projects to suit their own teaching or training needs, to focus on topics and media of interest, and to work both individually and collaboratively at a distance.

**EDGE903 Multimedia and Interface Design**
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: In the design of interactive learning environments, the development of an effective interface and the choice of appropriate media requires not only an understanding of the knowledge domain but also the most effective way to represent this to learners. This subject will develop students understanding of the design
and development of interactive multimedia learning resources and environments through a focus on selecting and combining media appropriately for effective learning. This subject explores the role of effective visualisation and screen design and the ways it can facilitate understanding by learners/users of software. Topics focus on how multiple media can be combined to enhance understanding, how visual design and metaphor support reduction in cognitive load, how effective electronic performance support systems support work through complex tasks and how usability can be investigated. Students will have an opportunity to design their own multimedia treatments for concepts of their choice and, using the software tools available, develop these into learning resources.

EDGE904 Online Learning and teaching
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: EDG9195
Subject Description: EDGE 904 Online learning and teaching provides a basic introduction to current design and research issues in online learning; Topics covered include technologies that facilitate online teaching and learning; the theoretical and pedagogical underpinnings of online teaching and learning; and, the communication models that are utilised in online teaching and learning.

EDGE905 Evaluation of Technology-Based Learning
Autumn Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: EDG9193
Subject Description: In this subject, students will explore appropriate evaluation approaches throughout the entire life cycle of an interactive learning system or technology-based learning environment—from needs analysis through to formative and summative evaluation, and beyond. Evaluation frameworks and models and how they are applied will be examined in depth, and students will develop strategies for selecting appropriate evaluation methods based on decisions that need to be made about a learning environment. Students will have the opportunity to apply their understanding of evaluation to a real-world context by designing a large-scale evaluation of a technology-based learning environment.

EDGH951 The Global Challenge in Adult Education/VET/Higher Education
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides an introduction to the contemporary adult education environment in Australia, as well as addressing challenges that will confront adult educators and administrators. Students will be introduced to key elements of adult and vocational education, including an exploration of the relationships between work, technology, training and employment, and new technologies and settings for learning. The subject will explore aspects of the National Training Reform Agenda. These developments are explored in the context of the work of administrators, trainers and teachers in their workplace settings. Four out of the five assessment modules must be completed successfully.

EDGH952 Learning about Learning in Adult Education/VET/Higher Education
Autumn Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This introductory subject provides a policy context in which teaching and learning in VET, adult and higher education has been developed, exploring some theoretical positions that have informed vocational education, including problem-based learning, reflective practice and the development of practitioner-based learning. The eight modules seek to model aspects of good learning theory through applied assessment tasks that enable students to trial learning experiences in their workplace. Students have the option to develop learning experiences and assessment and evaluation with a view to improving their own practice.

EDGH953 Design and Use of New Technologies in Ad Educ/VET/Higher Educ
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides both theoretical and practical dimensions of utilising new digital technologies of learning in adult, VET and higher education. The subject will address the nature and character of computer-based information and communications technology. The subject explores theory associated with learning mediated by technology and explores the application of web-based learning, the Internet, multimedia and learning objects to develop online learning environments.

EDGH954 Leading and Managing in Ad Educ/VET/Higher Educ
Spring Wollongong Flexible
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject explores the importance of leadership that is collaborative, planned and outcome oriented. The possibilities for developing collaborative partnership-based forms of management that enhance outcomes for the community and industry are stressed. Students will be encouraged to critically review their understanding and experience of management and leadership and review their practice with a view to developing productive partnerships within their working units and communities. Students will also be introduced to the principles of outcomes-based planning and the notion of multiple and diverse accountabilities such as the triple bottom line. This subject also stresses the need to develop leadership and management strategies that have the capacity to develop global alliances that incorporate international settings.
**EDGH955 Professional Development in Ad Educ/VET/Higher Educ**

Autumn  Wollongong  Flexible  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject enables students to develop a negotiated professional development project in areas associated with Adult Education, VET and Higher Education. The subject explores the concept of professional development in the workplace and explores opportunities for students to develop portfolios directed at emerging issues in Adult Education, VET and Higher Education. The subject has a particular emphasis on developments in research in the Higher Education sector. The subject has four assessment modules.

**EDGH956 Innovation for Practitioners in Ad Educ/VET/Higher Educ**

Autumn  Wollongong  Flexible  
Spring  Wollongong  Flexible  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject is designed to provide students with an opportunity to develop and trial an innovative response to issues in their workplace. The subject emphasises an approach to developing a learning experience or innovation in their workplace such as a curriculum unit that involves action learning. The subject material promotes and features a collaborative and cyclic approach to design, implementation and evaluation that enables participation and feedback by members of workplaces. The subject offers opportunities for students to develop innovations in their workplace and to develop materials or events that promote effective learning. This subject has four assessment modules.

**EDGL901 Foundations of Educational Leadership**

Autumn  Wollongong  Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This core subject provides students with the range of foundational understandings essential for understanding the leadership function in education and training organisations. The content covers the main areas of intellectual understanding which underpin ‘present’ orientated effective management by developing conceptual understandings of: adult education and training; staff development; information systems; financial management; personal management skills – as they contribute to the management function of educational organisations. As the course is related to educational management, it takes an overarching view of the challenges and issues facing incumbent or aspiring educational managers from different perspectives including physical education, sport and recreation. Students will be able to explore issues of relevance and application to their specific context.

**EDGL905 International Trends In Educational Leadership**

Autumn  Wollongong  Flexible  
Credit Points: 6  
Pre-requisites: EDGL901 or EDGL903  
Co-requisites: None  
Subject Description: Contact hours: 3 hr/ week or equivalent. This core subject provides a futures oriented context and understanding to the development and implementation of education and training policies in a rapid change, globalising economy. Selected content areas include: internationalisation of economies and social systems; policy and planning implications of weakened nation states, and the emergence of global social, economic, and legal systems; international perspectives on education and training; approaches to policy and planning in comparative social systems; the limitations of central policy and planning systems in rapid change customer focussed contexts; emerging methodologies for effective policy and planning in education and training systems and organisations.

**EDGL909 Leadership of Effective Change**

Autumn  Wollongong  Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The topics, case studies, and projects of this subject are selected to develop effective leadership strategies for implementing effective change in education and training organisations. They include: characteristics of effective change; environmental scans; the critical role and importance of staff in implementing effective change; working through HR strategies to achieve effective change strategies for planning, implementing and monitoring effective change in professional service organisations, with a particular focus on project management techniques for effective change.

**EDGL911 Leadership in Curriculum**

Spring  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This core subject deals with the special leadership and management tasks of the education and training organisation. The particular features of professional service organisations dealing with education and training processes and outcomes will be highlighted. The leadership/management roles and tasks which both oversight and complement the
Subject Description: The following broad areas of subject content will be encountered by students in their readings, the weekly on-line sessions and in the assessment tasks: The common law; Traditional claims to justice; The duty of care; The tort of negligence - students' physical welfare; Sport, physical education, exercise, practical activities; Significant statute law and education regulations; Educational malpractice – the failure to educate; The powers of police and the courts; School rules, policies, procedures and the law - student welfare and discipline; Child Protection; Attendance, suspension, expulsion/exclusion; Confiscation and search; The rights of students, teachers and the general public; Family law, custody, access; Relevant educational case histories in law; Current trends in education and the law; Risk management and harm minimisation for educational leaders.

EDGL930 Work Motivation in Educational Leadership

Spring  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject considers motivation, job satisfaction and related phenomena in educational workplaces. General theories and models are considered and their relevance to educational and training organisations will be explored. Models are critically examined and teachers, administrators’ and trainers’ job characteristics and their relationship with job satisfaction are investigated. Job redesign is discussed.

EDGL931 Organisational Behaviour in Education

Autumn  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: In this subject students will analyse human behaviour in educational organisations. A broad range of central concepts related to the behaviour of educational managers, leaders and other individuals in educational organisations, and the application of those concepts to the analysis of organisational problems, are considered. Some examples are communication, human resource management, power, politics, conflict, decision-making, planning, organisational change and organisational learning.

EDGL933 Organisation Theory for Educational Leaders

Spring  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The purpose of this subject is to provide students with ‘conceptual lenses’ from organisation theory to examine and understand educational organisations with application to educational leadership. A range of theoretical perspectives and
conceptualizations of organizations are included, for example, scientific management, bureaucracy and professional educators, human relations, organizational technology, organizational structure and open systems theory. Organisational metaphors, including organisational culture, and critiques of conventional theories of educational organizations are considered.

**EDGP901 Adolescent Health 1**  
EDU Intake Jan  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Adolescent Health 1 will provide an overview of health, well-being and the dimensions of health. The current health status of Australians, in particular, young people will be examined. The focus will be on psychosocial health and the mental illnesses affecting adolescents (psychotic, non-psychotic, self-harm). The sociocultural influences on a young person’s mental health and sense of self will be explored. The salutary factors of resilience, connectedness, participation, positive self-worth and sense of belonging will be included. Common problems of bullying, harassment and coping with loss and grief will be discussed.

**EDGP902 Adolescent Health 2**  
EDU Intake Jan  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Adolescent Health Issues 2 will provide the opportunity to investigate and critically examine the health of young people with a particular focus on specific health issues such as risk taking behaviour, sexuality, sexual health and substance use and abuse. This subject will take a holistic view of young people and explore their health and wellbeing from a socio-cultural perspective. Students will investigate drug use trends and issues, various perspectives on individual and societal attitudes to risk taking behaviour, substance abuse and sexual health, the harm minimisation approach and the biological, social, psychological and ethical/moral dimensions of human sexuality. In examining these issues, prevention, intervention and postvention methods will be considered and a variety of resources/programmes/support agencies identified that can assist in the meaningful promotion of the health of young people.

**EDGP903 Promoting Physical Activity 1**  
EDU Intake Jan  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students will participate in practical experiences that will explore the fundamental principles underlying all movement and identify how these principles impact on the development of specialised skills. The subject will actively engage participants in a variety of games (invasion, net/court, striking/fielding and target) that demonstrate the different approaches to the teaching and learning of games. Students will develop an understanding of game sense and how it relates to technique. The promotion of physical activity in aquatic environments will require students to display competence in a range of swimming activities and water rescue techniques.

**EDGP904 Promoting Physical Activity 2**  
EDU Intake Jan  Wollongong  On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Through participation in a variety of practical and theoretical experiences, students will develop their own level of performance and utilise a variety of teaching strategies associated with composition of movement. Students will participate in a range of modern, contemporary, and cultural dance mediums exploring locomotor and non-locomotor movements. Dominant movement patterns and concepts underlying dance and gymnastics, elements of composition and movement appreciation will be explored. The subject will cover specific safety considerations in planning, devising and performing dance and gymnastics movements. Students will be required to compile a resource folder of a range of movement experiences and associated resources to assist in future program design.

**EDGP910 Introduction to Outdoor Education**  
Autumn  Wollongong  Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Increasing pressure in urban and contemporary living has placed greater awareness on environmental and outdoor opportunities for educational, community and corporate groups. A variety of learning experiences will be presented which enable students to gain an insight into how Outdoor Education is used as a catalyst for social and personal development and/or environmental sensitivity. Topics include: the philosophy of the Outward Education; innovations in National Curriculum for Outdoor Education; an exposure to various school programs incorporating Outdoor Education; and an examination of technical skills required in this field. Practical fieldwork experiences on a regular basis also form part of this course.

**EDGP911 Project for EDGP910**  
Autumn  Wollongong  Flexible  
Credit Points: 2  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Contact hrs: 35hrs This subject is a complementary blend of theory and practical to highlight the various leadership, and management styles evident in outdoor education. Facilitation and processing techniques incorporated into outdoor education programs in a variety of pedagogical contexts will be examined. Specific content will explore various philosophies and methodologies used in adventure-
EDGP913  Project for EDGP912

Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This is an optional project component subject taken in conjunction with EDGP912 and not available separately. The 2 cp Project extends the opportunity to study the issues of EDGP912.

EDGP924  Young People and Health

Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGA924
Subject Description: This subject will address issues associated with young people’s health from a critical perspective, drawing on social and cultural theory and research in the area. It will provide participants with the knowledge and skills to evaluate the different positions on young people’s health and to develop the capacity to critically assess the substantial amounts of information available in academic and popular writings on the topic. Topics covered in the subject will include: youth as a relational concept; health issues facing young people today; ‘risk’ and young people; globalisation and youth health; approaches to youth health; youth health services; schools and youth health. This subject replaces EDGA924 in the postgraduate PE/Health program.

EDGP930  Theoretical and Practical Bases of Coach Education

Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Contact hrs: 3hrs per week. This subject analyses current coaching theory related to pedagogical issues, time management and overseas developments in coaching. Students undertake an indepth analysis of the discipline areas applied to coaching. A conceptual framework of coaching both in Australia and overseas will be used with practical implications related to practice sessions in a variety of sport environments.

EDGP931  Project for EDGP930

Autumn Wollongong Flexible
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This is an optional project component subject taken in conjunction with EDGP930 and not available separately. The 2 cp Project extends the opportunity to study the issues of EDGP930.

EDGP932  Issues In Coach Education and Sport Management

Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is designed to provide students with an examination of current issues. Attention will be given to current international issues such as administrative structures, advanced coaching models, theoretical and practical bases of talent identification, government policy, and research in coach education and sport administration. They will undertake a review of literature in one chosen area presenting the outcomes of the research in a seminar.

EDGP933  Project For EDGP932

Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This is an optional project component subject taken in conjunction with EDGP932 and not available separately. The 2 cp Project extends the opportunity to study the issues of EDGP932.

EDGP934  Cultural Politics of Sport, Leisure and Physical Education

Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will examine contemporary debates and issues in the areas of sport, leisure and physical education from a critical perspective. It will examine how the knowledge, values and practices associated with these areas are constituted in the context of specific social, economic, political and cultural relations and how the practices associated with these areas in turn shape social knowledge and values. The subject will draw on a range of methodologies and resources including media and document analysis, the interrogation of statistical reports and contemporary mythologies about sport and physical activity; current feminist and masculinity research on sport, leisure and physical education; contemporary theories of leisure as consumption; youth studies and leisure and physical activity.

EDGP935  Leadership and Management in Physical Education, Sport & Recreation

Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDGL903
Subject Description: This core subject provides students with the range of foundational understandings essential for understanding the management function in education and training organisations. The content topics are selected to introduce the main areas of intellectual understanding which underpin ‘present’ oriented effective management by developing conceptual understandings of: adult education and training; staff
development; information systems; financial management; personal management skills— as they contribute to the management function of educational organisations. As the course is related to educational management, it takes an overarching view of the challenges and issues facing incumbent or aspiring educational managers from different perspectives including physical education, sport and recreation. Students will be able to explore issues of relevance and application to their specific context.

**EDGP990 Practicum in a Learning Environment**

*Autumn* Wollongong Flexible  
*Spring* Wollongong Flexible  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Students will design, implement and evaluate a program of work in a practical environment. This will extend over 30 hours of contact during the session at a worksite of choice. Reflective evaluation will take place on all of the practicum resulting in a critical analysis. All students will meet on a regular basis to discuss issues related to the practicum.

**EDGP991 Project for EDGP990**

*Autumn* Wollongong Flexible  
*Spring* Wollongong Flexible  
**Credit Points:** 2  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This is an optional project component subject taken in conjunction with EDGP932 and not available separately. The 2 cp Project extends the opportunity to study the issues of EDGP990.

**EDGR911 Teaching Reading**

*Autumn* Wollongong Flexible  
*Spring* Wollongong Flexible  
**Credit Points:** 8  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject will examine the nexus between reading theories and practices. Topics to be studied include: reading and its relationship to language and learning; models of reading instruction and practices; history of reading policies and methods; learning to read and learning through reading; sociocultural relationships between the reader and the written texts; reading for different purposes; evaluation of reading; the reading-writing connections and current debates around reading instruction.

**EDGR912 Teaching Writing**

*Autumn* Wollongong Flexible  
*Spring* Wollongong Flexible  
**Credit Points:** 8  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject will examine the nexus between writing theories and practices. Topics to be studied will include: the writing process and its relationship to language and learning; models of writing instruction; learning to write and learning through writing; the role of context, purpose and audience in shaping written genres; the writing/reading connection—specifically spelling, grammar and the role of editing and proofreading, and the evaluation of written texts.

**EDGS901 Intro. to Inclusive Education: Strategies, Policies and Legislation**

*Not on offer in 2009*  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This unit will be an introduction to the learning requirements of students with special needs. Additionally, it will critically examine the processes, models, educational policies and strategies proposed for the inclusion of students with special needs in the regular classroom. The inclusion debate and issues such as the most effective delivery systems and the most effective curriculum structures will be examined. The barriers to inclusion such as stigma and negative attitudes will be explored together with service delivery structures in schools. Finally, there will be a focus on the implications of relevant legislation such as, the Disability Discrimination Act, Disability Standards for Education and the Occupational Health and Safety Act, for special education professionals.

**EDGS902 Asses. and Instruction of students with learning difficulties**

*Not on offer in 2009*  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject focuses on expanding knowledge & understanding of Learning Difficulties, and developing high level teaching strategies to most effectively cater for students experiencing LD. Students are given opportunity to experience a variety of teaching methods and programmes according to the specific difficulty which they target, ranging from: ADHD, Aspergers Syndrome, Dyspraxia, Dyslexia, Dysgraphia, Language Disorders, Mathematics Difficulties, Developmental Delay & Sensory Impairment.

**EDGS903 Technologies for students with special needs**

*Not on offer in 2009*  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject provides a theoretical and practical grounding in augmentative and alternative communication methods that enable students with language and communication difficulties to respond to all aspects of schooling. Students will consider how and why to use technologies to improve access by students with special need to all areas of the curriculum. In hands-on tutorials students will learn how to use aided and non-aided tools, computer assistive technologies and specific software (e.g. Boardmaker, PECS). The subject emphasises a Total Communication approach within a school and classroom context.

**EDGS904 Effective partnerships for Special Education professionals**

*Not on offer in 2009*
EDGS915 Programs for Students with Learning Difficulties

Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide students with the opportunity to investigate the educational needs of one particular group of students, and to evaluate the efficacy of current responses to their educational needs. Students will draw upon understandings and skills developed in EDGS914 which is a pre- or co-requisite for this subject.

EDGS916 Models of Behaviour Management
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines a range of approaches to behaviour management and the theoretical principles upon which they are based. Problems associated with non school attendance, oppositional disorders, attention deficit disorders and other commonly occurring behaviour disorders are critically examined within the context of increasing academic engaged time and developing social and conflict resolution skills.

EDGS917 Programming for Behaviour Management
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines a range of approaches to behaviour management and the theoretical principles upon which they are based. Problems associated with non school attendance, oppositional disorders, attention deficit disorders and other commonly occurring behaviour disorders are critically examined within the context of increasing academic engaged time and developing social and conflict resolution skills.

EDGS918 Approaches to Reading Difficulties: Theories and Strategies
Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will engage students in a critical review of current empirical research in the area of reading difficulties. Theoretical and methodological aspects will be considered.

EDGS919 Reading Difficulties: Program Design and Implementation
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: EDGS918
Subject Description: This subject will engage students in the practical implementation of current theories regarding the identification and remediation of reading difficulties. Students will be required to work with a student with reading difficulties for a
EDGS920  Language and Communication Difficulties: Theory and Practice
Autumn Wollongong Flexible
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the major causes of language and communication difficulties. An overview of the topic will include an historical perspective which indicates shifts in issues such as identification, classification and categorization. Specific language difficulties associated with autism, cerebral palsy, hearing impairment, intellectual impairment and learning disabilities will be examined. Assessment of communication difficulties and evaluation of a range of educational strategies will conclude the subject.

EDGS921  Language-Related Learning Difficulties: A Case Study
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the impact of language-related learning difficulties on academic performance. Students will analyse the needs of a child with such difficulties and make recommendations for compensatory teaching practices to enhance classroom success.

EDGS922  Teaching Gifted Students
Autumn Wollongong Flexible
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will identify and critically examine the current issues related to the education of gifted students. It will also prepare teachers to meet effectively the needs of such students through curriculum modification and application of special educational strategies. Topics will include: definition and identification issues; instructional models; educational strategies; creativity and thinking skills; counselling needs; special populations; and the implications of policy on educational practice.

EDGS923  Project in Gifted Education
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject builds on the theoretical perspectives gained from the subject, Giftedness in Special Populations. It provides the opportunity for students to explore more deeply a particular issue related to policy or programming for gifted students with other special needs related to their gender, ethnicity, or disability. Students completing the project will select a topic in consultation with the lecturer. The project may take the form of a case study, a curriculum plan or an evaluation study.

EDGS924  Giftedness in Special Populations
Spring Wollongong Flexible
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Contact hours: 3 hrs/week x 9. This subject will critically examine the needs of special populations of students who are generally under-represented in programs for gifted children. Students will engage in analysing and evaluating alternative forms of assessment and developing appropriate strategies for curriculum design and delivery. Possible focus groups will include: Aboriginal children, ethnic minority children, low SES, girls, underachievers, preschoollers, prodigies, and students with emotional difficulties, physical or learning disabilities.

EDGS925  Project in Dual Exceptionality
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject builds on the theoretical perspectives gained from the subject, Giftedness in Special Populations. It provides the opportunity for students to explore more deeply a particular issue related to policy or programming for gifted students with other special needs related to their gender, ethnicity, or disability. Students completing the project will select a topic in consultation with the lecturer. The project may take the form of a case study, a curriculum plan or an evaluation study.

EDGT917  English Language: Learners Problems
EDU Intake Feb Wollongong Distance
EDU Intake Aug Wollongong Distance
EDU Intake May Wollongong Distance
EDU Intake Jul Wollongong Distance
EDU Intake Aug Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is an introduction to the nature of the English language and the typical problems experienced by non-native speakers of English. It will canvass the ‘basics’ of English grammar and vocabulary, from word classes (nouns, verbs, adjectives, etc) through to the structure of sentences. It is aimed primarily at those who are interested in becoming teachers of English to second language learners in Australia or abroad. It will assist participants in consolidating their own knowledge about English and in diagnosing learners’ problems. This subject also intended as a guide to teaching English grammar. It is not intended as a remedial English course for participants in the subject.

EDGT920  Practicum II
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None

EDGT922  The English Sound System
Not on offer in 2009

University of Wollongong
and writing and the ways in which oral fluency fosters
of spoken interaction, the differences between speech
In EDGT931 students will
Subject Description: For those teaching English as
language approaches and more recent task- and genre-
the field of second language acquisition. The subject covers
language teaching, drawing on knowledge in
language development. The subject also addresses the
different ways in which spoken discourse can be studied
covering critical and other traditions of discourse analysis,
multimodal and ethnographic approaches. The subject
presents an overview of recent research and developments
in the teaching of listening and speaking and how these
areas can be taught in an integrated way making use
of computer and other technologies and approaches.

EDGT932 Second Language Literacy
EDU Intake Feb Wollongong Distance
EDU Intake May Wollongong Distance
Spring Wollongong On Campus
EDU Intake Aug Wollongong Distance
EDU Intake Nov Wollongong Distance
Credit Points: 6
Pre-requisites: None
Exclusions: EDGT920 or EDGT937 or EDGT938
Subject Description: This subject will explore the
time of literacy. It will consider the role of literacy
within a range of social, cultural, historical and educational
contexts. As well it will cover the following: a critical
analysis of theories of reading and writing and their
relevance for second language literacy development;
an analysis of approaches to teaching reading and
writing; the relationship between spoken and written
language; principles for developing effective literacy
programs; strategies for supporting the learning of
literacy for ESL/EFL learners at beginner through
to advanced levels in adult and school contexts.

EDGT933 Practicum or Project inTESOL
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Exclusions: EDGA981, EDGT921 or EDGT925
Subject Description: EDGT933 will not be
offered from 2009. Students should enrol in either
EDGT932 or EDGT938 to complete their program.

EDGT934 Teaching Pronunciation
and Prosody
EDU Intake Feb Wollongong Distance
EDU Intake May Wollongong Distance
Spring Wollongong On Campus
EDU Intake Aug Wollongong Distance
EDU Intake Nov Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject will provide students
with an understanding of the English sound system: of
intonation patterns, sentence rhythm and patterns of
word stress, of English phonemes and also of features
of connected speech such as elision and linking. The
subject will also analyse teaching strategies and the
development of teaching programs. There will be topics
on assessing learners’ needs and developing individual and
class programs to address specific pronunciation needs.

EDGT924 Teaching Listening to Second
Language Learners
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides an
introduction to knowledge and skills needed to
teach listening. It aims to help students to develop a
deeper understanding of listening as an interactive
process and from this perspective to develop
techniques and procedures for teaching effective
listening strategies. The principles of designing
various assessment listening tasks will be covered.

EDGT930 Methodology in Second
Language Teaching
EDU Intake Feb Wollongong Distance
Autumn Wollongong On Campus
EDU Intake May Wollongong Distance
EDU Intake Aug Wollongong Distance
EDU Intake Nov Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: EDUE319
Subject Description: The subject requires students to
explore their own and others’ experiences of language
teaching and learning and to research the general
principles of language teaching, drawing on knowledge in
the field of second language acquisition. The subject covers
approaches to second language teaching and learning: grammar/ translation, audiolinguism, communicative
language approaches and more recent task- and genre-
based approaches. It also explores the theories of language
and learning underpinning these and the issues in
the implementation of approaches. It addresses issues
of assessment, planning and curriculum design and
programming in relation to teaching children, teenagers
and adults in second or foreign language contexts.

EDGT931 Teaching Speaking and Listening
EDU Intake Feb Wollongong Distance

**Co-requisites:** None  
**Exclusions:** EDGT928

**Subject Description:** In EDGT935, students will gain an overview of the changing contexts of English Language teaching internationally and of the issues relating to English as a global language. There will be a focus on specific issues such as teaching young learners (with the development of English teaching at elementary level) and the use of appropriate methodologies in exam-based systems. Cross-cultural communication skills and issues of culture in language teaching would also be addressed. Students would have the flexibility to research specific countries and key issues that cut across national boundaries.

### EDGT936  Management, policy and curriculum in TESOL

</tr>
</tbody>
</table>

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** EDGT929

**Subject Description:** In EDGT936, students will research educational management and leadership in terms of English language teaching. The subject will address the impact of education and language policy at national/ international and local levels. It will also cover aspects of protocol and policy development in institutions, staff management and professional development, accountability and evaluation. There will also be a focus on negotiation, managing interpersonal relationships and conflict resolution. Students will explore models of curriculum development in language education and program evaluation.

### EDGT937  Field Experience Project in TESOL

<table>

<td>Flexible</td>
</tr>
</tbody>
</table>

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** EDUE319 or EDGT930  
**Exclusions:** EDGT933

**Subject Description:** This subject is intended for students who want to get an extended experience in language teaching and learning in different contexts. The subject will be of interest to those who have little or no teaching experience and who would like to observe teaching and learning in a range of contexts (different age levels, different sectors) or those who are already experienced teachers but who would like to become familiar with different teaching contexts. It will also provide an alternative to the practicum for those who are not yet ready or who are not required to do one by employers. The subject provides an opportunity to pursue a particular area of interest in some depth. The project involves classrooms observations and an in-depth study of an identified area of interest. In completing such a project, the student will have developed a detailed understanding of a significant topic and will have had experience in applying research skills.

### EDGT938  Practicum in TESOL

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** EDGT930 or EDUE319  
**Exclusions:** EDGT937 or EDGT930

**Subject Description:** The aim of this subject is to provide a guided introduction to the classroom application of second language teaching methodology and to provide an assessed practicum which meets the teaching practice requirements (i.e. no less than 6 hours of assessed whole class teaching) for employment in language schools in certain contexts. Students will undertake observations and teaching ESL or EFL in primary, secondary or adult contexts, develop portfolios of work and evaluate aspects of the teaching and learning they observe.

### EDGT940  Materials and Technology in Second Language Teaching

</table>

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** EDGT930 or EDGT930

**Subject Description:** This subject introduces students to a functional approach to language, focusing on the functions that English plays in our lives and the language resources that students need to control in order to use English effectively in a range of situations. The model adopted is that of Halliday and colleagues - an approach that underpins several language syllabuses in Australia and internationally. This approach (Systemic Functional Linguistics) looks at the relationship between the texts that we use in our daily lives and the contexts in which these texts are produced. This subject also addresses the classroom applications.

---

University of Wollongong
EDGT983  Assessment in TESOL
EDU Intake Feb  Wollongong  Distance  Spring  Wollongong  On Campus
EDU Intake May  Wollongong  Distance  EDU Intake Aug  Wollongong  Distance
EDU Intake Nov  Wollongong  Distance  Credit Points: 6
Pre-requisites: None  Co-requisites: None
Subject Description: This subject will prepare those involved in teaching English as a Second Language to assess learners' language proficiency. Participants will be introduced to a variety of assessment approaches and techniques, ranging from informal, classroom based assessment through to high stakes formal tests. Principles of validity and reliability of assessment procedures will be addressed.

EDGT984  Theories of Second Language Learning
EDU Intake Feb  Wollongong  Distance  Autumn  Wollongong  On Campus
EDU Intake May  Wollongong  Distance  EDU Intake Aug  Wollongong  Distance
EDU Intake Nov  Wollongong  Distance  Credit Points: 6
Pre-requisites: None  Co-requisites: None
Subject Description: Second language acquisition draws on theories from linguistics, cognitive psychology, psycholinguistics, sociolinguistics and education, and aims to account for processes of learning a second language. This subject is designed to provide students with a solid grounding in the issues and factors prevailing in second language acquisition. Its scope ranges from first language acquisition to different approaches to examining second language development including behaviourist, cognitive, functional, social-cultural and sociolinguistic approaches. These topics provide an appreciation of the complexity of second language learning and how successful learning may be promoted.

EDGT985  English in Specific Contexts
EDU Intake Feb  Wollongong  Distance  Spring  Wollongong  On Campus
EDU Intake May  Wollongong  Distance  EDU Intake Aug  Wollongong  Distance
EDU Intake Nov  Wollongong  Distance  Credit Points: 6
Pre-requisites: None  Co-requisites: None
Subject Description: This subject is designed to provide an overview of the recent developments in research on English for Specific Purposes (e.g. business, academic and medical etc). It will begin with a review of the emergence of ESP, its historical background and development, and current status in the context of ESL/EFL. This will then be followed by an introduction to discourse analysis and its relevance to ESP. Cross-cultural differences in discourse patterns will also be explored. Students will have opportunities to analyse written and spoken texts used in different ESP contexts. On the basis of the analysis, the subject will turn to a discussion of the implications for ESP course design and evaluation. Although the focus of the subject is on developing students’ ability to design an effective ESP program, their engagement with discourse analysis will help heighten their awareness of the genres which might facilitate their growth as writers in academic settings.

EDGX901  Psychology for Educators
Spring  Wollongong  On Campus  Autumn  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None  Co-requisites: None
Subject Description: This subject will cover contemporary themes in the sociology of education. In so doing it will pay particular attention to the ways in which globalisation, postmodernism, diversity in cultural interactions and the influence of technologies have all made for rapid and evolving changes and challenges in education. Utilising a variety of theoretical frameworks and by developing a diversity of ways of viewing the world and its impacts, this subject will assist students to understand how and what mechanisms are operating to influence education and its role and purpose in society. The subject will promote student engagement in critical reflection, creative thinking and in-depth analysis in relation to key issues pertaining to society and culture in Australian and global education contexts.

EDGX902  Educational Sociology: Culture, Society and Education
Spring  Wollongong  On Campus  Autumn  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None  Co-requisites: None
Subject Description: Building on a philosophical framework based on the new sociology of childhood researching children will provide a comprehensive and practical introduction to undertaking a research project where children are the key participants. This subject will begin by introducing students to the main theories and theoretical approaches to doing research with children. The second part will support students to review past research and then consider a variety of possibilities on how to design and conduct research with children. Then in conclusion the students will consider specific contemporary issues that working with children may present and ways to overcome them. This final section will look closely at the ethics of...
doing research with children and the advantages and disadvantages of what being involved means for children, particularly for children who are positioned as vulnerable or in socially or culturally disadvantaged contexts.

**EDGZ903 Minor Project in Education**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 8
- **Pre-requisites**: At least 16 cp in specialisation, and EDGZ900 or EDGZ921.
- **Co-requisites**: None
- **Exclusions**: EDGZ903
- **Subject Description**: This subject is part of the research orientation in the MEd program. It enables a student to explore a research issue in a sustained piece of writing, as preparation for higher degree studies. No project work should be commenced without approval from the Program Co-ordinator or the Head of the Graduate School.

**EDGZ906 Minor Project in Education**
- **EDU Intake Feb**: Wollongong Distance
- **Autumn**: Wollongong Flexible
- **EDU Intake May**: Wollongong Distance
- **Spring**: Wollongong Flexible
- **EDU Intake Aug**: Wollongong Distance
- **EDU Intake Nov**: Wollongong Distance
- **Credit Points**: 6
- **Pre-requisites**: None
- **Co-requisites**: EDGZ900 or EDGZ921
- **Exclusions**: EDGZ903
- **Subject Description**: This subject is part of the research orientation in the MEd program. It enables the students to explore a research issue relevant to their specialisation in the form of a short report.

**EDGZ909 Advanced Research Methods in Education**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 8
- **Pre-requisites**: EDGZ922 or equivalent
- **Co-requisites**: None
- **Exclusions**: EDGZ903
- **Subject Description**: This subject is part of the research orientation in the MEd program. It enables the students to explore a research issue relevant to their specialisation in the form of a short report.

**EDGZ904 Research Project Report**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 2
- **Pre-requisites**: None
- **Co-requisites**: EDGZ921
- **Subject Description**: This subject is part of the research orientation in the MEd program. It enables the students to explore a research issue relevant to their specialisation in the form of a short report.

**EDGZ912 Special Research Topic**
- **Autumn**: Wollongong On Campus
- **Spring**: Wollongong Flexible
- **Credit Points**: 8
- **Pre-requisites**: EDGA900, EDGZ900, EDGZ921, EDGZ922 or equivalent
- **Co-requisites**: None
- **Subject Description**: The subject will allow students following a specific specialisation to appraise, extend and apply understanding and skills in their area of professional or academic concern. Students will be required to undertake a critical reading, review and reporting program. Some students may extend their investigation via a small field based inquiry project which will explore the related theory and program issues in a professional setting.

**EDGZ926 Professional Project**
- **Annual**: Wollongong Flexible
- **Credit Points**: 12
- **Pre-requisites**: None
- **Co-requisites**: None
- **Exclusions**: EDGZ921
- **Subject Description**: This subject takes the form of a professional project which involves students identifying issues, researching the literature for recent information and presenting on current issues in their professional area; and the development and implementation of a project which would make a contribution to their local community of practice.

**EDGZ930 Introduction To Research & Inquiry**
- **Autumn**: Wollongong On Campus
- **Spring**: Wollongong Flexible
- **Credit Points**: 6
- **Pre-requisites**: None
- **Co-requisites**: None
- **Exclusions**: EDGZ903
- **Subject Description**: This subject examines the nature of research in Education and related areas. The subject will assist students in critically appraising reported research in academic contexts such as research journals, in public contexts such as government reports, and popular contexts such as the media. It will also provide the tools to conduct small project and site-based research and evaluation studies. Specifically the subject will address questions such as: why conduct research? what constitutes ‘good’ research? how are methodologies and theoretical frameworks for research determined? what are the ethical implications of conducting and reporting on research? These questions will be explored through tasks and the development of a project proposal related to specialisation interests of students undertaking the subject.

**EDGZ931 Research Proposal**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 8
- **Pre-requisites**: EDGZ921 or equivalent research subject
- **Co-requisites**: None
- **Exclusions**: EDGZ903
- **Subject Description**: This subject will examine in detail the main approaches to qualitative and quantitative research in education. From writing research questions to analysis, students will work through the following research designs: observational (including longitudinal, cross-sectional, and matched [case-control]); experimental; quasi-experimental (including group randomised trials); narrative; phenomenological; grounded theory; ethnographical; and case-study research.
Exclusions: EDGZ924

Subject Description: This subject helps students to design and plan the study that they will undertake within the research component of their course. Topics include: identifying and articulating educational problems; developing research questions; reviewing research literature; theoretical frameworks of research; research methods and designs; practicalities of conducting research; and ethics in research.

EDGZ932  Advanced Research Seminar
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 8
Pre-requisites: EDGZ930 or equivalent
Co-requisites: EDGZ931 or equivalent
Exclusions: EDGZ925

Subject Description: This subject provides students with an opportunity to plan and conduct a small project that contributes to their research study. The project is negotiated with the subject coordinator and supervisor and may include (but not limited to): the development of an intervention or intervention materials; the design and or testing of data collection instruments. Students will interact with other research students within the subject to share their ideas and learn from the project experiences of others.

EDGZ965  Vygotskian Studies in Education
Autumn  Wollongong  Flexible
Spring  Wollongong  Flexible
Credit Points: 4
Pre-requisites: None
Co-requisites: None

Subject Description: This subject will provide postgraduate students with knowledge of modern perspectives on teaching and learning derived from the theory of Vygotsky. The aim of the subject is to develop understanding of the ways that the Vygotskian perspectives can be applied to conducting educational research. The theoretical perspectives treated will include: communities of practice, situated and distributed cognition, household funds of knowledge, activity theory and dynamic assessment. In addition, research methods, which are consistent with Vygotskian approach, will be discussed. These will include: ethnographic study, development research and other relevant qualitative research methods.
Faculty of Engineering

Member Units
School of Civil, Mining and Environmental Engineering
School of Engineering Physics
School of Mechanical, Materials and Mechatronic Engineering

Degrees Offered

Research
Doctor of Philosophy
Master of Engineering - Research
Master of Science – Research (Physics)

Coursework
Master of Engineering
• Civil Engineering
• Environmental Engineering
• Materials Engineering
• Mechanical Engineering
• Mining Engineering
• Mechatronics
Master of Engineering Practice
Master of Engineering Management
Master of Engineering Asset Management
Master of Rolling Stock Engineering
Master of Medical Radiation Physics
Graduate Diploma in Engineering
Graduate Diploma in Medical Radiation Physics
Graduate Diploma in Science (Physics)
Graduate Certificate in Engineering
Graduate Certificate of Engineering Asset Management
Graduate Certificate in Rolling Stock Engineering

Doctor of Philosophy

Testamur Title of Degree: Doctor of Philosophy
Abbreviation: PhD
Home Faculty: Faculty of Engineering
Duration: 3 years full-time or part-time equivalent
Total Credit Points: 48 credit points per year
Entry Requirements: Bachelor degree in a relevant discipline with Honours Class II, Division 2 or higher
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 201
CRICOS Code: 001245D

Overview

Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original contribution to the body of knowledge in their area of interest. This qualification can lead to, or enhance, an academic career and is also highly regarded by public and private sector employers. A thesis containing the candidate’s research will be presented for external examination at the end of the study.

Current research areas are listed below:

Civil Engineering
- Steel and concrete structures
- Composite steel-concrete structures
- Deepwater oil and gas riser design
- Bridge engineering
- Ecologically sustainable structural design
- Solid and rock mechanics
- Foundation engineering, including railways
- Slope stability and reliability analysis
- Soft ground improvement technology
- Reinforced earth
- Dam and embankment engineering
- Finite element and other numerical methods
- Structural dynamics
- Cementitious and advanced materials for construction
- Flood studies, hydraulics and hydrology
- Water quality engineering
- Geo-environmental studies
- Flow and sediment transport in channel junctions

Environmental Engineering
- Advanced membrane treatment processes
- Agricultural waste treatment and management
- Ballast water treatment
- Bioenergy production and bioreactors
- Electrocoagulation
- Environmental geotechnology
- Environmental hydraulics and unit processes
- Environmental pollution control modelling
- Groundwater contaminant transport and modelling
- Integrated water recycling and reuse
- Recycling and solid waste management
- Remote area water treatment with renewable energy
- Removal of trace contaminants
- Risk assessment of wastewater reuse projects
- Soil erosion and sediment transport
- Supplementary water supply systems
- Treatment and drying of residuals for reuse
- Urban water quality process and modelling
• Water quality management and modelling of catchments, rivers and lakes.

Materials Engineering

Steel Metallurgy:
• Peritectic phase transformation: mechanism and kinetics
• Development of in-situ observation techniques
• Kinetics of phase transformations in zincalume alloy systems
• Property/microstructure relationships
• Process optimisation in direct reduction of iron
• Thermo-mechanical processing, including HSLA steels
• Corrosion of steelmaking refractories
• Slag properties and behaviour

Superconducting and Electronic Materials:
• Theory and mechanism of superconductors
• Phase relation, phase evolution and chemistry of superconductors
• Single crystal growth and study of intrinsic properties
• Fabrication of bulk, wires and tapes superconductors
• Critical current density, transport mechanism and flux pinning
• Studies on structure, microstructure and stability
• Colossal magnetoresistance materials
• Spintronic materials
• High energy batteries for electric vehicles
• Solid-state rechargeable lithium batteries for telecommunication and portable electronic devices
• Developing new cathode materials for lithium-ion batteries using Australian mineral resources
• Investigation of nano-materials for use in lithium rechargeable batteries
• Composite cathode materials for lithium ion batteries using chemical coating technique
• Hydrogen storage materials
• Nickel-metal hydride batteries
• Processing of thin films
• Investigation of superconductor thin films
• Nanofabrication of novel multilayer materials
• Coated conductors
• Nanostructure of electronic materials
• Ceramic and Refractory Materials:
• Sintering kinetics
• High temperature degradation
• Extrusion of resin-bonded ceramics
• Processing of refractories
• Intelligent Polymers:
• Artificial muscles
• Chemical and physical sensors
• Electronic textiles

Polymer Materials:
• Polymer coating adhesion
• Mechanical properties of polymer coatings
• Surface properties of polymers

Nano-materials:
• Synthesis and characterisation of carbon nanotubes
• High energy ball milling
• Structure and properties of nanocrystalline materials

Welding and Joining/Surface Engineering:
• Structure and properties of welded metals
• Weld metal cracking
• Post weld heat treatment
• Weldability of creep resistant steels
• Brazing and diffusion bonding
• Fusion welding of coated steels
• Surface engineering of materials
• Wear and surface property testing
• Physical vapour deposition processing of metals
• Ion implantation
• Microwave processing of materials
• Solidification
• Welding automation
• Welding process control
• Welding fume dispersion and control
• In process monitoring
• Laser hybrid welding
• Magnetically impelled arc butt welding

Special Materials Research and Technology
• Nanostructural and high surface area materials produced by mechano-chemical methods
• Plasma assisted mechano-synthesis and processing
• Solid/solid, solid/liquid and solid/gas reaction chemistry
• Super-hard materials, glassy metals and metal matrix composites
• Synthesis of MEMS materials by advanced processing techniques
• Electric discharge assisted, rapid reduction processes
• Plasma assisted synthesis of metal hydrides
• Iron-based shape memory alloys
• Copper based shape memory alloys
• Crystallography of martensitic transformations
• Microwave synthesis of non-oxide functional ceramics
• High temperature materials processing
• Rapid solidification processing

Mechanical Engineering (includes Mechatronics)

Applied Mechanics:
• Biomechanics
• Solid mechanics
• Computational fluid mechanics
• Jet cooling in industrial applications
• Finite element analysis
• Natural and hybrid ventilation of buildings
• Industrial ventilation systems
• Renewable energy systems
• Wave energy conversion
• Offshore structures
• Small wind energy systems
• Mechanical engineering design
• Heavy vehicle and rail dynamics
• Railway engineering
• Rolling mill technology
• Solar thermal system analysis and design
• Solid mechanics of elastic and magneto-elastic bodies
• System identification and control
• Tribology-bearing friction and wear
• Alternative fuels
• Novel IC engines

Manufacturing and Mechatronics:
• Sensors and actuators
• Smart materials and structures
• MEMS and Nanotechnology
• Laser welding and surfacing
• Automated pipe welding
• Robotic repair technology
• Novel control of arc processes
• Virtual reality weld simulator
• Magnetic impelled arc butt-welding
• Automated QC and reliability engineering
• Chip control in automated manufacture
• Expert/knowledge system in automated machining
• Intelligent manufacturing systems
• Monitoring/diagnosis of manufacturing processes and machinery conditions
• Integrated CAD/CAM
• Maintenance management

Bulk Materials Handling:
• Prediction of bin wall loads and flow rates
• Feeding and discharging systems including pressurised systems
• Dust and fume control
• Pneumatic conveying
• Computer simulation of discrete particles
• Biomass handling and feeding systems
• Fluidisation and deaeration

Mining Engineering
• Rock mechanics
• Mine simulation, planning and design
• Mine safety and mine ventilation
• Geostatistics
• Computer applications in mining engineering

Physics
• Astronomy and astrophysics
• Observational studies of star formation
• Comparative planetology: Mars and Venus
• Asteroid and cometary mining
• Laser spectroscopy
• Scattering of light by solids
• Solid state spectroscopy of impurities in semiconductors
• Studies of electronic wave functions in solids
• Theoretical astrophysics - galaxy formation, gas dynamics
• Terahertz optoelectronics
• Spintronics
• Thermionics
• Quantum transport in nanostructures
• Resonant tunnelling
• Far-infrared spectroscopy
• Thermal transport in layered structures
• Many body theory
• Zeeman spectroscopy
• Piezo spectroscopy

Medical Radiation Physics:
• Semiconductor radiation detectors
• Radiation transport and dosimetry
• Radiation therapy
• Medical imaging and radiology
• PET and SPECT instrumentation
• High Energy Physics Detectors
• Proton Therapy
Master of Engineering - Research

Testamur Title of Degree: Master of Engineering - Research
Abbreviation: MEng-Res
Home Faculty: Faculty of Engineering
Engineering Disciplines: Civil, Environmental, Materials, Mechanical, Mechatronics, Mining
Duration: 1.5 years full-time or part-time equivalent
Total Credit Points: 72
Entry Requirements: Relevant degree with Honours Class III or above
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1303
CRICOS Code: 042554G

Overview
The Master of Engineering degree by research is intended for engineers qualified and interested in specific engineering problems. The degree comprises a 48 credit point research thesis and 24 credit points of coursework. Coursework comprises the 6 credit point subject ENGG951 Engineering Project Management plus 18 credit points of elective subjects chosen from the relevant Master of Engineering program.

Advanced standing for some or the entire coursework component may be granted on demonstrated research skills. Evidence of these skills would normally be a Bachelor of Engineering (Honours Class II Division 2 or better) and/or an appropriate Masters Coursework degree.

For current research areas refer to the PhD program above.

Master of Science - Research

Testamur Title of Degree: Master of Science - Research
Abbreviation: MSc - Res
Home Faculty: Faculty of Engineering
Engineering School: Engineering Physics
Duration: 1.5 years full-time or part-time equivalent
Total Credit Points: 72
Entry Requirements: Degree in Physics, or a Graduate Diploma in Science (Physics) or approved equivalent qualification
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1304
CRICOS Code: 042555F

Overview
The Master of Science degree by research equips candidates with superior skills in research design and methodology in preparation for leadership roles in their chosen field. The degree comprises a 48 credit point research thesis and 24 credit points of coursework. Advanced standing for some, or all of the coursework component may be granted on demonstrated research skills.

Students entering with a degree below Honours Class II, Division 2 will complete the 48 credit point thesis and 24 credit point combination of subjects chosen from the remaining Graduate Subjects below, and the list of undergraduate Physics subjects. These subjects will be chosen in consultation with, and approved by the Physics Discipline Advisor.

For current research areas refer to the PhD program above.

Master of Engineering (Civil Engineering)

Testamur Title of Degree: Master of Engineering (Civil Engineering)
Abbreviation: ME
Home Faculty: Faculty of Engineering
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Entry Requirements: Bachelor of Engineering with Honours at Class III or higher from this University, or an approved equivalent qualification
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1403
CRICOS Code: 042657M

Overview
The Master of Engineering allows students to combine specialist postgraduate subjects, according to their undergraduate background, with project work. The program comprises a 24 credit point dissertation and at least 24 credit points of coursework. The dissertation typically requires rigorous research in a specialised area – normally in the area of coursework components undertaken.

**Overview**

The Master of Engineering allows students to combine specialist postgraduate subjects, according to their undergraduate background, with project work. The program comprises a 24 credit point dissertation and at least 24 credit points of coursework. The dissertation typically requires rigorous research in a specialised area – normally in the area of coursework components undertaken.

**Overview**

The Master of Engineering Practice has been designed to meet the needs of engineering leaders of the future. This program allows practicing engineers to build on, update and acquire additional knowledge in areas not covered in their first degree.

This is a 48 credit point program. The core program comprises four, 6 credit point subjects. The remaining 24 credit points can be selected from the Engineering Postgraduate subject list; or, for students wishing to have a specialisation recorded on their degree, 24 credit points of approved elective subjects from one of the engineering streams listed below.

Students can apply to undertake the Master of Engineering Practice in two streams. Students would complete the core program and two 24 credit point programs of elective subjects. This is a 72 credit point program and would normally take 1.5 to 2 years to complete. Both specialisations would be recorded on the testamur.

With approval of the Course Advisor, students can undertake a 12 credit point dissertation as part of the elective subjects. The dissertation, ENGG940 Dissertation, is a research project allowing students to pursue a particular area in depth. The dissertation develops skills in information retrieval, project planning and organisation analysis, problem solving, and effective communication of results.

Where insufficient subjects are offered in a particular stream and/or where students are not able to provide assumed knowledge for available electives, the Course Advisor may substitute ENGG subjects, providing at least three subjects are taken from the stream under consideration.

### Master of Engineering Management

**Testamur Title of Degree:** Master of Engineering Management  
**Abbreviation:** MEngMgmt  
**Home Faculty:** Faculty of Engineering  
**Duration:** 1 year full-time or part-time equivalent  
**Total Credit Points:** 48  
**Entry Requirements:** A Bachelor of Engineering degree or other qualifications together with at least 4 years’ experience in a senior management position will be considered  
**Delivery Mode:** On campus  
**Starting Session(s):** Autumn/Spring  
**Location:** Wollongong  
**UOW Course Code:** 1506  
**CRICOS Code:** 051350M

### Overview

The Master of Engineering Management is aimed at Engineers and others who see their careers progressing into management. The course provides them with a very strong grounding in some of the most modern management thinking that is applicable to the Engineering and Manufacturing industries. Graduates of this degree will become empowered to work in teams and understand managers from other disciplines including finance, human resources and marketing. They will be equipped to advance their careers into senior managerial positions.
This is a 48 credit point program. The core program comprises five 6 credit point subjects. The remaining 18 credit points can be selected from the elective subjects listed below.

* Subjects may require prior knowledge. Students should not enrol in these subjects without consultation and approval of the lecturer(s) concerned.

### Credit Towards Other Courses

Students who successfully complete the Master of Engineering Management may apply to articulate to either the Master of Engineering Practice (Double Major) or the Master of Business Administration.

To complete the Master of Engineering Practice (Double Major), students will be granted the major in Engineering Management and will be required to complete a further 36 credit points including an additional major study to complete the course.

To complete the Master of Business Administration, candidates will be required to complete a further six specified subjects (36 credit points) as determined by the Graduate Studies Advisor.

### Overview

The objective of the program is to ensure continuous improvement in the strategic and tactical response of organisations and their managers to the management of infrastructure assets.

The program provides the knowledge to organise and manage engineered asset costs effectively. From a strategic framework, students progressively address problems in designing and managing assets. This is achieved through a balanced program of subjects in asset management science and engineering, business administration and management and industrial engineering, with emphasis on practical applications. Students learn concepts and techniques by evaluating potential solutions to challenges faced by organisations.
This is a 48 credit point program. The core program comprises six 6 credit point subjects. The remaining 12 credit points can be either two 6 credit point elective subjects from the list below or one 12 credit point dissertation.

### Master of Rolling Stock Engineering

**Testamur Title of Degree:** Master of Rolling Stock Engineering  
**Abbreviation:** MRSE  
**Home Faculty:** Faculty of Engineering  
**Duration:** 2 years part-time (no full-time option)  
**Total Credit Points:** 48  
**Entry Requirements:** A Bachelor of Engineering degree or other qualifications together with at least 4 years’ experience in a senior management position will be considered  
**Delivery Mode:** Self-directed learning  
**Starting Session(s):** Autumn/Spring  
**Location:** Wollongong  
**UOW Course Code:** 1160

**Overview**

The Master of Rolling Stock Engineering follows on from the Graduate Certificate in Rolling Stock Engineering. This course will provide formal education and training for new graduate engineers and other engineering staff who wish to advance their career in rolling stock engineering.

This is a 48 credit point program and is conducted in two parts. Completion of Part 1 is prerequisite for commencement of Part 2.

Master of Medical Radiation Physics

Testamur Title of Degree: Master of Medical Radiation Physics  
Abbreviation: MMedRadPhys  
Home Faculty: Faculty of Engineering  
Engineering School: Engineering Physics  
Duration: 1 year full-time or part-time equivalent  
Total Credit Points: 48  
Entry Requirements: Completion of Bachelor of Science or equivalent with Physics as a major study  
Delivery Mode: On campus  
Starting Session(s): Autumn/Spring  
Location: Wollongong  
UOW Course Code: 1545  
CRICOS Code: 035592D

Overview
Candidates who have completed a Bachelors degree which did not include a relevant major study will be required to complete additional subjects in Physics as outlined in the Masters Degree regulations. Students who have completed the Bachelor of Medical Radiation Physics from the University of Wollongong, or equivalent specialist course, would be advised to enrol in a Medical Radiation Physics research program. The course consists of a research project and four subjects.

Graduate Diploma in Engineering

Testamur Title of Degree: Graduate Diploma in Engineering  
Abbreviation: GDipEng  
Home Faculty: Faculty of Engineering  
Engineering Disciplines: Civil, Environmental, Materials, Mechanical, Mining  
Duration: 1 year full-time or part-time equivalent  
Total Credit Points: 48  
Entry Requirements: A Bachelor of Engineering degree from a recognised tertiary institution  
Delivery Mode: On campus  
Starting Session(s): Autumn/Spring  
Location: Wollongong  
UOW Course Code: 649  
CRICOS Code: 009237F

Overview
The Graduate Diploma in Engineering is intended to provide specialised studies in Engineering. It may provide entry to the Masters by Research program for students who do not have the necessary entry qualifications, particularly if studying this discipline for the first time.

Students enrol in one of the following 48 credit point subjects according to their discipline area:

- Civil Engineering: CIVL899 Advanced Topics in Engineering
- Environmental Engineering: ENVE899 Advanced Topics in Engineering
- Materials Engineering: MATL899 Advanced Topics in Engineering
- Mechanical Engineering: MECH899 Advanced Topics in Engineering
- Mining Engineering: MINE899 Advanced Topics in Engineering
Graduate Diploma Medical Radiation Physics

Testamur Title of Degree: Graduate Diploma Medical Radiation Physics
Abbreviation: GDipMRP
Home Faculty: Faculty of Engineering
Engineering School: Engineering Physics
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Entry Requirements: A pass Bachelor degree of at least three years' duration in a relevant discipline
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 676
CRICOS Code: 052460G

Overview
This Graduate Diploma is based on the coursework component of the Master of Medical Radiation Physics; it allows students to complete the formal coursework necessary for Australasian College of Physical Scientists and Engineers in Medicine (ACPSEM) accreditation separately from the research component.

The Graduate Diploma program has been accepted by ACPSEM as leading towards accreditation as a professional medical physicist. The Graduate Diploma is not accredited by ACPSEM.

Students must consult the Medical Radiation Physics Discipline Adviser for admission to the course. Forty eight (48) credit points are to be chosen from the following list in consultation with the Physics Discipline Advisor.

Plus 2 electives from the Physics undergraduate program or 900-level Physics subjects.

Graduate Diploma in Science (Physics)

Testamur Title of Degree: Graduate Diploma in Science (Physics)
Abbreviation: GDipSc
Home Faculty: Faculty of Engineering
Engineering School: Engineering Physics
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Entry Requirements: A pass Bachelor degree of at least three years' duration in a relevant discipline.
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 683
CRICOS Code: 002363A

Overview
This course is designed to provide:
1. a Masters qualifying course for students who have inadequate preparation for direct entry into the Masters by Research program;
2. an opportunity for Science teachers who have a degree, but have taken Physics to first or second year level only, to improve their understanding and horizons in Physics;
3. an opportunity for international students and students without a full major in Physics to update their knowledge of Physics.

Students must consult the Physics Discipline Adviser for admission to the course. Forty eight (48) credit points are to be chosen from the following list in consultation with the Physics Discipline Advisor.

Graduate Certificate in Rolling Stock Engineering

Testamur Title of Degree: Graduate Certificate in Rolling Stock Engineering
Abbreviation: GCertRSE
Home Faculty: Faculty of Engineering
Duration: 1 year part-time (no full-time option)
Total Credit Points: 24
Entry Requirements: A Bachelor of Engineering degree from a recognised tertiary institution
Delivery Mode: Distance
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1160
CRICOS Code: N/A

Overview

This course is designed for those wishing to undertake a short program in Rolling Stock Engineering. On completion of the Graduate Certificate, students can apply to transfer to the Master of Rolling Stock Engineering.

Course Program

This is a 24 credit point program. The core program comprises four 6 credit point subjects.

SUBJECT DESCRIPTIONS

CIVL999  Advanced Topics in Engineering
Annual  Wollongong  On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None
Subject Description: Students will normally take a selection of topics at advanced level from the following: computer aided analysis and design; computer methods; concrete design; civil engineering materials; finite element techniques; hydrology; hydraulic; numerical techniques; reliability; rock mechanics, soil mechanics; simulation; structural analysis and design; structural topology; town planning; traffic planning; traffic engineering; transportation; highway engineering; urban investigations; structural dynamics; continuum mechanics.

CIVL901  Project
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: First stage of a comprehensive study concerning a specific topic; formulation of problem and literature study, critical examination of current work; planning of solution methods; presentation of results.

CIVL903  Concrete Technology
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Mix design theories; design of high performance and lightweight concrete, elastic behaviour; strength, creep, shrinkage; concreting operations; durability; significance of tests and properties of constituent materials; analysis of results; non-destructive tests; special concrete applications.

CIVL904  Highway Materials
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None

CIVL905  Transportation Engineering
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Transport problems; urban travel demands; the transport planning process; travel-demand forecasting; trip generation analysis; model split analysis; trip distribution analysis; route assignment analysis; economic analysis; employment and population forecasts; evaluation of transport plans; airport engineering; classification, design standards, layout and development, terminal facilities, city-airport transport systems; urban transportation; railroad engineering; light rail rapid transit; pipeline transportation; belt conveyors – freight and passengers.

CIVL907  Civil Engineering Computations
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will concentrate on software packages which are designed for application to a wide range of structural types, both two and three dimensional, including trusses, frames, plates and shells. Any combination of these components may be used with a variety of analysis and design procedures including linear elastic analysis, nonlinear optimization, steel frame member design, and design and checking of reinforced concrete building frames including beams, columns, slabs, steel quantity and location, material take-off etc.

CIVL908  Advanced Soil Mechanics
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The principle of effective stress and its implications; stress path in soil mechanics; problems of shear strength and failure; peak, residual and softened shear strengths for soil; pore pressure parameters A and B; the use of pore pressure parameters in practice; selected problems of stability and settlement; the analysis and performance of slopes; the factor of safety concept; stress analysis approaches; introduction to soil dynamics.

CIVL909  Advanced Foundation Engineering
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: General principles concerning selection of foundation type on different types of soil; Bearing capacity theories, shallow and deep footings, difficult ground conditions including collapsing and swelling soils; performance observations in geotechnical engineering; preventative and remedial measures against ground movement and slope failure; buoyancy rafts and basements; selected problems of foundation analysis and design; dam foundations; stress distribution and stress analysis; soil sampling and exploration; soil stabilisation including drainage.

CIVL911  Finite Elements Methods
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Variational principles; element shape functions, ‘displacement’ and ‘stress’ formulations, curved and isoparametric elements;
CIVL912 Engineering Hydrology
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Storm models, storm maximisation, extreme precipitation estimates, intensity-frequency duration analysis, design storms; rainfall losses, infiltration models, design losses; advanced unit - hydrograph theory, synthetic unit hydrographs; hydrograph synthesis by runoff - routing; design floods for rural and urban catchments.

CIVL916 Research Topics in Civil Engineering
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics will be selected from those areas of Civil Engineering in which staff members or visiting staff members to the Faculty, are engaged in active research.

CIVL920 Civil Engineering Hydraulics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Uniform flow in rivers and flood plains; open channel roughness and flow resistance; non-uniform open channel flow; backwater curve computation; unsteady open channel flow; Flood wave routing; hydraulics of spillways; hydraulics of bridges and culverts; retarding basin hydraulics; urban stormwater drainage design; sediment transport in open channel flow.

CIVL923 Advanced Reinforced Concrete
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Strength and behaviour of reinforced concrete members in flexure, shear, torsion and compression; bond and anchorage; non-rectangular sections; numerical and semi-graphical methods. Short and long-term deflections of beams; effect of repeated loading and impact. Analysis and design of deep beams. Yield line method for slabs. Design code provisions.

CIVL980 Advanced Computer Applications
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject content will comprise a selection from the following topics: Finite element modelling and simulation, system analysis, optimal design of civil and environmental engineering systems, advanced statistical techniques, advanced computer programming techniques; analysis of plates, shells and axisymmetric structures; analysis of slab- and box-type bridge superstructures.

CIVL981 Special Topic A
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Specialist topic in civil engineering offered by members of staff, professional engineers or visitors to the Faculty.

CIVL982 Special Topic B
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Specialist topic in civil engineering offered by members of staff, professional engineers or visitors to the School.

ENGG919 Dissertation
Annual Wollongong Flexible
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: A thesis is required based on project work and/or an interpretative literature review on a topic.

ENGG923 Advanced Digital Sound and Imaging Techniques
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Physics of sound, propagation of sound in air, interference and resonances, harmonics and musical instruments, acoustics; frequency response, digital sound recording and playback, digital filters, digital audio data compression and extraction and audio streaming; sound system design, frequency response curves, sound cards, audio systems, microphones, amplifiers and speakers. Introduction to digital image fundamentals: resolution, bit depth, compression, colour, image enhancement and geometric manipulations; noise reduction; image compositing; time and temporal manipulations, image tracking and stabilization; file formats: quality and efficiency; case studies.

ENGG924 Railway and Rolling Stock Environment
Autumn Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Rail within a transport industry context, historical perspective on railways development, business structures for rail organisations, rolling stock interfaces, safety considerations, design drivers, system design specification, rolling stock system(operations, servicing, maintenance), component interfaces,
train types and applications, rolling stock operation and asset management, railway cost perspectives, technological development trends in rolling stock.

**ENGG925 Rail Motive Power**  
*Description:* Diesel electric locomotives, electric locomotives, electric hydraulic locomotives, EMU, locomotive structure, locomotive configurations, locomotive performance, locomotive control systems, locomotive bogies, locomotive engines, locomotive traction generation, locomotive auxiliary systems, locomotive maintenance considerations. Elements of a traction system: interfaces with other systems, interactions between elements, limitations on tractive effort, traction control, basic traction technologies and their design, operation and maintenance characteristics: electric, diesel hydraulic, diesel, railcars, EMU, safety and environmental issues, performance criteria and measurement.

**ENGG926 Rail Vehicle Design**  
*Description:* Types and application of passenger rolling stock, passenger rolling stock configurations, passenger rolling stock structure, passenger rolling stock performance, passenger rolling stock traction and control systems, passenger rolling stock human interfaces, passenger rolling stock bogies, passenger rolling stock brakes, passenger rolling stock auxiliary systems, passenger rolling stock maintenance considerations, freight wagon types and applications, freight wagon standards, freight wagon life-cycle, freight wagon structures, freight wagon configurations, freight wagon coupling systems, freight wagon brakes, freight wagon bogies, freight wagon performance, freight wagon auxiliary fittings, freight wagon loading and unloading systems, freight wagon dangerous goods.

**ENGG927 Rolling Stock Safety and Braking System**  
*Description:* Rail safety systems and the interface with train braking systems, historical development of train brakes, train brake failsafe concepts, train brake types, components and applications, compressed air systems, train brake control and controllers, train brake system performance and design – parking, normal and emergency operation, train brake examination and testing, deadman and vigilance control, investigation of incidents where brake system failure may have been a factor.

**ENGG928 Rolling Stock Dynamics and Bogies**  
*Description:* Rolling stock dynamics and bogies.

**ENGG929 Rolling stock construction maintenance and design**  
*Description:* Rolling stock construction maintenance and design.

**ENG937 Special Topic in Engineering Management**  
*Description:* This is an occasional special topic subject designed to allow Engineering Management and Engineering Practice students an opportunity to gain special knowledge and expertise from specialists and Engineering Practice students an opportunity to gain special knowledge and expertise from specialists. The subject introduces engineers and technologists to state of the art ideas in general areas of engineering management and practice. The subject introduces engineers and technologists to state of the art ideas in general areas of engineering management and practice. The subject introduces engineers and technologists to state of the art ideas in general areas of engineering management and practice. The subject introduces engineers and technologists to state of the art ideas in general areas of engineering management and practice.
of the topic offered and the practical potential for organisations to take the idea behind the special topic on board when making management decisions. The actual topics covered will vary and will depend on the special expertise available to the Faculty of Engineering at the time the special topic is offered.

**ENGG938 Engineering Economics**  
*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Engineers today are not limited to the core of their activities being in the technical area but also the strategic and operational decision making processes. The aim of this course is to familiarise engineering students to the field of economics and its relevance and importance to the field of engineering. Initially, the course looks at a broad definition of economics and the basic elements of microeconomics such as concepts of supply and demand, market equilibrium and price elasticity. Macroeconomic issues are covered next with focus on GDP, inflation, unemployment, phenomenon of business cycles, and the financial markets. The core of the course examines the time value of money and how engineers use this concept for making crucial economic decisions. Future values of capital investments and their links to interest rates and compounding periods are investigated. Future values and present value of annuities, bond and mortgages are also explored. Using the tools developed, the course then applies them to the determination of net present values, internal rates of return and payback periods of diverse investment opportunities. Replacement analysis of capital equipment is examined as well. The implications of taxes, inflation and depreciation for capital budgeting are explored.

**ENGG939 Engineering Logistics**  
*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Logistics in this course focuses on the design, development, production, distribution, and sustaining support of ‘systems’ throughout their planned life-cycle(s). This course will concentrate on logistics from a systems engineering perspective; i.e., the design of systems for supportability and serviceability, the production and effective distribution of systems for customer use, and the sustaining maintenance and support of systems throughout their period of utilization. Logistics is one of the key elements in sustaining a system and it is important that to successfully accomplish its mission logistics design must be tailored on a total life cycle basis.

**ENGG940 Dissertation**  
*Spring 2009/Autumn 2010 Wollongong On Campus*

**Credit Points:** 12  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** The dissertation is a project allowing you to pursue a particular area in depth and solve a specific practical engineering problem. Students complete a dissertation in their area of interest. The dissertation develops skills in information retrieval, project planning and organisation, analysis, problem solving and effective communication of results. Involves the undertaking of an individual supervised project focused on solving a problem relevant to the discipline area of the degree. The student would normally be required to do a literature survey, analysis, and develop suitable solutions to the selected problem. This will allow the students to apply the knowledge and skills acquired in the structured coursework and thus gain valuable confidence in their ability to practice engineering at a high professional standard. Two bound copies of the final report must be submitted for assessment, together with an electronic version.

**ENGG945 Dissertation**  
*Spring2009/Autumn2010 Wollongong On Campus*

**Credit Points:** 24  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** The dissertation typically requires rigorous research in a limited area - normally in the area of coursework components undertaken. It comprises a research project based on a problem in the discipline of the degree. The student would normally be required to do a detailed literature survey, analysis, modelling and develop suitable solutions to a selected problem. Students will be able to choose a suitable investigation within the current and relevant research activities associated with the Faculty of Engineering. The dissertation is individually supervised. Two bound copies of the final report must be submitted.

**ENGG950 Innovation and Design**  
*Autumn Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Topics will be selected from: The creative and innovative process, aesthetics in design, life cycle design and planning, Design for economy, maintenance, disassembly, recycling, repair and rehabilitation. Designing with materials. Durability of materials, components, systems and structures. Intellectual property, patents and technology transfer. The international marketplace. Constraints on design: standards, specifications and codes of practice. Feasibility studies and costing Teamwork in design. Case studies.

**ENGG951 Engineering Project Management**  
*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**ENGG952 Engineering Computing**  
*Spring Wollongong On Campus*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Software applications, programing development environments, application
areas, mathematical techniques, and approaches to problem solving are explored from a wide variety of possible areas. Topics will be selected from the following list: Windows-based compilers and software libraries such as C/C++, fortran, and visual basic; Numerical and mathematical libraries such as Matlab, Mathematica, and Mathcad; Advanced spreadsheet programming; 3D Graphics programming using OpenGL; Advanced engineering graphics using AutoCAD; Database principles and techniques; Mesh Generation for finite element and finite difference modelling; Numerical solution of the equations of physical and engineering systems; Operations research, project management, and reliability simulation; Artificial neural networks.

**ENGG953 Modelling of Engineering Management Systems**

Spring Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** Concentrating on the search of appropriate operations research techniques to assist in the solution of engineering management problems and basic experimental design. Topics include: basic principles of modelling; decision support models, modelling failure processes, search methods, scheduling models, queuing theory and its application, data collection and design, introduction to experimental design, principles of design, importance of randomisation, simple comparative experiments, experiments with a single factor, randomized blocks and related designs, introduction to factorial designs, Taguchi’s philosophy of design.

**ENGG954 Strategic Management for Engineers and Technologists**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** The subject introduces engineers and technologists to strategic management. This includes basic principles of analysis, decision-making and implementation. The aim is to create awareness of strategic issues in engineering and technology based organisations. This includes an appreciation of competitive leverage from technology decisions. A need for consciousness of these issues amongst engineers is crucial to their function in both profit and not for profit organisations.

**ENGG955 Engineering Research Methods**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** The overall objective is to develop a structured approach to research in engineering. The focus is on the development of skills in framing a research problem, developing a research design, design of data collection analysis and interpretation frameworks. Literature research skills will be developed. An understanding of the selection and use of measurement sensors and engineering data collection and analysis tools will also be developed. Hands on experience in an engineering laboratory will be a feature. Ethical issues in research will be reviewed. Students will work on a selected project to develop a properly structured research proposal, including a research plan. The plan is to be presented orally and in written form.

**ENGG956 Financial Management for Engineered Assets**

Spring Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** Financial management principles, time value of money, discrete assets considerations, continuous assets considerations, identification of cost elements, cost prediction methods, regulatory economics, financial case development, engineered asset repair-replace decision making.

**ENGG957 Project Implementation and Outsourcing**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** Employment law, contract law, issues such as types of interface i.e. contract types (cost plus, schedule of rates); HR structure and sourcing arrangements, management of the interface, performance measurement, monitoring and management, managing the client, managing the supplier, legal implications, employment law and safety law implications, duty of care, transmission of business, industrial relations, intellectual property, ownership and use of maintenance data and know-how.

**ENGG958 Life-Cycle and Risk Management**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** Framework, context and history of asset management, strategic management and engineered asset management in context. Application/adaptation of basic tools, costs and benefits of life cycle management, available models and standards. Possible uses of models business drivers, legal requirements, quality systems and configuration and documentation management, interfaces with other functions (departments and organisations).

**ENGG959 Asset Management System Design**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: None

Co-requisites: None

**Subject Description:** Topics that may be covered include: human aspects of asset management and reliability; ergonomics; work measurement, methods engineering and activity sampling applied to asset management activities; estimation of task time; facilities layout. Planning for shutdowns and overhauls;
inventory selection and inventory control systems, configuration management, warehouse control, evaluation of asset management performance.

**Subject Description:** The main aim is to introduce concepts relating to water resources and global water problems, water quality characteristics, water quality processes and guidelines, water quality management, water supply and sanitation, natural treatment processes, various municipal water and wastewater treatment processes and wastewater reuse and recycling that will lead to sustainable development. The lecture components will be supplemented with relevant tutorials and weekly assignments. A number of laboratory classes will give students hands on exposure to determination.

**ENVE926 Air and Noise Pollution Management**

**Subject Description:**
ENVE928 Design of Urban Water Systems
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will focus on several group design projects in urban stormwater management in terms of quality and quantity, river water quality and onsite waste management systems. In urban drainage design, you will use rational design and DRAINS model. In stormwater quality, pollutant build up – washoff relationships will be developed, river water quality using QUALIIIE model and design of onsite systems using Australian standards.

ENVE929 Site Contamination and Remediation Technologies
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The course describes the chemistry of soils, interactions of pollutants with soils and organic matter and their fate in the environment. Saturation of soils with contaminants through various sources has led to groundwater contamination. Characterisation of such sites, monitoring parameters, decision making and regulation will be included in this subject. The remediation of such contaminated soils and groundwater will be described with selected technologies, options of site containment, which is currently the most common technique will also be covered. The course will give an overview of the options and tools to assess and select the appropriate technology. This will also involve the revision of chemical parameters and students without the expected pre requisites are required to revise chemical principles independently.

ENVE930 Coastal, River and Groundwater Engineering
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Coastal Engineering - wave forecasting; wave refraction; diffraction and breaking; wave forces on structures; beach erosion and beach protection. Water Resources - the hydrologic cycle; distribution of the world's water resources; surface water resources; groundwater resources; computer models of catchment water balances; storage reservoir yield analysis. River Engineering - fluvial hydraulics; morphology of natural channels; soil erosion, sediment transport in streams; re-naturalising streams; Groundwater Hydraulics - groundwater quality and contaminants - reservoir sedimentation; hydraulic structures.

ENVE931 Membrane Processes and Applications
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject intends to demonstrate to students how nature works (biological membranes) and how such principles (membrane processes) can be used for medical, water and wastewater, processing and other industries by engineering appropriate materials and systems. The subject hence leads from nature to material science and engineering, fundamental transport principles to applications and process design with immediate relevance to the water and wastewater treatment industry where membranes are becoming a predominant process choice worldwide. The subject aims to bring science and engineering together on a number of levels such as in terms of learning from nature, applying engineering solutions to medical applications and using scientific principles to obtain engineering solutions. Both engineering and science students will be exposed to the thinking in the other discipline.

ENVE981 Special Topic A
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Specialist topic in environmental engineering offered by members of staff, professional engineers or visitors to the department.

ENVE982 Special Topic B
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Specialist topic in environmental engineering offered by members of staff, professional engineers or visitors to the department.

MATL899 Advanced Topics in Materials Engineering
Annual Wollongong On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None
Subject Description: A program approved by the Discipline Adviser of project work and studies of advanced topics in materials selected from the fields of processing, physical and mechanical behaviour, microstructure and observational methods.

MATL901 Special Topic in Materials 1
Spring Wollongong On Campus
Credit Points: 6

MATL999 Advanced Topics in Materials
Not on offer in 2009
Credit Points: 48
Pre-requisites: MATH202 and MATH203
Co-requisites: None

MECH899 Advanced Topics in Engineering
Annual Wollongong On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None
Subject Description: Students will normally take a selection of topics at advanced level. The selection of the topics will be subject to the approval of the Head of the Department in which the student wishes to enrol and subsequently specialise.

MECH913 Pneumatic Transport of Bulk Solids
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Classification and selection of transport systems; flow patterns; pressure drop, minimum transport velocities; design parameters and examples; feeding and disengaging methods.

MECH918 Sustainable Energy in Buildings
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Students will normally take a selection of topics at advanced level. The selection of the topics will be subject to the approval of the Head of the Department in which the student wishes to enrol and subsequently specialise.

MECH919 Advanced Topics in Mechanical Engineering 1
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: There is no set syllabus for this subject. It is intended that it normally be offered on a specialised mechanical engineering topic given by members of the Department, visiting academic staff or engineering consultants.

MECH920 Computational Methods for Fluid Dynamics
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject introduces computational fluid dynamics (CFD) techniques; consistency, accuracy and stability; validation of computational results; study of engineering systems which may include incompressible and compressible flow of fluids; turbulence; heat transfer and multiphase phenomena; and use of a commercial CFD package for solving industrial fluid dynamic problems.

MECH925 Advanced Fluid Power
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Fluid power components; circuit design; analysis of transmission, valve-controlled and feedback systems; electronic controls; vibration and transient response.

MECH927 Physical Processing of Bulk Solids
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Bulk solids description and characterisation; crushing, grinding, thickening, separation, precipitation, filtration, blending, tabletting, briquetting and agglomeration, sizing and classification; introduction to beneficiation; drying; intermediate processing and handling; control and instrumentation; dust generation and abatement.

MECH928 Finite Element Techniques in Mechanical Engineering
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None

MECH929 Advanced Topics in Mechanical Engineering 2
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: As for MECH919.

MECH934 Advanced Manufacturing Processes
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Modelling of advanced manufacturing processes; manufacturing cost analysis; productivity and quality methods and measurements in manufacture; computer-assisted process planning; manufacturing optimisation; trends in advanced manufacturing processes, recycling aspects.

MECH935 Integrated Manufacturing Systems
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Concurrent engineering, its application and benefits; computer integrated
manufacturing concepts and applications; CAD/CAM, 
CNC programming, FMC, FMS; computer-process 
interacting; process and tool condition monitoring; 
computer-aided quality control; assembly systems, assembly 
lines, assembly line balancing; design for manufacture 
- casting, forming, machining and selected examples; 
human interface in manufacturing systems; future trends.

**MECH939 Advanced Topics in 
Mechatronic Engineering**

Autumn Wollongong On Campus  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: There is no set syllabus 
for this subject. It is intended that it normally be 
oned on a specialised mechatronic engineering 
topic given by members of the Faculty, visiting 
aademic staff or engineering consultants.

**MECH941 Micro/Nano Robotic Systems**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: An overview of manipulation 
systems, comparison of macro-micro-nano worlds, 
macro/nano mechanics, actuation, sensing, design, 
manufacturing/fabrication, control and calibration issues 
in macro/nano robotic systems, examples of micro/ 
nano robotic systems and their application areas.

**MECH948 Sustainable Energy Technologies**

Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject covers a number 
of Sustainable Energy Technologies including the 
following: solar thermal systems; photovoltaics; wind 
energy; hydroelectricity generation; wave power systems; 
biomass; remote area power supplies; energy conservation/ 
auditing. The environmental and social impact of these 
technologies as compared to conventional energy sources 
will be considered. Students will undertake a laboratory/ 
field experiment or project, and/or carry out a case study.

**MECH949 Advanced Computer Control 
of Machines and Processes**

Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Advanced modelling and 
control of multivariable systems; performance of 
multivariable control systems; optimal control theory; 
robust control systems; design, implementation 
and evaluation of digital control systems.

**MECH950 Advanced Robotics**

Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The subject provides the 
knowledge and skills required to design appropriate 
robotic systems. Topics covered include: industrial 
robots as a component of automation, mathematical 
modelling of a robotics arm, direct and inverse kinematics 
model, direct and inverse dynamics model, trajectory 
planning, robot control, design and selection of drives 
and motors, industrial vision systems, position sensors, 
force sensors, ultrasonic sensors and other sensors.

**MECH979 Sustainable Transport and 
Engine Technology**

Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Advanced topics in: 
human powered transport, conventional and 
novel engine technology and design; strategies 
for reducing emissions; alternative fuels; solar 
vehicles; fuel cells and hybrid vehicles.

**MECH982 Bulk Solids Characterisation 
and Particulate Mechanics**

Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Concepts of particle mechanics 
(failure criteria, models to represent such criteria 
as particle size and distributions, particle shape, 
compressibility, permeability, internal friction, cohesion, 
adhesion, wall friction); concepts of flow properties 
of bulk solids for equipment design; flow property 
measurement techniques; use of computer software to 
alalyse and present experimental data for use in design.

**MECH983 Bulk Solids Handling 
(Storage and Flow)**

Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Basic concepts of storage; flow 
and feeding of bulk solids; use of flow properties to 
determine hopper geometrics; bin wall loads; feeding 
and discharge systems, feeder loads; chute design; 
flowrate prediction; segregation and blending; dust 
suppression systems; stock pile systems; case studies.

**MECH984 Belt Conveying**

Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Belt conveying systems; 
properties of conveyor belting; tension analyses 
(static and dynamic); drive systems; loading and 
unloading belts; trajectory prediction; transfer chute 
design novel belt systems; economic analyses.

**MECH985 Dust and Fume Systems**

Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Basic concepts; terminology
MECH986 Instrumentation and Control Systems For Bulk Solids
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Transducer types and their specification and applications; dynamic response of systems; speed measurement and control; mass flow rate measurement; belt weighing; weigh belt feeders; continuous and batch weighing systems; bin weighing systems and structural implications; system accuracy; interfacing with PLC's and computers; case studies.

MECH987 Advanced Topics in Bulk Solids and Particulate Technologies 1
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: There is no set syllabus for this subject. It is intended that it normally be offered on a specialised topic relating to some aspect of modern technologies relating to bulk solids and/or particulate technologies by staff members/visiting specialists and/or engineering practitioners.

MECH988 Advanced Topics in Bulk Solids and Particulate Technologies 2
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: There is no set syllabus for this subject. It is intended that it normally be offered on a specialised topic relating to some aspect of modern technologies relating to bulk solids and/or particulate technologies by staff members/visiting specialists and/or engineering practitioners.

MECH989 Advanced Topics in Bulk Solids and Particulate Technologies 3
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: There is no set syllabus for this subject. It is intended that it normally be offered on a specialised topic relating to some aspect of modern technologies relating to bulk solids and/or particulate technologies by staff members/visiting specialists and/or engineering practitioners.

MECH990 Bulk Solids and Particulate Technologies Project
Not on offer in 2009
Credit Points: 12
Pre-requisites: None

Co-requisites: None
Subject Description: Prepare a thesis on an approved topic related to bulk solids and/or particulate technologies. Normally the thesis will cover work performed in the workplace and additional supervision by an industry representative.

MECH993 Maintenance Management of Bulk Handling Systems
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Maintenance function principles and objectives; reliability and maintainability; maintenance planning; maintenance strategy for plant – a systems approach; maintenance and information support; failure analysis; maintenance organisation; maintenance control and documentation; human resource management; total production maintenance; auditing industrial maintenance systems.

MECH994 Mechanical Handling Systems
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Loss factor of transport; economic analysis of conveying and transportation systems; aspects of particulate mechanics in relation to mechanical handling systems; design concepts and performance criteria of mechanical conveying and feeding equipment employed in process plants. Performance analysis and evaluation of mechanical loading and unloading systems such as used in ship transport.

MECH995 Bulk Solids Handling (Systems and Design)
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Bin wall loads for symmetric and eccentric discharge; analysis of dynamic effects, the 'silo quaking' problem; wall roughness, friction and wear; feeder design principles; performance analysis of a range of feeders for bulk solids; flow promotion; blending and mixing; flow of fine powders; transfer chutes; vibration of bulk solids.

MINE899 Advanced Topics in Mining Engineering
Annual Wollongong On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None
Subject Description: Computer aided analysis and design; computer methods; ore reserve estimation finite element techniques; hydrology; hydraulics; numerical techniques; reliability; rock mechanics; simulation; structural analysis and design; structural topology; mine planning.
MINE902 Advanced Studies in Mining Engineering
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics will be selected from those areas of Mining Engineering in which staff members or visiting staff members to the Department are engaged in active research.

MINE903 Simulation of Mining Operations and Problems
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Including coal reserves, mining dimensions, surface effects, cost benefit effects of operation and management and economic evaluation and feasibility of a mining enterprise.

MINE904 Rock Mechanics
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Fundamentals of strata mechanics together with advanced topics including engineering technology and rock mechanics aspects of coal mining strata control. Design aspects of mine structures, such as mine pillars, gate roads and longwall mining. Instrumentation in providing for the safe design of the mine opening; Rock and cable bolting techniques, powered support design, slope stability and surface subsidence.

MINE905 Environmental Control in Mines
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Mine climate and its control, ventilation planning, ventilation network analysis and simulation; fan selection, booster fans; ventilation of long headings, recirculation; exhaust from diesel engines and their control; methane and its control in underground coal mines, dust in mine air and its control.

MINE906 Mining Engineering Techniques
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A selection of advanced laboratory and field exercises in mine support, temporary and long term; in situ testing, laboratory testing, rock properties and parameters; mine design and plant related to extraction areas.

MINE916 Mineral Valuation and Risk Analysis
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to provide resource professionals with the analytical tools to assess and evaluate the financial viability of an exhaustible resource project at various stages from exploration into development. It provides the student with knowledge of the theory, principles and applications of probabilistic discounted cash flows to the risk analysis of resources projects. Monte Carlo and Latin Hypercube simulation methods are discussed in the evaluation of financial risks. The subject also surveys the effects of mining taxation and other government imposts on a mining project and the impact of inflation on cash-flow analysis.
PHYs946  Advanced Solid State Physics
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Crystal Symmetries; Groups of Linear Transformation; Abstract Groups; Theory of Group Representations; Group of the Schrodinger Equation; Selection Rule Theorem; Groups of Physical Interest; Rotation Operations; Double-Valued Representations; Direct Products; Crystal Fields; Adiabatic Approximations; Bloch's Theorem; The Effective Mass Expansion; Spin-Orbit Interaction; Time-reversal Symmetry; Symmetry Properties of Wave Vectors; Band Theory; Impurities in Semiconductors.

PHYs948  Physics of Imaging
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is intended to lead to an understanding of the instrumentation and techniques involved in diagnostic and therapeutic uses of radiation in medicine. Topics covered will include Interactions of Radiation with Matter, Sources of Radiation, Detecting Radiation, Nuclear Electronics and data acquisition system, Nuclear Reactions and Production of Radiosotopes, Neutron Physics, Dosimetry of photons, electrons and neutrons, Solid Sate Dosimetry, TLD and film dosimetry, Introduction to Radiation Therapy, Medical Linear Accelerators, X-ray Modelling Methods, Brachytherapy and Radiosurgery, Clinical Radiotherapy, Linear Accelerators X-ray and Electron Beam Properties.

PHYs950  Special Topics in Physics A
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: PHYs947
Subject Description: The subject content will reflect the specialisation of the postgraduate coursework degree in which the student is enrolled. The material will, where possible, be based on existing Physics Honours subjects, but may be selected from any area of Physics on the advice of the academic supervisor. Subject content will change in scope and depth to reflect the postgraduate nature of the coursework.

PHYs951  Medical Physics Research Project
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 18
Pre-requisites: None
Co-requisites: None
Subject Description: The student will be required to undertake an applied research project on a topics of medical radiation physics under the supervision of one of the staff members working in the area of medical radiation physics. The area of research will be selected from the following fields: Nuclear Medicine, Medical Imaging, Radiobiology, Radiation Protection, Diagnostic Radiology, Radiotherapy, Instrumentation and Imaging Physics. All the above research topics may not be available every year.

PHYs952  Radiation and Radiotherapy Physics
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is intended to lead to an understanding of the instrumentation and techniques involved in diagnostic and therapeutic uses of radiation in medicine. Topics covered will include Interactions of Radiation with Matter, Sources of Radiation, Detecting Radiation, Nuclear Electronics and data acquisition system, Nuclear Reactions and Production of Radiosotopes, Neutron Physics, Dosimetry of photons, electrons and neutrons, Solid Sate Dosimetry, TLD and film dosimetry, Introduction to Radiation Therapy, Medical Linear Accelerators, X-ray Modelling Methods, Brachytherapy and Radiosurgery, Clinical Radiotherapy, Linear Accelerators X-ray and Electron Beam Properties.

PHYs953  Medical Imaging and Nuclear Medicine
Annual Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is intended to lead to an understanding of the instrumentation and techniques involved in medical imaging and an appreciation of the part played by image analysis in medical physics specifically. Topics covered will include - the photographic process, solid state detectors and CCDs, the hardware of image processing; film digitisers and plate scanners, software techniques, histograms, enhancements, convolution, edge enhancement, fourier techniques and operature synthesis, nuclear magnetic resonances, larmour frequency, basic imaging, slice selection, 3D data acquisition, chemical shift imaging, contract agents, image artefacts and distortion. The evolution and basic physics of radionucilde imaging, the tracer principle in Nuclear Medicine, the ideal properties for radioactive agents for diagnostic studies, the ideal properties for therapeutic radioactive agents, basic physiology of body organs pertinent of Nuclear Medicine.
## PHYS955  Transitional Medical Radiation Physics Program

<table>
<thead>
<tr>
<th>Annual</th>
<th>Wollongong</th>
<th>On Campus</th>
</tr>
</thead>
<tbody>
<tr>
<td>Credit Points:</td>
<td>8</td>
<td></td>
</tr>
<tr>
<td>Pre-requisites:</td>
<td>None</td>
<td></td>
</tr>
<tr>
<td>Co-requisites:</td>
<td>None</td>
<td></td>
</tr>
</tbody>
</table>

**Subject Description:** The Transitional Program will have the following structure:
- Radiation and Radiotherapy Physics - involving practical and clinical laboratory work in the following areas: QA and Simulator (10hrs), Advanced Pinnacle and Dose Planning (16hrs), Monte Carlo simulations (8hrs) and Brachytherapy (4hrs).
- Medical Imaging and Nuclear Medicine (60hrs) - no further work is required of Honours graduates in Medical Imaging. Students will be required to attend the Nuclear Medicine module of PHYS953. In addition students will be required to produce a paper and present a major seminar on an aspect of clinical medical radiation physics (approx 15hrs).

## PHYS960  Advanced Project in Physics B

<table>

</tr>
</tbody>
</table>

**Subject Description:** The student will be required to design and construct several self-contained experiments at the level of those encountered in Advanced Experimental Physics. OR After successfully completing this subject, the student will:
- have gained experience in contributing to the work of a small research group
- be able to keep detailed working records of the progress of experiments
- have gained a variety of intermediate practical and analytical level skills related to the specific area of research in which they have been involved
- be able to present a short seminar on the research in which they were engaged.

## PHYS990  Applied Physics Project

**Overview**

Candidates with demonstrated research potential, exhibited usually by a Bachelor Honours, Masters by Research degree or other Masters degree can apply to take a Doctor of Philosophy. Full-time study of three years, or the part-time equivalent, is normally required. Candidates will be expected to work under supervision on research projects related to their thesis area and may be required to complete coursework classes in order to acquire theory and develop methodological skills necessary for their doctoral research. Candidates for this degree enrol in the subject THES924 Thesis Full-time or, THES912 Thesis Part-time.

The following areas of research are some of the topics available to candidates undertaking the Doctor of Philosophy degree at the Graduate School of Business:
- Logistics and Supply Chain Management
- Management systems
- Corporate Recovery and Turnaround Strategy
- Organisational Behaviour
- Financial Management of Enterprises
- Financial Restructuring
- Strategic Management
- Corporate Governance and Business Ethics
- International Business Strategy
- Labour Regulation in the Global Economy
- Public Policy and Public Administration
- Health Management and Policy Development

Applications must be accompanied by a 2,000 word proposal describing the candidates preferred area of research interest.

**Other Information**

Additional information is available from www.uow.edu.au/gsb/ or email gsb@uow.edu.au

**Overview**

The Doctor of Business Administration (DBA) is an advanced postgraduate research degree that focuses on professional business practice, providing practicing managers with research skills that can be applied to issues of organisational leadership. The course supports the School’s research philosophy; to undertake innovative research of industrial or government relevance and significance. The DBA is designed to provide a framework that will enable participants to expand their knowledge in one or more business areas, drawing on the disciplinary expertise of faculties across campus. The program provides students with the opportunity to undertake an independent research project by completing a thesis. The course is designed to build on the existing strengths of the participants and provide a formal educational opportunity for them to demonstrate managerial capacities and gain a competitive advantage in business.
Entry Requirements
Students will have as a minimum, a good first degree, but more commonly a master degree, for example a Master of Business Administration. Work experience is advantageous to students in selecting appropriate topics and in access to data sources. However, students with a master’s degree and limited work experience may be accepted.

Applications must be accompanied by a 2,000 word proposal describing the candidate’s preferred area of research interest. Research interests should be related to topics listed on the Graduate School of Business website.

International applicants must also meet the University’s English Language requirements as set out at http://www.uow.edu.au/prospective/international/

Course Requirements
Candidates are required to complete six (6) subjects plus a thesis (a combined total of 144cps) according to the list below.

Master of Business - Research

Testamur Title of Degree: Master of Business – Research
Abbreviation: MBus-Res
Home Faculty: Graduate School of Business
Duration: 3 years part-time
Total Credit Points: 72 cps
Starting Session(s): Autumn at Wollongong Campus
Intake A at Sydney Business School
Delivery Mode: Face-to-face
Location: Wollongong, Sydney Business School
UOW Course Code: 1338, S1338
CRICOS Code: NA

Overview
The Master of Business – Research is designed for students who would like to study a higher degree research program, but are hesitant to commit to the Doctor of Philosophy (PhD) or the Doctor of Business Administration (DBA) degrees. The program is suitable for those who are working in middle management positions and aspire to progress to a senior management role. The coursework component of the degree will allow the students to develop the appropriate research skills to complete the thesis which follows.

Entry Requirements
Applicants must have a Bachelor degree or equivalent from a recognised tertiary institution with an average of at least 60%.

Course Requirements
Candidates are required to complete 24 credit points of coursework and a 48 credit point thesis.

Course Program

Advanced Standing/Credit
The Master of Business – Research may be used as a pathway into the Doctor of Philosophy (PhD) or the Doctor of Business Administration (DBA). Upon completion of the MBR, students may apply to progress to the Doctor of Business Administration (DBA) with credit for subjects previously completed.
Master of Business Administration

Testamur Title of Degree: Master of Business Administration and Master of Business Administration (Executive)

Abbreviation: MBA, EMBA

Home Faculty: Graduate School of Business

Duration: 1.5 years full-time or part-time equivalent

Duration: EMBA: 2 years part time

Total Credit Points: 72

Starting Session(s): Autumn, Spring at Wollongong Campus

Intake A, B, C, D at Sydney Business School

EMBA: Intake A at Sydney Business School

Delivery Mode: Face-to-face

Location: Wollongong, Sydney Business School

UOW Course Code: MBA: 547, SC547

EMBA: 548, SC548

CRICOS Code: 013031G

Overview

The Master of Business Administration is designed for experienced professionals who wish to develop their managerial skills in order to operate effectively in an increasingly competitive and evolving global business environment. Our program is designed for those who are qualified in a specialised field and who wish to develop their business acumen and business skills. Master of Business Administration students develop a portfolio of key management competencies that range from strategic analysis and decision making skills through to an appreciation of global business challenges, complemented by people, financial, marketing and system analysis skills.

Entry Requirements

Applicants must have a Bachelor degree or equivalent from a recognised tertiary institution with an average mark of at least 60%, along with a minimum of two years full-time relevant professional or managerial work experience.

International applicants must also meet the University’s English Language requirements (Refer to the University’s website at www.uow.edu.au/prospective/international for details).

Course Requirements

Candidates are required to complete twelve 12 subjects (72 cps) according to the list below. There are nine (9) compulsory subjects (54 cps) plus three (3) elective subjects (18 cps) selected from other 900 level Graduate School of Business or other 900 level subjects as approved by the Graduate Studies Advisor.

</tr>
</tbody>
</table>

# TBS 901 is a pre-requisite for TBS 907.
* These capstone subjects should ideally be undertaken only after all other compulsory subjects have been completed.

Two elective subjects that are highly recommended to students because they provide vital management skills are:

1. TBS 902 Statistics for Decision Making (required for those students who have not previously studied statistics, as this subject develops the skills necessary to complete other core MBA subjects); and
2. TBS 908 Supply Chain Management (provides an overview of overall product/service development, outlining the dependency upon both internal and external parties)

Students may also apply to complete an individual research project as a 6 or 12 credit point elective subject. The project topic has to be pre-approved by the Graduate Studies Advisor.

Note: Students undertaking the program through the Sydney Business School will have a more restricted number of elective subjects available to them. However, students may also choose electives at the Wollongong campus or undertake cross-institutional study.
Master of Business Administration (Executive)

The EMBA is a tailored MBA program which is suitable for mature students in a senior management role or those aspired to progress their career to a senior management position. For details regarding the program content and delivery, visit our website at http://www.uow.edu.au/gsb/

Advanced Standing/Credit

Upon completion of the MBA with an average mark of at least 60 per cent, candidates may apply to progress to the Master of Business Administration Advanced with credit for previous subjects completed within the MBA.

Master of Business Administration graduates may also apply to enrol in one of the Graduate School’s eight subject Masters degrees. Candidates may apply for advanced standing for subjects completed under the MBA and will be required to complete a further six specified subjects (36 credit points) as determined by the Graduate Studies Advisor.

Candidates who have completed one of the Graduate School’s eight subject Masters degrees or a selected range of Masters programs from the Faculties of Commerce, Health and Behavioural Sciences, Informatics, Engineering, and Education, and who meet the MBA entry requirements, may apply to enrol in the MBA program. Students may be eligible for advanced standing for up to six subjects (36 credit points) towards the MBA.

Candidates should consult the Graduate Studies Advisor for further information.

Other Information

Our membership with the Australian National Business School (ANBS) enables our Master of Business Administration students to be able to transfer to other ANBS member Universities and have the flexibility to work temporarily interstate without disrupting their studies. Master of Business Administration students also have the opportunity to participate in South East Asian and European summer schools.

Overview

The Master of Business Administration Advanced program offers students an extended MBA degree. The MBA Advanced program has a strategic focus designed for those students who require the knowledge, competencies and managerial skills necessary to operate in a challenging and changing global environment. The MBA Advanced program offers students the opportunity to further specialise in their area of interest by completing additional elective subjects.

Entry Requirements

Upon successful completion of the Master of Business Administration program with an average mark of 60 per cent, students may apply to progress to the MBA Advanced degree.

Course Requirements

In addition to the Master of Business Administration (MBA) course requirements, candidates will complete four additional 900 level elective subjects (24 credit points) from a specialisation discipline selected from the list below. The subject selection is to be determined in consultation with the GSB’s Graduate Studies Advisor and the relevant Faculty’s Course Co-ordinator.

Graduate School of Business

• General Management **
• International Business **
• Logistics **

Faculty of Commerce

• Accounting
• Finance
• Economics
• Human Resource Management
• Information Systems
• Management
• Marketing

Faculty of Engineering

</table>

Overview

The Master of Business Coaching has been designed to appeal to a broad range of people interested in business coaching including: those already working as business coaches without formal qualifications, internal business coaches working within companies, those working as individual or executive coaches who wish to strengthen their business understanding, consultants or counsellors who wish to develop their coaching skills, people undertaking a change of career and, managers who wish to develop coaching skills as part of their management approach.

The course focus is to apply coaching methodologies to business studies, covering content such as strategy, change management and people management, and techniques such as collaborative working and facilitation.

Entry Requirements

Applicants must have a recognised Bachelor degree of three years full-time (or part-time equivalent) duration.

International applicants must also meet the University’s English Language requirements as set out at http://www.uow.edu.au/prospective/international/

Course Requirements

Candidates are required to complete six (6) core subjects plus two (2) electives, totalling 48 credit points.

Course Program

Students are to complete 12 credit points of elective subjects selected in consultation with the Course Co-ordinator after considering the student’s existing knowledge, skills and career goals.

**Advanced Standing/Credit**

Upon successful completion of the Master of Business Coaching students may apply to enrol in another of the School’s Masters programs and apply for credit for previous postgraduate studies. Those graduates who meet the MBA entry requirements may apply to enrol in the MBA program, and may be eligible for advanced standing for up to six subjects (36 credit points) towards the MBA.

Candidates should consult the Graduate Studies Advisor for further information.

**Other Information**

All applicants will be required to attend an interview conducted by the Graduate School of Business.

</tbody>
</table>

**Overview**

This course is designed for practicing health professionals seeking to develop their management and leadership skills. This flexible program allows students to select from a variety of Graduate Certificate degrees and tailor their Masters program to suit their professional development requirements.

**Entry Requirements**

Students can enter the Master of Health Leadership and Management degree via either of the pathways detailed below:

Applicants with a Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent, together with a minimum of two years full-time relevant work experience will be admitted to the Master of Health Leadership and Management degree. Upon commencement of the degree, students will nominate two Graduate Certificate degrees within the course structure.

Alternatively, applicants may apply to enrol in one of the Graduate Certificate degrees listed within the MHLM course structure, provided they meet the entry requirements as specified for this Graduate Certificate by the relevant Faculty. Upon successful completion of the Graduate Certificate with an average mark of at least 60 per cent, students may apply to progress to the Master of Health Leadership and Management with credit for previous studies completed.

**Advanced Standing**

Candidates must successfully complete a total of eight subjects, totalling 48 credit points; no advanced standing will be granted for subjects completed in the first graduate certificate degree. Students who successfully complete one of the Graduate Certificate programs listed in the course structure with an average mark of at least 60 per cent may apply to progress to the MHLM with credit for previous studies.

**Course Requirements**

Students who enrol directly into the Master of Health Leadership and Management will be required to meet with the Course Co-ordinator and discuss which two of the graduate certificate programs will comprise the course. Those students who enrol initially in one of the Graduate Certificate degrees listed below, will be eligible to progress to the Master of Health Leadership and Management, upon successful completion with an average mark of at least 60 per cent. Candidates will then articulate to the Master of Health Leadership and Management and complete a further 24 credit points of subjects, based on one of the other graduate certificate programs listed below.

At least one of the graduate certificate programs must be chosen from those offered by the Faculty of Health and Behavioural Sciences. As leadership is a core component of this program, students must either complete the Graduate Certificate in Health Leadership and Management OR successfully complete the subject TBS903 Managing People in Organisations within one of the other Graduate Certificates.

**Faculty of Health and Behavioural Sciences**

- Graduate Certificate in Health Leadership and Management
- Graduate Certificate in Health Management
Master of International Business

Testamon Title of Degree: Master of International Business
Abbreviation: MIB
Home Faculty: Graduate School of Business
Duration: 12 months full-time or part-time equivalent
Total Credit Points: 48 cps
Starting Session(s): Autumn, Spring at Wollongong Campus
Intake A, B, C, D at Sydney Business School
Delivery Mode: Face-to-face
Location: Wollongong, Sydney Business School
UOW Course Code: 597, SC597
CRICOS Code: 026342G

Overview
The Master of International Business program prepares students to succeed in managerial and professional positions in the global economy. The globalisation of the market place requires businesses to be increasingly innovative and competitive. Managers need to understand the complexities of global culture, political, economic, organisational and financial forces and recognise how they can impact on the success of their business.

This course examines the background of globalisation and teaches the management skills and competencies that are necessary in order to effectively operate in a truly global business environment.

Entry Requirements
Applicants must have a Bachelor degree or equivalent from a recognised tertiary institution.

International applicants must also meet the University's English Language requirements. Refer to the University's website at http://www.uow.edu.au/prospective/international/english/index.html

Course Requirements
Candidates are required to complete a total of eight (8) subjects (48 cps) according to the list below.

**Overview**

The Master of Management provides an opportunity for practicing managers to enhance their career opportunities by developing further professional, personal and technical skills in key business areas. The Master of Management comprises eight subjects chosen from the overall portfolio of subjects offered at each campus of the GSB in consultation with the Graduate Studies Advisor. The structure of this program is flexible in order to take into account individual professional development needs. Programs of study are negotiated on an individual basis with the Graduate Studies Advisor.

**Entry Requirements**

Applicants must have a Bachelor degree from a recognised institution with an average mark of at least 60%.

International applicants must also meet the University's English Language requirements (refer to the University's website at www.uow.edu.au/prospective/international/ for details).

**Course Requirements**

Candidates will be required to complete eight (8) subjects (48 credit points) determined in consultation with the Graduate Studies Advisor.

**Advanced Standing/Credit**

Upon successful completion of the Master of Management, students may apply to enrol in another of the School's Masters programs and apply for up to 25 per cent credit for previous postgraduate studies. Those graduates who meet the MBA entry requirements may apply to enrol in the MBA program, and may be eligible for advanced standing for up to six subjects (36 credit points) towards the MBA.

Candidates should consult the Graduate Studies Advisor for further information.
Master of Project Management

Testamur Title of Degree: Master of Project Management
Abbreviation: MProjMgmt
Home Faculty: Graduate School of Business
Duration: 12 months full-time or part-time equivalent
Total Credit Points: 48 cps
Starting Session(s): Autumn, Spring at Wollongong Campus
Intake A, B, C, D at Sydney Business School
Delivery Mode: Face-to-face
Location: Wollongong, Sydney Business School
UOW Course Code: 1577, S1577
CRICOS Code: 061946M

Overview
Efficient project management provides organisations with improved ability to plan, implement and control their business activities. The growth of new forms of technology in project management has prompted organisations to look for skilled project managers who can enhance the performance of their businesses. The Master of Project Management equips students with comprehensive project management skills and teaches strategies for dealing with a broad range of issues encountered within business organisations.

Entry Requirements
Applicants must have a bachelor degree from a recognised institution with an average mark of at least 60%.
International applicants must also meet the University's English Language requirements as detailed at http://www.uow.edu.au/prospective/international/

Course Requirements
Candidates are required to complete a total of eight (8) core subjects totalling 48 credit points.

Master of Retail Management

Testamur Title of Degree: Master of Retail Management
Abbreviation: MRetMgmt
Home Faculty: Graduate School of Business
Duration: 12 months full-time or part-time equivalent
Total Credit Points: 48 cps
Starting Session(s): Autumn, Spring at Wollongong Campus
Intake A, B, C, D at Sydney Business School
Delivery Mode: Face-to-face
Location: Wollongong, Sydney Business School
UOW Course Code: 1574, S1574
CRICOS Code: 061990G

Overview
Retailing is a major sector of the Australian economy. Globally, retailing is one of the fastest growth areas for employment. In recent years, retailers have had to deal with increased levels of competition, the growth of the internet, new forms of technology and consumers who are looking for better value together with higher quality service. As a result, retailers require managers with the necessary skills to tackle and meet those challenges.

The Master of Retail Management equips students with strategies for dealing with issues unique to retail and the education necessary to succeed in leadership roles within the sector.

Entry Requirements
Applicants must have a bachelor degree from a recognised institution with an average mark of at least 60%.
International applicants must also meet the University’s English Language requirements as set out at http://www.uow.edu.au/prospective/international/

Course Requirements
Candidates are required to complete eight (8) core subjects totalling 48 credit points.

* Topic to be negotiated with the Graduate Studies Advisor to meet individual students’ development needs and work environment.

Advanced Standing/Credit
Upon successful completion of the Master of Retail Management students may apply to enrol in another of the School’s Masters programs and apply for credit for previous postgraduate studies. Those graduates who meet the MBA entry requirements may apply to enrol in the MBA program, and may be eligible for advanced standing for up to six subjects (36 credit points) towards the MBA.
Candidates should consult the Graduate Studies Advisor for further information.
Master of Science (Logistics)

Testamur Title of Degree: Master of Science (Logistics)
Abbreviation: MSc (Log)
Home Faculty: Graduate School of Business
Duration: 12 months full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn, Spring at Wollongong Campus
Intake A, B, C, D at Sydney Business School
Location: Wollongong, Sydney Business School
UOW Course Code: 574C, S574C
CRICOS Code: 042635F

Overview

This course is designed to provide professionals working in logistics and operations management, particularly in the manufacturing, transport, retail and service industries, with the skills to manage the flow of materials and information within and between organisations and their business environment. Students will learn how to implement a supply chain strategy within an organisation and develop skills in forecasting, production and service planning. An emphasis is given to information technology systems and computer programs as these are increasingly integral to successful supply chain delivery.

The Master of Science (Logistics) is accredited by the Chartered Institute of Logistics and Transport and the Chartered Institute of Purchasing and Supply.

Entry Requirements

Applicants must have a Bachelor degree in a relevant discipline, typically in Commerce, Engineering, Mathematics or IT, from a recognised institution, with an average mark of at least 60%. Applicants who have a Bachelor degree in other disciplines may be admitted, providing they have completed relevant work experience within the industry or a demonstrated understanding of the business environment.

International applicants must also meet the University’s English Language requirements (refer to the University’s website at www.uow.edu.au/prospective/international/ for details).

Course Requirements

Candidates are required to complete a total of eight (8) subjects (48 cps) according to the list below.

Advanced Standing/Credit

Upon successful completion of the MSc, students may apply to enrol in another of the School’s Masters programs and apply for credit for previous postgraduate studies. Those graduates who meet the MBA entry requirements may apply to enrol in the MBA program, and may be eligible for advanced standing for up to six subjects (36 credit points) towards the MBA.

Candidates should consult the Graduate Studies Advisor for further information.
Graduate Diploma in Business Administration

Overview
The Graduate Diploma in Business Administration is available for students who wish to undertake a business administration program of shorter duration. The Graduate Diploma program is aimed at providing practising managers with core management competencies and skills. With a strategic focus, the course equips modern managers with conceptual tools and analytical and evaluation techniques.

Entry Requirements
Applicants must have a Bachelor degree or equivalent from a recognised tertiary institution with an average mark of at least 60%, along with a minimum of two years full-time relevant professional or managerial work experience.

Course Requirements
Candidates are required to complete eight (8) subjects (48 credit points) selected from the list of Master of Business Administration core subjects as approved by the Graduate Studies Advisor.

Advanced Standing/Credit
Upon completion of the Graduate Diploma in Business Administration, students may apply to progress to the Master of Business Administration (MBA) with credit for previous subjects completed within the Graduate Diploma. Applicants should consult the Graduate Studies Advisor for further information.

Graduate Certificate in Business Administration

Overview
The Graduate Certificate in Business Administration is available for students who wish to study the fundamental concepts of management. This program is aimed at providing practising managers with key management competencies and skills, including analytical and evaluation techniques.

Entry Requirements
Applicants must have a Bachelor degree or equivalent from a recognised tertiary institution with an average mark of at least 60%, along with a minimum of two years full-time relevant professional or managerial work experience.

Course Requirements
Candidates are required to complete four (4) subjects (24 credit points) selected from the list of Master of Business Administration core subjects as approved by the Graduate Studies Advisor.
**Advanced Standing/Credit**

Upon completion of the Graduate Certificate in Business Administration students may apply to progress to either the Graduate Diploma in Business Administration or Master of Business Administration and apply for credit for subjects completed under the Graduate Certificate.

**Other Information**

University of Wollongong Doctor of Philosophy (PhD) students enrolled in faculties other than the Graduate School of Business and the Faculty of Commerce may apply to enrol in this degree concurrently. Candidates must be currently enrolled in a Doctor of Philosophy at the University of Wollongong in order to be eligible to apply. For further information, please contact the Graduate School of Business.

## Overview

The Graduate Certificate in Business is a pathway program leading to entry to a number of Master degrees offered by the Graduate School of Business. It can be packaged with an offer of admission to the following Graduate School of Business degrees:

- Master of International Business
- Master of Management
- Master of Project Management
- Master of Retail Management
- Master of Science (Logistics)

The Graduate Certificate may be suitable for students who do not meet either:

- The English language requirement for direct entry to a Master degree which requires an IELTS overall score of 6.5. The Graduate Certificate entry requirement is IELTS 6.0.
- Or, the academic requirements for direct entry into Master degrees. For example, if you have a Bachelor degree but do not have the required content for direct entry, or have other appropriate combinations of academic qualifications and relevant professional experience.

## Entry Requirements

Applicants must have a Bachelor degree or equivalent from a recognised institution. Applicants with other academic qualifications and/or relevant professional experience (for example two years full-time study along with two years relevant work experience) may also be considered.

International applicants must also meet the University’s English Language requirements as set out at [http://www.uow.edu.au/prospective/international/](http://www.uow.edu.au/prospective/international/)

## Course Requirements

Candidates are required to complete four (4) 900 level subjects (24 credit points) as approved by the Graduate Studies Advisor.

## Advanced Standing/Credit

Upon successful completion of the Graduate Certificate in Business with an average mark of at least 60%, students may apply to enrol in either the Master of International Business, Master of Management, Master of Project Management, Master of Retail Management or Master of Science (Logistics) degrees. Students will not be eligible for advanced standing for subjects completed under the Graduate Certificate in Business pathway program towards their subsequent Masters degree.
Graduate Certificate in International Business

Testamur Title of Degree: Graduate Certificate in International Business
Abbreviation: GCertIntBus
Home Faculty: Graduate School of Business
Duration: 6 months full-time or part-time equivalent
Total Credit Points: 24 cps
Location: Wollongong, Sydney Business School
Delivery Mode: Face-to-face
Starting Session(s): Autumn, Spring at Wollongong Campus
Intake A, B, C, D at Sydney Business School
UOW Course Code: 1141, S1141

Upon successful completion of the Graduate Certificate in Retail Management, students may apply to progress to the Master of Retail Management with credit for subjects completed in the Graduate Certificate.
**SUBJECT DESCRIPTIONS**

**TBS 901  Accounting for Managers**
- Intake A: Sydney, Modular
- Autumn: Wollongong, On Campus
- Intake C: Sydney, Modular
- Intake D: Shoalhaven, Modular

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** TBS980

**Subject Description:** This subject is intended for those who need to obtain a better understanding of the principles of accounting and financial management. No previous knowledge or experience is assumed. The subject will introduce you to the role that effective financial management makes within an organisation. The aim is to make you proficient in the use of the accounting data that you receive in your work environment, as well as making you aware of the basis on which key financial decisions are made. You will be introduced to the basic concepts of financial decision-making and the role of financial management in both private and public sector organisations. The concepts and techniques will assist you in the use and interpretation of accounting data and you will become better acquainted with the planning and controlling of resources you have at your disposal.

**TBS 902  Statistics for Decision Making**
- Intake A: Sydney, Modular
- Autumn: Wollongong, On Campus
- Intake C: Sydney, Modular
- Spring: Wollongong, On Campus

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** ECON940

**Subject Description:** This unit will provide an in-depth introduction to probability, decision theory, and statistical inference with emphasis on solutions to actual business problems. After developing a foundation in probability theory, the subject will extend this foundation to a set of methodologies for the analysis of decision problems. The unit examines structures for managerial decision making under conditions of partial information and uncertainty. The examination of the use of statistical techniques in managerial decision-making processes, including, confidence intervals, hypothesis testing, quality control, simple and multiple regression and factor analysis should be applied in realistic case situations.

**TBS 903  Managing People in Organisations**
- Intake A: Sydney, Modular
- Autumn: Wollongong, On Campus
- Spring: Wollongong, On Campus

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject introduces students to ideas about managing people in organisations which thematically combine theories and research in organisational behaviour and human resource management. The subject encourages students to think about management and organisations in ways which are multi-disciplinary, problem solving and critical. It encourages intellectual inquiry and debate using a range of sources: theoretical, journalistic, historical, comparative and quantitative. The subject encourages students to evaluate popular management fads in the light of more rigorous theorising and research. It aims to improve the research, critical thinking, writing and speaking skills of students.

**TBS 904  Marketing Management**
- Intake B: Batemans Bay, Modular
- Intake B: Shoalhaven, Modular
- Intake C: Sydney, Modular
- Autumn: Wollongong, On Campus

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** MARK922

**Subject Description:** This subject examines the contemporary view of marketing and focuses on the following areas: identification of marketing opportunities; market segmentation; targeting and positioning; product life cycle; new product development; services marketing and marketing mix decisions.

**TBS 905  Economic Analysis of Business**
- Intake B: Shoalhaven, Modular
- Intake C: Sydney, Modular
- Spring: Wollongong, On Campus

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject aims to introduce students, and develop their understanding of, core economic concepts relevant to business and managerial decision-making, in order that they may identify and interpret those economic events and circumstances which influence the operations of business. Commencing with the (microeconomic) examination of the behaviour of individual economic units, the subject develops to provide a view of macroeconomics and its application to the functioning of the economy overall. National accounts systems are introduced, and the macroeconomic approach that is relevant to an open economy of the type in which real businesses operate. It is a course objective to equip students to be able to read and understand published articles on business and the broader economy, and interpret these as to their impact on business and government organisations, and such material will be used in class.

**TBS 906  Information Systems for Managers**
- Intake A: Batemans Bay, Modular
- Intake A: Shoalhaven, Modular
- Intake B: Sydney, Modular
- Spring: Wollongong, On Campus
- Intake D: Sydney, Modular

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Exclusions:** BUSS903

**Subject Description:** This subject provides an understanding of the management of information systems...
in organisations, in particular, it provides an analysis of the approaches to managing information and knowledge as well as the techniques for ensuring information quality. Other issues considered are the creation of strategies to resource and control information flows and usage within an organisation; the management of information system projects and the impact of change their implementation has on staff; the use of technology and people to improve the quality information services.

Finally, we live in Asia Pacific, so it is important to understand the regionalisation of supply chains which is well underway, and in some cases, globalisation.

**TBS 909 Corporate Governance**  
Autumn Wollongong On Campus  
Intake C Sydney Modular  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The broad aim of this subject is to identify, explain and evaluate the sometimes competing approaches to corporate governance and business ethics that have defined the terms of the governance debate, to assess the role of public policy in designing and overseeing effective systems of corporate governance and to examine the relationship between governance issues and business. This will provide students with a sound understanding of the complex issues that have to be faced by industry and government in developing effective, and ethical, corporate governance systems.

**TBS 912 Quantitative Methods for Decision Making**  
Autumn Wollongong On Campus  
Intake B Sydney Modular  
Intake D Sydney Modular  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject focuses on the quantitative techniques available to managers in problem solving and decision making in businesses. The subject aims to develop in students the skills necessary for data analysis, model building and analysis for business decision-making. To this end the subject covers areas such as decision making under certainty and uncertainty, linear programming, transportation and transhipment techniques, project scheduling with certainty and uncertainty, waiting line models, goal programming, Analytic Hierarchy Process and simulations.

In this subject, the emphasis is given on the analysis and interpretation of the results provided by the models.

**TBS 913 Innovation Topics and Cases**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject covers integration issues that must be confronted and managed to create value from technological and business innovation, including: initiating innovation and incubating novel thinking, technological innovation, the innovation process, theories of innovation, planning innovation, strategy and innovation, R & D management, economic justification and innovation, new products and processes, operations strategy and innovation, process innovation, managing future technologies, public policy and technological innovation, and globalising change.
Subject Description: The core element of the ASIAM program examines the spectacular growth in the tiger economies, and focuses on South Korea, Malaysia, China and Indonesia. Forms of government, the structure of industry, inward investment, sourcing, trading relationships, government/ business relationships and business style are some of the issues addressed. Students visit local organisations and meet senior managers.

TBS 915 Supply Chain Management: From Vision to Implementation
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The main theme of this subject is the alignment of supply chains with customers and suppliers to create new value. The role of 3PLs and 4PLs is also critically reviewed, and new business models are proposed for managing future supply chains. This subject will introduce the unique ‘alignment’ framework, and then work through all the components necessary for it’s successful operation, from customer segmentation at the user end, to supplier relationships at the sourcing end. This subject is a ‘must’ for any executive wishing to be at the vanguard of latest thinking in the design and operation/ implementation of high-performance supply chains in all goods and services sectors.

TBS 916 Intellectual Capital Development: The Asia-Pacific Perspective
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: In the Knowledge Economy, the generation and exploitation of knowledge plays the predominant role in the creation of wealth, and knowledge has become the most important factor in economic growth. At the enterprise level, corporate investment in knowledge and related intangibles is growing at a faster rate than tangible investment in all developed economies. This unit critically evaluates knowledge strategies at the national and enterprise level, and confirms elements of effective knowledge management in the Asian context. Firstly, national knowledge-based strategies for economic growth in Singapore, Korea, Malaysia and Australia will be examined. Secondly, knowledge strategies adopted by leading Asian firms (based on Most Admired Knowledge Enterprises - Asia 2003) will be reviewed. Based on the analyses, success criteria for knowledge management in Asia at national and enterprise levels will be identified.

TBS 917 Strategic Negotiation for International Business
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This unit will provide a close examination of the dynamics of the process of negotiation. This will be achieved through an exploration of negotiation theory and research and through the practical exercise of various negotiating techniques. This theory into practice approach will encourage students to develop a strategic rather than reactive perspective to the task of reaching an agreement through negotiation. The unit will also critically examine the inter-cultural dimensions of negotiation.

TBS 918 Strategic Supply Chain Management
Autumn Wollongong On Campus
Intake B Sydney Modular
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject extends the study of Supply Chain Management from the introductory level and examines the development of organisational strategy in the context of supply chain management. The overarching framework around which the course content is organised is the supply chain management performance/ capability continuum, which consists of three critical components: operational excellence, supply chain integration, and collaboration and virtual supply chains. Also covered is how information systems can be used to bring strategic competitive advantage to supply chains.

TBS 920 International Business Strategy
Intake A Sydney Modular
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: TBS984
Subject Description: This subject provides a detailed introduction to management within an international business perspective. Business is becoming increasingly global and firms require managers who understand and can resolve the challenges faced in surviving and succeeding in this competitive, diverse and dynamic environment. The subject seeks to integrate a range of disciplines including economics, management, global finance, marketing, operations management, and socio-cultural and political sciences, into a program focussed on the application of such disciplines to real business challenges. The subject therefore intends to build the students awareness of the complexity and dynamic nature of international business, and build their capacity to think and respond strategically. Managers capable of operating effectively in this environment will have truly global skills and will enhance their career prospects in today's exciting international business context.

TBS 921 Strategic Decision Making
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is theory and case based and will provide a study of the development of strategic decision-making and its application to corporate strategy. The subject consists of three main sections: strategic analysis, strategic choice and strategy implementation. However, it is more realistic to consider these from an integrated point of view and students will be strongly encouraged to develop holistic ideas of strategic decision-making, with emphasis on solutions
to actual business challenges. Students should also realise that much of the strategic thinking that will be covered in this subject is also relevant to not for profit organisations. The theme throughout the subject will be to assess strategic capability and determine appropriate strategic actions, by developing a sound understanding of the mechanisms behind industry opportunities and threats. That is not to say that a purely mechanistic view is appropriate. Creativity, divergent lateral thinking and some understanding of risk management are essential requirements. The ability to find company information and develop a sophisticated understanding of case information are also skills that will be developed to encourage an educated approach to strategic decision-making.

**TBS 922 Management Project**  
Intake B Sydney Modular  
Spring Wollongong On Campus  
Intake D Sydney Modular  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students are required to present a management report to agreed guidelines and to a maximum length of 10,000 words. This project should relate to the students workplace environment and negotiated with the Subject Co-ordinator.

**TBS 923 Contemporary Issues in Management**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject provides a broad view of currently topical issues in management through the study, analysis and discussion of relevant readings on each issue. The subject’s approach is based on initial study of the selected readings, complemented by development of theoretical aspects where required, followed by group discussion and analysis of each issue. Assessment for the subject will be based on essay submissions for each issue covered, normally three in number, as well as a take home final examination.

**TBS 924 Management Project**  
Not on offer in 2009  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Students are required to present a management report, to agreed guidelines and to a maximum length of 10,000 words. This project must relate to a student’s chosen area of specialisation within the MBA.

**TBS 925 Inventory Management**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: TBS 930  
Co-requisites: TBS930 may be completed simultaneously with TBS 925.  
Subject Description: This subject aims to provide the student with state-of-the-art knowledge of inventory management theory and practice. Topics included will be as follows: materials management; management of storage and retrieval facilities; types of inventory problems; measuring inventory performance; inventory management systems for independent demand items; influence of forecasts and uncertainties of demand and lead time; dependent demand inventory systems; multi-echelon inventory management; decision models for inventory management; simulation models of inventory management systems; and case studies of world-class inventory management.

**TBS 926 Manufacturing Management**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject looks at manufacturing industry dynamics and manufacturing strategy, value adding in manufacturing, materials flow, manufacturing planning and control including MRP II, ERP, JIT and OPT. Maintenance management, supply procurement, distribution quality control, assurance and improvement, manufacturing information technology, performance management, concept of lean and agile manufacturing. Students are expected to undertake a substantial mini-project that is usually case-based, preferably on an aspect of the student’s work experience.

**TBS 927 Process and Change Management**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject combines the process reengineering and change management. The topics covered in this context include mass customisation, business process reengineering, and change management for process change. Cases are studied to provide a unifying theme in terms of organisational change, supply chain reengineering and integration aspects.

**TBS 928 Logistics Systems**  
Intake A Sydney Modular  
Intake C Sydney Modular  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Logistics Systems is an advanced course in logistics and supply chain management. It involves design and management of supply chain systems. It prepares students for logistics management positions in manufacturing, transportation and distribution firms. The application of analytical techniques, simulations and computer software to selected aspects of distribution management is explored in the course. Attention will be given to areas of network planning, inventory control, facility location, vehicle routing and scheduling of logistics systems. Mathematical models in these areas will be discussed in terms of their ability to represent the problem and usefulness to the managers. Cases will be used to demonstrate the nature of decision making problems managers face in logistics and supply chain management in contemporary business and class discussion will take place about the repercussions of alternative decisions.
TBS 929 Management of Process Innovation

Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A key concern of contemporary technology management is improving the rate and quality of process innovation by adopting new methods to successfully integrate environmental, human, organisational and technological factors. This subject introduces the student to the interdependent human and technological character of work systems and provides principles and methodologies for designing more effective organisations. This subject is focused on the ‘design’ aspects of process innovation and covers in some detail socio-technical system design.

TBS 932 Service Operations Management

Not on offer in 2009
Credit Points: 6
Pre-requisites: TBS908
Co-requisites: None
Subject Description: The purpose of this subject is to provide the student with an understanding of the basic issues, concepts, methods, tools and some quantitative models in Service Operations Management (SOM). The subject is designed for students with no previous study in Service Operations Management but aims to develop an understanding and level of skill commensurate with postgraduate study, though at an introductory level rather than that required by a professional service operations manager. Subject Aims: 1) To develop an appreciation of the significance of SOM to the success or failure of a business; 2) To be aware of and to understand some of the key activities involved in SOM; 3) To develop an insight into some of the many different tools and techniques used by Service Operations Management.

TBS 933 Procurement and Inventory Management

Intake A Sydney Modular
Autumn Wollongong On Campus
Intake C Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Today, the function that used to be called purchasing or procurement, has expanded to become supply management. Supply management is a progressive approach to managing the supply base that differs from a traditional arm’s length or adversarial approach with suppliers. This subject looks at the expanded responsibility of procurement and its integration with long-term strategic corporate planning. Procurement now includes participating collaboratively in key material requirements determinations, supply management and warehousing and inventory management. It focuses on the management of supplier relations and performance. This subject incorporates all these areas in the development of procurement and supply chain management. Also included are key elements of supply chain inventory management. Also included are key elements of supply chain inventory management.

TBS 934 Logistics Information Systems

Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject centres on how information technologies will transform the business landscape, with a particular emphasis on logistics and supply chains. Lectures highlight logistics management process analysis, value and productivity performance measurement of information technology investments, and the impact of ERP and RFID on supply chain strategy.

TBS 935 Project Management

Intake A Sydney Modular
Autumn Wollongong On Campus
Intake B Sydney Modular
Intake C Batemans Bay Modular
Intake C Bega Modular
Intake C Loftus Modular
Intake C Shoalhaven Modular
Intake C Sydney Modular
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to develop knowledge of various types of projects in current business organisations. The students will learn the different stages
involved in the conception and implementation of projects, writing project proposals, carry out feasibility studies, organising and managing project teams, understand the role of project management in business organisations, project planning and scheduling, project finance, effective information and stakeholder management, contractual arrangements and project supervision.

### TBS 936 Advanced Project Management

**Intake A**  
Sydney  
Modular  

**Intake Autumn**  
Wollongong  
On Campus  

**Intake Spring**  
Wollongong  
On Campus  

**Intake D**  
Sydney  
Modular  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** TBS935  

**Subject Description:** This subject builds on the concepts in TBS935 Project Management, with special emphasis on managing complex and high-risk projects. The subject will cover topics in advanced project management including risk management, defining and managing complex scope, system definition and configuration management, models development, contracts and acquisition strategy, quality and value management, business case and tender preparation, negotiation and conflict resolution, management of time and stress, relationship contracting and performance management.

### TBS 940 International Project Management

**Not on offer in 2009**  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**Subject Description:** All sectors of industry, including production or servicing as well as public sector organisations, are increasingly applying the principles of Project Management. Add to this the international factor and project management can become challenging. In the ‘global economy’, more educated, demanding and litigious customers are creating a strong need for flexible and quick response capabilities in organisations, together with strong accountability mechanisms. Managers who are confident in conceiving, planning, implementing and managing international projects are building organisational and personal capabilities which will enhance their organisations - whether manufacturing, service or ‘not for profit’. This subject analyses key issues for Project Management, including the definition of a project, impacts on the management of these due to culture, organisational structure, risk management, and leadership influences.

### TBS 945 Retail Management

**Intake Autumn**  
Wollongong  
On Campus  

**Intake C**  
Sydney  
Modular  

**Intake D**  
Sydney  
Modular  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**Subject Description:** This subject examines the complex and manifold questions of retail management. Internationally known retail companies are used as examples to facilitate an understanding of what is involved in strategic retail management and to present cases of best practice. Key themes covered in this subject include: an overview of strategic retail management; situational analysis; targeting customers and gathering information; choosing a store location; managing a retail business; merchandise management and pricing; communicating with suppliers and customers and; integrating and controlling the retail strategy.

### TBS 946 Retail Marketing

**Intake B**  
Sydney  
Modular  

**Intake Spring**  
Wollongong  
On Campus  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**Subject Description:** This subject provides a comprehensive introduction to retail marketing. It has a coherent structure, looking first at the nature of retail marketing, then at the environment, at consumer behaviour, segmentation and positioning and at the retail marketing mix. More specialist topics are also addressed such as own-label brand marketing, retail promotion and advertising, retail service provision and comparative international retail marketing management.

### TBS 950 Quality in Management

**Intake A**  
Sydney  
Modular  

**Intake Autumn**  
Wollongong  
On Campus  

**Intake B**  
Sydney  
Modular  

**Intake C**  
Sydney  
Modular  

**Intake Spring**  
Wollongong  
On Campus  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**Subject Description:** This subject addresses the quality issues from the supply chain perspective. It covers the following topics: the quality imperative for the open economy; concepts of quality; quality in service and manufacturing organisations; quality control and assurance; quality costs; tools of TQM; quality function deployment; six sigma implementation; principles of Taguchi methods and robust quality; international quality assurance standards; HRM in quality; case studies in quality management.

### TBS 951 Statistics for Quality Management

**Not on offer in 2009**  

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  

**Exclusions:** TBS902  

**Subject Description:** Topics covered in this subject include quality theory including ‘six sigma’ and the ‘seven tools of quality’. This subject has a comprehensive approach to statistics to meet the needs of students from diverse backgrounds. The subject provides a theoretical and practical grounding in statistical process quality (SPC). Students will be required to demonstrate their understanding of SPC using real case studies from organisations or companies selected by the student. The subject will create a direct link between statistical concepts delivered in lectures and real cases in the area of quality and a direct link between SPC and regression analysis.

### TBS 952 Implementing Quality Systems

**Not on offer in 2009**  

**Credit Points:** 6  
**Pre-requisites:** TBS950  
**Co-requisites:** None  

**Subject Description:** This subject briefly reviews
basic Quality philosophies – with an emphasis on system, cost, problem solving and people improvement. It concentrates on systems thinking as a key factor in understanding and improving quality, the development of a learning organisation, and ultimately the achievement of customer loyalty. This subject also reviews the fundamentals of the Quality organisation: ISO 9000, Six Sigma and other Quality systems that play a role in TQM. The course introduces practical Quality systems (eg Kaizen, improvement methodologies and QI tools), Quality Function Deployment (QFD), measure of conformance and the prevention of non-conformance. The behaviour, commitment, and involvement of people in a Quality organisation are explored, including: team working, the team approach to problem solving, and the roles of management, suppliers, and customers in a Quality environment. Implementation examples are provided through a case study that features the identification and improvement of quality systems.

TBS 953 Management of Service Quality
Not on offer in 2009
Credit Points: 6
Pre-requisites: TBS950
Co-requisites: None
Subject Description: This subject explores the dimensions of successful service firms. It prepares students for enlightened management and suggests creative entrepreneurial opportunities. Outstanding service organizations are managed differently than their ‘merely good’ competitors. Actions are based on totally different assumptions about the way success is achieved. The results show not only in terms of conventional measures of performance but also in the enthusiasm of the employees and quality of customer satisfaction. Beginning with the service encounter, service managers must blend marketing, technology, people, and information to achieve a distinctive competitive advantage. This subject will study service management from an integrated viewpoint with a focus on customer satisfaction. The material will integrate operations, marketing, strategy, information technology and organizational issues. Finally, because the service sector is the fastest-growing sector of the economy, this course is intended to help students discover entrepreneurial opportunities.

TBS 954 Quality Management and Design
Not on offer in 2009
Credit Points: 6
Pre-requisites: TBS950
Co-requisites: None
Subject Description: This subject emphasises the application of organisation level improvement techniques in the effective management of Learning Organisations in a post industrial rapid change economy. Issues covered emphasise Organisational Performance Measurement (OPM) and improvement, and develop intellectual frameworks for:- the contribution of measurement and improvement, and development of methodologies for designing and integrating quality into organisational systems, and a futures perspective on the likely successful features of quality organisations in non ferrous manufacturing environments such as transgenics, nanotechnologies, molecular manufacturing.

TBS 955 Quality Assurance
Not on offer in 2009
Credit Points: 6
Pre-requisites: TBS950 and TBS952
Co-requisites: None
Subject Description: This course provides an opportunity for specialised study within the Quality management program, by developing the following frameworks of understanding: 1) the terminologies and purposes of Quality Assurance; 2) studies of selected methodologies Quality Assurance; 3) a case study in quality assurance; 4) preparing an organisation for a selected QA accreditation.

TBS 956 Foundations in Business Studies
Autumn Wollongong On Campus
Intake B Sydney Modular
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to introduce to students fundamental factors which affect the operations of a business. The subject examines the effects of domestic and international environment on a business. The domestic factors were introduced in an Australian context and international factors were incorporated focusing the world economic system, placing more emphasis on factors which affects the Asia-Pacific region.

TBS 957 Introduction to Contemporary Business Practice
Autumn Wollongong On Campus
Intake B Sydney Modular
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to give students an overview of contemporary business practices, from the initial choices of what products and services to offer customers, through the management of operations and supply chain, managing people and financial resources, within the context of an ethically responsible approach to business.

TBS 961 Business Spanish Language and Culture
Intake A Sydney Modular
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is intended for those who wish to acquire knowledge of the Spanish language for use in a practical business context. It has been designed for those seeking to build business relationships with Spanish speaking people at a managerial level. The language functions and the business vocabulary presented in the course are appropriate to a number
of commercial situations. Participants will also study socio/ economic/ political features of a number of key Spanish speaking countries. The main emphasis of the course is on mastering basic linguistic skills. Students will be encouraged to practice speaking in class in pairs or groups (setting up role-plays adapted to topics used in the lesson). Students will also discover how they best learn a language and will be encouraged to use the relevant authentic materials and websites provided in class.

**TBS 962 Business Chinese Language and Culture**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject is intended for those who wish to acquire a knowledge of Chinese for use in a practical business context. It has been designed for those seeking to build business relationships with Chinese speaking people at a managerial level.

The language functions and the business vocabulary presented in the course are appropriate to a number of commercial situations. Participants will also study socio/ economic/ political features of a number of key Chinese speaking countries. This subject is an introductory course for beginners. Students are expected to complete private study to achieve the expected result. Emphasis will be on the practical use of the language, in terms of speaking, listening and writing. Students are also expected to achieve a better understanding of the social and cultural context of the language.

**TBS 963 Introduction to Business Coaching**
Intake A Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject is designed to enable students to differentiate between coaching, consultancy, counselling and mentoring, and between executive, life and business coaching. It introduces the main topics of leadership, people management, communication, negotiation, business analysis, business improvement, change management and project management. It allows students to experience skills to be covered in other subjects of the course, such as facilitation and collaboration. It also encourages students to think about the ethical considerations involved in the business coaching relationship.

**TBS 964 Applied Coaching Practice**
Intake B Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject will outline factors affecting the management and development of people using a coaching methodology in leadership. This subject will discuss coaching, mentoring, facilitation and training methodologies in order to understand differences in approaches and skill requirements. Students will be encouraged to develop, to increase personal awareness, to practice, to review, to discuss and to propose coaching approaches to situations and challenges faced with people in a business environment.

**TBS 965 Leadership and People Management**
Intake C Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject will enhance students’ knowledge and understanding of working with people, focussing on topics such as communication, motivation and leadership. These topics will be discussed within the framework of business coaching, both from the point of view of skills which the business coach will use with their clients and their own companies, and from the point of view of the analysis and advice which they may offer clients. Coaching skills such as observation of people’s behaviour and feedback to peers will be developed in this subject.

**TBS 966 Business Coaching Strategy and Planning**
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject will enhance students’ knowledge and understanding of working with people, focussing on topics such as communication, motivation and leadership. This subject will give students an understanding of business coaching and planning, for large and small companies. They will apply their understanding both to clients and to their own businesses. Students will analyse a range of different businesses and business environments and explore strategic choices and decision-making. They will analyse their own competencies and competitive advantages and those of their competitors, partners and clients.

**TBS 967 Innovation, Improvement and Change Management**
Intake B Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** This subject will help students to develop an understanding of innovation and how to manage innovation successfully from initial idea, through funding, risk management and implementation. Students will learn how to foster a creativity of innovation and creativity, using coaching methodologies such as the use of non-directive questioning to encourage clients to propose their own solutions. Students will learn to select appropriate tools and techniques of knowledge management and business improvement to use with their clients. Students will also learn how to identify and overcome resistance to change and how to manage change successfully.

**TBS 968 Business Coaching Research Paper**
Intake B Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None

**Subject Description:** Students will agree a topic relevant to coaching in their industry and research it.
Quantitative and qualitative research methodologies will be discussed as well data analysis and data presentation. Students will present their research findings to their peers and to academic staff. Ethical considerations will be discussed throughout the course. Students will receive coaching and mentoring throughout their research, which will enhance their understanding of these processes as well as of the research itself.

TBS 970 Management Project Planning
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None

TBS 971 Quality Management Project
Not on offer in 2009
Credit Points: 6
Pre-requisites: TBS970
Co-requisites: None

TBS 972 Current Issues in Business
Intake A & B Sydney Modular
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will comprise weekly seminars, some of which will be given by staff and visiting academics, while others will be given by student research clusters on current topics relating to their research areas. The topics will vary with the research interests of staff, visitors and students. The subject is designed to heighten students awareness of a broad range of contemporary business issues, and allow them to situate their own research in this context. It will also provide students with a range of examples of high quality presentations, enabling them to appreciate the standard expected. Students will be encouraged to question and give feedback to their peers.

TBS 973 Business Development
Intake C & D Sydney Modular
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will stimulate students to think about the demanding nature of change management and leadership in any organisation today; while helping them to develop a portfolio of skills in consultancy, coaching, and mentoring. These skills will help students in carrying out their research, in their professional lives and in peer support of their fellow students. Students will conduct a project on an agreed topic and to present their findings to their peers.

TBS 974 Research Development
Annual Wollongong On Campus
Credit Points: 24
Pre-requisites: TBS999
Co-requisites: None
Subject Description: Students further refine their research question and approach, possibly undertaking some pilot studies or trials after obtaining the relevant ethical approval. Students may commence their research when their refined proposal has been approved by their supervisor. For the end of Year 2, students must produce an updated research proposal, updating their literature review and their methodology, reporting on any data collection and analysis undertaken, and relating it to the existing literature. They must also include a detailed plan for the next phase of their research and dissertation.

TBS 980 International Financial Management
Autumn Wollongong On Campus
Intake B Sydney Modular
Intake C Sydney Modular
Spring Wollongong On Campus
Intake D Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ACCY905 or FIN 928 or TBS 901
Subject Description: This subject introduces students to financial management in an international context. The topics covered include the following: financial environment of international corporate activity; foreign exchange and derivatives markets; methods of foreign exchange risk measurement and management; overview of international financial markets and instruments; financing of foreign trade and foreign direct investments; international working capital management; investment decision making in an international context, including country risk analysis; international aspects of controlling, reporting and performance analysis; effects of government regulation on management decision making.

TBS 981 Managing in Multi-National Companies
Intake A Sydney Modular
Autumn Wollongong On Campus
Intake C Sydney Modular
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will outline the factors affecting the management of people in multi-national enterprises, both the international regulatory organisations such as the International Labour Organisation and internal business criteria such as the effect of different business strategies and environments on people management practices. The course will discuss leadership, motivation, communication, performance management, diversity and corporate social responsibility as practised in multi-nationals, relating academic theory to real world examples. Students will be encouraged to think, to analyse, to discuss, to research, and to propose solutions to the problems they analyse.

TBS 982 Marketing in a Global Economy
Intake A Sydney Modular
Autumn Wollongong On Campus
Intake C Sydney Modular
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The objective of this subject is to provide a background in global marketing and both a theoretical and practical perspective to advertising communications and promotion management in a global economy. Thus, by adopting the perspective of the product
manager or marketing manager, the subject examines the development and implementation of advertising and promotional programmes to facilitate global marketing.

**Exclusions:** TBS 920

**Subject Description:** This subject provides an introduction to management within an international business perspective. Business is becoming increasingly global and firms require managers who understand and can resolve the challenges faced in surviving and succeeding in this competitive environment. Greater internationalisation of business requires firms to be more competitive, dynamic, and interdependent. Managers must understand the complexities of global cultural, political, economic, organisational, and financial forces and recognise how they affect their firm. Management challenges include dealing with the uncertain external environment, handling the increased risk of international operations, and developing appropriate international strategies. Managers capable of operating in this environment will have truly global skills and will enhance their career prospects in today’s exciting international business context.

**Credit Points:** 12

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** This subject will give students an understanding of the purpose, philosophy and application of research, with particular emphasis on research focus, defining and refining research questions, quantitative and qualitative methods, the advantages and disadvantages of each and how to choose the appropriate method(s), the use of multi-method approaches, and options for
data analysis and presentation. This knowledge will allow students to demonstrate their expertise in research methodology, both qualitative and quantitative.

</table>

**Credit Points:** 12  
**Pre-requisites:** None  
**Co-requisites:** None  

**Subject Description:** This subject is designed to enable students to become thoroughly familiar with the subject in which they intend to specialise, using all university facilities available. All students will be expected to demonstrate an appreciation for application of knowledge and information to a real business situation. Students will be further expected to organise, categorise and discuss the information and issues relevant to their research to an exceptionally high level. A key output of the literature will be the identification of a series of research questions which the current literature does not adequately address. Students will be expected to select one or more of these questions as the focus for their research.

**TBS 999  Research Proposal**

<table>

<td>On Campus</td>
<td></td>
</tr>
</tbody>
</table>

**Credit Points:** 24  
**Pre-requisites:** TBS 996, TBS 997  
**Co-requisites:** None  

**Subject Description:** Students are expected to produce an 8,000 - 10,000 word research proposal paper in a structured framework. Students will choose one of the topics they identified as a gap in their first literature review and conduct an in-depth literature review of this particular topic. They will select and justify appropriate research methodologies. They will develop a research proposal based on their literature review and methodology through discussion with their peers and supervisors in regular meetings within their clusters. They will present their proposal, incorporating a clear explanation of their rationale, aims and research methods and their plan to achieve their research aims to a panel of examiners and the full cohort.
Faculty of Health and Behavioural Sciences

Degrees Offered

Research
Doctor of Philosophy
Doctor of Philosophy (Clinical Psychology)
Doctor of Public Health
Master of Midwifery – Research
Master of Nursing – Research
Master of Science – Research
Master of Science – Research (Psychology)

Coursework (by Academic Unit)

School of Health Sciences
Master of Science
Exercise Rehabilitation
Nutrition
Nutrition and Dietetics
Nutrition/Dietetics and Exercise Rehabilitation
Occupational Health and Safety
Occupational Hygiene Practice
Population Health
Master of Health Management
Master of Public Health
Graduate Diploma in Science
Biomedical Science
Exercise Rehabilitation
Graduate Certificate in Occupational Health and Safety
Graduate Certificate in Occupational Hygiene Practice
Graduate Certificate in Public Health
Graduate Certificate in Health Management
Graduate Certificate in HIV/AIDS
Graduate Certificate in Advanced Dietetic Practice

School of Nursing, Midwifery and Indigenous Health
Master of Health Leadership and Management
Master of Indigenous Health

Other Information

Criminal Record Checks
As part of the ‘whole of government’ approach to child protection, the NSW Department of Health requires all students in health related courses to undergo a criminal record check. The criminal record check shall be completed before a student can attend any clinical placement in a Public Health facility.

Students need to give their consent to such a check and will submit a signed consent form through the University. Consent forms are available from universities. Checks are done through the Police Service and coordinated by the Department of Health. When the check is completed, the student will be issued with a Clearance Card which has to be produced whenever they attend a clinical placement. The Card must not be photocopied or duplicated in any way. Lost, mislaid or mutilated Clearance Cards are replaced on application from the student with payment of a fee.

If a student receives a positive result from the check, it will not necessarily exclude them from a clinical placement. Each situation will be individually assessed in a confidential consultation between the student and a representative of the Department of health.

An additional requirement came into effect with new child protection legislation enacted in July 2000. The University will provide another form to the student called the Prohibited Employment Declaration. The Declaration must also be completed prior to any clinical placement. The completed and signed declaration is returned to the University and will be held by us. The Health Department does not issue or administer this form.

Infectious Diseases
Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health, including guidelines regarding infectious diseases.

In the hospital system, you will be exposed to a large number and variety of individuals, some of whom may have a communicable disease such as tuberculosis, measles, mumps, rubella, diphtheria, poliomyelitis, HIV or Hepatitis B. This may place you at risk of acquiring one of these diseases. In other cases, if you have a communicable disease, you may place your clients at risk.

For your protection, and for the protection of your potential clients, you are recommended to have vaccinations before you begin clinical work. Evidence of your vaccination status may be required by certain clinical placements/agencies before attendance. If your vaccinations are incomplete, opportunities for placement may be limited and your progress in the course could be affected.

Some categories of health care workers – nurses, doctors, dentists, dental technicians, podiatrists and physiotherapists – also have regulated individual responsibility with regard to infection control. You should familiarise yourself with these responsibilities.

Health care workers who are either HIV antibody positive, or Hepatitis B e-antigen or Hepatitis B DNA positive, or Hepatitis C PCR positive, must not perform exposure prone procedures. Expert medical advice should be obtained by infected people on their infectious status and the extent to which this may limit their clinical practice.

Overview
The Doctor of Philosophy provides the opportunity to pursue in-depth research. Candidates are expected to develop a research thesis that leads to an original and significant contribution to the knowledge in a particular field.

Major Study Areas
Schools research activities are in the areas of:

**Health Sciences**
- Anatomy
- Applied Cardiovascular Physiology
- Biomechanics
Candidates must have an Honours Bachelor degree of at least four years duration, and have achieved Honours Class II Division 2 or higher, or completed a Master by Research degree. In addition, a primary supervisor in the relevant academic unit must be identified prior to commencing the program. International students are required to have achieved an IELTS score of 6.5, with a level of 6.0 in reading, writing, speaking and listening. Requirements are higher in some programs.

**Course Requirements**

Study at the Doctoral level, usually for a minimum of 3 years full-time, is by advanced research thesis. Potential candidates should discuss their research plan with the Postgraduate Research Coordinator of the School/Department, at which time the supervision arrangements of the School/Department will be outlined.
Rules and procedures for Doctoral degrees by Thesis are listed in the Course Rules. Doctoral candidates are urged to be familiar with the Code of Practice - Supervision and General Course Rules governing Thesis and Research Degrees, including the regulations regarding preparation and submission of the thesis.

**Doctor of Philosophy (Clinical Psychology)**

- **Testamur Title of Degree:** Doctor of Philosophy (Clinical Psychology)
- **Abbreviation:** PhD (Clin/Psyc)
- **Home Faculty:** Health and Behavioural Sciences
- **Duration:** 4 years full-time or part-time equivalent
- **Total Credit Points:** 192
- **Delivery Mode:** Face-to-face
- **Starting Session(s):** Normally Autumn
- **Location:** Wollongong
- **UOW Course Code:** 209
- **CRICOS Code:** 003002G

**Overview**

This program aims to equip candidates with both clinical and research training at high levels of expertise. The coursework and practical experience provide students with a comprehensive understanding of the principles governing psychological assessment and therapy and the clinical skills required to treat a wide variety of psychological disorders in children, adolescents and adults. Candidates also undertake in-depth research that makes an original contribution to the body of knowledge in clinical psychology. The research comprises more than two thirds of the degree. The clinical training enables the candidate to practise as a clinical psychologist, and the research training can lead to (or enhance) an academic career, and is highly regarded by public and private sector employers.

**Entry Requirements / Assumed Knowledge**

Candidates must have a superior honours degree in Psychology of at least four years duration of Class II, Division 1 standard or higher. Entry is very competitive and successful applicants will typically also be recipients of a PhD Scholarship. Selection for entry is based on academic record, a research proposal, two referee’s reports, relevant practical experience and a personal statement. Short-listed candidates are also subject to a selection interview.

International students must demonstrate that they have achieved an IELTS score of 7 overall, with at least 7 in all bands (reading and writing, speaking and listening). In addition, international applicants must have a degree in psychology that is equivalent to an Australian 4-year sequence of psychology. International applicants must have their qualifications assessed by the Australian Psychological Society (APS) for equivalence and provide this evidence in their application (see: www.psychology.org.au/membership/qualifications/).

**Course Requirements**

Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases at the end of this chapter.

Overview
The Doctor of Public Health is a professional doctorate degree granted on successful completion of an approved program of coursework, in addition to an independent and original investigation of a significant problem in public health, and the presentation of the research as an acceptable thesis. This degree prepares students for leadership positions in the health sector that require advanced analytical or conceptual capabilities. Students should consult the information under the Doctor of Philosophy for information about the School's research areas.

Entry Requirements / Assumed Knowledge
To qualify for entry to the program, candidates must have a Master of Public Health degree or equivalent, usually at credit level or higher, or an Honours Bachelor degree of at least Class II, Division 2 standard in a relevant discipline, followed by the equivalent of one year of full-time relevant and approved postgraduate study.

Students should preferably have two or more years of appropriate professional experience, and have demonstrated potential capacity for leadership in the area of specialisation. Applicants should submit a record of professional experience and names of two appropriate referees. International students are required to have achieved an IELTS score of 6.5, with a minimum level of 6.0 in reading, writing, speaking and listening.

Course Requirements
The Doctor of Public Health usually takes three years of full-time study. It includes a coursework component and a research component. There will be no advanced standing granted for previous graduate study at Masters level. The coursework involves a maximum of one year of full-time study (48 credit points) in both required and elective courses. The research component of the program involves at least two years of full-time enrolment, undertaking a thesis following completion of the coursework component. Progression to the research component requires the development of a suitable research proposal, at the end of which the student sits a qualifying examination.

On successful completion of the qualifying examination, the student undertakes the research under supervision. At the end of this period the student will submit a thesis for examination under the regulations for Doctoral Theses of the University. Individual coursework programs should be decided in conjunction with the intended supervisor for the research and the Head of School. The coursework must be passed with a credit average mark to allow progression into the research component of the course. Applicants who have not had a background in public health may be advised to take the four core subjects listed below. Some applicants may be advised to undertake specialised programs in preparation for their research.

**Overview**

The Master of Midwifery – Research is intended to provide candidates with the opportunity to pursue a research program in a specialised field of midwifery. Interdisciplinary supervision will be encouraged so that a student may have (for instance) a supervisor who is a midwife/nurse academic, and another with expertise in an appropriate associated discipline.

**Entry Requirements / Assumed Knowledge**

Applicants must hold a qualification that would demonstrate their authority to practice as a Registered Midwife within Australia (or provide evidence of equivalent international registration as a midwife). Applicants must also demonstrate the minimum tertiary qualifications of a 3 year Bachelor of Nursing degree (or equivalent).

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

**Course Requirements**

The candidate is required to undertake a total of 72 credit points to successfully complete the Master of Midwifery – Research. It is expected that all candidates will undertake the coursework preparation program (outlined below) before enrolling in the thesis, unless through recognition of the candidate’s prior learning and the possession of relevant qualifications they can demonstrate that they possess the relevant skills and knowledge.

Master of Nursing – Research

Title of Degree: Master of Nursing – Research
Abbreviation: MNurs-Res
Home Faculty: Health and Behavioural Sciences
Duration: 1.5 years or part-time equivalent
Total Credit Points: 72
Delivery Mode: Day/Evening/Flexible
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1310
CRICOS Code: 042634G

Overview
The Master of Nursing – Research is intended to provide candidates with the opportunity to pursue a research program in a specialised field of nursing. Interdisciplinary supervision will be encouraged so that a student may have (for instance) a supervisor who is a midwife/nurse academic, and another with expertise in an appropriate associated discipline. Students should consult the information under the Doctor of Philosophy for information about the school's research areas.

Entry Requirements / Assumed Knowledge
Applicants must hold a qualification in Nursing which will enable them to gain authority to practice as a Registered Nurse, (or provide evidence of equivalent international registration as a nurse.) In addition, applications must have one of the following: a Bachelor degree in Nursing, Graduate Certificate in Nursing, Bachelor of Nursing (Honours) Class II, Division 2, or a Master of Nursing degree or equivalent. Applicants who do not possess a Bachelor degree in Nursing, may gain entry to the Master of Nursing – Research program by successfully completing a Graduate Certificate in Nursing, with content arranged with advice from the Postgraduate Coordinator, and by achieving a credit average.

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements
The candidate is required to undertake 72 credit points to successfully complete the Master of Nursing – Research. It is expected that all candidates will undertake the coursework preparation program (outlined below), before enrolling in the thesis, unless through recognition of the candidate’s prior learning and the possession of relevant qualifications they can demonstrate that they possess the relevant skills and knowledge.

**Overview**

The Master of Science – Research provides the opportunity to pursue independent research in fields including biomedical science, exercise science, exercise rehabilitation, nutrition and dietetics, and public health. Students who wish to undertake a PhD and have not completed a research honours year as part of their undergraduate degree or obtained an honours grade of Class II, Division 2 or below should undertake a Master of Science – Research. Students may apply for a course transfer to a PhD after 12 months of candidature. Consult the information under the Doctor of Philosophy for information about the schools research areas.

**Entry Requirements / Assumed Knowledge**

Students must have completed an undergraduate degree in a relevant discipline. International students are required to have achieved an IELTS score of 6.5, with a level of 6 in reading, writing, speaking and listening.

**Advanced Standing**

Advanced standing for the coursework component may be granted to those who have completed an appropriate Bachelor (Honours) Degree.

**Course Requirements**

All candidates for this program must present a research seminar in each enrolled year, take part in a research proposal and defence process, and submit a written research thesis.

Students entering the program with an Honours Bachelor degree with at least Class II, Division 2, are required to complete a research thesis to the value of 48 credit points.

Students who do not have an Honours Bachelor degree with at least Class II, Division 2, must complete 24 credit points of coursework research methodology, as well as complete a 48 credit point major thesis.

A detailed research proposal must be submitted for examination within the first year of candidature. This examination must be passed successfully for the candidature to be allowed to continue.

Master of Science – Research (Psychology)

Testamur Title of Degree: Master of Science – Research
Abbreviation: MSc-Res
Home Faculty: Health and Behavioural Sciences
Duration: 2 years full-time
Total Credit Points: 72
Delivery Mode: Day
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 1304
CRICOS Code: 044405D

Overview
The Master of Science – Research provides the opportunity to pursue research in psychology. Students should consult the information under the Doctor of Philosophy for information about the research areas available in the School of Psychology.

Entry Requirements / Assumed Knowledge
Students must normally have a 4th year in Psychology (or equivalent) that includes a full year of research.

It is possible to limit the number of students admitted each year based on the availability of suitable supervisors. If the number of applicants exceeds the quota, admission will be based on academic qualifications, and entry will usually require a minimum Honours grade of Class II, Division 2 (or equivalent) in a relevant discipline.

International students are required to have achieved an IELTS score of 6, with a level of 6 in reading and writing, and 5 in speaking and listening.

Course Requirements
All candidates for this program must present a research seminar in each enrolled year, take part in a research proposal and defence process, and submit a written research thesis.

Students entering the program with an Honours Bachelor degree with at least Class II, Division 2 (or equivalent) are eligible to apply for advanced standing toward the coursework component of this degree, and therefore may only be required to complete a research thesis to the value of 48 credit points.

Students who are deemed not to have sufficient training in research methodology and statistics will be required to complete 24 credit points of research methodology coursework as outlined in the table below, in addition to completing a 48 credit point major thesis.

Overview
The Master of Science (Exercise Rehabilitation) aims to produce professional exercise scientists who can utilise exercise to prevent and rehabilitate disease and injury in the broader community.

Entry Requirements / Assumed Knowledge
A Bachelor degree in Exercise Science or Human Movement of at least 3 years duration from a recognised tertiary institution is required. Places are limited and a credit average across all completed undergraduate subjects is required to be considered competitive for entry.

International students are required to have achieved an IELTS score of 6.5, with a level of at least 6 in all bands, reading, writing, speaking and listening.

Course Requirements
The Master of Science (Exercise Rehabilitation) is comprised of 72 credit points of subjects, and can be taken as 1.5 years full-time or 3 years part-time study.

Note that this degree has a compulsory clinical placement in Year 1. In order to complete this placement, students must comply with the legal requirements of the NSW Health Department. This requires all staff and students undertaking clinical placements to receive a criminal record clearance and vaccination record status check before employment or placement in any capacity in the NSW health system. For further information, refer to the Additional Information section.

Master of Science (Nutrition)*

Overview
The Master of Science (Nutrition) program provides access to the academic and research experience of the MSc (Nutrition and Dietetics) program, but excludes the placement program and so is not accredited by the DAA. It is particularly suitable for students interested in a nutrition research career or nutrition work in other countries which do not require professional dietetic recognition.

Entry Requirements / Assumed Knowledge
A Bachelor degree (incorporating a full year of study of both biochemistry and human physiology) of at least 3 years duration from a recognised tertiary institution, or equivalent. Entry is competitive, and it is only possible to admit a limited number of students each year. If the number of applicants exceeds the quota, admission will be based on academic qualifications.

International students are required to have achieved an IELTS score of 6.5, with a minimum level of 6 in reading, writing, speaking and listening.

Advanced Standing
Depending on their undergraduate degree, students can apply for advanced standing for up to 24 credit points, which would allow completion in 18 months of full-time study.

Course Requirements
The Master of Science (Nutrition) is comprised of 72 credit points of subjects and can be taken as 1.5 years full-time or 3 years part-time enrolment.

Overview
The Master of Science (Nutrition and Dietetics) consists of coursework and placements, and develops knowledge and skills required by nutritionists/dietitians working in a variety of community and public health settings, hospitals, and other tertiary health care facilities.

Entry Requirements / Assumed Knowledge
A Bachelor degree of at least 3 years duration from a recognised tertiary institution (or equivalent) is required for entry. The degree must incorporate a full year of study of both biochemistry and human physiology, as well as the equivalent of 1 full-time semester of nutritional science subjects across the whole degree (equal to 24 credit points at UOW). Entry is highly competitive, and only a limited number of students can be admitted each year. If the number of applicants exceeds the quota, admission will be based on academic qualifications.

International students are required to have achieved an IELTS score of 6.5, with a level of at least 6.0 in reading and writing, speaking and listening.

Course Requirements
The Master of Science (Nutrition and Dietetics) is comprised of 96 credit points of subjects and can be taken as 2 years full-time or part-time equivalent.

Note that clinical placement is compulsory in Year 2 of the degree. In order to complete this placement, students must comply with the legal requirements of the NSW Health Department. This requires all staff and students undertaking clinical placements to receive a criminal record clearance and vaccination record status check before employment or placement in any capacity in the NSW health system. For further information, refer to the Additional Information section.

Master of Science (Nutrition, Dietetics and Exercise Rehabilitation)

Testamur Title of Degree: Master of Science (Nutrition, Dietetics and Exercise Rehabilitation)

Abbreviation: MSc

Home Faculty: Health and Behavioural Sciences

Duration: 2 years full-time

Total Credit Points: 104

Delivery Mode: Face-to-Face

Starting Session(s): Autumn

Location: Wollongong

UOW Course Code: 574N

CRICOS Code: 026169E

Overview

The Master of Science (Nutrition, Dietetics and Exercise Rehabilitation) is designed to meet core fields of competency defined by the dietetics and exercise science professions, including key areas of clinical dietetics practice, community and public health nutrition, food service systems management, exercise prescription, exercise rehabilitation and clinical practicum studies.

Entry Requirements / Assumed Knowledge

A Bachelor degree of at least 3 years duration in Exercise Science and Nutrition from a recognised tertiary institution is required. The degree must incorporate a full year of study of biochemistry and of human physiology, as well as the equivalent of 1 full-time semester of nutritional science subjects across the whole degree (equal to 24 credit points at UOW). Applicants with other undergraduate degree backgrounds may need to complete additional study prior to entry into this degree. Entry is highly competitive and specific subject pre-requisites must be met to be eligible to apply.

International students are required to have achieved an IELTS score of 6.5, with a level of at least 6.0 in, reading and writing, speaking and listening.

Course Requirements

The Master of Science (Nutrition, Dietetics and Exercise Rehabilitation) is comprised of 104 credit points of subjects and can be taken as 2 years full-time or part-time equivalent.

Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases under the Additional Information Section.

Overview
The Master of Science (Occupational Health and Safety) provides an intensive professional program of study in the area of OH&S with the opportunity to develop a specialisation in either Occupational and Environmental Health or OH&S Management. This degree also allows students to develop research skills related to professional practice in OH&S.

Entry Requirements / Assumed Knowledge
For direct entry to the Master of Science (Occupational Health and Safety) a recognised 3 year Bachelor degree is required. In addition, applicants must demonstrate that their degree contains the equivalent of one (1) year of science subjects.

Completion of the Graduate Certificate in Occupational Health and Safety with a credit average serves as an alternative basis for entry into the Master of Science (Occupational Health and Safety) for applicants that don’t have a Bachelor degree.

International students are required to have achieved an IELTS score of 6.5, with a level of at least 6 in all bands, reading and writing, speaking and listening.

Advanced Standing
Students who have a completed Bachelor of Science (Exercise Science) from UOW that includes either BEXS401 Ergonomics or BEXS403 Ergonomics can apply for advanced standing for GHMA915 Ergonomics in the Master of Science (Occupational Health and Safety).

Course Requirements
The Master of Science (Occupational Health and Safety) is comprised of 52 credit points of subjects as outlined in the table below.

Course Program
Subjects (by year) Session Credit Points
GHMA915 Ergonomics in Practice* Autumn 8
GHMA927 Advanced Workplace Injury Management* Autumn 8
GHMA946 Epidemiology & Toxicology for OHS Practitioners Autumn 6
LAW 969 OH&S Law** Autumn 6
GHMA920 Behavioural Change: Human Factors in OH&S Spring 6
GHMA923 OH&S Risk Management* Spring 6
GHMA922 Occupational Hygiene and Toxicology* Summer 6

Plus 6cp of electives from the list below:
GHMA940 Measurement of Hazardous Substances* Autumn 6
GHMA941 Thermal Environment* Winter 6
GHMA942 Noise- Measurement and Its Effects* Winter 6
GHMA944 Asbestos and Other Fibres* Spring 6

* These subjects are taught in various block delivery modes. Please consult the Course Coordinator for details.
** This subject is run by the Faculty of Law and usually runs in block format, please consult with the Faculty of Law for details.

Professional Recognition
Graduates are encouraged to seek membership of leading professional institutes or societies (subject to their membership grading rules) such as the following:

• Australian Institute of Occupational Hygienists Inc.
Registered nurses who complete the Graduate Certificate in Science (OHS) or Master of Science (OHS) are eligible to apply for membership of the Australian College of Occupational Health Nurses (subject to their grading rules).

**Overview**

The Master of Science (Occupational Hygiene Practice) provides an intensive professional program of study in the area of occupational hygiene with the opportunity to develop a specialisation in one or more industry streams such as the mining or oil & gas industries.

**Entry Requirements / Assumed Knowledge**

The Master of Science program is for those who want to pursue a career in Occupational Hygiene. Applicants with a Bachelor degree with at least 1 year of science subjects or a credit average in the Graduate Certificate in Occupational Hygiene Practice may apply.

Completion of the Graduate Certificate in Occupational Hygiene Practice with a credit average serves as an alternative basis for entry into the Master of Science (OHP) for applicants that don’t have a Bachelor degree.

International students are required to have achieved an IELTS score of 6.5, with at least 6 in all bands, reading and writing, speaking and listening.

**Course Requirements**

The Master of Science (Occupational Hygiene Practice) is comprised of 48 credit points of subjects as outlined in the table below.

*Please note that this course is currently being reviewed and will not be on offer from Spring 2009.

Overview

The Master of Science (Population Health) provides students with the knowledge and understanding of efforts made by society to protect, promote and restore people's health. However, as a 72 credit point degree, it also gives students the opportunity to gain more knowledge in the area of health management, to undertake a major project, or to undertake study in another area with approval of the Head of School.

Entry Requirements / Assumed Knowledge

A Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent. Applicants with other acceptable qualifications and work experience may be admitted on completion of the Graduate Certificate in Public Health.

International students are required to have achieved an IELTS score of 6.5, with a level of 6.0 in all bands.

Course Requirements

Students must complete 72 credit points of coursework in accordance with one of the following streams:

Health Management stream: 30 credit points of core subjects and GHMD906 Quality Management for Health Services; plus another 18 credit points of elective subjects from schedule 2 in the table below, and a further 18 credit points from any schedule in the table below

Project stream: 30 credit points of core subjects plus GHMD997 Major Project; and a further 18 credit points from any schedule in the table below

Other elective subjects may be approved by the Head of School.

International students must take GHMD903 in their first session.

Master of Health Management*

Overview
The Master of Health Management program is designed for those in sectional, clinical or departmental management positions, or for those health professionals with relevant experience who wish to extend their activities into health management.

Entry Requirements / Assumed Knowledge
A Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent, together with a minimum of two years full-time relevant work experience. In special circumstances, an applicant holding other acceptable academic qualifications, plus a minimum of two years full-time relevant work experience, may be admitted. If you do not have a three year Bachelor degree or equivalent, you must provide a detailed statement confirming the nature and duration of your work experience, together with supporting documentation from your employer. International students are required to have achieved an IELTS score of 6.5, with a level of 6.0 in all bands.

Advanced Standing
Students who have completed relevant subjects in a Graduate Certificate in Health Management or Graduate Certificate in Public Health may receive advanced standing based on those subjects, up to a maximum of 24 credit points.

Course Requirements
Candidates are required to complete 48 credit points of accredited modules comprising subjects on offer from the School of Health Sciences and the Graduate School of Business.
TBS901 Accounting for Managers Intake C 6
TBS903 Managing People in Organisations Intake B 6

Plus one elective subject as approved by the Course Co-ordinator. *

Credit Towards other Courses
Upon successful completion of the Master of Health Management, those students who meet the Master of Business Administration (MBA) entry requirements may apply to enrol in the MBA degree, and may be eligible for up to 6 subjects (36 credit points) advanced standing as determined by the MBA Course Co-ordinator.

Overview
Health is defined as a state of well-being, not just the absence of disease. The Master of Public Health provides students with knowledge and understanding of efforts made by society to protect, promote and restore people's health. The goals of public health include the promotion and improvement of health, as well as the prevention of disease, premature death, and disease-produced discomfort and disability in the population.

Entry Requirements / Assumed Knowledge
A Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent. People with other acceptable qualifications and work experience may be admitted on completion of the Graduate Certificate in Public Health.

International students are required to have achieved an IELTS score of 6.5, with a level of 6.0 in all bands.

Course Requirements
Students complete 48 credit points of coursework, comprising five core subjects and three electives from any schedule listed in the table below. International students must take GHMD903 in their first session. Other elective subjects may be approved by the Head of School.

Graduate Diploma in Science (Biomedical Science)

Testamur Title of Degree: Graduate Diploma in Science (Biomedical Science)
Abbreviation: GDipSc
Home Faculty: Health and Behavioural Sciences
Duration: 1 year full-time
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 650
CRICOS Code: 002508M

Overview

The Graduate Diploma in Science (Biomedical Science) is designed to give graduates further training in one of the discipline areas of biomedical science.

Entry Requirements / Assumed Knowledge

Entry into the Graduate Diploma in Science (Biomedical Science) requires the successful completion of a Bachelor degree of at least 3 years duration from a recognised tertiary institution, with emphasis in biomedical science. Applicants must include a statement of purpose with their application form.

It is possible to admit only a limited number of students each year. If the number of applicants exceeds the quota, admission will be based on academic qualifications.

International students are required to have achieved an IELTS score of 6, with a level of 6 in reading and writing, and 5 in speaking and listening.

Course Requirements

The Graduate Diploma in Science (Biomedical Science) is comprised of 48 credit points.

As the program is designed specifically for each student’s needs, subjects should be selected in consultation with an academic adviser and be approved by the Head of School. Students may choose subjects from discipline areas including anatomy, physiology, biochemistry, exercise physiology and nutrition.

Graduate Diploma in Science (Exercise Rehabilitation)

Testamur Title of Degree: Graduate Diploma in Science (Exercise Rehabilitation)
Abbreviation: GDipSc
Home Faculty: Health and Behavioural Sciences
Duration: 1 year full-time
Total Credit Points: 48
Delivery Mode: Day
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 650
CRICOS Code: 002508M

Overview
The Graduate Diploma in Science (Exercise Rehabilitation) focuses on the utilisation of exercise as a means of improving health and fitness, and rehabilitating injured tissues and/or systems.

Entry Requirements / Assumed Knowledge
Entry into the Graduate Diploma in Science (Exercise Rehabilitation) requires the successful completion of a Bachelor of Science (Exercise Science) (or equivalent) of at least 3 years duration from a recognised tertiary institution.
It is only possible to admit a limited number of students each year. If the number of applicants exceeds the quota, admission will be based on academic grades across the second and third year subjects in the undergraduate degree.
International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements
The Graduate Diploma in Science (Exercise Rehabilitation) is comprised of 48 credit points of subjects and can be taken over one year full-time or 2 years part-time.
Note that this degree has a compulsory clinical placement. In order to complete this placement, students must comply with the legal requirements of the NSW Health Department. This requires all staff and students undertaking clinical placements to receive a criminal record clearance and vaccination record status check before employment or placement in any capacity in the NSW health system. For further information, refer to the Additional Information section.

Course Program
Subjects (by year) Session Credit Points
BEXS411 Practicum in Exercise Science A Autumn 8
BEXS451 Exercise Rehabilitation 1: Musculoskeletal Autumn 8
BEXS452 Exercise Rehabilitation 2: Cardiorespiratory and Neurological Autumn 8
BEXS402 Exercise Science for Special Populations Spring 8
BEXS412 Practicum in Exercise Science B Spring 8
BMS 303 Research Topics in Exercise Science Spring 8

Professional Recognition
Graduates of the Graduate Diploma in Science (Exercise Rehabilitation) may gain full membership of AAESS after completing a period of supervised work experience, and may apply for accredited membership.

Graduate Certificate in Occupational Health and Safety

Testamur Title of Degree: Graduate Certificate in Occupational Health and Safety
Abbreviation: GCertOHS
Home Faculty: Health and Behavioural Sciences
Duration: 1 year
Total Credit Points: 26
Delivery Mode: Flexible delivery
Starting Session(s): Autumn, Spring, Summer
Location: Wollongong
UOW Course Code: 1135
CRICOS Code: N/A

Overview
The Graduate Certificate in Occupational Health and Safety course provides an entry point for students who don’t meet the requirements for direct entry to the Masters degree. The course is designed to permit students to transfer to the Master of Science (Occupational Health and Safety) provided that a credit average is achieved across all subjects in the Graduate Certificate.

Entry Requirements / Assumed Knowledge
Applicants who hold a degree that doesn’t meet the criteria for direct entry to the Masters may be accepted for entry to the Graduate Certificate in Occupational Health & Safety. Applicants who hold a Certificate IV in Workplace Safety or equivalent, plus two years of relevant work experience in an OHS related area, will also be considered.

Course Requirements
The Graduate Certificate in Occupational Health and Safety course is comprised of 26 credit points of subjects as outlined in the table below.

Graduate Certificate in Occupational Hygiene Practice

Testamur Title of Degree: Graduate Certificate in Occupational Hygiene Practice
Abbreviation: GCertOHP
Home Faculty: Health and Behavioural Sciences
Duration: 1 year
Total Credit Points: 24
Delivery Mode: Face-to-Face
Starting Session(s): Autumn & Spring
Location: Wollongong
UOW Course Code: 1177
CRICOS Code: N/A

Overview
The Graduate Certificate in Occupational Hygiene Practice aims to develop the basic skills necessary to evaluate workplaces for worker exposure to hazardous substances. Skills will also be developed in the control of hazardous substances after they have been identified and evaluated.

Entry Requirements / Assumed Knowledge
The Graduate Certificate program has been designed as an entry course for those who may not have an undergraduate degree but have relevant work experience and/or an OHS qualification. The program is designed so that students may progress from the Graduate Certificate through to the Masters degree, provided a credit average is maintained throughout the Graduate Certificate.

Course Requirements
The Graduate Certificate in Occupational Hygiene Practice course is comprised of 24 credit points of subjects as outlined in the table below.

Course Program

Graduate Certificate in Advanced Dietetic Practice

Testamur Title of Degree: Graduate Certificate in Advanced Dietetic Practice
Abbreviation: GradCertAdvDietPrac
Home Faculty: Health and Behavioural Sciences
Duration: 4 sessions part-time, or 1 session full-time
Total Credit Points: 24
Delivery Mode: Face-to-Face
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 1170
CRICOS Code: 061882M

Overview

This is a course for practising dietitians (with a minimum of 3 years professional experience) who wish to undertake further study and develop their career whilst continuing to practise. The course provides opportunities for students to:

• Enhance their skills of reflection
• Enhance their skills of research design, data collection, program evaluation and statistical analysis
• Select and apply appropriate approaches in order to advance dietetic practice
• Engage in academic debate involving issues relating to practice and evidence-based approaches

The course will also assist current Accredited Practising Dietitians who may wish to apply for the title of Advanced Practitioner with the Dietitians Association of Australia (DAA). On completion of this course, students will be able to provide evidence of advanced knowledge and skills in many elements of three of the five key competency areas that need to be included in a dossier of supporting evidence: ‘Research and Evaluation’, ‘Strategic and Reflective Practice’ and Professional Competence’.

Entry Requirements / Assumed Knowledge

Applicants must possess professional Dietetics qualifications suitable for membership of the Dietitians Association of Australia, with at least 3 years experience as a practising dietitian.

International applicants require an IELTS of 7.0
Course Requirements
The course consists of 4 subjects (24 credit points) and will take a minimum of one semester to complete, but is more likely to be completed part-time over a 2 year period. Many subjects are available via flexible or distance learning, to allow students to enrol by distance if required. The course is composed of 3 core subject areas (reflective practice, research methods, and advanced dietetic practice) and one elective (in areas of management, public health, research methods and marketing).

</tbody>
</table>

Overview
This course is designed for practicing health professionals seeking to develop their management and leadership skills. This flexible program allows students to select from a variety of Graduate Certificate degrees and tailor their Masters program to suit their professional development requirements.

Entry Requirements
Students can enter the Master of Health Leadership and Management degree via either of the pathways detailed below:
Applicants with a Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent, together with a minimum of two years full-time relevant work experience will be admitted to the Master of Health Leadership and Management degree. Upon commencement of the degree, students will nominate two Graduate Certificate degrees within the course structure.

Alternatively, applicants may apply to enrol in one of the Graduate Certificate degrees listed within the MHLM course structure, provided they meet the entry requirements as specified for this Graduate Certificate by the relevant Faculty. Upon successful completion of the Graduate Certificate with an average mark of at least 60 per cent, students may apply to progress to the Master of Health Leadership and Management with credit for previous studies completed.

**Advanced Standing**

Candidates must successfully complete a total of eight subjects, totalling 48 credit points; no advanced standing will be granted for subjects completed in the first graduate certificate degree. Students who successfully complete one of the Graduate Certificate programs listed in the course structure with an average mark of at least 60 per cent may apply to progress to the MHLM with credit for previous studies.

**Course Requirements**

Students who enrol directly into the Master of Health Leadership and Management will be required to meet with the Course Co-ordinator and discuss which two of the graduate certificate programs will comprise the course.

Those students who enrol initially in one of the Graduate Certificate degrees listed below, will be eligible to progress to the Master of Health Leadership and Management, upon successful completion with an average mark of at least 60 per cent. Candidates will then articulate to the Master of Health Leadership and Management and complete a further 24 credit points of subjects, based on one of the other graduate certificate programs listed below.

At least one of the graduate certificate programs must be chosen from those offered by the Faculty of Health and Behavioural Sciences. As leadership is a core component of this program, students must either complete the Graduate Certificate in Health Leadership and Management OR successfully complete the subject TBS903 Managing People in Organisations within one of the other Graduate Certificates.

**Faculty of Health and Behavioural Sciences**

- Graduate Certificate in Health Leadership and Management
- Graduate Certificate in Health Management
- Graduate Certificate in Nutrition Management

**Graduate School of Business**

- Graduate Certificate in Business Administration
- Graduate Certificate in Logistics
- Graduate Certificate in Management

**Faculty of Informatics**

- Graduate Certificate in Health Informatics
- Graduate Certificate in Information and Communication Technology

Course structures for individual Graduate Certificate degrees can be found in the relevant Faculty’s Handbook.

Master of Indigenous Health

Testamur Title of Degree: Master of Indigenous Health
Abbreviation: MIndHealth
Home Faculty: Health and Behavioural Sciences
Duration: 1.5 years or part-time equivalent
Total Credit Points: 72
Delivery Mode: Flexible / Distance
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 589
CRICOS Code: 031165M

Overview
The Master of Indigenous Health is currently delivered through distance education, with some provision for negotiated tutorial time.

The course provides students with knowledge and skills to effectively address Indigenous community health, community development, and cultural issues in relation to Indigenous health.

Entry Requirements / Assumed Knowledge
A Bachelor degree of at least three years duration, or Graduate Diploma (or equivalent), from a recognised tertiary institution. Recognition is given for relevant work experience and prior learning.

Course Requirements
Students complete a total of 72 credit points as outlined in the course program below.

Master of Nursing

Testamur Title of Degree: Master of Nursing
Abbreviation: MNurs
Home Faculty: Health and Behavioural Sciences
Duration: 1 year or part-time equivalent
Total Credit Points: 48
Delivery Mode: Day/Evening/Flexible
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 583
CRICOS Code: 009251G

Overview
The Master of Nursing is designed to prepare nurses for senior roles in nursing and in the health care system. It is a program of either selected coursework, or by a combination of coursework and a major project.

The aims of the program are to prepare candidates with beginning competence in research methods and design and provide candidates with important current evidence based health care and nursing information. The main objectives are to provide an academic avenue for professional development, knowledge and comprehension of research methods and design, and of evidence based practice.
Entry Requirements / Assumed Knowledge

A Bachelor degree in Nursing of at least three years duration or a Graduate Certificate in Nursing from a recognised tertiary institution is required.

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements

The Master of Nursing is a 48 credit point program that may consist entirely of coursework, or may be a combination of coursework and a major project. There are 24 credit points of core subjects that all students must complete. The remaining 24 credit points can be made up from the elective subject list below, or the student may elect to complete their program by undertaking a research project (Major Project).

Master of Science (Dementia Care)

Testamur Title of Degree: Master of Science (Dementia Care)
Abbreviation: MSc
Home Faculty: Health and Behavioural Sciences
Duration: 1 year full-time
Total Credit Points: 48
Delivery Mode: Core subjects are flexible delivery; electives may include on-campus subjects
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 574
CRICOS Code: 064125B

Overview

The Master of Science (Dementia Care) is a clinically-focused program that prepares practitioners for advanced professional practice and initiating innovation in the specialist field of dementia.

The course will provide graduates with skills and advanced knowledge in the care of people with dementia. Students will have the opportunities to build on existing knowledge and use work-based learning to enhance client care and service delivery in the multi-disciplinary environment.

Entry Requirements / Assumed Knowledge

A 3 year Bachelor degree in a health-related discipline, or equivalent. Applicants who hold professional qualifications in a health-related discipline will also be considered.

International students are required to have achieved an IELTS score of 6.5, with a level of at least 6 in all bands of reading, writing, speaking, and listening.

Course Requirements

The Master of Science (Dementia Care) is comprised of 48 credit points of subjects as per the table below.

Master of Science (Developmental Disability)*

Testamur Title of Degree: Master of Science (Developmental Disability)
Abbreviation: MSc
Home Faculty: Health and Behavioural Sciences
Duration: Additional 6 months following completion of the Graduate Diploma
Total Credit Points: 24 credit points (above the 48 credit points completed in the Graduate Diploma in Science (Developmental Disability) (Currently Under Review)
Delivery Mode: Face-to-face
Starting Session(s): No intake in 2009
Location: Wollongong
UOW Course Code: 574P
CRICOS Code: 048497G

*Please note this course is currently under review and will not be on offer in 2009

224 University of Wollongong
Overview

This multidisciplinary program is designed for health and education professionals who work in the developmental disability sector. It aims to provide an appropriate theoretical and conceptual framework for practice and access to contemporary information relating to developmental disability.

The course consists of specialist developmental disability subjects and electives. Emphasis is on applying theoretical, research-based knowledge to practice in the developmental disability field.

Entry Requirements / Assumed Knowledge

Successful completion of the University of Wollongong’s Graduate Diploma in Science (Developmental Disability).

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements

Students enrolling in the Master of Science (Developmental Disability) already will have completed the 48 credit point Graduate Diploma in Science (Developmental Disability). The candidate is required to undertake a further 24 credit points of subjects to successfully complete the Master of Science (Developmental Disability).

Students undertake a research project on an aspect of developmental disability that consolidates earlier studies in developmental disability and research methodology.

Course Program

Following completion of the requirements for the Graduate Diploma in Science (Developmental Disability) students enrol in:

Master of Science (Gerontology and Rehabilitation Studies)

The Master of Science (Gerontology and Rehabilitation Studies) is designed to provide opportunities for practitioners working with older people or clients with rehabilitation needs to enhance their knowledge and clinical skills in relevant areas. The focus of the course is on enabling practitioners to prepare for new roles related to clinical leadership, management, education, or research, in the area of aged and rehabilitation care. The course provides an environment for multi-disciplinary colleagues to share best practice in addressing the challenges of implementing evidence-based practice, delivering new policy initiatives, and promoting user and carer involvement in care delivery.

Entry Requirements/ Assumed Knowledge

A Bachelor degree, or equivalent, or successful completion of a Graduate Certificate in a related discipline. Consideration will be given to health professionals who do not hold any diplomas or the degrees listed above. International students must have an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements

The Master of Science (Gerontology and Rehabilitation Studies) is a 48 credit point programme that may consist entirely of course work, or may be a combination of coursework and major project. There are four core subjects that all students must complete (24 credit points). The remaining 24 credit points can be made up from elective subjects, or the student may elect to complete their programme by undertaking a research project (Major Project).

Overview

The Master of Science (Midwifery) program enables Registered Nurses to undertake the recommended theory and clinical experience as required by the Nurses and Midwives Board, NSW, Australia in order to become Registered Midwives. The program aims to provide graduates with skills and advanced knowledge from several related disciplines to provide continuing care for women, their infants and families during the reproductive phase of their lifespan. During the program, the exploration and clarification of evidence-based midwifery practice is emphasised.

Entry Requirements / Assumed Knowledge

Authorisation to practice as a Registered Nurse by the Nurses Registration Board of NSW, List A and:

a) a three-year Bachelor of Nursing degree or equivalent (eg. Diploma in Nursing, Graduate Diploma in Nursing) or a three-year Bachelor degree from a related discipline;

b) consideration may be given to registered midwives who do not hold any diplomas or previously mentioned degrees.

International students who are registered midwives in their own countries may enrol and are awarded advanced standing for the clinical subjects. International students who are not registered midwives in their own countries must obtain temporary registration as a nurse in New South Wales through the Nurses and Midwives Board, NSW, Australia in order to undertake the clinical subjects. International students are also required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements

The Master of Science (Midwifery) requires the completion of 48 credit points of subjects. Students are required to complete a minimum of 1516 hours of reimbursed, or 1020 hours total supernumerary clinical experience, to demonstrate that they meet the Nurses Registration Board of NSW pre-requisite for registration.

Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases at the end of this chapter.

Graduate Certificate in Health Leadership and Management

Testamur Title of Degree: Graduate Certificate in Health Leadership and Management
Abbreviation: GCertHLM
Home Faculty: Health and Behavioural Sciences
Duration: 0.5 year full-time, or part-time equivalent
Total Credit Points: 24
Delivery Mode: Face-to-Face
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 1163
CRICOS Code: 061991F

Overview
This is a course for health professionals including Nurses, Midwives, Allied Health and Medical Practitioners. It provides opportunities to:

• Understand and practice the skills of effective leadership.
• Explore the skills of the effective manager.
• Enhance skills of reflection.
• Discover the value of coaching skills in healthcare practice.

On completion of this course, health professionals will feel confident about their contribution to the challenges they are presented with in their clinical practice and be able to facilitate change through leadership.

Entry Requirements / Assumed Knowledge
All applicants must have a recognised Bachelor’s Degree in a health discipline OR equivalent.

International students are required to have achieved a minimum IELTS score of 6.5 overall, with a level of at least 6 in all bands of reading and writing, speaking and listening.

Course Requirements
The Graduate Certificate in Health Leadership and Management course is comprised of 24 credit points of subjects, and from 2008 can be taken as a one session full-time enrolment or 1 year part-time.

Overview

This course provides a solid introduction to understanding and conducting health-related research. The core subjects provide grounding in the key skills needed to read, interpret and evaluate published research; to develop and implement a health research project; to evaluate health-related outcomes; and to apply learning about research frameworks and methods to questions experienced in the students’ workplace and social environment.

The course fosters excellence in teaching and learning by undertaking an innovative approach to student scholarship, with academics, other professionals and student participation contributing to the creation of a student friendly course that has been designed to be responsive to the individual student’s need and to encourage collaboration and active participation in the learning experiences.

This course is suitable for students preparing to undertake higher degree research studies as well as those wishing to develop fundamental research skills for professional practice.

Entry Requirements / Assumed Knowledge

A Bachelor degree of at least three years duration from a recognised tertiary institution, or equivalent.

Graduate Certificate in Nursing

Testamur Title of Degree: Graduate Certificate in Nursing
Abbreviation: GCertNurs
Home Faculty: Health and Behavioural Sciences
Duration: 1 year part-time
Total Credit Points: 24
Delivery Mode: Day/Evening/Flexible
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 1112
CRICOS Code: N/A

Overview

The Graduate Certificate in Nursing is a short, focused course having both academic and industry relevance. It is designed to give students the flexibility to choose subjects that allow professional development to occur in tandem with academic rigour. Candidates may exit following completion of the required subjects, having acquired advanced knowledge in their chosen fields and having been prepared for advanced practice.

Entry Requirements / Assumed Knowledge

A Bachelor degree in Nursing of at least three years duration from a recognised tertiary institution or a qualification to practice as a Registered Nurse or equivalent.

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening.

Course Requirements

The candidate is required to undertake 24 credit points from the table below, at least 12 credit points of which must be Nursing.

Note that in Spring 2009, four new majors will be introduced into the Graduate Certificate of Nursing, subject to final approval. The majors will be:

- Ophthalmology
- Infection Control
- Sexual Health
- Hand Management, Therapy and Rehabilitation

Details of these majors will be posted on this page once final approval has been given.

Graduate Certificate in Practice Nursing

Testamur Title of Degree: Graduate Certificate in Practice Nursing
Abbreviation: GCertPractNurs
Home Faculty: Health and Behavioural Sciences
Duration: 1 year part-time
Total Credit Points: 24
Delivery Mode: Combination of On-campus and Flexible
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 1150
CRICOS Code: N/A

Overview
This course is aimed at registered nurses working within general practice. It aims to inform the course participants of the sociological, economic and political aspects of general practice, as well as foster best practice principles in relation to clinical nursing practice within the general practice context.

This course has a strong emphasis on clinical skill development and decision-making within general practice. The development of this course has been in association with divisions of general practice and practice nurses both nationally and internationally.

Entry Requirements / Assumed Knowledge
Applicants must be a registered nurse within Australia; preferably currently employed as a practice nurse; however, registered nurses who are not currently employed as a practice nurse may enrol upon advice from the Course Coordinator.

International students are required to have achieved an overall IELTS score of 6.5, with a level of at least 6.0 in all bands, reading and writing, speaking and listening. They must also be a registered nurse in Australia, or have acquired temporary nurse’s registration in Australia.

Course Requirements
The candidate is required to undertake 24 credit points to successfully complete the Graduate Certificate in Practice Nursing.

Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases under the Additional Information Section.
Course Program

Subjects (by year)                                      Session  Credit Points

Graduate Certificate in Social Marketing for Health

Testamur Title of Degree: Graduate Certificate in Social Marketing for Health
Abbreviation: GCertSocMarkHlth
Home Faculty: Health and Behavioural Sciences
Duration: 1 year part-time
Total Credit Points: 24
Delivery Mode: Flexible
Starting Session(s): Autumn, Spring
Location: Wollongong
UOW Course Code: 1172
CRICOS Code: N/A

Overview

This course provides all the necessary skills to enable students to pursue a career in social marketing in a health related agency, or to pursue social marketing interventions as a practical way to approach a health problem.

Entry Requirements / Assumed Knowledge

A Bachelor degree of at least three years duration from a recognised tertiary institution, or equivalent (or experience deemed equivalent).

Course Requirements

Students complete a program of 24 credit points as outlined in the table below.

Course Program

Subjects                                      Session  Credit Points
CHIP911  Social Marketing for Health          Autumn   6
GHMD930  Mass Media and Population Health     Autumn   6
CHIP912  Advanced Studies in Behaviour Change Spring   6
CHIP913  Social Marketing Practice*           Spring   6

* Students in CHIP913 select either a Research Proposal stream OR an off-campus clinical placement.

School of Psychology

Doctor of Psychology (Clinical)

Testamur Title of Degree: Doctor of Psychology (Clinical)
Abbreviation: DPsyc (Clin)
Home Faculty: Health and Behavioural Sciences
Duration: 3.5 years full-time or part-time equivalent
Total Credit Points: 168
Delivery Mode: Face-to-face
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 208
CRICOS Code: 027469G

Overview
The Doctor of Psychology (Clinical) aims to provide students with a comprehensive understanding of the principles governing psychological assessment and therapy and the clinical skills required to assess and treat a wide variety of psychological disorders in children, adolescents and adults. This course also exposes students to advanced skills and knowledge relevant to the practice of clinical psychology. This includes advanced training in the design, execution, and writing up of a research project that focuses on an issue that is relevant to clinical psychology theory or practice. The program equips postgraduates with clinical and research knowledge, and skills superior to those acquired at the professional Masters level. The doctoral program is principally focused on applied clinical psychology research leading to a doctoral level research thesis.

Entry Requirements / Assumed Knowledge
Places in this course are limited and will be based on academic merit and personal suitability.
Candidates must have a superior honours degree in Psychology of at least four years duration of Class II, Division 1 standard or higher. Entry is very competitive and successful applicants will typically also be recipients of a PhD Scholarship. Selection for entry is based on academic record, a research proposal, two referee’s reports, relevant practical experience and a personal statement. Short-listed candidates are also subject to a selection interview. Candidates in the MPsyc (Clin) may apply to transfer to this course at the completion of year 1. For entry details consult www.uow.edu.au/health/psyc

International students must demonstrate that they have achieved an IELTS score of 7 overall, with at least 7 in all bands (reading and writing, speaking and listening). In addition, international applicants must have a degree in psychology that is equivalent to an Australian 4-year sequence of psychology. International applicants must have their qualifications assessed by the Australian Psychological Society (APS) for equivalence and provide this evidence in their application (see: www.psychology.org.au/membership/qualifications/).

Course Requirements
Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases at the end of this chapter.

In addition to coursework and practicum requirements, candidates will be required to successfully complete a supervised research program on a topic that is consistent with key research interests of the School of Psychology and the Illawarra Institute of Mental Health.

Overview

The Master of Psychology (Clinical) is a fully accredited professional 5th and 6th year of study for the purpose of full registration as a psychologist. Completion of the course also meets the training requirements for associate membership of the Australian Psychological Society College of Clinical Psychologists.

This program provides a comprehensive understanding of the principles governing psychological assessment and therapy. It equips students with the clinical skills required to assess and treat a wide variety of psychological disorders in children, adolescents and adults. Teaching methods include mandatory face to face classes and clinical practice. The program involves four sessions of full-time study or their part-time equivalent.

Entry Requirements / Assumed Knowledge

Candidates must have a 4 year Honours degree in Psychology of at least Class II Division 1, or equivalent, from a recognised university. Applicants with a Postgraduate Diploma in Psychology are eligible to apply but students are encouraged to pursue an honours degree option if that is available to them.

Selection for entry is based on academic record, two referee’s reports, relevant practical experience and a personal statement. Short-listed candidates are also subject to a selection interview.

Places in this course are limited. Entry is competitive and is based on academic merit and personal suitability.

International students must demonstrate that they have achieved an IELTS score of 7 overall, with at least 7 in all bands (reading and writing, speaking and listening). In addition, international applicants must have a degree in psychology that is equivalent to an Australian 4-year sequence of psychology. International applicants must have their qualifications assessed by the Australian Psychological Society (APS) for equivalence and provide this evidence in their application (see: www.psychology.org.au/membership/qualifications/).

Students should consult the information on Criminal Records Checks, Prohibited Employment Declaration and Infectious Diseases under the Additional Information Section.

Overview
This program is available to applicants with a major study in Psychology. Because the APS reserves the name ‘Masters’ for 5th and 6th year courses, this course is not accredited by the Australian Psychological Society. It is thus not suitable for Australian students who intend to proceed further with APS accredited professional training. The program structure allows international students to tailor their studies to suit the requirements of the profession in their own countries.

Entry Requirements / Assumed Knowledge
A Bachelor degree of at least three years duration with a major in Psychology from a recognised tertiary institution (or equivalent) is required for entry.

International students are required to have achieved an IELTS score of 6.5, with at least 6.0 in reading, writing, speaking and listening.

Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn session
Location: Wollongong
UOW Course Code: 674
CRICOS Code: 026168F

Overview
The Postgraduate Diploma in Psychology is a fourth year of study, accredited by the Australian Psychological Society, for graduates with a major in Psychology. It is an alternative to the Honours degree.

It is a partial qualification for registration as a Psychologist with the Psychologists Registration Board of New South Wales – a post diploma period of supervision also being required.

The Postgraduate Diploma is not intended as a route to PhD studies but it can serve as a 4th year preparatory to further postgraduate coursework degrees (eg. the Clinical Masters degree) at Wollongong and similar postgraduate courses in other universities. However, applicants should check with individual university departments on this matter before committing themselves to the course of study.

Entry Requirements / Assumed Knowledge
Eligibility for entry to the Postgraduate Diploma in Psychology program depends on the successful completion of a Bachelor degree from the University of Wollongong with a major in Psychology, or an equivalent qualification from another tertiary institution approved by the Council of the University of Wollongong and accredited by the Australian Psychological Society.

Entry to the Postgraduate Diploma is competitive and is based on academic qualifications. For the purposes of entry to the program we use the best 48 credit points from successfully completed 200- and 300- level Psychology subjects.

International students are required to have achieved an IELTS score of 6.5, with at least 6.0 in reading, writing, speaking and listening.

* Please note this course is under review and will not be on offer in 2009

Overview

The Postgraduate Certificate in Professional Psychological Practice is a post-fourth-year course designed to provide students with skills that will facilitate registration as a psychologist with the NSW Psychologists Registration Board. The course consists of a series of group supervision sessions integrated with workshops.

It is important to note that registration with the Board is not automatic on completion of this course.

Entry Requirements / Assumed Knowledge

Eligibility for entry to the Postgraduate Certificate in Professional Psychological Practice is based on the successful completion of a 4th year of study in Psychology recognised by the NSW Psychologists Registration Board (e.g., an APS accredited 4 year degree) and acceptable performance in an intake interview.

This course is not available to international students.

Course Requirements

Students can elect to complete one or all of the 4 annual 8 credit point subjects listed below. Successful completion of all subjects (total of 32 credit points) will lead to the award of the Certificate.

Note that new students will not be admitted to this degree in 2009. All current students will be permitted to continue their enrolment.

Overview

The Master of Nutrition Management allows students to critically examine key issues relating to food product development in Australia today, and apply new knowledge and skills to developments within their own work environments.
Entry Requirements / Assumed Knowledge

Applicants must possess an undergraduate degree from a recognised Australian university or institution of equivalent standing, with a grade average of at least 60%; or, applicants must possess an undergraduate degree from a recognised Australian university or institution of equivalent standing, with a grade average between 50% and 59% and must also have completed a minimum of two years full-time relevant work experience (managerial or supervisory in nature and/or which carries a level of responsibility) after graduation.

In special circumstances, applicants who hold other academic or professional qualifications and have a minimum of five years full-time or ten years part-time relevant work experience, may also be granted admission to the program.

International students are required to have achieved an IELTS score of 6.5, with a minimum level of 6.0 in reading, writing, speaking and listening.

Course Requirements

The Master of Nutrition Management comprises 4 nutrition and 4 management subjects totalling 48 credit points, over four sessions part-time.

* Alternate subject for 2009 is MARK922, which is offered in both Autumn and Spring session.

Credit Towards Other Courses

Students may apply to undertake another session of work including a project to receive a Master of Science (Nutrition Management) or undertake the remaining requirements of a Master of Business Administration program to achieve this as an additional qualification. Students need to meet the required two years work experience for the Master of Business Administration program, or the academic requirements for entry into the Major Project. Entry to the Major Project also requires the availability of a suitable supervisor and an available project.

Students in this program should be aware that there is no direct transfer option into other Nutrition Masters programs (including Nutrition, Nutrition & Dietetics). Students may apply to enter these other programs via the usual application process, which is generally a competitive process.

Students who wish to later apply for entry into the Master of Science (Nutrition or Nutrition & Dietetics) must ensure that they have the required pre-requisites, including 12 credit points of human physiology and 12 credit points of biochemistry.

Overview
The Master of Science (Nutrition Management) allows students to critically examine key issues relating to food product development in Australia today, and apply new knowledge and skills to developments within their own work environments. In addition, students have the opportunity to conduct a major project to apply these skills in a research context, or further develop Business and/or Science knowledge.

Entry Requirements / Assumed Knowledge
Applicants must possess an undergraduate degree from a recognised Australian university or institution of equivalent standing, with a grade average of at least 70%.

Applicants who possess an undergraduate degree from a recognised Australian university or institution of equivalent standing, with a grade average between 60% and 69%, and have also completed a minimum of two years full-time relevant work experience (managerial or supervisory in nature and/or which carries a level of responsibility) after graduation will also be considered.

In special circumstances, applicants who hold other academic or professional qualifications and have a minimum of five years full-time or ten years part-time relevant work experience may also be granted admission to the program.

International students are required to have achieved an IELTS score of 6.5, with a minimum level of 6 in reading writing, speaking and listening.

Course Requirements
The Master of Science (Nutrition Management) comprises 72 credit points made up of 4 nutrition and 4 management subjects plus an additional 24 credit points from either a major project (24 credit points) or 4 electives chosen from the Master of Business Administration subjects, or other subjects approved by the Associate Director (Education).

or

24 credit points of electives chosen from the Master of Business Administration subjects or other subjects approved by the Associate Director (Education).

* Alternate subject for 2009 is MARK922 which is offered in both Autumn and Spring session.

** Requires the availability of a suitable research supervisor and research project.

Further Study Options
Students who have completed the requirements of the Master of Science (Nutrition Management) may progress to the Master of Business Administration (MBA) with up to 48 credit points of advanced standing. Students need to meet the required two years work experience for the Master of Business Administration program.

Students in this program should be aware that there is no direct transfer option into other Nutrition Masters programs (including Nutrition, Nutrition & Dietetics). Students may apply to enter these other programs via the usual application process, which is generally competitive.

Students who wish to later apply for entry into the Master of Science (Nutrition or Nutrition & Dietetics) must ensure that they have the required pre-requisites including 12 credit points of human physiology and 12 credit points of biochemistry.

Graduate Certificate in Nutrition Management*

Testamur Title of Degree: Graduate Certificate in Nutrition Management
Abbreviation: GCertNutrMgmt
Home Faculty: Health and Behavioural Sciences
Duration: 1 year part-time
Total Credit Points: 24
Delivery Mode: Day
Starting Session(s): Autumn
Location: Wollongong
UOW Course Code: 1132
CRICOS Code: NA

* Please note this course is currently under review

Overview
The Graduate Certificate in Nutrition Management allows students to critically examine key issues relating to food product development in Australia today, and apply new knowledge and skills to developments within their own work environments.

Entry Requirements / Assumed Knowledge
Applicants must have a 3yr undergraduate degree from a recognised Australian university, or equivalent, with a grade average of 65%. Applicants with 3yr undergraduate degree from a recognised Australian university, or equivalent, with a grade average of less 65% must also have completed a minimum of two years full-time relevant work experience (managerial or supervisory in nature and/or which carries a level of responsibility) after graduation.

Applicants who hold other academic or professional qualifications and have a minimum of five years full-time or ten years part-time relevant work experience may also be granted admission to the program on a case-by-case basis.

International students are required to have achieved an IELTS score of 6.5 with a minimum level of 6 in reading, writing, speaking and listening.

Course Requirements
The Graduate Certificate in Nutrition Management comprises 2 nutrition and 2 management subjects totalling 24 credit points, over two sessions part-time.

**SUBJECT DESCRIPTIONS**

**CHIP912 Advanced Studies in Behaviour Change**
- Spring Wollongong Distance
- Spring Wollongong Flexible

**Credit Points:** 6
**Pre-requisites:** None
**Co-requisites:** None

**Subject Description:** This subject identifies and examines appropriate theories in the planning of health education and promotion programmes. It distinguishes between theories at the individual level and those at the group or community levels. This subject demonstrates how to identify and choose intervention methods from theory and the literature to effect behaviour change. It presents ideas on how to translate these methods into strategies to deliver programmes that create behaviour change at the different levels. It identifies how to measure behaviour before and after intervention and how to evaluate programmes designed to effect behaviour change.

**CHIP913 Social Marketing Practice**
- Spring Wollongong Distance
- Spring Wollongong Flexible

**Credit Points:** 6
**Pre-requisites:** CHIP911, GHMD930
**Co-requisites:** CHIP912

**Subject Description:** This subject provides students with practical experience to research in a health related workplace that engages in social marketing strategies for health promotion. Students identify and critically evaluate one of the social marketing programmes adopted by that agency. Students collect all the relevant data and policy documents to examine the process of planning, implementing and evaluating that programme. Students are expected to critically analyse the programme in order to identify the successes and failures of the strategies used and present alternatives or additional material to be used within that programme.

**CHIP915 Essential Skills for Health Researchers**
- Autumn Wollongong Flexible
- Autumn Wollongong Distance

**Credit Points:** 6
**Pre-requisites:** None
**Co-requisites:** None

**Subject Description:** This subject focuses on specific research skills that are essential for students to be competent and successful in their HDR, and ultimately independent researchers. The specific skills that are addressed include: (1) effective strategies for delineation of an important researchable question; (2) strategies for identifying, critically analysing and integrating the relevant research literature; (3) defining and measuring relevant endpoints including educational, psychological, behavioural, health status and community endpoints; special attention is placed on examination of psychometric properties of the measurement instruments/strategies; (4) strengths and limitations of various experimental, quasi-experimental and survey designs; (5) defining the study sample and determining the required sample size; (6) options for assigning participants to groups; (7) identifying and addressing ethical issues, and preparation of an ethics application; and (8) interpreting study findings within the context of the existing knowledge base.
Informatics
Law
Science

The Discipline of Ergonomics (or human factors) is the scientific discipline concerned with the understanding of interactions among humans and other factors (such as work environments, products and systems in order to make them compatible with and to evaluate the performance of tasks, jobs, products, environments and systems in order to make them compatible with the needs, abilities and limitations of people.

Subject Description: A research project designed to develop an understanding of the scientific process through the experience of research. Students will design, propose, conduct, analyse, interpret and then present the results of a research project which can be related to the topic of their Major Thesis.

Co-requisites: None
Pre-requisites: None
Credit Points: 8

GHMA909 Practicum

Annual Wollongong On Campus
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: A subject which introduces students to their supervisor’s laboratory and allows for the development of technical skills and procedures critical to the success of their Major Project. If the student is undertaking a non-laboratory based thesis, another relevant subject may be substituted for GHMA909 with the approval of the HOD.

GHMA913 Special Topics

Annual Wollongong On Campus
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: A subject which develops the students’ ability to examine, access, interpret and evaluate primary and secondary source research data and ideas. Students will write an extensive critical review of the literature or other approved area of research related to their Major Thesis.

GHMA915 Ergonomics In Practice

Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to the discipline of ergonomics. The subject is designed to provide an overview of ergonomics to provide understanding and basic skills. This subject is particularly useful for OHS practitioners and those interested in further study of ergonomics and human factors. The Discipline of Ergonomics (or human factors) is the scientific discipline concerned with the understanding of interactions among humans and other elements of a system, and the profession that applies theory, principles, data and methods to design in order to optimize human well-being and overall system performance. Ergonomists contribute to the design and evaluation of tasks, jobs, products, environments and systems in order to make them compatible with the needs, abilities and limitations of people.

GHMA920 Behavioural Change: Human Factors in OHS

Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Traditional OHS performance based strategies are giving way to developments in behavioural science that aim to: allow recognition of occupational, environmental and social factors that influence attitudes and behaviours in the workplace; provide an insight into human error; and provide mechanisms to modify behaviours so as to eliminate or reduce the potential for error. Our students will examine the results of safety programmes operating in industry so they understand the concepts and influences behind: The role of the OH&S professional in influencing management; The importance of goal setting, leadership and the ‘engagement’ of people; The Behaviour-Based System of Safety Management; Human error and the difference between slips, lapses, mistakes and violations; Mindful and Error Tolerant Organisations; The styles and pitfalls of reward and disciplinary systems that seek to ensure safety compliance; Human nature, sensation, perception, ‘stress’ and distress, fatigue and shift work; The impact of drugs and alcohol on safety performance and analysis of the efficacy of random testing; Methods and efficacy of assessing potential job candidates in terms of safety compliance. At the conclusion, students will have a solid understanding of the concepts and foundations of human behaviour (with the exception of ergonomics) and the necessary skills to undertake a critical review of OHS strategies and the development of intervention strategies.

GHMA922 Occupational Hygiene and Toxicology

Summer 2009/2010 Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: In modern society every workplace contains chemical, physical or biological agents which may have the potential to give rise to adverse health effects in workers. This course aims to present the principles of occupational hygiene and toxicology and how this information is used by practitioners to recognise, evaluate and control workplace exposures.

GHMA923 OHS Risk Management

Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Risk management in the workplace is the culture, processes and structures that are directed towards realising potential opportunities whilst managing adverse effects (AS/NZS 4360:2004). The risk management process is the systematic application of management policies, procedures and practices to the tasks of communicating, establishing the context, identifying, analysing, evaluating, treating, monitoring and reviewing risk (AS/NZS 4360:2004). In OHS this process is directed towards the identification of hazards to health and safety of the workforce and to their control. The following topic areas will be covered: Hazard
identification; Risk assessment, control and monitoring; Critical evaluation and review of risk assessment techniques and implementation strategies; The process and recording of investigations into incidents and accidents in the workplace that threaten or harm workers' health and/or safety; The development of a safety management plan. Students will conduct risk management assessments and gain experience in writing reports suitable to submit to industry. Students will use their knowledge of risk management principles to assess OHS hazards in the workplace and recommend appropriate control strategies.

GHMA927 Advanced Workplace Injury Management
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This course should provide students with an overview of workplace injury management and return to work strategies. Principles of workplace rehabilitation and legislative requirements specific to NSW will be covered. Students should gain practical skills and experience in workplace injury management and assessment through the use of case studies, with the emphasis on injury management - maintaining an injured worker in the workplace through appropriate workplace assessment, matching worker capabilities with work tasks, reducing the risk of re-injury, and promoting the return to full duties.

GHMA929 Exercise Psychology and Dietary Counselling
Autumn Wollongong On Campus
Pre-requisites: None
Co-requisites: GHMA934 or BND434
Exclusions: GHMA933 OR BND433 OR PSYC216
Subject Description: The subject will combine an understanding of the central features of sports psychology with basic skills in dietary counselling and small group education in the context of diet and exercise. Students will study personality and situational factors influencing participation in sport, and cognitive and behavioural influences on the promotion of healthy lifestyles. They will counsel individuals in dietary change and develop skills in medical documentation and small group education.

GHMA930 Community and Public Health Nutrition
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: BMS310 OR GHMD936 OR SFC902
Subject Description: Key areas of community and public health nutrition include nutrition surveillance, food policy, program planning and health promotion. There will be a focus on community nutrition practice, covering such topics as maternal and infant nutrition, school-based nutrition programs, diabetes education and the health of older people in the community. Submission of some assignment work via eLearning Space.

GHMA931 Nutrients and Metabolism
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Exclusions: BMS311
Subject Description: This subject covers the need for nutrients and how the human body metabolises these nutrients. It begins with basic concepts such as bioavailability of nutrients from food. It then focuses on specific nutrients including protein and fat quality, folate and B vitamins, antioxidants and soy phytoestrogens, most of which do not have recommended dietary intakes (RDIs). The overall aims are 1) to understand the relationships between intake of nutrients and health status and 2) to develop an appreciation for the development of an RDI for a nutrient. Please note that this is a core subject for all of the University of Wollongong's nutrition degrees and hence it is tailor for nutrition students.

GHMA932 Research in Human Nutrition
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: STAT151 or Equivalent
Co-requisites: None
Exclusions: BMS312
Subject Description: The subject will introduce students to a range of key areas of research in human nutrition. Beginning with an overview of nutrition research and the development of literature reviews, topics will include diet intake methodology, the use of nutrient databases, biomedical assays and indicators, epidemiological and ethnographic approaches as they relate to nutrition.

GHMA933 Communication in Healthcare Practice
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: GHMA934 or BND434
Exclusions: BND433, GHMA929
Subject Description: The subject will introduce you to the theory and practice of communication in the professional work environment, emphasising successful communication in a range of contexts. These include client counselling, small group education, community consultation, participation in meetings, working with the media and conflict resolution. In order to promote teamwork and group skills, the subject is taught on a small group basis, and you should prepare for each activity. In order to promote an understanding of how people learn in small groups, you are asked to keep a reflective journal and to critique the process at the completion of the subject.

GHMA934 Dietetics
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: GHMA931 and GHMA932; or BMS311 and BMS312
Co-requisites: GHMA930 or BMS310
Exclusions: BND434
Subject Description: Dietetics concerns the manipulation of food and dietary data with the aim of supporting nutritional health. This subject focuses attention on the nutritional needs of individuals, in clinical and community health settings, where nutritional...
intervention will improve or support the quality of life. This subject will draw upon much of your undergraduate and postgraduate studies. In particular you should revise your understanding of nutrition through the life cycle, human physiology and metabolic biochemistry.

**GHMA935 Food Service and Dietetics Management**

**Subject Description:** This subject offers students the opportunity to complete a specialised project related to an area of their dietetic practice (e.g. a specialist clinical area such as pediatrics, renal or sports nutrition; or community or foodservice practice). Students will undertake either an externally provided short course or manage the provision of meals via an institutional food service. Aspects of organisational design, leadership, motivation, negotiation, resource management, decision making and power will be explored.

**Credit Points:** 8

**Pre-requisites:** GHMA930 or BMS310 or GHMA931 or BMS311 or GHMA932 or BMS312

**Co-requisites:** None

**Exclusions:** BND435

**GHMA936 Advanced Dietetic Practice**

**Subject Description:** This subject offers students the opportunity to complete a specialised project related to an area of their dietetic practice (e.g. a specialist clinical area such as pediatrics, renal or sports nutrition; or community or foodservice practice). Students will undertake either an externally provided short course in a specialty area of practice with a minimum of 15 hours face-to-face teaching (approved by the course coordinator) – for example courses provided by Special Interest Groups of DAA – or undertake a guided program of specialist reading. Building on the knowledge gained and by adopting a critical and reflective approach to their work, students will then analyse a problem and develop a plan to improve or advance an aspect of their current professional practice. The final report will be presented in the format of an article suitable for publication or a professional practice. The final report will be presented in the format of an article suitable for publication or a professional practice. The final report will be presented in the format of an article suitable for publication or a professional practice. The final report will be presented in the format of an article suitable for publication or a professional practice. The final report will be presented in the format of an article suitable for publication or a professional practice.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**GHMA937 Practical Studies in Nutrition and Dietetics**

**Subject Description:** This subject comprises a practicum of at least 16-20 weeks duration which is spent in hospitals, community health centres, and other food-related organisations. Students will be under the supervision of experienced practitioners appropriate to the placement requirements. This placement is designed to develop the student’s skills and competencies in a range of areas including specialised therapeutic diets and the provision of community nutrition programs. It also provides the students with opportunities to rehearse and demonstrate both interviewing and counselling skills, as well as information and behaviours required to allow the Dietitian to operate as an independent professional. Awareness of, and behaviours consistent with the knowledge of ethics requirements, confidentiality, accountability and other responsibilities of the autonomous professional operating either independently or as a member of a multidisciplinary team should be demonstrated by the student.

**Credit Points:** 24

**Pre-requisites:** GHMA934 and GHMA935; GHMA933 or GHMA929

**Co-requisites:** None

**Exclusions:** BND437

**GHMA940 Measurement of Hazardous Substances**

**Subject Description:** The aim of this subject, Measurement of Hazardous Substances, is to outline the general approach advocated for the assessment of the health risk(s) associated with exposure to hazardous substances, and then focuses in detail on the role and application of atmospheric monitoring. It addresses the theory of sampling, practical sampling and analytical considerations and the calculation and presentation of results. Numerical calculations are included to ensure that the underlying principles are well understood.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**GHMA941 Thermal Environment**

**Subject Description:** The overall aim of this subject is to develop professional knowledge and skills in the specialised area of thermal environments. Specifically the subject will: Provide the student with a sound understanding of the physiological effects of the thermal environment on workers in a variety of settings; Develop the skills necessary to assess the degree of risk in a wide variety of situations both hot and cold; Provide guidance on those control measures that can be used to minimise the effects of adverse thermal conditions in the workplace.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**GHMA942 Noise - Measurement and its Effects**

**Subject Description:** The aim of this subject is to provide the student with an appreciation of the nature of noise hazards in the workplace and the effects of noise on people. Additionally, the subject details the approach in conducting noise assessments in the workplace as well as the general environment; and to determine the significance of measurement data in relation to the various standards for compliance.
GHMA943  Control of Hazardous Substances  
Spring  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites:  None  
Co-requisites:  None  
Subject Description: The aim of this subject is to provide the student with an appreciation of workplace processes and practices where hazardous substances occur and the methods that can be used to control employee exposures to those hazardous substances. Additionally, the subject details the approach in conducting assessments of ventilation systems (a key control technology) in the workplace to establish if the ventilation system is effective and operating to its design specifications.

GHMA944  Asbestos and Other Fibres  
Spring  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites:  None  
Co-requisites:  None  
Subject Description: The aim of this subject is to enhance the student’s knowledge of occupational hygiene practice in relation to fibrous dusts such as asbestos, synthetic mineral fibres (glass fibre, rock wool etc) and aramids (such as Nomex, Kevlar, Twaron etc) of which the latter are increasingly finding uses in industry. This subject provides guidance as to how these products can be managed so as to minimise employee exposures. This includes understanding the health effects, evaluating workplace exposures, and management of fibrous materials in workplaces.

GHMA945  Ergonomics Essentials  
Spring 2009/2010  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites:  None  
Co-requisites:  None  
Subject Description: The aim of the subject is to provide the student with a broad based introduction to ergonomic principles and their application in the design of work, equipment and the workplace. Specific consideration will be given to musculoskeletal disorders, manual handling, ergonomic aspects of the environment, as well as to the social aspects and relevant international standards.

GHMA946  Epidemiology and Toxicology for OHS Practitioners  
Autumn  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites:  None  
Co-requisites:  None  
Subject Description: The aim of this subject is to provide the student with a sound knowledge of the principles of industrial toxicology and epidemiology and its relevance with workplace health. This will assist with their understanding of the basis of workplace exposure standards and how they can be applied in the working environment. Students will also gain experience as to how they should research the health effects of various contaminants in the workplace.

GHMA947  Occupational Hygiene in the Oil and Gas Industry  
Summer 2009/2010  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites: GHMA940, GHMA943 and GHMA946  
Co-requisites: None  
Subject Description: The aim of this subject is to provide the student with specialist information relating to workplace situations likely to arise in the oil and gas industry. Specific information will be provided as to how various situations can be identified, assessed and controlled. Topics covered include exposure assessment, role of the occupational hygienist, design and construction risks, risk communication, specific risks in upstream and downstream sites and emergency response.

GHMA948  Occupational Hygiene in the Mining Industry  
Summer 2009/2010  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites: GHMA940, GHMA943 and GHMA946  
Co-requisites: None  
Subject Description: The aim of this subject is to provide the student with specialist information relating to workplace situations likely to arise in the mining industry. Specific information will be provided as to how various situations can be identified, assessed and controlled. Topics covered include exposure assessment, role of the occupational hygienist, design and construction risks, risk communication, specific risks in mining and mineral processing sites and emergency response.

GHMA949  Occupational Hygiene Project  
Spring  Wollongong  On Campus  
Credit Points:  6  
Pre-requisites: GHMA940 and GHMA946  
Co-requisites: GHMA943  
Subject Description: For successful completion of this subject each student will be required to undertake a suitable occupational hygiene project associated with their employment and research the issue(s) identified. The project should focus on a workplace where a potential for exposure from a chemical, physical or biological contaminant may exist and provides the opportunity to collect and critically evaluate data and prepare a report. For those students who cannot undertake a project at their workplace, suitable alternate projects will be provided. Each student will have access to a mentor who will help guide them through the project.

GHMA950  Research Project in Nutrition and Dietetics  
Spring  Wollongong  On Campus  
Credit Points:  16  
Pre-requisites: GHMA932  
Co-requisites: None  
Exclusions: BND 445  
Subject Description: This research project is designed to give the Masters students an intensive period of study in the design and conduct of scientific research. The project (which may include clinical practice, public health, food service or other aspects of nutrition and dietetics) will be carried out under the close guidance of a supervisor - usually an academic in the School of Health Sciences - however field supervisors in the health system may also assist. Students will normally begin preparation for their project while undertaking GHMA932 and may need to begin preparation before the start of session to seek ethics approval.
GHMA951  Exercise Rehabilitation I: Musculoskeletal
Autumn  Wollongong  On Campus
Credit Points: 8
Pre-requisites: BMS203 and BEXS351
Co-requisites: None
Exclusions: BEXS451
Subject Description: This subject extends the study of exercise rehabilitation providing revision related to the structure and function of major joints and introduces common pathologies - mechanisms and outcomes. The subject covers information related to evaluation of the injured site and the design and management of appropriate exercise rehabilitative techniques designed to improve functional capabilities and prevent reinjury. It is essential for students undertaking this subject to have excellent knowledge in Functional Musculoskeletal Anatomy and Exercise Physiology and Prescription. Students without this requisite knowledge will have difficulty completing this subject.

GHMA952  Exercise Rehabilitation II: Cardiorespiratory & Neurological
Autumn  Wollongong  On Campus
Credit Points: 8
Pre-requisites: BMS344 and BMS346 and BEXS352
Co-requisites: None
Exclusions: BEXS452
Subject Description: This subject investigates the use of exercise as a clinical rehabilitative tool for patients with cardiovascular or neurological pathologies. The subject covers information related to evaluation of the pathology and the design and management of appropriate exercise rehabilitative techniques to improve functional capabilities and enhance quality of life.

GHMA997  Major Project
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 24
Pre-requisites: BMS312 (Greater than 65% in BMS 312) or GHMA932
Co-requisites: None
Subject Description: The subject will introduce students to specific areas of research practice in the field of nutrition and dietetics. Topics will be negotiated based on the current research activities of the metabolic research centre and its associates. A group or individual research project is designed to give students an intensive one session research experience under the guidance of an academic supervisor.

GHMB901  Infection Control Nursing
Spring  Wollongong  Flexible
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to develop or enhance the nurse knowledge of fundamental principles of infection prevention and control and their practical application. This will be achieved through the study of theory and history of infection control nursing, health care associated and community infections, development of policies and procedures, staff health and vaccine preventable disease, pharmacology, antibiotic use and resistance, antiseptics and disinfectants, cleaning, disinfection and sterilisation, health promotion and education, basic epidemiological principles, public health and outbreak management, environmental issues, related legislation and clinical governance. Observational visits to relevant facilities will be included as appropriate.

GHMB902  Effective Management in Health
Autumn  Wollongong  Flexible
Spring  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will prepare students for the diverse and complex health care environments, in which they will conduct their professional practice. Each topic is designed to increase the learners understanding and knowledge of oneself through; self awareness, reflection and self evaluation. In order to practise effectively, nurses need to be self aware, open-minded and reflective, and to have developed an understanding of esoteric concepts such as knowing oneself and being responsible for others. The course will address each of these concepts from both theoretical and pragmatic perspectives. Nurses also need to understand the nature and culture of the health care organizations, in which they will generally practice. Diverse health care delivery systems will therefore be analysed and explored. Management requires an understanding of processes, systems and relationships. The Australian health care system will be contextualized from a global perspective. Therefore the Australian health care system is compared and contrasted with other health care systems. Contemporary concepts of management, in health care organizations, are analysed, explored and discussed in terms of their unique cultures and climates.

GHMB903  Scientific and Qualitative Developments in Acute Care Nursing
Autumn  Wollongong  Flexible
Spring  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Investigates technological, biological, psychological and sociological developments that have created an impact in acute care nursing in recent times. Insights into specific technology and pharmacology used for diagnostic or therapeutic purposes by nurses and the Health team will be targeted, including their characteristics, uses and efficacies within an holistic nursing care framework.

GHMB905  Special Topic in Nursing
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This is a combined program of research and coursework leading to the completion of a minor project. Students will be expected to work closely with a supervisor on a project where a common interest exists.

University of Wollongong
GHM8905 Acute Care Nursing: Reflections on Practice

Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Focuses on relevant theories, themes and issues that have a practical bearing upon acute care nursing, and on models of acute care nursing that address evidence based practice. Practical aspects include pathophysiology of the Cardiovascular, Respiratory, Nervous and Alimentary systems and Acid Base balance; and Introduction to Electrocardiograph Interpretation.

GHM8907 Fundamental Concepts in Developmental Disability

Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Provides the basic scientific knowledge on which developmental disability practice is based. Emphasis upon the student gaining sound understanding of the nature of developmental disability within a broad social context. The body of knowledge which defines and identifies the nature of the group and the philosophical, ethical and legal foundations for practice will be addressed in this course.

GHM8908 Applied Behavioural Science for Developmental Disability Practice

Not on offer in 2009
Credit Points: 6
Pre-requisites: GHM8907 Fundamental Concepts in Developmental Disability
Co-requisites: None
Subject Description: Developmental disability practice makes extensive use of such skills and roles as assessment, programming, teaching, behaviour management and supportive counselling. To use these skills effectively, the student requires a knowledge of selected principles drawn from the behavioural sciences. This subject will provide the necessary theoretical framework, together with an emphasis on practical application and problem-solving skills.

GHM8911 Midwifery Practice 1

Autumn Wollongong On Campus
Credit Points: 4
Pre-requisites: GHM8916 (Part-time students)
Co-requisites: GHM8914, GHM8916, GHM8923 (Full-time students)
Subject Description: This subject is the first of three subjects that allows the student to acquire the necessary clinical experiences as designated by the Nurses and Midwives Board New South Wales. Midwifery Practice 1 is designed to introduce the student in the provision of care of the woman and her family throughout pregnancy, parturition and the puerperium. Special emphasis is on the well woman, pregnancy, fetus, parturition, puerperium and the neonate. Potential complications during childbearing and management of high-risk women are examined. There will be an emphasis on evidence-based practice, critical appraisal and professional issues for midwives. The practical application of different models of care is also explored. Clinical practice will consist of the experiences suggested by the Nurses and Midwives Board New South Wales. As required by the Nurses and Midwives Board New South Wales, students should complete Midwifery Practice 1, 2 & 3 in a time period not exceeding four consecutive academic semesters.

GHM8912 Midwifery Practice 2

Spring Wollongong On Campus
Credit Points: 4
Pre-requisites: GHM8911, GHM8914, GHM8916
Co-requisites: GHM8915
Subject Description: This subject is the second of three subjects that allows the student to acquire the necessary clinical experiences as designated by the Nurses and Midwives Board New South Wales. The student progresses along a continuum, developing and consolidating skills and knowledge in the provision of care of the woman and her family learnt in the first clinical rotation.

GHM8913 Midwifery Practice 3

Summer 2009/2010 Wollongong On Campus
Credit Points: 4
Pre-requisites: GHM8912, GHM8915
Co-requisites: None
Subject Description: This subject is the third of three subjects that allows the student to acquire the necessary clinical experiences as designated by the Nurses and Midwives Board New South Wales. Midwifery Practice 3 is designed for the student to continue, and finally complete, the provision of care of the woman and her family and to build on skills acquired whilst undertaking Midwifery Practice 1 & 2.

GHM8914 Midwifery Management 1

Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: GHM8916 (Part-time students)
Co-requisites: GHM8911, GHM8916, GHM8923 (Full-time students)
Subject Description: This subject is designed to be taken in conjunction with the clinical subject, GHM8911 Midwifery Practice 1. The subject provides the theoretical framework for the student to function as a safe beginning midwifery student caring for women throughout the antenatal and intrapartum period. An ability to review literature is an essential component of this subject.
Students are expected to facilitate their own learning by utilising the Library Database Workshops and the IT services available at the University. They are expected to achieve a high level of learning that is evidenced by the quality of analysis, synthesis and evaluation of evidence based research and its application to midwifery practice.

**GHMB915 Midwifery Management 2**

Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: GHMB911, GHMB914, GHMB916, GHMB923  
Co-requisites: GHMB912, GHMB917  
Subject Description: This subject is designed to be taken in conjunction with the clinical subject, GHMB912 Midwifery Practice 2. Midwifery Management 2 is designed for the student to continue to learn and understand the theoretical midwifery framework underpinning midwifery practice. This subject continues the theoretical component relating to intrapartum, maternal, postnatal and neonatal care for the well mother and healthy baby. Potential complications will then be examined. An ability to review literature remains an integral component of this subject. Students are expected to continue to facilitate their own learning by utilising the Library Database Workshops and the IT services available at the University. They are expected to demonstrate a high level of learning that is evidenced by the quality of analysis, synthesis and evaluation of evidence based research and its application to midwifery practice.

**GHMB916 Human Reproduction**

Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject is designed to provide students with advanced knowledge of anatomy and physiology related to conception, pregnancy and birth. Biochemical, nutritional, and genetic influences on conception and embryonic, fetal, neonatal development and maternal responses will be addressed. Technology used in assessment, diagnosis and intervention at all stages of the reproductive process will be explained in terms of scientific principles. The knowledge gained from this course provides midwives with an important component of a scientific knowledge base from which to plan and provide midwifery practice for their clients.

**GHMB917 Midwifery in the Social Context**

Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject will provide the student with an in-depth knowledge of theory and research, on psychological, sociological and cultural influences throughout the period of pregnancy, childbirth, and parenting. Evidenced based research, and knowledge of national guidelines and community resources are utilised to equip the student to assist the contemporary family throughout this transition to parenthood. Students are challenged to explore their own values and belief systems. They are encouraged to develop an appreciation for cultural and social diversity and differing perspectives they encounter in the clinical setting. Advocacy for women’s choices and development of the midwifery profession is also explored. The implications of the content of this subject is to reiterate the primary health care role of the midwife.

**GHMB918 Introduction to Sexual Health Nursing**

Spring Wollongong Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject aims to prepare the nurse for a role in the Sexual Health environment. The subject aims to develop the nurse’s knowledge and understanding of Population Health, Sexually Transmissible Infections, Blood Borne Viruses, Sexual History Taking and Legal and Professional issues from a nursing perspective. The subject promotes a problem-solving approach to Sexual Health nursing practice and enables students to facilitate practice development.

**GHMB919 Developing Sexual Health Nursing Practice**

Spring Wollongong Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: GHMB918  
Subject Description: This subject will enable students to develop practical skills and knowledge required in the sexual health environment, utilising theory from Introduction to Sexual Health Nursing. The subject involves clinical placements within sexual health facilities where students will be able to observe and be supervised by clinical experts in the field. This subject is intended to prepare students for a role within the specialty.

**GHMB923 Legal and Professional Issues**

Autumn Wollongong On Campus  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject is designed to provide students with a knowledge of legal and professional issues in relation to their area of clinical practice. Relevant Australian legislation, appropriate case law and examples of moral reasoning will be used to provide a framework for clinical decision-making.

**GHMB925 Effective Leadership in Health**

Autumn Wollongong Flexible  
Spring Wollongong Flexible  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject focuses on leadership that creates the climate in which people work together to achieve successful outcomes from the challenges they confront. Each topic is designed to increase the learners’ understanding and knowledge of the characteristics of effective leadership and the various organisational environments in which leaders operate. Learners will be exposed to various models of leadership and encouraged to explore their own antecedent leadership characteristics. Leadership requires an understanding of organisational culture, interpersonal relationships, processes
and systems. The Health Services environment presents unique leadership challenges which will be explored and analysed. Specifically, the subject examines five practices of leadership identified by Kouzes and Posner, namely: model the way, inspire a shared vision; challenge the process; enable others to act; and encourage the heart.

**GHMB926 Coaching Skills for Healthcare Leaders**

*Autumn Wollongong Flexible*  
*Spring Wollongong Flexible*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject focuses on concepts and skills that can be used to achieve solutions and results in the workplace and is particularly relevant for people interested in professional, practice and organisational development. It is divided into four modules: Coaching skills for healthcare leaders provides an orientation to facilitating solution-focused, person-centred, goal-oriented processes; Solution-focused, person-centred, goal-oriented processes enable participants to become even more competent in facilitating learning, change, performance and human flourishing; Motivational Change provides participants with a conceptual framework and practical strategies that can be used to facilitate change as well as strategies for assessing and enhancing motivation, and working with people’s needs and values.

**GHMB927 An Introduction to Human Anatomy and Physiology**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject is designed to give the student an understanding of the structure and functioning of the human body. As this is a course designed for non-medical health professionals the major emphasis is on physiology rather than anatomy. All the organ systems of the human body are studied and appropriate links are made with both pathophysiology and human development. The laboratory sessions form an integral part of the course, expanding on and complementing the lectures. They allow time for more in-depth study of structure and illustrate functioning through a series of carefully designed experimental procedures.

**GHMB928 Introduction to Ophthalmic Nursing**

*Spring Wollongong Flexible*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject aims to prepare the nurse for a role in Ophthalmic environments. The subject aims to develop the nurse’s in-depth knowledge and understanding of Anatomy and Physiology, Pathophysiology, Pharmacology, Disease and Disorders of the eye, Theory of Ophthalmic Nursing Practice, Health Promotion and relevant Legal and Professional Issues. The subject promotes a problem-solving approach to Ophthalmic nursing practice and enables students to facilitate practice development.

**GHMB929 Developing Ophthalmic Nursing Practice**

*Spring Wollongong Flexible*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** GHMB928

**Subject Description:** This subject will require students to gain mastery level of essential practical skills required to function as a specialist ophthalmic nurse, utilising theoretical knowledge gained in Introduction to Ophthalmic Nursing. The subject involves clinical placements within ophthalmic centres where students will be supervised and assessed by clinical experts.

**GHMB932 Principles and Practices of Psychosocial Rehabilitation**

*Autumn Wollongong Flexible*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject provides students with a contemporary framework for understanding the rehabilitation and recovery process for people with a mental illness. It provides students with a set of knowledge and skills that can be applied in a range of contexts including case management and psychosocial rehabilitation services in both government and non-government sectors located in metropolitan, rural and remote areas. The subject examines theoretical and empirical issues associated with change enhancement, needs identification, collaborative goal setting, and collaborative task setting and monitoring outcomes. The skills component focuses on an understanding of the relationship between the clinician and the consumer (working alliance) and the process of recovery from mental illness undertaken by an individual consumer.

**GHMB933 Comprehensive Systems of Mental Health Care**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject provides an overview of basic theoretical models used to explain psychiatric disorder and presents a historical overview of mental health services. It examines the impact of the National Mental Health Strategy on the development of an integrated, comprehensive mental health service. Students are provided with an understanding of each component of a community service network, including the role and function of crisis intervention services, residential services, hospital based services, and multidisciplinary mental health structures. The role of consumer and carer advocacy organisations is examined.

**GHMB934 Assessment and Diagnosis in Mental Health**

*Autumn Wollongong Flexible*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None

**Subject Description:** This subject examines the importance of various approaches and methods of assessment, including the assessment interview, the
Case Management in Mental Health

Subject Description: The subject introduces candidates to the theory and practice of case management. It presents an overview of interventions and treatment options for people presenting with acute psychiatric disorders as well as those requiring more intensive rehabilitation. Principles and strategies for crisis intervention, including pharmacological management and family and network interventions are examined in detail. The clinical approach adopted is based on cognitive behavioural principles.

Co-requisites: None
Pre-requisites: None
Credit Points: 6

Case Management in Mental Health

GHMB936 Supervised Clinical Practice

Not on offer in 2009

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Subject Description: A range of clinical placement opportunities are available within Mental Health Services. However, before enrolling in this subject students must negotiate details of their proposed placement with the course coordinator and nominated clinical supervisor. Students must develop and submit an outline of the program including a description of the nature of the clinical work, specific competencies to be developed, and how the development of competencies will be monitored and evaluated by the clinical supervisor.

Subject Description: This subject introduces candidates to the theory and practice of case management. It presents an overview of interventions and treatment options for people presenting with acute psychiatric disorders as well as those requiring more intensive rehabilitation. Principles and strategies for crisis intervention, including pharmacological management and family and network interventions are examined in detail. The clinical approach adopted is based on cognitive behavioural principles.

Co-requisites: None
Pre-requisites: None
Credit Points: 6

Context of General Practice

Subject Description: This subject will address the historical, political, economical and sociological context of general practice. This subject will also include the structure of the Australian health care system, general practice models – both national and international, government incentive schemes, determinants of workload, care coordination, collaborative work practices, professional boundaries, and patient information management.

Co-requisites: None
Pre-requisites: None
Credit Points: 6

Practice Nursing

Annual Wollongong Flexible
Spring2009/Autumn2010 Wollongong Flexible

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Subject Description: This subject will address the theoretical principles and the application of these to the clinical practice context of the practice nurse within general practice. This subject will examine evidence based practice in relation to nursing treatments and procedures, health promotion, and chronic disease self-management. This subject will also enable the student to undertake a critical analysis of their own clinical practice and develop strategies for professional development within their own practice. This critical analysis will be based upon best practice in relation to general practice nursing. Clinical competence will also be monitored in partnership with general practice and the School of Nursing, Midwifery and Indigenous Health, University of Wollongong.

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Mainland and Indigenous Health, University of Wollongong.

Credit Points: 6
Pre-requisites: None
Co-requisites: None

Subject Description: This subject provides an overview of the societal and familial structures underpinning Indigenous peoples in Australia. There is a focus on the links between family and health, the role of Indigenous women in particular, and other relevant cultural, historical and social factors.

Co-requisites: None
Pre-requisites: None
Credit Points: 6

Health and Human Ecology

Annual Wollongong Distance
Spring2009/Autumn2010 Wollongong Distance

Credit Points: 12
Pre-requisites: None
Co-requisites: None

Subject Description: This subject is designed for students to develop a proposal for a research study towards a Master Of Indigenous Health, and for non research students wishing to complete a minor project in a specific content area. The research students will be supervised by a lecturer who has expertise in research and chosen the field of study. The techniques of study will include library searches, an oral presentation of the proposal, and a written proposal. For non-research students the content will reflect the content area of the specified topic being studied under a supervisor. The techniques of study will include library, an oral presentation of the proposal, and a written minor project.

Co-requisites: None
Pre-requisites: None
Credit Points: 6

Subject Description: This subject explores and examines key factors to be considered in environment, health and planning for urban, rural and remote Indigenous communities. There is a focus on the requirements of public health policy and legislation. There is also a critical interrogation of the relationship between the environment and issues of public and community health. Issues such as research, environmental racism, health settings, access to public health facilities and population stresses will be examined in the light of their impact on allocation of health resources and service delivery.
GHMB944 Community Resource Planning
Spring Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide students with an opportunity to identify, develop and evaluate practical applications of health promotion in Indigenous communities. The subject introduces the principles and theory of health promotion within a primary health care and community development framework. Some of the principles that guide education for health and planning education sessions are also discussed.

GHMB948 Hand Management, Therapy and Rehabilitation
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to prepare the nurse to manage patients who require hand management, therapy and rehabilitation. It is anticipated that the graduates of this course will demonstrate expertise and confidence to function and engage in the management of hand injuries/trauma conditions, wound care and associated long term rehabilitation and health promotion. This subject promotes a problem-solving approach to hand nursing practice and enables students to facilitate practice development.

GHMB949 Developing Hand Nursing Practice
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: GHMB948
Subject Description: This subject will require students to gain mastery level of essential practical skills required to function as a specialist hand nurse, utilising theoretical knowledge gained in Hand Management, Therapy and Rehabilitation. The subject involves clinical placements within hand facilities where students will be supervised by clinical experts.

GHMB950 Reflective Practice 1
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This Reflective Practice subject develops (or enhances existing) personal conceptual frameworks and skills of reflectivity applicable to practice, so as to enable participants to ‘stand back’ from situations, to see the ‘whole of the moon’ rather than just ‘the crescent’. The subject promotes reflection upon theory and research which underpins practice, so as to enable participants to identify potential areas for practice development and meaningful research.

GHMB951 Reflective Practice 2
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: GHMB950
Co-requisites: None
Subject Description: This subject will build on the objectives for GHMB950 (its pre-requisite) in that it will enable students to further develop skills in writing literature reviews, as the rhetoric of literature searching and analysis. The particular focus of how these skills are utilised will be very much the domain of the student. He/she will be able to decide whether they wish to develop skills of sustaining argument(s) through an extended piece of written work; writing for publication; or, developing an evidence base for planned innovation. There will also be an opportunity for students to consider skills related to framing research questions and writing research proposals from the basis of their reflections on practice.

GHMB953 Special Topic in Nursing
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: GHMB950
Co-requisites: None
Subject Description: This subject is designed for students to develop a proposal for a research study towards a Master Of Nursing - Research, and for non-research students the content will reflect the content area of the specified topic being studied under a supervisor.

GHMB954 Studies in Alcohol and Other Drugs
Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide an understanding of the pharmacological, psychological and sociological basis of drug use and drug dependence. It examines drug and alcohol use from a historical perspective and explores the impact that so-called ‘grand theories’ of drug use has had on contemporary attitudes to substance use, on government policies and on treatment modalities.

GHMB955 Dementia Care Across Settings
Autumn Wollongong Distance
Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The following will be the focus in this subject: workshop activities to develop new clinical skills and influence attitudes about working with people with dementia and their carers; development of advanced presentation skills through the poster assessment. The subject provides the opportunities to challenge negative attitudes and understanding about how situations, not individuals with dementia, are the cause of the distress expressed.
GHMB956 Policy and Practice in the Care of Older People
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The following will be the focus in this subject: sociological, political, and social policy theory and concepts to understand ageing; academic work with a specific focus on those returning to studying after a break. This focus will provide students with opportunities to develop relevant theoretical knowledge and academic skills compliments the other two core subjects on the Gerontology and Rehabilitation Studies course.

GHMB957 Rehabilitation: Concepts and Practice
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will build incrementally on general and topic specific knowledge skills developed during subjects taken in Autumn Session. The specific focus will be: student led seminars to develop in-depth clinical knowledge and enhance presentation skills; computer and facilitation skills through web-based discussions with colleagues. This subject provides an opportunity to apply theoretical concepts of rehabilitation in partnership with users, carers, multi-disciplinary team colleagues, and the voluntary sector.

GHMB958 Advancements in Dementia Care
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is a core component of the dementia care courses and will extend the knowledge and skills developed in the GHMB955 Dementia Across Care Setting in the program. This subject provides the opportunity to apply the theoretical concepts of dementia care in practice and focuses on the partnership with individuals, carers and health professional colleagues in the delivery of care for persons experiencing dementia. The topics include: promotion of healthy lifestyles; protection of rights and interests; culturally diverse communities; younger people with dementia and rural and remote issues.

GHMB959 Facilitating Innovation and Change: Tools for Practice Development
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The subject focuses on participatory teaching practices. Students will explore concepts of engagement and collaboration, clinical puzzling, future focused approaches to practice change, practice development, clinical evaluation and the evolution of cultures of learning in clinical contexts.

GHMB989 Mental Health Nursing: Clinical Principles and Practice
Annual Wollongong Flexible
Spring2009/Autumn2010 Wollongong Flexible
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Students will combine theoretical underpinnings of mental health with a supervised clinical practice that will provide the opportunity to develop and refine clinical skills and interventions for people seriously affected by mental illness. Requirements for the clinical practice component will be based on best practice guidelines and students will utilise a reflective model to identify areas of professional development.

GHMB997 Major Project
Annual Wollongong On Campus
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: This is a combined program of research and coursework leading to the completion of a major project. Students will be expected to work closely with a supervisor on a project where a common interest exists.

GHMB998 Minor Thesis
Annual Wollongong On Campus
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: This is a major component of a combined coursework/thesis program in the Masters of Nursing undertaken by candidates enrolled in the School of Nursing, Midwifery and Indigenous Health. A thesis must be submitted and assessed according to the Course Rules for Masters’ Candidates. Thesis work is only commenced with the approval from the coordinator of the subject and the Head of the School. Students will be required to present a seminar on their chosen thesis topic prior to completion of the thesis.

GHMC914 Thesis
Annual Wollongong On Campus
Credit Points: 48
Pre-requisites: None
Co-requisites: None
Subject Description: Thesis for the Doctor of Psychology (Clinical). This subject, in conjunction with Research Project A and Research Project C, comprises the research component of the DPsych degree.

GHMC920 Psychotherapy of Personality Disorders
Autumn Wollongong On Campus
Credit Points: 4
Pre-requisites: None
Co-requisites: None
Subject Description: This subject focuses on advanced training in the treatment of personality disorders and
complex cases. Classification, aetiology, and treatment models and methods will be addressed through workshops and clinical presentations. Satisfactory completion of a 250-hour supervised practicum training with clients in personality disorders or equivalent area is required as part of this subject. The primary focus will be on conducting evidence-based practice for enhancing a client’s interpersonal effectiveness, emotion regulation, and distress tolerance. Training will emphasise developing skills to deal with therapeutic stalemates, comorbid psychopathology, self-harm behaviours, acute crises, and building effective therapy teams.

**GHMC921 Clinical Supervision and Practice**

*Spring - Wollongong On Campus*

**Credit Points:** 4  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject focuses on knowledge and skills required of an advanced professional. The clinical supervision component will cover theories and models of clinical supervision, and the rationale, procedures, and best-practice guidelines regarding formulating supervision plans, conducting supervision, assessing supervisee performance and evaluating supervision programs. In addition to didactic teaching, skills training methods (e.g., role-play, videotapes) will be used. This subject will also include a 250-hour clinical practicum within an advanced professional or clinical supervision area.

**GHMC931 Clinical Neuropsychology**

*Spring - Wollongong On Campus*

**Credit Points:** 4  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject aims to introduce students to neuroanatomy and theories of neuropsychological assessment and approaches to rehabilitation. The subject will deal with basic brain anatomy; principles of neuropsychological assessment; administration and interpretation of neuropsychological tests; neuropsychological report writing; neuropsychological disorders.

**GHMC943 Practicum 2A**

*Summer 2008/Autumn 2009 - Wollongong On Campus*  
*Spring - Wollongong On Campus*

**Credit Points:** 4  
**Pre-requisites:** GHMC938 Practicum 1A  
**Co-requisites:** None  
**Subject Description:** The practicum is composed of 300 hours of case-work from the Northfields Clinic and/or external agencies providing psychological services. The student might be required to attend group and individual supervision sessions as well as have assessment/therapy sessions taped for discussion and feedback. The placement may occur with agencies providing either child or adult services, however when considered together with GHMC942 and GHMC944, exposure to a wide range of clinical/applied contexts (specified elsewhere) will be required.

**GHMC944 Practicum 2B**

*Summer 2008/Autumn 2009 - Wollongong On Campus*  
*Annual - Wollongong On Campus*  
*Autumn - Wollongong On Campus*  
*Spring - Wollongong On Campus*

**Credit Points:** 4  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** The practicum is composed of 250 hours of case-work from Northfields Clinic and/or external agencies. The student might be required to attend group and individual supervision sessions as well as have assessment/therapy sessions taped for discussion and feedback. The placement may occur with agencies providing either child or adult services, however when considered together with GHMC938, and GHMC943, exposure to a wide range of clinical/applied contexts will be required.

**GHMC946 Research Project A**

*Not on offer in 2009*

**Credit Points:** 8  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Research Project A aims to equip students with a wide variety of research skills required for professional psychology. The content will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review. Students completing the MPsych program will also complete Research Project B and a project report in the format of a journal article.

**GHMC947 Research Project B**

*Not on offer in 2009*

**Credit Points:** 16  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Research Project B in combination with Research Project A, aims to equip MPsy (Clinical) students with a wide variety of research skills required for professional psychology. The context will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review and a project report in the form of a journal article.

**GHMC951 Child and Adult Assessment and Psychopathology**

*Autumn - Wollongong On Campus*

**Credit Points:** 8  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This course focuses on equipping...
clinical psychology students with theoretical knowledge and practical skills relevant to the assessment and formulation of mental disorders in adults and children. This is achieved through a combination of lectures, workshop activities, independent study, and 50 hours of supervised practical training at Northfields Clinic. The clinical-theoretical part of the course will describe models of human cognitive processes such as memory and higher intellectual functioning and the ways in which these functions may become disturbed in people with mental disorders. The assessment and diagnosis components of the course will cover the main diagnostic classification systems and psychometric assessment methods relevant to understanding adults and children with psychiatric disorders characterised primarily by depression and anxiety.

**GHMC952 Principles of Psychotherapy**

Subject Description: This subject provides students with a set of research-based interventions, strategies and skills for conducting psychological therapy for children and adults. The subject examines the microskills of interviewing, goal setting, problem solving, monitoring and reviewing, relationship enhancement, and selection of appropriate interventions depending on client need. Satisfaction completion of 100 hours of practical training with clients is required. Training methods include video feedback and direct observation of clinical skills. The subject provides the principles of empirically-based psychotherapy with children and adults in individual, family and group therapy formats.

**GHMC953 Neuropsychology & Neuropsychiatric Disorders**

Subject Description: This subject will equip students with knowledge of the theoretical and practical issues that impinge on the assessment of children and adults who present with disorders, stemming from primary neurological pathology. This will be achieved through a combination of lectures, workshop activities, independent study, and 150 hours of supervised practical training at Northfields Clinic. The subject content related to clinical neuropsychological assessment will include: the main diagnostic and classificatory systems; principles of psychometric assessment; the selection, administration and interpretation of specific tests; and the development of clinical formulations that can be used to guide treatment. Topics relating to psychopathological theory will include basic neuroanatomy and neuropathology and theoretical and clinical models of psychotic and behavioural disorders in children and adults.

**GHMC954 Cognitive Behavioural Therapies**

Subject Description: The subject aims to provide students with knowledge of the principles, procedures, applications, and research associated with psychotherapy for children and adults for a wide range of psychological disorders. Students will also obtain practical skills training in the conduct of therapy. The focus will be on cognitive behavioural therapies. Apart from lectures, training methods will include demonstration of therapy, role-play sessions, use of videotapes, and a minimum of 100 hours of clinical practice within the Northfields Clinic or other equivalent agency.

**GHMC955 Health and Wellbeing**

Subject Description: This subject examines health psychology, behavioural medicine, psychopharmacology and rehabilitation models of intervention. Stress and coping are examined within individuals, groups and populations. Current evidence-based practice of psychopharmacology is also considered. Satisfactory completion of 300 hours of practical training with clients is required as part of this subject. Focus will be on applications where a clinical psychologist in practice may be active, including treating substance dependence, chronic pain, cancer, cardiovascular disease, HIV/AIDS, chronic and terminal illnesses, implementing behavioural interventions for physical activity and dietary change, positive psychology techniques and lifeskills coaching.

**GHMC956 Special Groups and Methods**

Subject Description: While many of the skills obtained in clinical training are ubiquitous, students need to consider the unique needs and considerations of special needs groups and take this into account in their psychological practice. This subject introduces the student to the application of psychological principles to special needs groups and in special situations. In particular, the subject will address needs as they relate to working with people with developmental disabilities, working in forensic environments and relevant sociocultural considerations. Additional ethical and professional issues that pertain to these groups and situations will be addressed. Successful completion of this subject will also include 300 practicum hours in a relevant clinical placement, supported by appropriate clinical supervision.

**GHMC978 Child and Adolescent Psychology**

Subject Description: This subject focuses on a range of childhood and adolescent concerns or problem behaviours within a broad developmental framework. The subject will provide students with a general introduction to the specific problems and needs of children and parents who present to psychologists in clinical practice. Individual and family based assessment and intervention approaches will be examined for problems such as...
mental retardation, conduct disorders, attention deficit hyperactive disorders, learning problems, anxiety and depressive disorders, and early onset psychosis.

**GHMC979 Major Research Project**
- **Annual** Wollongong Flexible
- **Credit Points:** 18
- **Pre-requisites:** None
- **Subject Description:** Students complete an empirical study on a research topic chosen from given areas of staff expertise. Projects may be conducted in small groups, however, write-ups will be completed and assessed individually. Weekly research seminars consist of discussion of the research process, selecting a topic, and enhancing writing and oral presentation skills.

**GHMC981 Research Project C**
- **Spring** Wollongong On Campus
- **Credit Points:** 16
- **Pre-requisites:** GHMC946 Research Project A
- **Co-requisites:** None
- **Subject Description:** Research Project C in combination with Research Project A, aims to equip students with a wide variety of research skills required for professional psychology. The subject covers ethical issues in research, the importance of conceptual and theoretical foundations in research, how to critically evaluate research, establishing aims, sampling, design, methods of data collection, principles and procedures governing selection and implementation of data analyses. Students will receive assistance in data entry, screening, and analysis using SPSS. Students will learn the stylistic requirements of scientific writing for research publication. Research Project A, C and the Major Thesis comprise the research component of the Doctor of Psychology (Clinical) degree.

**GHMC982 Research Project D**
- Not on offer in 2009
- **Credit Points:** 24
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject focuses on advancement of research skills particularly within the areas of data analyses and thesis writing. The candidate will be required to attend regular sessions with the research supervisor. In certain cases, attendance at specified research lectures, seminars and other workshops might be required. The project culminates in the submission of a research thesis.

**GHMC983 Research Project E**
- Not on offer in 2009
- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject focuses on research skills applicable for practising professionals, including setting up systems for data collection and management in agencies, analyses of clinical data, and reporting of results. If data collection is involved, this will be a minor component. In certain cases, attendance at specified research seminars and workshops might be required. The project will culminate in a) a research proposal describing research aims, procedures for collection, management and analyses of routinely collected data, or b) analyses of archival data and preparation of a manuscript for submission to a scientific journal. Occasionally the report may also take the form of a comprehensive review of literature on a clinical topic.

**GHMC984 Social Psychology and Health**
- **Autumn** Wollongong Flexible
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** This subject addresses key theoretical and empirical issues in the area of Social Psychology and explains their implications for health behaviours. The focus is on the joint effects of internal and external processes in the causation and maintenance of human behaviours. Emphasis is placed on elaborating social psychological models of health behaviours, the roles of attitudes, values and beliefs in shaping different behaviours and the effects of conformity, compliance and life events on behaviour. A range of psychological and health principles will be examined within the context of formulating treatment and evaluation proposals or prevention programs designed to change social behaviours in relation to health issues, such as stress and coping strategies, drug and alcohol abuse, sexual behaviours, exercise and nutrition, and aged care. The applicability of major research findings across cultures will also be addressed.

**GHMC985 Principles and Practices of Psychological Assessment**
- **Autumn** Wollongong Flexible
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** The aim of this subject is to examine the principles underpinning psychological assessment and introduce students to the practices of psychological assessment. The subject is designed to integrate learning in previous years including theories of personality, intelligence combined with statistical theory and then examine how these issues are used in practice. Criteria to understand and evaluate psychological tests will be used as a common theme throughout the subject, including examination of their construct validity. The general ethical issues of psychological assessment will be compared to the specific Australian Psychological Society guidelines for psychological assessment. After examination of the theoretical principles, students will have the opportunity to administer, score and interpret commonly used assessment tools used to assess general intelligence, emotional intelligence, personality and vocational preference and psychological well-being.
**Subject Description:** The first part of this subject draws together key issues in ethics, research and professional practices in psychology. Ethics theory will be addressed and ethical and legal issues will be explored in research, therapeutic and professional settings. The second part deals with contemporary issues in experimental psychology including, for instance, memory, reading disorders, emotional intelligence, etc.

**GHMC989 Advanced Abnormal Psychology**

- **Spring:** Wollongong  Flexible
- **Spring:** Wollongong  On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject builds upon previous study in core areas of abnormal psychology, with contributions from personality, learning, and developmental psychology to consider the ways theories of human behaviour help our understanding of psychopathology. Students will be expected to develop a critical and analytical understanding of the conceptual frameworks and assumptions of a number of major schools of abnormal psychology. The etiology and maintenance of clinical disorders will be examined from a variety of theoretical and research perspectives.

**GHMC990 Advanced Clinical Issues A**

- **Spring:** Wollongong  On Campus
- **Credit Points:** 4
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject refers to an in-depth coverage of any specific topic of assessment or therapy determined by the Clinical Programs Director to be of relevance for the student’s unique set of circumstances. The topic can relate to a specific disorder or a specific assessment or therapeutic intervention. Coverage will include an intensive review of current literature including current controversies, a critical evaluation of theoretical bases and practical applications. Teaching and assessment methods will depend on the topic chosen.

**GHMC991 Advanced Practicum A**

- **Summer 2008/Autumn 2009:** Wollongong  On Campus
- **Credit Points:** 4
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** The practicum is composed of at least 200 hours of supervised casework from the Northfields Clinic or other specified agencies that provide psychological services. Casework will include assessment and treatment of difficult psychological problems. The student will be required to attend group and individual supervision sessions.

**GHMC993 Advanced Training in Personality Disorders A**

- **Autumn:** Wollongong  On Campus
- **Credit Points:** 4
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject focuses on advanced training in the treatment of personality disorders. Classification, etiology, clinical features, and treatment models and methods will be addressed through workshops, clinical presentations, supervision and 20 hours of practicum placement. Part A of this series will focus on the basics of working with people with personality disorders, with emphasis on team approach, setting goals, problem solving, and strategies for dealing with crises. The clinical emphasis will be on conducting a skills based approach for enhancing a client’s interpersonal effectiveness, emotion regulation, and distress tolerance based on principles of Dialectical Behaviour Therapy.

**GHMC994 Advanced Training in Personality Disorders B**

- **Autumn:** Wollongong  On Campus
- **Credit Points:** 4
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject focuses on advanced training in the treatment of personality disorders (PD). Clinical features and treatment models and methods will be addressed through workshops, clinical presentations, supervision and 30 hours of practicum placement. Part B of this series will focus on advanced techniques for dealing with more complex difficulties that can arise within treatment. Emphasis will be on developing skills to deal with therapeutic stalemates, comorbid psychopathology, self-harm behaviours, hospitalisations, adolescent clients and termination issues. Consideration will be given to dealing with therapist responses to working with people with PD and building effective supervision and case management teams.

**GHMC995 Advanced Training - Clinical Supervision A**

- **Spring:** Wollongong  On Campus
- **Credit Points:** 4
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject covers theories and models of clinical supervision, discusses rationale and procedures for setting up programs for clinical supervision, and analyses theoretical and practical issues surrounding the various components including objectives, methods, assessment and evaluation of clinical supervision. Ethical issues and common difficulties arising within supervision are also addressed. The trainee will be required to record videos of therapy sessions, provide supervisory comments on taped therapy sessions, and formulate supervision plans for psychologists in training. In addition to lectures and seminars, skills training methods including demonstration, video tapes and role play are used.
GHMC996  Advanced Training - Clinical Supervision B
Spring  Wollongong  On Campus
Credit Points: 4
Pre-requisites: None
Co-requisites: None
Subject Description: This subject focuses on the supervised practice of clinical supervision. The student will be required to formulate supervision plans and supervise trainee psychologists, so an investment of 40-60 hours in supervision work should be expected. The trainee supervisor will also receive supervision during this period. The subject will also cover a critical analysis of theoretical and practical issues surrounding the various components, including objectives, methods, assessment and evaluation of clinical supervision. In addition to lectures and seminars, skills training methods including demonstration, video tape feedback, and role play are used.

GHMD903  Public Health Communication and Data Skills
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Students who have already demonstrated acquisition of these communication and data skills.
Subject Description: This subject introduces students to those communication and data skills which are considered essential for public health practice and which underpin other subjects in the MPH. These include the ability to effectively find and critically analyse public health data and to communicate public health knowledge in a variety of formats. The subject is designed in three parts to develop the students' literacy skills in concurrence with the literacy demands of other subjects: Part 1, Introduction to critical analysis; Part 2, Accessing and evaluating information; and Part 3, Structuring arguments and communicating information.

GHMD904  Epidemiology
Spring  Wollongong  Distance
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: GHMD903 - Statistics in Health Research. Students who have already completed GHMD983 should apply for a waiver of the co-requisite.
Exclusions: Not to count for credit with POP204
Subject Description: This subject addresses principles and methods of epidemiological investigation including analytic and experimental epidemiology. Topics to be covered are: measurement in epidemiology; screening, design of ecological studies, surveys, case control and cohort studies, clinical trial design, analysis of studies, critical appraisal of the literature, biological inference and causality. These methodological issues will be applied to a wide range of content areas such as occupation, cancer, health services and infectious diseases.

GHMD905  Social Foundations of Public Health
Autumn  Wollongong  Distance
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Introduces students to theories and concepts from the social sciences necessary for the understanding and analysis of public health issues. Examines socio-economic and environmental influences on health, and health inequalities. Explores development, gender, citizenship, culture and human rights. Critiques the concepts of community and social capital.

GHMD906  Quality Management for Health Services
Autumn  Wollongong  Distance
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Develops knowledge and skills in the application of contemporary quality management theories and concepts. Examines the forces driving change in the organisation and management of health care organisations and the implications for health care managers. Traditional approaches are contrasted with contemporary approaches. Quality management is considered an essential component of good management practice.

GHMD907  Independent Study in Public Health
Autumn  Wollongong  On Campus
Spring  Wollongong  Distance
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The aim of this subject is to provide students with the opportunity to explore an issue or problem of particular interest to public health with the assistance of a supervisor. All students will critically analyse the relevant literature and then either write a journal article or, for those undertaking research degrees, a research proposal. In some cases other formats, such as a report to a health organisation or community group, will be allowed for the final assignment with the permission of the supervisor.

GHMD908  Health Services Planning and Evaluation
Spring  Wollongong  Distance
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject covers the theory and practice of health planning. Topics include: Health needs assessment, planning approaches, strategy analysis and formulation, setting goals and objectives,
performance measurement and evaluation. Students will develop skills in service planning for population/public health programs and institutional services.

**GHMD909  Comparative Health Systems: Policies and Politics**

**Subject Description:** This subject examines how ideologies and political processes influence health policy development and health service delivery. The impact of broad socio-economic forces on health status and health policy development are emphasised. The subject is designed to assist individuals to develop analytical and strategic skills.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**GHMD912  Health Promotion**

**Subject Description:** This subject introduces students to the concept of health promotion and how it has been applied in particular settings - health services, worksites, schools and communities. Theoretical perspectives of behaviour change and public policy, as they are applied within the field of health promotion, will be critically reviewed.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** Not to count for credit with POP202

**GHMD913  Alcohol and other drug studies**

**Subject Description:** This subject will provide an understanding of the pharmacological, psychological and sociological basis of alcohol and other drug (AOD) use and dependence. It will focus on government, intersectoral and community approaches to inform, minimise and treat the harm caused by the use of alcohol and other drugs. Contemporary issues, perspectives and approaches, which impact on both national and global policies, will be explored.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**GHMD924  Health Information Systems**

**Subject Description:** This subject will introduce information systems in health and health informatics to students. Topics will include: clinical systems development, systems management, electronic health record, clinical decision support, classification and coding, privacy and confidentiality and IT risk assessment. Current and future computer applications in health (e.g. PAS, order management, tele health) will be discussed.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** Not on offer in 2009

**GHMD925  Aboriginal Health Issues**

**Subject Description:** This subject will introduce the student to the food and nutrition system in Australia. Key areas of public health nutrition discussed

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** Not to count for credit with POP325

**Subject Description:** Examines the health status of Aboriginal Australians from a historical perspective, using relevant insights from the experiences of other indigenous populations. Explores the causes of Aboriginal health problems, the political and economic context of health, the role of culture, and access to health services. Critiques current strategies to improve health.

**GHMD928  Introduction to Infectious Disease - HIV/AIDS & Hepatitis**

**Credit Points:** 6

**Pre-requisites:** Enrolment in Graduate Certificate in HIV/AIDS or graduate Public Health programs. Experience in health care sector. Demonstrated interest in HIV/HepC.

**Co-requisites:** None

**Subject Description:** The subject provides an overview of two key infectious diseases - HIV/AIDS and Hepatitis. The materials cover three common issues of pathophysiology and epidemiology of disease, prevention of transmission and service provision. Students undertake study within 2 short courses provided by the Albion Street Clinic, together with set assessment tasks. Module A: Introduction to HIV/AIDS provides an overview of current HIV/AIDS information for health professionals working in a clinical setting. Module B: Hepatitis for Health Care Workers provides an overview of current information on hepatitis A, hepatitis B and hepatitis C (HAV, HBV and HCV).

**GHMD930  Mass Media and Population Health**

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** This unit examines the effects of media on health and social behaviour. Students will develop skills in media analysis, the development of evaluation tools to cover the (hopefully) positive impact of public health campaigns. The subject covers commercial and social advertising, program and editorial content, media advocacy, and social marketing; and presents case studies of current media coverage and advertising campaigns to demonstrate the effects of media on health and social behaviour. Students will develop skills in media analysis, the development of communication campaigns, and dealing with the media.

**GHMD936  Public Health Nutrition**

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** Not to count for credit with GHMA930 or BMS310 or SFC902

**Subject Description:** This subject will introduce the student to the food and nutrition system in Australia. Key areas of public health nutrition discussed.
include food and nutrition surveillance, food policy, programme planning and nutrition promotion. Subject involves on-line student discussions.

**GHMD981 Reproductive Health Care in developing countries**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Students will examine social, cultural and behavioural factors that impact on women and children in developing countries. They will assess evidence based practices that prevent and address conditions leading to Maternal and Neonatal mortality and morbidity including sexual health. Epidemiology of and prevention of sexually transmitted illness (STI) including HIV/AIDS in women and children and issues related to mother to child HIV transmission will be discussed. Integrating of service provision for Reproductive Health programs in resource poor settings will be covered.

**GHMD983 Statistics in Health Research**

*Spring Wollongong On Campus*  
*Spring Wollongong Distance*  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** Introduces basic statistical concepts and methods. Topics covered: collecting data, designing statistical studies, principles of data presentation; exploratory data analysis, probability and statistical models emphasizing binomial and normal distributions; categorical data, contingency tables and the Chi-squared distribution; sampling, sample means and the central limit theorem; inference - point estimation, confidence intervals, testing hypotheses; inference about single parameters; comparing means and proportions, analysis of variance, demography.

**GHMD984 Health Research Methodology**

*Spring Wollongong Distance*  
*Spring Wollongong On Campus*  
**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** GHMD983 Statistics in Health Research, or GHMB950 Reflective Practice, or equivalent.  
**Studens who have already completed GHMD983 or GHMB950 should apply for a waiver of the co-requisite.**  
**Subject Description:** This subject introduces students to health research methodology. Topics include formulating a research question, conducting a literature review and writing a research proposal. Students will acquire skills in interviewing, survey design, and appropriate methods of qualitative and quantitative analysis. Ethical issues such as informed consent and confidentiality will be addressed.

**GHMD985 Public Health Investigation**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** GHMD904 Epidemiology  
**Co-requisites:** None  
**Subject Description:** The subject consists of a self directed computer based case study to be conducted in teams of 2 students. The case study concerns an environmental contamination and the methods to investigate the situation and its health effects. The students are placed in the situation of a public health official with a limited financial budget and many options for research. Primary investigation, risk evaluation, potential study designs and actual study analysis will be covered. Presenting the results to a critical audience will be simulated in class presentations.

**GHMD986 Environmental Health**

*Not on offer in 2009*

**Credit Points:** 6  
**Pre-requisites:** None  
**Co-requisites:** None  
**Subject Description:** This subject covers various case studies in environmental health such as air pollution, soil contamination, climate change, water availability and contamination, waste problems and urbanisation. The lectures present the theories and internationally relevant cases. The students will present their own case studies in class and critique another in writing.

**GHMD985 Minor Project**

*Autumn Wollongong On Campus*  
*Spring Wollongong On Campus*  
**Credit Points:** 12  
**Pre-requisites:** 24 cp at graduate level  
**Co-requisites:** None  
**Subject Description:** The aim of this subject is to allow students to conduct a small public health research project under supervision. The type of project will be decided in conjunction with the project supervisor; options include an empirical study, a critical review of existing materials such as a meta-analysis, an evaluation of a service or program, or the development and testing of an educational program. All students will write a brief project proposal, and either a final report, or a journal article and separate literature review. In some cases other formats, such as a report to a health organisation or community group, may be substituted for the journal article with the permission of the supervisor. Approval from the University Human Research Ethics Committee will be required if the project involves human participants.

**GHMD987 Major Project**

*Annual Wollongong On Campus*  
*Autumn Wollongong On Campus*  
*Spring Wollongong On Campus*  
**Credit Points:** 24  
**Pre-requisites:** GHMD984 Health Research Methodology  
**Co-requisites:** None  
**Subject Description:** The aim of this subject is to allow students to design and conduct a small public health research project under supervision. The type of project will be decided in conjunction with the project supervisor; options include an empirical study, a critical review of existing materials such as a meta-analysis, an evaluation of a service or program, or the development and testing of an educational program. All students will write a project proposal, critically analyse the relevant literature, and write a final report or other assessments. Students will also present their work to a School of Health Sciences seminar. Approval from the University Human Research Ethics Committee will be required if the project involves human participants.
**PSYC966 Professional Practice Group Supervision A**

*Not on offer in 2009*

**Credit Points:** 8

**Pre-requisites:** 4 year degree in Psychology

**Co-requisites:** None

**Subject Description:** This subject will assist students to fulfil NSW Psychologists Registration Board requirements for Supervision. It consists of meetings of up to 5 students and a clinical supervisor to discuss applications of psychological skills to practice. While this subject is independent from GHMC967 (Professional Practice Workshops A), students enrolled in both subjects will have an opportunity to use the group supervision to further develop skills learned in workshops.

**PSYC967 Professional Practice Workshop A**

*Not on offer in 2009*

**Credit Points:** 8

**Pre-requisites:** 4th year in Psychology

**Co-requisites:** None

**Subject Description:** This subject will assist students to fulfil NSW Psychologists Registration Board requirements for Approved Workshops and Seminars. It consists of 8 workshops on four board required certificate subjects: Introduction to Psychological Practice; Ethical, Legal and Professional Matters; Psychological Testing; and Interviewing, Counselling and Consulting. Workshops will be delivered by specialist professionals and/or academics with specific skills and knowledge in the identified areas, will be skills based and will be delivered in block workshop formats. While this subject is independent from PSYC966 (Professional Practice Group Supervision A), students enrolled in both subjects will have an opportunity to use the group supervision to further develop workshop skills.

**PSYC968 Professional Practice Group Supervision B**

**Annual Wollongong On Campus**

**Credit Points:** 8

**Pre-requisites:** 4 year degree in Psychology

**Co-requisites:** None

**Subject Description:** This subject will assist students to fulfil NSW Psychologists Registration Board requirements for Supervision. It consists of weekly meetings of up to 5 students and a clinical supervisor to discuss applications of psychological skills to practice. While this subject is independent from GHMC969 (Professional Practice Workshops B), students enrolled in both subjects will have an opportunity to use the group supervision to further develop skills learned in workshops. This subject will build on the skills and experiences of Professional Practice Group Supervision A.

**PSYC969 Professional Practice Workshop B**

**Annual Wollongong On Campus**

**Credit Points:** 8

**Pre-requisites:** 4 year degree in Psychology

**Co-requisites:** None

**Subject Description:** This subject will assist students to fulfil NSW Psychologists Registration Board requirements for Approved Workshops and Seminars. It consists of 8 workshops on four board required certificate subjects: Intervention Strategies; Record Keeping; Development and Maintenance of Psychological Skills; and Data Collection and Evaluation. Workshops will be delivered by specialist professionals and/or academics with specific skills and knowledge in the identified areas, will be skills based and will be delivered in block workshop formats. While this subject is independent from GHMC968 (Professional Practice Group Supervision B), students enrolled in both subjects will have an opportunity to use the group supervision to further develop workshop skills.

**PSYP901 Research Project A Part 1**

**Autumn Wollongong On Campus**

**Credit Points:** 8

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Research Project A aims to equip students with a wide variety of research skills required for professional psychology. The content will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review. Students completing the MPsych program will also complete Research Project B and a project report in the format of a journal article.

**PSYP902 Research Project A Part 2**

**Annual Wollongong On Campus**

**Spring Wollongong On Campus**

**Spring2009/Autumn2010 Wollongong On Campus**

**Credit Points:** 8

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Research Project A aims to equip students with a wide variety of research skills required for professional psychology. The content will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review. Students completing the MPsych program will also complete Research Project B and a project report in the format of a journal article.

**PSYP903 Research Project B Part 1**

**Autumn Wollongong On Campus**

**Credit Points:** 16

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Research Project B in combination with Research Project A, aims to equip MPsych (Clinical) students with a wide variety of research skills required for professional psychology. The context will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review. Students completing the MPsych program will also complete Research Project B and a project report in the format of a journal article.
Critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review and a project report in the form of a journal article.

**PSYP904 Research Project B Part 2**

Annual Wollongong On Campus
Spring Wollongong On Campus
Spring2009/Autumn2010 Wollongong On Campus

Credit Points: 16
Pre-requisites: None
Co-requisites: None

**Subject Description:** Research Project B in combination with Research Project A, aims to equip MPsych (Clinical) students with a wide variety of research skills required for professional psychology. The context will begin by covering the conceptual bases, aims, context, sampling, designs, methods of data collection, followed by discussion of principles and procedures governing selection and implementation of data analyses. Ethical issues in conducting research are reviewed. Students will develop skills to evaluate research critically and interpret data. Students will develop and conduct a research project in a relevant area of professional psychology and submit a comprehensive literature review and a project report in the form of a journal article.

**SFC 901 Contemporary Issues in Food and Nutrition**

Spring Wollongong On Campus

Credit Points: 6
Pre-requisites: As per course entry requirements
Co-requisites: As per course entry requirements

**Subject Description:** This subject introduces students to ideas on the causes, nature, and effect of a number of current food and nutrition issues. This includes but will be not limited to, the alteration of nutrient composition in the development of foods to meet specific needs and the food regulatory environment including consideration of labelling requirements that must be addressed. Examples will be drawn from Australia and overseas. Students will critically discuss the role of influential factors, including interaction of biological, lifestyle and sociocultural aspects of human behaviour; changes in the nature of the food system; role of government and professional groups; and consumer interests.

**SFC 902 Food Regulation and Policy in Australia**

Autumn Wollongong On Campus

Credit Points: 6
Pre-requisites: As per course entry requirements
Co-requisites: As per course entry requirements

**Subject Description:** This subject describes and analyses aspects of the Australian food regulatory system and its relationship with the production and promotion of foods. Issues are discussed within 3 modules: food regulatory system and the legal framework; food policy: development, organisational structures and analysis; and food and nutrition system - examples of food regulation and policy issues.

**SFC 903 Nutrition Research**

Autumn Wollongong On Campus

Credit Points: 6

Pre-requisites: STAT151 or Equivalent.
Entry is competitive, a quota may apply.
Co-requisites: None

**Subject Description:** The subject provides an overview of the processes in nutrition research, including literature reviews, key methodologies and the development of research proposals. Each of these learning domains are linked to case studies of substantive research undertaken through the Smart Foods Centre. In this way the relevance of research to industry is displayed and students are exposed to research principles in the context of opportunities for collaborative research in a range of disciplines associated with the Smart Foods Centre network.

Overview

Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original contribution to the body of knowledge in a chosen field of study. This qualification can lead to, or enhance, an academic career and is also highly regarded by public and private sector employers.

Entry Requirements / Assumed Knowledge

A four-year Honours Bachelor degree in Computer Science (a minimum of Class II, Division 2 or higher), or Master of Computer Science – Research degree with strong performance in the 48 credit point thesis, or equivalent.

Course Requirements

This program is 100% by thesis. Candidates enrol in a 48 credit point thesis subject and repeat the same enrolment for each year of study, usually over three years of full-time study. Students may be required to attend lectures in relevant topics from time to time throughout the program.

Current Research Areas

Security

Computer and Communication Security
Cryptography Theory and Combinatorial Design
Information Theory and Coding
Network Security
Multimedia Security

Software Engineering

Software Testing
Requirements Engineering
Business Process Management
Service-oriented Systems
Agent-oriented Software Engineering

Multimedia Information Processing

Image/Video Processing
Human Activity Detection and Recognition
Image/Video Annotation and Retrieval
Multimodal Biometrics and Crypto-biometrics
Multimedia Security and Forensics
Virtual Reality

Intelligent Systems

Robotics
Machine Learning
Machine Vision
Ultrasonic Sensing
Safety, Risk and Hazard Analysis
Distributed Systems
Overview
This program is designed to equip students with superior skills in research design and methodology in preparation for leadership roles in the field of computer science.

Entry Requirements / Assumed Knowledge
This is primarily a research degree for those who have completed an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or a Masters by coursework in an appropriate discipline, which includes a minor project worth at least 12 credit points or equivalent.

If a candidate has a good academic record, and has completed a project worth at least 12 credit points or equivalent, entry from a Pass Bachelor degree, Pass Bachelor degree and Graduate Diploma, or Pass Bachelor Degree and Graduate Certificate, is possible.

Advanced Standing
Candidates with an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or Masters by coursework degree, may be given exemption from all, or some, of the 24 credit points of coursework and admitted directly to the 48 credit point research thesis component. This is contingent on evidence of proven research experience.

Course Requirements
The degree is normally 72 credit points, consisting of a 48 credit point research thesis and 24 credit points of coursework. The program must be completed in a maximum time of two years full-time and requires satisfactory completion of the following:

1. CSCI940 Research Methodology (6cp)
2. Three subjects (18cp) from the CSCI Graduate Subjects List to constitute a coherent introduction to the proposed area of research, as agreed to by Head of School. (Note: students must achieve at least a WAM of 67.5% in the coursework component); and
3. 48 credit point thesis.

Candidates who fail to meet the requisite standard for the coursework component may have their enrolment cancelled. In this case, a candidate may be eligible to apply for one of the graduate certificates offered by the Faculty or transfer to a 48 credit point Masters by coursework degree.

A candidate may not include for this degree subjects similar in content to subjects included in their Honours or Masters. Each candidate shall have a supervisor and a co-supervisor appointed on the recommendation of the Head of the School of Computer Science and Software Engineering.

Current Research Areas
Refer to Current Research Areas under the Doctor of Philosophy entry.
**Master of Computer Science Advanced**

**Testamur Title of Degree:** Master of Computer Science Advanced  
**Abbreviation:** MCompScAdv  
**Home Faculty:** Informatics  
**Duration:** 1.5-2 years (3-4 full-time sessions) or part-time equivalent  
**Total Credit Points:** 72  
**Delivery Mode:** Face-to-face  
**Starting Session(s):** Autumn/Spring  
**Location:** Wollongong  
**UOW Course Code:** 1562  
**CRICOS Code:** 056216K

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

**Overview**

This degree is designed to provide advanced studies in Computer Science at a professional level and also prepare students for the Master of Computer Science – Research or Doctoral research programs. Candidates may choose to complete either a single or a double major in a sub-discipline such as Multimedia Information Processing, Software Engineering, Computer and Network Security or Intelligent Systems.

**Entry Requirements / Assumed Knowledge**

A degree equivalent to a three-year Australian Bachelor degree with a major in Computer Science, Software Engineering or Computer Engineering, with at least a 60% average. Knowledge of C++ and UNIX is assumed.

**Course Requirements**

The degree requires satisfactory completion of 900 level subjects to the value of at least 72 credit points, including:

(a) At least three (3) subjects (18 cp) chosen from a major subject list;
(b) At least three (3) subjects (18 cp) chosen from another major subject list;
(c) satisfactory completion of CSCI940 Research Methodology (6 cp) and CSCI991 Project (12 cp)
(d) Plus an additional three (3) subjects (18cp) from the CSCI Graduate Subject List

Note:

i) a maximum of two (2) subjects (12 cp) may be at 900-level from the following subject prefixes ISIT, MATH, STAT, ECTE or TBS. These subject prefixes may be substituted for subjects in the CSCI Graduate Subject List in rule (d) above. (Note that quotas may apply to TBS subjects offered at the Sydney Business School.) These subjects must be approved by the Head of School prior to commencing the subject/s.

ii) Any other 900-level subjects must be approved by the Head of School prior to commencing the subject.

**Areas of Major Study**

Candidates enrolled in this degree may choose to major in:

- Computer and Network Security
- Intelligent Systems
- Multimedia Information Processing
- Software Engineering

Students may combine any of the above majors as a double major. A major in ICT Management (ICTM) is also available as a second major combined with one of the above majors.

**ICT Management**

The ICT Management major can only be taken as a second major in conjunction with Multimedia Information Processing or Software Engineering or Computer and Network Security or Intelligent Systems.

Candidates wishing to complete this major must complete 18cp from majors listed above, and 18cp from ICT major subject list. Completion of these subjects will satisfy course rule a) and b) above.

To complete a major in ICT Management, students must complete 18cp from the list of subjects below:

**Overview**

This degree is designed to provide advanced studies in Computer Science at a professional level and also prepare students for the Master of Computer Science – Research or Doctoral research programs. Candidates may choose to complete a single major in a sub-discipline such as Multimedia Information Processing, Software Engineering, Computer and Network Security or Intelligent Systems.

**Entry Requirements / Assumed Knowledge**

A degree equivalent to a three-year Australian Bachelor degree with a major in Computer Science, Software Engineering or Computer Engineering, with at least a 60% average. Knowledge of C++ and UNIX is assumed.

**Course Requirements**

The degree requires satisfactory completion of 900 level subjects to the value of at least 48 credit points including:

(a) At least three (3) subjects (18 cp) chosen from one major subject list;
(b) At least one (1) subject (6 cp) from the subject list of another major;
(c) Plus an additional (4) subjects (24 cp) from the CSCI Graduate Subject List.

Note:

i) a maximum of two (2) subjects (12 cp) may be at 900-level from the following subject prefixes ISIT, MATH, STAT, ECTE or TBS. These subject prefixes may be substituted for subjects in the CSCI Graduate Subject List in rule (c) above. (Note that quotas may apply to TBS subjects offered at the Sydney Business School.)
   These subjects must be approved by the Head of School prior to commencing the subject/s.

ii) Any other 900-level subjects must be approved by the Head of School prior to commencing the subject.

**Overview**

This course has been specifically designed to allow students with a Bachelor degree outside the computing field to gain a Master level qualification in the area.

**Entry Requirements / Assumed Knowledge**

A degree equivalent to a three-year Australian Bachelor degree in any discipline, with at least a 60% average.

**Course Requirements**

Candidates must successfully complete 12 subjects, including:
1. Eight (8) Core Subjects;
2. No more than two (2) subjects selected from Elective Subjects List A; and
3. At least two (2) subjects selected from the Elective Subjects List B.

Graduate Diploma in Computer Science

Testamur Title of Degree:  Graduate Diploma in Computer Science  
Abbreviation:  GradDipCompSc  
Home Faculty:  Informatics  
Duration:  1 year (2 full-time sessions) or part-time equivalent  
Total Credit Points:  48  
Delivery Mode:  Face-to-face  
Starting Session(s):  SIM Session 1, SIM Session 2, SIM Session 3, SIM Session 4.  
Location:  Singapore Institute of Management (SIM)  
UOW Course Code:  687  
CRICOS Code:  NA  

Overview
This degree is designed to provide state of the art knowledge and specialist skills in Computer Science. It is suitable for candidates who have existing but limited ICT/Engineering technical qualifications or who have significant experience in related fields, but wish to upgrade their knowledge and understanding in this field. The degree is designed primarily for professionals who wish to progress upwards or broaden their career in the ICT industry.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree with at least a 60% average in an area related to ICT/Engineering. Applicants with a degree in any area plus at least one year full-time employment in the ICT industry will be considered.

Course Requirements
The degree requires satisfactory completion of 48 credit points that include:
(a) 24 credit points selected from the subject list for one of the major studies; and
(b) 24 credit points selected from the 300 level computer science subjects.

Areas of Major Study
Students enrolled in this degree may choose to major in:
• Digital Systems Security
• Multimedia and Game Development
• Enterprise Systems

### Overview

Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original and significant contribution to the body of knowledge in their chosen studies. This qualification can lead to or enhance an academic career and is highly regarded by private and public sector employers.

### Entry Requirements / Assumed Knowledge

A four-year Honours Bachelor of Engineering degree (minimum Class II, Division 2 or higher); or a Master of Engineering Studies (at the required level); or a Master of Engineering – Research, in one of the following areas: Computer, Electrical, Electronic or Telecommunications Engineering; or equivalent.

The School normally requires students to register initially for the Masters by Research program. Subject to satisfactory progress, including the presentation of a report and seminar, a student's candidature may be transferred to Doctor of Philosophy (PhD) after one year, without penalty.
Course Requirements

This program is by 100% thesis. Students may be required to attend lectures in relevant topics from time to time throughout the program.

All new students enrolling in a research degree are expected to prepare and defend a research proposal early in their candidature. Normally, the degree will be completed in not less than four, and not more than eight, academic sessions of full-time study, or six to 16 sessions of part-time study.

Current Research Areas

The following areas of research are available to candidates undertaking the degrees of Doctor of Philosophy or Master of Engineering - Research:

**Intelligent Mechatronics: Automation**
- Advanced control systems
- Control networks
- Haptic rendering
- Machine tool design
- Precision position and speed control
- Robotics and sensors
- Tele robotics
- Virtual manipulation

**Intelligent Mechatronics: Applications**
- Arc welding control
- Medical image processing
- Renewable energy sources
- Superconducting magnetic energy storage
- Virtual surgery

**Power: Quality and Reliability**
- Conducted electromagnetic interference (EMI)
- Data mining
- Distribution system reliability
- Harmonic management
- Power electronics and drives
- Power quality monitoring and data analysis
- Power quality indices and reporting
- Standardisation
- Voltage fluctuations and flicker

**Telecommunications: Digital Signal Processing**
- Adaptive filtering
- Blind signal processing
- Coding for error-prone channels
- Computational auditory scene analysis
- Data mining
- Filter banks and wavelets
- Image and video segmentation, compression and retrieval
- Internet access technologies (xDSL)
- Low-rate speech coding
- Multirate signal processing
- Wideband speech/audio coding
- 3D Audio objects and environments

**Telecommunications: Network Services**
- Internet and WWW services
- Internet telephony

2009 Postgraduate Handbook
Multimedia databases
Network games
Video on demand
Virtual reality

**Telecommunications: Photonics**
- Bragg grating sensing system
- Fibre Bragg grating design and writing
- FBG devices for optical communication systems
- Optical fibre

**Telecommunications: Switched Networks**
- Active networks
- Ad hoc multi-hop networking
- Closed loop control in packet networks
- Location aware networking
- Network dimensioning
- Network management
- Network traffic modelling and control
- Wireless internet protocols

**Telecommunications: Wireless Communications**
- Code division multiple access systems
- Microwave propagation and channel modelling
- Mobile ad hoc networks
- Sequence design
- Smart antennas
- Space-time coding
- Ultra wideband communications

Note: Not all areas are available for research at all levels, nor at all times.

**Overview**

This program aims to provide specialised research training for those preparing for careers in academia, government and industry; and to provide practising engineers with the means to increase their knowledge and upgrade their qualifications.

**Entry Requirements / Assumed Knowledge**

This degree is primarily a research degree for those who have completed an Honours Bachelor degree at a standard of Class II, Division 2 or higher; or a Master of Engineering Studies degree with satisfactory completion of ECTE953 and a weighted average mark of 67.5% or higher (or equivalent), in one of the following areas: computer; electrical; telecommunications engineering; or a related area.

Entry from a Pass Bachelor degree in computer, electrical, telecommunications engineering, or a related area, is possible if a candidate has a good academic record.
Advanced Standing
Candidates with an Honours Bachelor degree at a standard of Class II, Division 2 or higher; or a Master of Engineering Studies degree with satisfactory completion of ECTE953 and a weighted average mark of 67.5% or higher in computer, electrical, or telecommunications engineering or a related area (or equivalent), may be given exemption from all, or some, of the 24 credit points of coursework. This would be contingent on evidence of considerable research strength.

Course Requirements
The degree is normally 72 credit points, consisting of a 48 credit point research thesis and 24 credit points of coursework. The program must be completed in a maximum time of two years full-time and requires satisfactory completion of the following:
1. 24 credit points of coursework, consisting of 900-level ECTE subjects chosen from those listed under the Master of Engineering Studies and approved by the Head of the School of Electrical, Computer and Telecommunications Engineering, in consultation with the School Postgraduate Research Committee, to constitute a coherent introduction to the proposed area of research; and
2. Subject to students gaining a weighted average mark of 67.5% for the coursework, a 48 credit point thesis subject.
Candidates who fail to meet the requisite standard for the coursework component will be required to transfer to the Master of Engineering Studies.

Current Research Areas
Refer to Current Research Areas under the Doctor of Philosophy entry.

Other Information
Subject to satisfactory progress and satisfactory performance in seminars, students may transfer to the Doctor of Philosophy (PhD) program prior to completion of the Master of Engineering – Research.

Master of Engineering Practice (Mechatronics)
This course is offered jointly by the Faculty of Engineering and the School of Electrical, Computer and Telecommunications Engineering.
Details of the Entry Requirements and Program of Study are contained in the Faculty of Engineering entry.
Graduates interested in mechatronics who have an electrical, computer, electronic or related undergraduate degree, may also consider the specialist mechatronics subjects that are available within the Master of Engineering Studies – Electrical Engineering Major.

Overview
The objective of this program is to provide graduates with engineering skills at a level between the Bachelor and Masters by Research degree levels.

Entry Requirements/Assumed Knowledge
A degree equivalent to a three or four year Australian Bachelor of Engineering in Computer, Electrical, Electronics or Telecommunications Engineering.

Course Requirements
The Master of Engineering Studies program provides the opportunity for students to undertake a major in:
- Computer Engineering
The major would be recorded on the testamur.

Students must complete 48 credit points consisting of the common core (18 credit points); one major (18 credit points); and two electives (12 credit points).

ECTE953 Advanced Project (12 credit points) is optional. If this subject is undertaken the topic must be in the area of the major area of study. Entry to this subject is restricted to those students who gain a weighted average mark of at least 72.5% for the full-time first session load or equivalent (i.e. four six credit point subjects, including ECTE906 Advanced Signals and Systems, ECTE955 Advanced Laboratory, ECTE975 Communication and ICT Workplace Practice plus one six credit point subject from the major).

The course program is set out below:

**Course Program**

Note: Only a limited number of subjects will be offered in any one year.

### Core Subjects

Students must complete the following subjects in their first session of enrolment:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECTE906 Advanced Signals and Systems</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>ECTE955 Advanced Laboratory</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
<tr>
<td>ECTE975 Communications and ICT Workplace Practice</td>
<td>Autumn/Spring</td>
<td>6</td>
</tr>
</tbody>
</table>

#### Computer Engineering Major

Students must select three subjects from the following list:

- ECTE931 Real-Time Computing
- ECTE932 Computer Systems
- ECTE933 Embedded Systems
- ECTE968 Coding and Error Correction

#### Digital Media Broadcasting Major

Students must select three subjects from the following list:

- ECTE901 Multimedia Signal Processing
- ECTE903 Image and Video Processing
- ECTE905 Speech and Audio Processing
- ECTE933 Embedded Systems
- ECTE965 Wireless Communication Systems

#### Electrical Engineering Major

Students must select three subjects from the following list:

- ECTE901 Multimedia Signal Processing
- ECTE912 Power Electronics and Drives
- ECTE933 Embedded Systems
- ECTE942 Computer Controlled Systems
- ECTE962 Telecommunications System Modelling
- ECTE965 Wireless Communications Systems

#### Internet Technology Major

Students must complete the following subjects:

- ECTE956 Internet Technology Laboratory
- ECTE965 Wireless Communication Systems
- ECTE992 Internet Networking Protocols

#### Power Engineering Major

Students must complete the following subjects:

- ECTE912 Power Electronics and Drives
- ECTE923 Power System Analysis
Robots and Automation Major

Students must complete the following subjects:

- ECTE933 Embedded Systems (Autumn 6)
- ECTE941 Intelligent Control (Autumn 6)
- ECTE971 Robotics and Flexible Automation (Spring 6)

Telecommunications Engineering Major

Students must complete the following subjects:

- ECTE962 Telecommunications System Modelling (Spring 6)
- ECTE982 Network Engineering (Autumn 6)
- ECTE986 Telecommunications Network Management (Spring 6)

Electives

Students must select two subjects from the following list:

- ECTE901 Multimedia Signal Processing (Autumn 6)
- ECTE902 Stochastic Signal Processing (n/o 2009 6)
- ECTE903 Image and Video Processing (Spring 6)
- ECTE904 Adaptive Signal Processing (n/o 2009 6)
- ECTE905 Speech and Audio Processing (n/o 2009 6)
- ECTE912 Power Electronics and Drives (Autumn 6)
- ECTE923 Power System Analysis (Autumn 6)
- ECTE926 Power Distribution Systems (Spring 6)
- ECTE931 Real-Time Computing (Autumn 6)
- ECTE932 Computer Systems (Spring 6)
- ECTE933 Embedded Systems (Autumn 6)
- ECTE941 Intelligent Control (Autumn 6)
- ECTE942 Computer Controlled Systems (Spring 6)
- ECTE953 Advanced Project (Autumn/Spring 12)
- ECTE956 Internet Technology Laboratory (Autumn/Spring 6)
- ECTE962 Telecommunications System Modelling (Spring 6)
- ECTE965 Wireless Communication Systems (Spring 6)
- ECTE968 Coding and Error Correction (n/o 2009 6)
- ECTE970 Advanced Topics in Engineering (n/o 2009 6)
- ECTE971 Robotics and Flexible Automation (Spring 6)
- ECTE982 Network Engineering (Autumn 6)
- ECTE986 Telecommunications Network Management (n/o 2009 6)
- ECTE992 Internet Networking Protocols (Autumn/Spring 6)

Other Information

Students who have satisfactorily completed ECTE953 Advanced Project and who gain a weighted average mark of 67.5% or higher in the Master of Engineering Studies are eligible to apply for entry to the Master of Engineering – Research, subject to supervisor availability.

Overview
The objective of this program is to provide graduates with engineering skills at a level between the Bachelor and Masters by Research degree levels.

Entry Requirements/Assumed Knowledge
A degree equivalent to a three or four year Australian Bachelor of Engineering in Computer, Electrical, Electronics or Telecommunications Engineering.

Course Requirements
The Master of Engineering Studies (Double Major) program provides the opportunity for students to undertake a double major in:
- Computer Engineering
- Digital Media Broadcasting
- Electrical Engineering
- ICT Management
- Internet Technology
- Power Engineering
- Robotics and Automation
- Telecommunications Engineering

Both majors would be recorded on the testamur.

Students must complete 72 credit points, consisting of the common core (18 credit points), two majors (36 credit points) and three electives (18 credit points).

Subjects which are duplicated across the majors cannot be counted in both majors. For example, where one subject is listed in both the Computer Engineering and the Electrical Engineering Majors, it can only be counted in one of these majors for students doing the Computer Engineering-Electrical Engineering double major.

ECTE953 Advanced Project (12 credit points) is optional. If this subject is undertaken the topic must be in the area of one of the majors being studied. Entry to this subject is restricted to those students who gain a weighted average mark of at least 72.5% for the full-time first year load or equivalent (i.e. six subjects – 36 credit points in total - including ECTE906 Advanced Signals and Systems, ECTE955 Advanced Laboratory and ECTE975 Communication and ICT Workplace Practice).

Course Program
Note: Only a limited number of subjects will be offered in any one year.

Core Subjects
Students must complete the following subjects in their first session of enrolment:

<table>
<thead>
<tr>
<th>Subjects</th>

</tbody>
</table>

Computer Engineering Major
Students must select three subjects from the following list:

ECTE931 Real-Time Computing | Autumn | 6
ECTE932 Computer Systems   | Spring | 6
ECTE933 Embedded Systems   | Autumn | 6
ECTE968 Coding and Error Correction | n/o 2009 | 6

Digital Media Broadcasting Major
Students must select three subjects from the following list:

ECTE901 Multimedia Signal Processing | Autumn | 6
ECTE903 Image and Video Processing  | Spring | 6
ECTE905 Speech and Audio Processing | n/o 2009 | 6
ECTE933 Embedded Systems            | Autumn | 6
ECTE965 Wireless Communication Systems | Spring | 6

Electrical Engineering Major
Students must select three subjects from the following list:

ECTE901 Multimedia Signal Processing | Autumn | 6
ICT Management Major

Students must complete the following subjects:
ISIT900  Fundamentals of Contemporary Technologies  Autumn/Spring  6
ISIT905  Technology Management and Information  Autumn  6
ISIT946  Project and Change Management  Spring  6

Internet Technology Major

Students must complete the following subjects:
ECTE956  Internet Technology Laboratory  Autumn/Spring  6
ECTE965  Wireless Communication Systems  Spring  6
ECTE992  Internet Networking Protocols  Autumn/Spring  6

Power Engineering Major

Students must complete the following subjects:
ECTE912  Power Electronics and Drives  Autumn  6
ECTE923  Power System Analysis  Autumn  6
ECTE926  Power Distribution Systems  Spring  6

Robotics and Automation Major

Students must complete the following subjects:
ECTE933  Embedded Systems  Autumn  6
ECTE941  Intelligent Control  Autumn  6
ECTE971  Robotics and Flexible Automation  Spring  6

Telecommunications Engineering Major

Students must complete the following subjects:
ECTE962  Telecommunications System Modelling  Spring  6
ECTE982  Network Engineering  Autumn  6
ECTE986  Telecommunications Network Management  Spring  6

Electives

Students must select two subjects from the following list:
ECTE901  Multimedia Signal Processing  Autumn  6
ECTE902  Stochastic Signal Processing  n/o 2009  6
ECTE903  Image and Video Processing  Spring  6
ECTE904  Adaptive Signal Processing  n/o 2009  6
ECTE905  Speech and Audio Processing  n/o 2009  6
ECTE912  Power Electronics and Drives  Autumn  6
ECTE923  Power System Analysis  Autumn  6
ECTE926  Power Distribution Systems  Spring  6
ECTE931  Real-Time Computing  Autumn  6
ECTE932  Computer Systems  Spring  6
ECTE933  Embedded Systems  Autumn  6
ECTE941  Intelligent Control  Autumn  6
ECTE942  Computer Controlled Systems  Spring  6
ECTE953  Advanced Project  Autumn/Spring  12
ECTE956  Internet Technology Laboratory  Autumn/Spring  6
ECTE962  Telecommunications System Modelling  Spring  6
ECTE965  Wireless Communication Systems  Spring  6
ECTE968  Coding and Error Correction  n/o 2009  6
ECTE970  Advanced Topics in Engineering  n/o 2009  6
ECTE971  Robotics and Flexible Automation  Spring  6
ECTE982  Network Engineering  Autumn  6
ECTE986  Telecommunications Network Management  n/o 2009  6
ECTE992  Internet Networking Protocols  Autumn/Spring  6
Other Information

Students who have satisfactorily completed ECTE953 Advanced Project and who gain a weighted average mark of 67.5% or higher in the Master of Engineering Studies (Double Major) are eligible to apply for entry to the Master of Engineering – Research, subject to supervisor availability.

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview

The Master of Technology Engineering program is designed specifically for students who have a degree equivalent to a three or four year Australian Bachelor degree that is not specifically in electrical engineering, or a related discipline. The program will provide students with an opportunity to undertake a major in one of the following areas:

- Computer Engineering
- Digital Media Broadcasting
- Electrical Engineering
- Internet Technology
- Power Engineering
- Robotics and Automation
- Telecommunications Engineering

The major would be recorded on the testamur.

Entry Requirements/Assumed Knowledge

Completion of the Graduate Certificate in Technology Engineering.

Course Requirements

Students must have satisfactorily completed 72 credit points, consisting of:

- the Graduate Certificate in Technology Engineering (24 credit points – selected and approved by the Head of School)
- PLUS the course program of 48 credit points consisting of:
  - core subjects (18 credit points);
  - one major (18 credit points); and
  - two elective subjects (12 credit points).

The common core subjects: ECTE906 Advanced Signals and Systems, ECTE955 Advanced Laboratory and ECTE975 Communication and ICT Workplace Practice must be undertaken in the first session following satisfactory completion of at least 18 credit points of the Graduate Certificate in Technology Engineering.

ECTE953 Advanced Project (12 credit points) is optional. If this subject is undertaken the topic must be in the major area of study. Entry to this subject is restricted to those students who gain a weighted average mark of at least 72.5% for the full-time load or equivalent (i.e. four six credit point subjects – 24 credit points in total – including ECTE906 Advanced Signals and Systems, ECTE955 Advanced Laboratory and ECTE975 Communication and ICT Workplace Practice plus one six credit point subject from the chosen major).

Course Program

Note: Only a limited number of subjects will be offered in any one year.

Core Subjects

Students must complete the following subjects in their first session following satisfactory completion of at least 18 credit points of the Graduate Certificate in Technology Engineering:

<table>

Overview

The Graduate Certificate in Technology Engineering will provide a pathway into the Coursework Masters Program for students who have an undergraduate background that is not specifically in computer, electrical or telecommunications engineering.

Entry Requirements / Assumed Knowledge

A degree equivalent to a three or four year Australian Bachelor degree in communications, engineering (other than electrical and related disciplines), information technology or science.

Course Requirements

The Graduate Certificate in Technology Engineering requires the satisfactory completion of four subjects (24 credit points) selected and approved by the Head of School, based on the student's undergraduate background and relevant work experience.

Students will have the opportunity to gain general skills in areas including:

- Database Systems;
- Digital Hardware;
- Power Engineering;
- Communications; and
- Internet Engineering.

For a listing of subjects offered by the School of Electrical, Computer and Telecommunications Engineering please refer to the University of Wollongong Subject Database.

Other Information

Students who satisfactorily complete the Graduate Certificate in Technology Engineering are eligible to apply for entry to the Master of Technology Engineering.
Overview

The objective of this program is to provide state of the art knowledge and specialist skills on a broad range of Internet technologies and systems. It is suitable for candidates who have existing but limited ICT technical qualifications or who have significant experience in related fields, but wish to significantly upgrade their knowledge and understanding in this field.

Entry Requirements / Assumed Knowledge

A degree equivalent to a three or four year Australian tertiary qualification with at least a 60% average, which must include the equivalent of first year mathematics.

Applicants without first-year mathematics, but who have at least two years of Internet/computer related work experience may be considered.

Course Requirements

The Graduate Diploma in Internet Technology requires the satisfactory completion of a recommended program of study approved by the Head of School, consisting of 48 credit points of coursework subjects.

Students will have the opportunity to gain general and specialist skills in diverse areas of Internet technologies and their applications, including:

- Programming and Programming Languages such as Java;
- Database Systems;
- System Level Engineering Principles and Design;
- Electronics and Communications; and
- Embedded Internet Systems.

State of the art practical exposure to Internet technologies will be provided through advanced laboratory experiments and communication and group work skills.

On enrolment, each student will be considered individually and provided with the details of subjects recommended to suit their specific background.

School of Information Systems and Technology

Doctor of Philosophy

Overview

Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original contribution to the body of knowledge in a chosen field of study. This qualification can lead to, or enhance, an academic career and is also highly regarded by public and private sector employers.
Entry Requirements / Assumed Knowledge

A four-year Honours Bachelor degree in Information and Communication Technology, (a minimum of Class II, Division 2 or higher), or a Master of Information and Communication Technology – Research degree with strong performance in the 48 credit point thesis, or equivalent.

Course Requirements

This program is 100% by thesis. Candidates enrol in a 48 credit point thesis subject and repeat the same enrolment for each year of study, usually over three years of full-time study. Students may be required to attend lectures in relevant topics from time to time throughout the program.

Current Research Areas

Systems & Technology
Aged care
Collaborative Systems
Customer Relationship Management
Database Systems
e-Business Applications
e-Commerce
e-Learning
Electronic health records
e-Manufacturing
Health Informatics (aged care, electronic health records)
Health record input systems
Information Management
Point-of-care solutions
Privacy Issues in EHRs
Radio Frequency Identification
Semantic Web

Overview

Health services in Australia, as in most countries, are experiencing a surge of interest and investment in e-health. This program is designed to provide IT professionals with a better understanding of the specifics of health informatics and provide health professionals with a better understanding of IT within their industry.

The program aims to equip graduates with an understanding of the health sector, and of the application of relevant systems, in order to take on key roles in successful strategy development and health systems projects.

Entry Requirements / Assumed Knowledge

A degree equivalent to a three-year Australian Bachelor degree, with an average of at least 60%, in information technology, computer science or an ICT-related specialisation.

Applicants with a three-year degree in Health Science plus at least one year full-time (or part-time equivalent) employment in a position related to Health will be considered by the Faculty.

Course Requirements

Candidates must successfully complete eight (8) subjects, including:
1. Three (3) Core Subjects (18cp); and
2. Five (5) subjects (30cp) chosen from the list of electives below, or three subjects (18cp) plus the Research Report (12cp).

or any other subject approved by the Head of School or the Course Coordinator/s prior to commencement.

**NOTE:** Not all subjects may be available every year. In addition, an IT background is assumed for some of the listed electives. Students should consult with the course coordinator to ensure appropriate subjects chosen.

**Other Information**

Students enrolled in the Master of Health Informatics may apply to graduate with a Graduate Certificate in Health Informatics after satisfactory completion of at least 24 credit points, which must include the three core subjects ISIT917, ISIT 929 and ISIT 930, and one 6 credit point elective subject chosen from the above list.

**Professional Recognition**

The Master of Health Informatics is accredited by the Australian Computer Society as meeting requirements for membership at an “Associate Level”.

**Overview**

This course is designed for practicing health professionals seeking to develop their management and leadership skills. This flexible program allows students to select from a variety of Graduate Certificate degrees and tailor their Masters program to suit their professional development requirements.

**Entry Requirements**

Students can enter the Master of Health Leadership and Management degree via either of the pathways detailed below:

Applicants with a Bachelor degree of at least three years duration from a recognised tertiary institution or equivalent, together with a minimum of two years full-time relevant work experience will be admitted to the Master of Health Leadership and Management degree. Upon commencement of the degree, students will nominate two Graduate Certificate degrees within the course structure.

Alternatively, applicants may apply to enrol in one of the Graduate Certificate degrees listed within the MHLM course structure, provided they meet the entry requirements as specified for this Graduate Certificate by the relevant Faculty. Upon successful completion of the Graduate Certificate with an average mark of at least 60 per cent, students may apply to progress to the Master of Health Leadership and Management with credit for previous studies completed.
Advanced Standing
Candidates must successfully complete a total of eight subjects, totalling 48 credit points; no advanced standing will be granted for subjects completed in the first graduate certificate degree. Students who successfully complete one of the Graduate Certificate programs listed in the course structure with an average mark of at least 60 per cent may apply to progress to the MHLM with credit for previous studies.

Course Requirements
Students who enrol directly into the Master of Health Leadership and Management will be required to meet with the Course Co-ordinator and discuss which two of the graduate certificate programs will comprise the course.

Those students who enrol initially in one of the Graduate Certificate degrees listed below will be eligible to progress to the Master of Health Leadership and Management, upon successful completion with an average mark of at least 60 per cent. Candidates will then articulate to the Master of Health Leadership and Management and complete a further 24 credit points of subjects, based on one of the other graduate certificate programs listed below.

At least one of the graduate certificate programs must be chosen from those offered by the Faculty of Health and Behavioural Sciences. As leadership is a core component of this program, students must either complete the Graduate Certificate in Health Leadership and Management or successfully complete the subject TBS903 Managing People in Organisations within one of the other Graduate Certificates.

Faculty of Health and Behavioural Sciences
Graduate Certificate in Health Leadership and Management
Graduate Certificate in Health Management
Graduate Certificate in Nutrition Management

Graduate School of Business
Graduate Certificate in Business Administration
Graduate Certificate in Logistics
Graduate Certificate in Management

Faculty of Informatics
Graduate Certificate in Health Informatics
Graduate Certificate in Information and Communication Technology

Course structures for individual Graduate Certificate degrees can be found in the relevant Faculty’s Handbook.

# By request. This program is not available to international students on-shore.
+ Please note this course is currently under review and may not be on offer from Spring Session 2009.

Overview
This industry-based degree has been specifically tailored for practising IT professionals, providing a deeper understanding of the issues that arise in the implementation and application of IT. The program informs and educates professionals about the organisational, economic, regulatory and socio-technical issues essential to the effective management of information technology.

The degree aims to improve the skills of professionals who are using the latest software technologies by providing a combined program of academic guidance to work-based activities plus traditional academic subjects, which can be offered off-campus in the form of short courses.
Entry Requirements / Assumed Knowledge

Current employment in an information and/or communication technology (ICT) related field with:

- A degree equivalent to a three-year Australian Bachelor degree with an average of at least 60% and demonstrated IT knowledge; or
- Qualifications showing an appropriate balance between other academic or professional qualifications, and relevant professional experience in information and/or telecommunications technology.

Ideally, all candidates would have a minimum of two years professional experience in information and/or communication technology. Each application will be considered on its merit.

Note: Enrolment may be through collaborative agreements with companies.

Course Requirements

Candidates must successfully complete the following three components:

1. Core Professional Development (12cp);
2. ITCS949 Industry-based Information Technology Project (12cp); and
3. Four (4) Academic subjects (24cp).

To be awarded with a major study, three (3) subjects must be selected from one of the groups of subjects listed below.

Subjects | Session | Credit Points
--- | --- | ---
Software Engineering
CSCI910 Formal Methods in Software Engineering | Autumn | 6
CSCI926 Software Testing | Autumn | 6
CSCI927 Service-Oriented Software Engineering | Spring | 6
CSCI928 Software Engineering Requirements and Specifications | Spring | 6
Electronic Commerce
ISIT901 IT Strategic Planning | Spring | 6
IACT906 Business On-Line | Not on offer | 6
2009
ISIT937 Information Technology Security and Risk Management | Autumn | 6
Information Management
ISIT916 Organisational Issues in Information Technology | Autumn | 6
ISIT 917 Information Management | Autumn | 6
ITCS936 Detailed Design of Integrated Solutions for eBusiness | Not on offer | 6
2009
Multimedia
CSCI946 Multimedia Studies | Autumn | 6
CSCI936 Visualisation | Autumn | 6
IST991 Special Topics in IS and IT A | Autumn | 6
ITCS907 Java Programming & Object Oriented Design | Spring | 6
Enterprise Network Planning, Design and Management
ISIT901 Information Systems Strategic Planning | Spring | 6
ISIT918 Strategic Network Management | Autumn | 6
ISIT925 Strategic Network Design | Spring | 6
ISIT937 Information Technology Security and Risk Management | Autumn | 6

Other Information

Students enrolled in the MIIT may apply to graduate with a Graduate Certificate in Industry-based Information Technology after satisfactory completion of 24 credit points, chosen from any combination of the following:

1. 6cp for Core Professional Development;
2. ITCS949 Industry-based Information Technology Project (12cp);
3. Up to three Academic subjects (18cp) chosen from the above list.

Professional Recognition

The Master of Industry-based Information Technology is accredited by the Australian Computer Society as meeting requirements for membership at a “Professional Level”.

2009 Postgraduate Handbook
Master of Information and Communication Technology*

Testamur Title of Degree: Master of Information and Communication Technology
Abbreviation: MICT
Home Faculty: Informatics
Duration: 1 year (2 full-time sessions) or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn/Spring
Location: Wollongong; INTI College, Sarawak, Malaysia;
UOW Course Code: 581
CRICOS Code: 009250J

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview
This degree is aimed primarily at graduates working in the ICT industry who will benefit from an in-depth study of the organisational, economic, regulatory and socio-technical issues that arise in the implementation and application of IT, and of how to effectively manage these issues. Candidates may choose to complete a single major in a sub-discipline such as applied e-business, IT Strategic Planning, Network Management, e-Learning or e-Health.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree, with a 60% average, in an area related to ICT (eg Information Systems, Information Technology, Computer Science) or A Graduate Diploma in IS or IT from the University of Wollongong with an average mark of 60%.

Advanced Standing
The Graduate Certificate in Information and Communication Technology at UOW articulates into the MICT and the MICTAdv.
Also, the current MICT degree at UOW articulates into the MICTAdv.

Course Requirements
The degree requires satisfactory completion of 900 level subjects to the value of at least 48 credit points, including:
1. a. The four (4) core subjects (24cp): xx
b. At least two (2) subjects (12cp) selected from the ISIT Graduate Subjects List (see below);

d. i. A maximum of two (2) subjects (12 cp) at 900-level may be taken from the following subject prefixes CSCI, ITCS, MATH, STAT, ECTE or TBS. (Note that quotas may apply to TBS subjects offered at the Sydney Business School.)
ii. Any other 900-level subjects must be approved by the Head of School prior to commencing the subject.
2. To be awarded with a major (except e-Learning), a candidate shall satisfactorily complete four (4) subjects (24cp) as set out in the relevant program below, while still complying with requirement 1(b) and 1(c) above.
3. To be awarded with a major in e-Learning, a candidate shall satisfactorily complete four (4) subjects (24cp) as set out in the relevant program below, with the requirements 1(b) and (c) waived.
4. This degree may be completed without attempting a major area of study.

Areas of Major Study
Candidates enrolled in this degree may choose to major in:
• e-Business
• IT Strategic Planning
• Network Management

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview

This program is designed to provide students with sound practice in research methods appropriate to the study of information and communication technology applications, and to prepare students for Doctor of Philosophy (PhD) level research.

Entry Requirements / Assumed Knowledge

This is primarily a research degree for those who have completed an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or a Masters by coursework in an appropriate discipline which includes a minor project worth at least 12 credit points or equivalent.

If a candidate has a good academic record, and has completed a minor project worth at least 12 credit points or equivalent, entry from a Pass Bachelor degree, Pass Bachelor degree and Graduate Diploma, or Pass Bachelor Degree and Graduate Certificate, is possible.

Advanced Standing

Candidates with an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or Masters by coursework degree, may be given exemption from all, or some, of the 24 credit points of coursework and admitted directly to the 48 credit point research thesis component. This is contingent on evidence of proven research experience.

Course Requirements

The degree is normally 72 credit points, consisting of a 48 credit point research thesis and 24 credit points of coursework. The program must be completed in a maximum time of two years full-time and requires satisfactory completion of the following:

1. ISIT940 Research Methods (6cp);
2. Three subjects (18cp) from the ISIT Graduate Subjects List to constitute a coherent introduction to the proposed area of research, as agreed to by the Head of School. (Note: students must achieve at least a WAM of 67.5% in the coursework component); and
3. 48 credit point thesis.

Candidates who fail to meet the requisite standard for the coursework component may have their enrolment cancelled. In this case, a candidate may be eligible to apply for one of the graduate certificates offered by the School or transfer to a 48 credit point Masters by coursework degree.

A candidate may not include for this degree subjects similar in content to subjects included in their Honours or Masters. Each candidate shall have a supervisor and a co-supervisor appointed on the recommendation of the Head of School of Information Technology and Computer Science.

Current Research Areas

For areas of interest available to candidates undertaking the Master of Information and Communication Technology – Research, please refer to Current Research Areas under the Doctor of Philosophy entry.
Master of Information and Communication Technology Advanced*

Testamur Title of Degree: Master of Information and Communication Technology Advanced
Abbreviation: MICTAdv
Home Faculty: Informatics
Duration: 1.5-2 years (3-4 full-time sessions) or part-time equivalent
Total Credit Points: 72
Delivery Mode: Face-to-face
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1563
CRICOS Code: 056217J

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview
This degree is aimed primarily at graduates working in the ICT industry who will benefit from an in-depth study of the organisational, economic, regulatory and socio-technical issues that arise in the implementation and application of IT, and of how to effectively manage these issues. Candidates may choose to complete either a single or a double major in a sub-discipline such as applied e-business technologies, e-business management, corporate network management, corporate network design, information technology management or health informatics.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree, with a 60% average, in an area related to ICT (e.g. Information Systems, Information Technology, Computer Science) or

A Graduate Diploma in IS or IT from the University of Wollongong with an average mark of 60%

Advanced Standing
The Graduate Certificate in Information and Communication Technology at UOW articulates into the MICT and the MICTAdv.

Also, the current MICT degree at UOW articulates into the MICTAdv, plus students in the MICTAdv may choose to exit early with an MICT if they fulfil the requirements of that degree.

Course Requirements
1) The degree requires satisfactory completion of 900 level subjects to the value of at least 72 credit points, including:
   a) four (4) core subjects (24cp):
      - ISIT900 Fundamentals of Contemporary Technologies (6)
      - ISIT903 Enterprise Architecture Design (6)
      - ISIT904 Systems Integration (6)
      - ISIT946 Project and Change Management (6)

   c) at least six (6) subjects (36cp) selected from the ISIT Graduate Subjects List;
   d) i) A maximum of two (2) subjects (12 cp) at 900-level may be taken from the following subject prefixes CSCI, ITCS, MATH, STAT, ECTE or TBS. (Note that quotas may apply to TBS subjects offered at the Sydney Business School.)
      ii) Any other 900-level subjects must be approved by the Head of School prior to commencing the subject.

   2) To be awarded with a major (except e-Learning), a candidate shall satisfactorily complete four (4) subjects (24cp) as set out in the relevant program below, while still complying with requirement 1(b) and 1(c) above.

   3) To be awarded with a major in e-Learning, a candidate shall satisfactorily complete four (4) subjects (24cp) as set out in the relevant program below, with the requirements 1(b) and (c) waived.

   4) To be awarded with a double major, candidates must ensure that four of the subjects selected satisfy the requirements of one major and that a separate set of four subjects satisfy the requirements of a second major, i.e. any subject counted towards one major cannot also be counted towards a second major.

5) This degree may be completed without attempting a major area of study.

Areas of Major Study
Candidates enrolled in this degree may choose to major in:

Overview

The Master of Information Systems degree specialising in Information Systems provides graduates with the opportunity to study advanced topics in information systems and to undertake a research project in one of the areas of research interest in the Information Systems Discipline. The program aims to both deepen and broaden the knowledge and skills of students in systems development methodologies, systems management, electronic commerce and a selected area of Information Systems research.

Entry Requirements / Assumed Knowledge

A degree equivalent to a three-year Australian Bachelor degree, with a 60% average, in an area related to Information and Communication Technology (eg Information Systems, Information Technology, Computer Science); or

A Graduate Diploma in Information Systems or Information Technology from the University of Wollongong with an average mark of 60%.

Advanced Standing

The Graduate Certificate in Information and Communications Technology from UOW articulates into the Master of Information Systems.

The Master of Information Systems articulates to the Master of Information Systems (Advanced)

Course Requirements

The degree requires the satisfactory completion of 900 level subjects to the value of at least 48 credit points (see below). Consisting of:

a) Five (5) core subjects (36 credit points)
b) Two (2) subjects (12 credit points) selected from Graduate Subject List.

UOW Course Cod: 1509
CRICOS Code: 031283E

# By request.

Overview
The organisational challenge of introducing and managing information technology is daunting. Today's business requires IT strategic planning to be an integral part of the organisation's strategic plan.
This degree is aimed primarily at professionals who wish to progress upwards or broaden their career opportunities in the ICT industry, and covers both IT strategic planning and implementation and organisational management.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree with at least a 60% average in an area related to ICT (eg Computer Science, Information Technology, Business Information Systems, Computer Engineering, Electrical Engineering, and Telecommunications Engineering).
Applicants with a degree in any area plus at least one year full-time employment in the ICT industry will be considered.
Students with an average mark of at least 60% in their three-year Bachelor degree, but with little or no background in IT, may be considered. Under special circumstances, applicants with other academic or professional qualifications, plus a minimum of five years full-time (or 10 years part-time) work experience in the ICT industry, may be considered by the Faculty.

Course Requirements
Candidates must successfully complete eight subjects, including:
1. Four subjects from Group A; and
2. Four subjects from Group B.

Group A: At least 24 cp of coursework taken from:

<table>
<thead>
<tr>
<th>Subjects</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISIT900</td>
<td>Fundamentals of Contemporary Technologies</td>
<td>6</td>
</tr>
<tr>
<td>ISIT901</td>
<td>Information Systems Strategic Planning</td>
<td>6</td>
</tr>
<tr>
<td>ISIT903</td>
<td>Enterprise Architecture Design</td>
<td>6</td>

TBS 950  Quality in Management   6
TBS 981  Managing in Multinational Companies   6

Or any other subject approved by the Head of School, prior to commencement

NB: TBS subjects are offered by the University of Wollongong Graduate School of Business. Start dates differ from the standard University Calendar. Quotas may apply to TBS subjects offered at the Sydney Business School.

Credit Towards Other Courses

Upon successful completion of the MITM, those students who meet the Master of Business Administration (MBA) entry requirements, which includes previous work experience, may apply to enrol in the MBA degree and, if successful, will be required to complete a further six (6) specified subjects (36 credit points) as determined by the MBA co-ordinator.

Upon successful completion of the MITM, students may articulate into the MICT, MICTAdv, MIS or MISAdv only if they satisfy the requirements for the specific degree. It should be noted that all these degrees require an average mark of 65% in either an undergraduate degree in ICT or the Graduate Diploma in Information Systems & Technology from UOW.

Professional Recognition

The Master of Information Technology Management is accredited by the Australian Computer Society as meeting requirements for membership at an "Associate Level".

Graduate Certificate in Health Informatics+

Testamur Title of Degree:  Graduate Certificate in Health Informatics
Abbreviation:  GCertHlthInfo
Home Faculty:  Informatics
Duration:  6 months or part-time equivalent
Total Credit Points:  24
Delivery Mode:  Face-to-face
Starting Session(s):  Autumn/Spring
Location:  Wollongong
UOW Course Code:  N/A
CRICOS Code:  N/A

+ Please note this course is currently under review and may not be on offer from Spring Session 2009.

Overview

This graduate certificate is designed as an early exit point from the Master of Health Informatics degree.

Entry Requirements / Assumed Knowledge

Refer to Master of Health Informatics.

Course Requirements

Students enrolled in the Master of Health Informatics may apply to graduate with the Graduate Certificate in Health Informatics after satisfactory completion of 24 credit points, which must include the three core subjects ISIT917, ISIT929 and ISIT930, and one 6 credit point subject chosen from the electives listed for the Master of Health Informatics.
Graduate Certificate in Industry-based Information Technology+

Testamur Title of Degree: Graduate Certificate in Industry-based Information Technology
 Abbreviation: GCertIIT
 Home Faculty: Informatics
 Duration: 6 months (1 full-time session) or part-time equivalent
 Total Credit Points: 24
 Delivery Mode: Modular face-to-face
 Starting Session(s): Negotiable
 Location: Wollongong/off-shore#
 UOW Course Code: 1140
 CRICOS Code: Not Applicable

# By request. This program is not available to international students on-shore.
+ Please note this course is currently under review and may not be on offer from Spring Session 2009.

Overview
This graduate certificate is designed as an early exit point from the Master of Industry-based Information Technology (MIIT) degree.

Entry Requirements / Assumed Knowledge
Refer to Master of Industry-based Information Technology.

Course Requirements
Students enrolled in the MIIT may apply to graduate with a Graduate Certificate in Industry-based Information Technology after satisfactory completion of 24 credit points, chosen from any combination of the following:
1. 6cp for Core Professional Development
2. ITCS949 Industry-based Information Technology Project (12cp)
3. Up to three Academic subjects (18cp) chosen from the subjects listed under the MIIT.

Graduate Certificate in Information and Communication Technology+

Testamur Title of Degree: Graduate Certificate in Information and Communication Technology
 Abbreviation: GCertICT
 Home Faculty: Informatics
 Duration: 6 months (1 full-time session) or part-time equivalent
 Total Credit Points: 24
 Delivery Mode: Face-to-face
 Starting Session(s): Autumn/Spring
 Location: Wollongong
 UOW Course Code: 1111
 CRICOS Code: 020196F

+ Please note this course is currently under review and may not be on offer from Spring Session 2009.

Overview
This program introduces information and communication technology (ICT) concepts, and provides students with the opportunity to obtain the knowledge and skills required to effectively solve organisational, economic, regulatory and socio-technical problems that arise in the implementation and application of information technology (IT).

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree in an area related to ICT (e.g. Information Technology; Computer Science; Information Systems; or Electrical, Computer or Telecommunications Engineering).

Course Requirements
The certificate requires satisfactory completion of at least 24 credit points of graduate subjects including:
1. ISIT900 Fundamentals of Contemporary Technologies (6 credit points);
2. Three (3) 900-level subjects (18 credit points) chosen from the ISIT Graduate Subjects List or any other subject approved by the Head of School

If it is the intention of the student to progress or articulate into a Masters degree then the pattern of study should follow the intended Masters degree. In other words, subject selection should be consistent with the intended Masters degree.
Advanced Standing

Students who qualify for the Graduate Certificate in Information and Communication Technology may be able to proceed to any of the following degrees:

- Master of Information and Communication Technology (MICT)
- Master of Information and Communication Technology Advanced (MICTAdv)
- Master of Information Technology Management (MITM)

Advanced standing of 24 credit points will be granted towards these Masters degrees.

The completion of the Masters degree will require the satisfactory completion of a further 24 credit points as specified in the schedule for that program.

Other Information

Prior to the conferring of a Master of Information and Communication Technology upon a candidate who holds a Graduate Certificate in Information and Communication Technology from this University, the candidate shall surrender the testamur and all rights relating to the Graduate Certificate.

Graduate Certificate in Information Systems

Testamur Title of Degree: Graduate Certificate in Information Systems
Abbreviation: GCertInfoSys
Home Faculty: Informatics
Duration: 1 year part-time
Total Credit Points: 24
Delivery Mode: On campus
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 697B
CRICOS Code: 050003E

Overview

This course is designed for graduates seeking an introductory course in the field of Information Systems. The course is specifically designed for, and restricted to, those students who hold University qualifications in areas not related to the field of Information Systems.

Entry Requirements / Assumed Knowledge

A degree equivalent to a three-year Australian Bachelor degree in an area other than Information and Communication Technology, i.e. not a degree in Information Systems, Information Technology, Computer Science or Computer Engineering.

Applicants with other professional or academic qualifications not related to Information and Communication Technology, plus a minimum of two (2) years full-time work experience (or part-time equivalent) in the Information and Communication Technology industry, may be considered by the Faculty.

Advanced Standing

Students performing at a satisfactory level in the Graduate Certificate may be permitted to continue with the Graduate Diploma in Information Systems with up to 24 credit points of specified credit.

Course Requirements

The course requires satisfactory completion of 4 undergraduate subjects (24 credit points) selected from the list below:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISIT100</td>
<td>Systems Analysis</td>
<td>Spring 6</td>
</tr>
<tr>
<td>ISIT111</td>
<td>Programming Concepts</td>
<td>Autumn/Spring 6</td>
</tr>
<tr>
<td>ISIT112</td>
<td>Database</td>
<td>Spring 6</td>
</tr>
<tr>
<td>ISIT218</td>
<td>Systems Design and Human Computer Interaction</td>
<td>Autumn 6</td>
</tr>
<tr>
<td>ISIT212</td>
<td>Corporate Network Planning and Design</td>
<td>Autumn 6</td>
</tr>
</tbody>
</table>

Alternative subjects may be substituted with the prior consent of the Head of School.
Graduate Diploma in Information Systems and Technology*

Testamur Title of Degree: Graduate Diploma in Information Systems and Technology

Abbreviation: GDipInfoSysTech

Home Faculty: Informatics

Duration: 1 year or part-time equivalent

Total Credit Points: 48

Delivery Mode: On campus

Starting Session(s): Autumn/Spring

Location: Wollongong

UOW Course Code: 684

CRICOS Code: 031280G

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.

Overview

This course aims to provide graduates with a coherent program of studies which will enable them to function as information systems professionals within a business organisation. The curriculum provides a balanced approach to the technical knowledge and skills, as well as an emphasis on human aspects of the information systems field.

Advanced Standing

The course will include articulation into the Master of Information Systems (MIS), the MIS(Advanced), the Master of Information and Technology Management (MITM), the Master of Information and Communication Technology (MICIT) and the Master of Information and Communication Technology(Advanced) (MICIT(Advanced))

Entry Requirements / Assumed Knowledge

A degree equivalent to a three-year Australian Bachelor degree in an area other than ICT i.e. not a degree in Information Systems, Information Technology, Computer Science or Computer Engineering

OR

A Graduate Certificate in Information Systems, from the University of Wollongong, with an average mark of 60%.

OR

Applicants with other professional or academic qualifications not related to ICT, plus a minimum of three years full-time work experience (or part-time equivalent) in the ICT industry, may be considered by the Faculty.

Course Program

The GDipIST requires satisfactory completion of 8 subjects (48 credit points), consisting of the following:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Session</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISIT100 Systems Analysis</td>
<td>Autumn</td>
<td>6</td>

Overview

Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original contribution to the body of knowledge in mathematical or statistical studies. This qualification can lead to, or enhance, an academic career and is highly regarded by private and public sector employers.

Entry Requirements / Assumed Knowledge

A four-year Honours Bachelor degree in any relevant area of Mathematics or Statistics (Class II, Division 2 or higher); or a Master of Science − Research (Mathematics) or (Statistics) with a strong performance in the 48 credit point thesis, or equivalent.

Course Requirements

This program is 100% by thesis (carrying weighting of 48 credit points per year). Students may be required to attend lectures in relevant topics on occasion throughout the program.

Current Research Areas

Please refer to staff web pages at www.math.uow.edu.au for current research areas.

Other Information

It is possible to downgrade enrolment from a PhD to a Master of Science − Research, with the permission of the Head of School.

Overview

This program is designed to consolidate and expand students’ knowledge at an advanced level in their area of interest in mathematics. The degree will provide students with the skills required for sound practice in mathematics research in preparation for doctoral level research.

Entry Requirements / Assumed Knowledge

This is primarily a research degree for those who have completed an Honours Bachelor degree at a standard of Class II, Division 2 or higher in Mathematics, or an equivalent Masters by coursework degree in Mathematics. Entry from a relevant Pass Bachelors degree, or Pass Bachelor degree and Graduate Diploma, with a very good academic record is also possible.

Advanced Standing

Candidates with an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or an equivalent Masters by coursework degree, may be given exemption from all, or some, of the 24 credit points of coursework.

University of Wollongong
Course Requirements

The degree is normally 72 credit points, consisting of a 48 credit point research thesis and 24 credit points of coursework. The program must be completed in a maximum time of two (2) years full-time (or four (4) years part-time) and requires satisfactory completion of the following:

1. 24 credit points of subjects chosen from the 900-level Mathematics subjects listed below, which together provide research skills and competencies required to complete a research project in Mathematics.
2. 48 credit point thesis.

The registration of a candidate will be subject to termination if that candidate fails subjects to the total value of 18 or more credit points.

Each candidate shall have a supervisor appointed on the recommendation of the Head of Postgraduate Studies.

<td>Autumn</td>
</tr>
</tbody>
</table>

Note the content of the subjects MATH971, MATH972, MATH973, MATH974, MATH980, MATH 981 and MATH 982 may vary each year. However, each year it will be possible to specialize in either applied mathematics or pure mathematics.

A list of topics that will be covered within each of the above subjects will be available in the subject database each year. These topics will include those offered by UOW staff, those from the Australian Mathematical Sciences Institute Summer and Winter graduate schools and classes available remotely, via the School’s access grid room.

Current Research Areas

For areas of research available to candidates undertaking the Master of Science – Research (Mathematics), please refer to staff web pages at www.math.uow.edu.au.

Other Information

Before the award Master of Science – Research (Mathematics) is conferred on a candidate who holds a testamur of the University of Wollongong for the degree of Master of Mathematics; the candidate shall surrender the testamur and the corresponding rights to the degree of Master of Mathematics.

It is possible to upgrade enrolment from a Master of Science – Research to a PhD, in certain circumstances. Consult the HDR Handbook: Course Transfers for more information.

Overview

This program is designed to consolidate and expand students’ knowledge at an advanced level in their area of interest in statistics. The degree will further enhance the analytical and communication skills required by a professional statistician, as well as provide students with the skills required for sound practice in statistics research in preparation for doctoral level research.

Entry Requirements / Assumed Knowledge

This is primarily a research degree for those who have completed an Honours Bachelor degree at a standard of Class II, Division 2 or higher in Statistics, or an equivalent Masters by coursework degree in Statistics.
Entry from a relevant Pass Bachelor degree, or Pass Bachelor degree and Graduate Diploma, with a very good academic record is also possible.

**Advanced Standing**
Candidates with an Honours Bachelor degree at a standard of Class II, Division 2 or higher, or an equivalent Masters by coursework degree may be given exemption from all, or some, of the 24 credit points of coursework.

**Course Requirements**
The degree is normally 72 credit points, consisting of a 48 credit point research thesis and 24 credit points of coursework. The program must be completed in a maximum time of two years full-time (or four years part-time) and requires satisfactory completion of the following:

1. 24 credit points of subjects chosen from the 900-level Statistics subjects listed below, which together provide research skills and competencies required to complete a research project in Statistics.

2. 48 credit point thesis.

The registration of a candidate will be subject to termination if that candidate fails subjects to the total value of 18 or more credit points.

Each candidate shall have a supervisor appointed on the recommendation of the Head of Postgraduate Studies.

### Overview
This program is designed to consolidate and expand the mathematics knowledge gained by a student in an undergraduate program and to develop skills in undertaking mathematical research projects.
Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree with a major in a relevant area of Mathematics, or equivalent. Applicants with a tertiary qualification containing a minimum of two (2) years of mathematics may be considered.

Course Requirements
The degree will normally occupy two (2) sessions of full-time study or four (4) sessions of part-time study, and requires satisfactory completion of at least 48 credit points, as set out in the following course program.

The registration of a candidate will be subject to termination if that candidate fails subjects to the total value of 18 or more credit points.

Each candidate shall have a supervisor appointed on the recommendation of the Head of Postgraduate Studies.

Candidates must complete one of MATH990 or MATH991, plus further subjects to make a total of 48 credit points. Apart from MATH990 and MATH991, further subjects may be chosen from the course program listed below. The final program is subject to the approval of the Head of Postgraduate Studies.

Plus at least 42 credit points (or 36 credit points if MATH991 is undertaken) chosen from the following list, as approved by the Head of Postgraduate Studies:

- INFO911 Data Mining and Knowledge Discovery
- INFO912 Mathematics for Cryptography
- MATH971 Advanced Topics in Applied Mathematics A
- MATH972 Advanced Topics in Applied Mathematics B
- MATH973 Advanced Topics in Pure Mathematics A
- MATH974 Advanced Topics in Pure Mathematics B
- MATH980 Preliminary Topics in Mathematics A
- MATH981 Preliminary Topics in Mathematics B
- MATH982 Preliminary Topics in Mathematics C
- Or any other 900-level subjects offered by the School of Mathematics and Applied Statistics, as approved by the Head of School and/or Head of Postgraduate Studies.

Note the content of the subjects MATH971, MATH972, MATH973, MATH974, MATH980, MATH 981 and MATH 982 may vary each year. However, each year it will be possible to specialize in either applied mathematics or pure mathematics.

A list of topics that will be covered within the above subjects in any one year will be available in the subject database towards the end of each preceding year. These subjects include those offered by UOW staff, those from the Australian Mathematical Sciences Institute Summer and Winter graduate schools and classes available remotely, via the School’s access grid room.

In exceptional circumstances and subject to approval by the Head of Postgraduate Studies, up to two 6 credit point subjects may be replaced by 900-level subjects of the same value offered by Units other than the School of Mathematics and Applied Statistics.

Other Information
Students who satisfactorily complete the Masters degree are eligible to apply for entry to the Master of Science - Research (Mathematics).
Master of Statistics

Testamur Title of Degree: Master of Statistics
Abbreviation: MStat
Home Faculty: Informatics
Duration: 1 year (2 full-time sessions) or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 575
CRICOS Code: 016121D

Overview
This program is designed to upgrade statistical skills, and to educate the candidate to undertake advanced statistical work in industry, commerce or government, including the ability to communicate effectively with the users of their skills.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree with a major in Statistics (or a Graduate Diploma in Statistics), or equivalent. Applicants with a tertiary qualification containing a minimum of two years of statistics may be considered.

Course Requirements
The degree will normally occupy two (2) sessions of full-time study or four (4) sessions of part-time study, and requires satisfactory completion of at least 48 credit points, as set out in the following course program.

The registration of a candidate will be subject to termination if that candidate fails subjects to the total value of 18 or more credit points.

Each candidate shall have a supervisor appointed on the recommendation of the Head of Postgraduate Studies.

Other Information
Students who satisfactorily complete the Masters degree are eligible to apply for entry to the Masters of Science – Research (Statistics).
Master of Financial Mathematics

Testamur Title of Degree: Master of Financial Mathematics
Abbreviation: MFinMath
Home Faculty: Informatics
Duration: 1 year (2 full-time sessions) or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 1548
CRICOS Code: 050301F

Overview
To provide students with a first degree in areas such as mathematics, finance, economics, business, engineering or science with training in quantitative financial analysis and a range of analytical, statistical, computational and modelling skills needed for the formulation, implementation and evaluation of models in the financial sector to structure transactions, evaluate financial derivatives, manage risk and construct investment strategies.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree with a major in mathematics or statistics.
Applicants with other three-year degrees will be considered if they possess a substantial background in mathematics (including calculus, linear algebra, differential equations, probability and statistics) equivalent to at least a second-year Bachelor level.

Course Requirements
The degree will normally occupy two (2) sessions of full-time study or four (4) sessions of part-time study, and requires satisfactory completion of at least 48 credit points, as set out in the following course program.

Professional Recognition
All graduates of this program satisfy the education requirements for Senior Associate membership of the Financial Services Institute of Australasia. (Senior Associate membership requires three years practical experience as well as the educational component).

Graduate Diploma in Statistics*

Testamur Title of Degree: Graduate Diploma in Statistics
Abbreviation: GDipStat
Home Faculty: Informatics
Duration: 1 year (2 full-time sessions) or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn/Spring
Location: Wollongong
UOW Course Code: 665
CRICOS Code: 001251F

* Please note this course is currently under review and there may be changes for students commencing from Spring Session 2009. Please contact the Faculty for further information.
Overview
This program is intended for students with limited or no background in statistics but who have the equivalent of first-year mathematics. Students can update or improve their statistical skills to Bachelor level and gain entry to the Master of Statistics program.

Entry Requirements / Assumed Knowledge
A degree equivalent to a three-year Australian Bachelor degree, which must include the equivalent of first-year mathematics.

Course Requirements
The graduate diploma will normally occupy two (2) sessions of full-time study or four (4) sessions of part-time study, and requires the satisfactory completion of at least 48 credit points, with the following requirements:
1. At least 36 credit points are to be chosen from those subjects listed in the Bachelor of Mathematics and Master of Statistics course structures, including at least 24 credit points of 300-level or 900-level subjects.
2. Candidates are not to include subjects which, in the opinion of the Head of School, are equivalent in content to those for which credit has already been obtained towards some other degree or diploma.
3. The chosen program is to be approved by the Head of School prior to enrolment.

Other Information
Students who satisfactorily complete the Graduate Diploma are eligible to apply for entry to the Master of Statistics.

2009 Postgraduate Handbook
SUBJECT DESCRIPTIONS

CSCI910  Formal Methods in Software Engineering
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to formal methods for software specification. The role of formal methods in the software development process is explained and investigated. The subject uses the Z notation as an example of a formal specification technique and introduces software tools for the creation and manipulation of Z specifications. Case studies of safety-critical and real-time systems are used as a basis for a study of the application of formal specification techniques. Topics will include: Introduction to formal approaches to design and specification, Review of mathematical foundation for formal methods, use of assertions and proof, analysis and verification of specification and design, disciplined approaches to design change, Z notation and its related software tools.

CSCI924  Reasoning and Learning
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to the concepts of agents and heuristics used in intelligent reasoning and learning systems. Topics covered include multi-agent systems, agent safety, agent liveliness, computational heuristics, machine learning techniques, case based and other forms of knowledge reasoning, temporal reasoning, knowledge extraction, ontology and complexity. It examines software architectures and programming systems for implementing reasoning, learning, searching and modelling to solve intelligent systems’ problems in the presence of incomplete information.

CSCI925  Human Computer Interaction
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is designed to help managers of information technology projects understand and appreciate issues that affect the usability and utility of software, from a user point of view, and how to ensure that introducing new software to the organization will improve work processes and increase productivity. The subject examines the design, evaluation and implementation of interactive computing systems for human use and the major phenomena surrounding them. Students will be introduced to methods and techniques used in evaluating user needs and the usability of the interactive system. They will be given the essential theoretical background to HCI approaches, methods and techniques followed by practical experience in conducting different types of usability evaluations.

CSCI926  Software Testing and Analysis
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Testing is a crucial task in the software development life cycle, and can easily exceed fifty percent of a project’s total development cost. This subject will provide students with practical software testing and analysis methods for software quality assurance. Topics may include: software qualities, static analysis methods including reviews and analysis by tools, specification-based or black-box testing techniques, structure-based or white-box testing techniques, debugging techniques, data flow analysis, model checking, automation of testing, quality assurance for Web applications, testing for software security, testing throughout the software life cycle, test management, and the psychology of testing. Practical components will include designing and implementing strategies and methods to test real-world programs effectively and efficiently.

CSCI927  Service-Oriented Software Engineering
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to provide students with a thorough understanding of the software engineering aspects of the increasingly important service-oriented computing paradigm. Topics covered include service-oriented architectures, service modeling and requirements analysis, service semantics, service discovery, service design, service composition, service inter-operation, QoS factors, service-level agreement management, business process modeling and management, lifecycle management, compliance management, distributed transaction management, privacy and trust. The subject will involve industry guest lectures and a practical development project.

CSCI928  Software Engineering Requirements and Specifications
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will demonstrate how software development can be viewed as a kind of engineering - an activity of building useful things to serve recognisable purposes. For software engineers, these useful things are a special kind of machine known as software systems. This subject emphasises the importance of understanding the application domains that software systems interact with and the problems we try to solve in these domains. The subject focuses on writing explicit and precise descriptions known as: (1) Requirements - descriptions of application domains and the problems to be solved there; (2) Specifications - descriptions of the interface between the machine and the application domain. The subject addresses techniques used to record, elicit, and reason about these descriptions. The subject examines the approach to Requirements and Specification techniques taken by a range of systems engineering methodologies. The concepts of method engineering are introduced and the role of software tools to support this activity is discussed.

<td>CSC1935</td>
<td>Computer Vision</td>
<td>Spring</td>
<td>Wollongong</td>
<td>6</td>
<td>None</td>
<td>None</td>
<td>This subject is designed to equip the student with an understanding of the fundamental tools required to analyse, design and implement computer vision systems. Topics covered include low-level, mid-level, and high-level vision; image formation; camera model and calibration, stereo vision; edge detection and segmentation; thinning and skeletonising, binary morphological operations; object recognition, image interpretation and scene understanding.</td>
</tr>
<tr>
<td>CSC1936</td>
<td>Visualisation</td>
<td>Autumn</td>
<td>Wollongong</td>
<td>6</td>
<td>None</td>
<td>None</td>
<td>This subject examines a broad range of visualisation techniques used in industry to assist researchers in analysis and interpretation of data. It introduces general techniques for the display of univariate, multivariate and vector data in one, two and higher independent dimensions. The underlying geometric computational techniques are presented as well as their application in specific fields. Topics include such areas as splines, contours, Voronoi diagrams, height fields, vector fields, atomic modelling and 3D scalar fields.; Research papers provide source material for the majority of this subject.</td>
</tr>
<tr>
<td>CSC1940</td>
<td>CS Research Methodology</td>
<td>Autumn</td>
<td>Wollongong</td>

</tbody>
</table>
**CSCI968 Network Security**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** This subject provides a survey of network security technologies and explores them in practice. This includes but not limited to, network-based threats, security failure in cryptographic and network protocols, authentication servers, certificates and public-key infrastructure, security provisions in communication protocols and standards, electronic mail security, firewalls and intrusion detection systems.

**CSCI971 Advanced Computer Security**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** This subject provides a review of computer security. Topics include: digital signatures, elliptic curve cryptography, El Gamal public key methods, the Advanced Encryption Standard (AES), Security Standards, Security Evaluation Standards, Linear Cryptanalysis, Differential Cryptanalysis.

**CSCI981 Preliminary Topics in Computer Science B**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A selection of topics will be available from time to time to serve as preliminary material in the Master of Computer Science.

**CSCI982 Preliminary Topics in Computer Science C**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A selection of topics will be available from time to time to serve as preliminary material in the Master of Computer Science.

**CSCI983 Preliminary Topics in Computer Science D**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A selection of topics will be available from time to time to serve as preliminary material in the Master of Computer Science.

**ECTE901 Multimedia Signal Processing**  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: ECTE401, ECTE996  
**Subject Description:** The aim of this subject is to extend digital signal processing knowledge gained in undergraduate courses. The contents consist of applying digital signal processing to practical applications including speech, audio, image and video processing and current research developments in these areas.

**ECTE903 Image and Video Processing**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: ECTE403  
**Subject Description:** The aim of this subject is to extend digital signal processing knowledge gained in undergraduate courses. The contents will consist of applying digital signal processing in image and video processing applications, including current research developments.

**ECTE906 Advanced Signals and Systems**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: ECTE401, ECTE996  
**Subject Description:** The aim of this subject is to provide students with fundamental theoretical and practical skills to undertake the analysis, modelling and simulation of signals and systems using Matlab and Simulink. This subject will cover analogue and digital signal representation and transformation; system function; time and frequency response; random signals and analysis; and signal processing applications.

**ECTE912 Power Electronics and Drives**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: ECTE412, ECTE925  
**Subject Description:** The aim of this subject is to provide students with an understanding of power conversion circuits using modern power switching devices and their application to equipment supplies and
ECTE923  Power System Analysis

Subject Description: The aim of this subject is to provide students with an understanding of the advanced techniques required for power systems calculations and analysis. Topics covered in this subject include: an introduction to power systems comprising thermal and hydro power stations; transmission lines and distribution systems; computer applications in power systems planning, design, control and operation; review of basic analysis tools; reactive power management; load flow and fault analysis; and transient stability and current research developments in these areas.

ECTE926  Power Distribution Systems

Subject Description: The aim of this subject is to provide students with an understanding of the design concepts and operation of electrical power distribution systems relevant to the electrical utility industry and industrial plants containing large power distribution applications. Topics covered in this subject include: an introduction to distribution system planning and automation; load modelling and calculations; system equipment modelling and selection; protection and insulation coordination; power quality and system load interaction; design of radial systems; voltage control; capacitor applications; earthing and reliability; and current research developments in these areas.

ECTE931  Real-Time Computing

Subject Description: Requirements and specification methods in real time systems, software design, development and testing cycle, timing analysis of real-time systems, classical problems, pre-emptive scheduling of periodic tasks, non pre-emptive scheduling, intractability results, resource allocation, hybrid real-time/non-real-time models, distributed real-time systems, fault tolerant systems and current research developments in these areas.

ECTE932  Computer Systems

Subject Description: The aim of this subject is to provide an opportunity for students to undertake a
major engineering project and develop their initiative. ECTE953 Advanced Project requires students to work on individual projects that may involve some background reading and analysis, the development of hardware, the development of software, or an experimental program. Where possible the projects are related to the research programs of the School and are chosen to develop the student's initiative. It will involve weekly tutorial sessions; the presentation of seminars; and writing of reports. Each student is required to deliver an oral seminar and to prepare a final thesis on the result of the work undertaken.

ECTE955 Advanced Laboratory
Autumn: Wollongong On Campus
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Exclusions: ECTE956
Subject Description: The aim of this subject is to provide students with an opportunity to apply and verify theory in areas associated with the postgraduate programs through laboratory experiments and computer studies. Students will be expected to design, and perform experiments; analyse results; and write reports on projects selected to illustrate practical issues selected from the two postgraduate programs.

ECTE956 Internet Technology Laboratory
Autumn: Wollongong On Campus
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Exclusions: ECTE955
Subject Description: This subject consists of a series of experiments, during which the students (working individually or in small groups) become familiar with recent technological developments related to the Internet and its applications. Because the experiments are current ‘hot topics’ in Internet technology, they will be updated regularly to include recent developments. These will include wireless networking, multimedia applications, remote control and operation, etc.

ECTE957 Advanced Internet Project
Autumn: Wollongong On Campus
Spring: Wollongong On Campus
Credit Points: 12
Pre-requisites: A WAM of 72.5% for 24 credit points of ECTE 900-level (including ECTE956 and ECTE991) in your first full-time session program.
Co-requisites: ECTE991
Subject Description: The aim of this subject is to provide an opportunity for students to undertake a major technology project and develop their initiative. ECTE957 Advanced Internet Project requires students to work on individual projects that may involve some background reading and analysis, the development of hardware, the development of software, or an experimental program. Where possible the projects are related to the research programs of the School and are chosen to develop the student’s initiative. It will involve weekly tutorial sessions; the presentation of seminars; and writing of reports. Each student is required to deliver an oral seminar and to prepare a final thesis on the result of the work undertaken.

ECTE962 Telecommunications System Modelling
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE462
Subject Description: The aim of this subject is to provide students with telecommunication engineering skills including skills to analyse dimension telephone exchanges, trunk lines, Internet switches and circuit and packet switched networks. Topics covered will include: telephone and data networks and systems; mixed voice and data queueing systems; optimal capacity allocation; direct and alternate routing; and current research developments.

ECTE965 Wireless Communication Systems
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE964, ECTE966, ECTE967.
Subject Description: The aim of this subject is to provide students with an understanding of the systems used in wireless communications. Topics covered include: the regulatory environment; electromagnetism fundamentals; antennas and antenna systems; near earth propagation; the multi-path propagation environment; multi-user communications in wireless systems; medium access control and mobility management mechanisms; and current research developments in these areas. Case studies will also be undertaken.

ECTE971 Robotics and Flexible Automation
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE471, ECTE472, ECTE972.
Subject Description: The subject provides the knowledge and skills required to design appropriate robotic systems for flexible automation, including the modelling, analysis, design, and deployment of a robotic manipulator and its associated sensory systems. The contents will consist of: Industrial robots, as a component arm; direct and inverse kinematics model; direct and inverse dynamic model; trajectory planning; control systems for industrial robots; tactile sensors; force sensors; ultrasound sensors; computer vision and other sensors and current research developments in these areas.

ECTE975 Communication and ICT Workplace Practice
Autumn: Wollongong On Campus
Spring: Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide an opportunity for students to develop a better understanding of the nature of generic skills and their significance in the workplace and in particular, the Australian workplace culture. It will provide students with the skills to communicate effectively - to individuals and groups - using an array of...
communication methodologies, eg. verbal, written and electronic. The development of skills to enhance employment, including the ability to identify appropriate opportunities, write applications and understand interview techniques will be a key focus of this subject.

**ECTE982 Network Engineering**

*Autumn Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE482.

**Subject Description:** ECTE982 will consider large scale IP networks. In addition to considering architectures and protocols, a key focus will be the development of analytical techniques to assist the design and performance monitoring of these networks. Topics will include: ISP architectures; BGP routing; mobile IP; IP QoS; MPLS; ATM; multimedia applications; peer to peer networking and network management; and current research developments in these areas.

**ECTE986 Telecommunications**

*Network Management*

*Spring Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE486.

**Subject Description:** The aims of this subject are to provide students with an understanding of the technical issues of telecommunications management, to provide practical hands-on experience of network configuration and management systems and to make students aware of economic, management and political issues in telecommunications management. Topics covered will include: private and public communications systems; LANs and SNMP; integration of voice, data and video in networks; general management issues; international standards; and current research developments.

**ECTE992 Internet Networking Protocols**

*Network Management*

*Autumn Wollongong On Campus*

*Spring Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE481, ECTE981.

**Subject Description:** This subject will provide students with an understanding of technologies used to provide connectivity and quality of service (QoS) on the Internet. Topics to be studied will include: CIDR; OSPF; BGP; mobile IP; DSDV; AODV; integrated and differentiated Services; traffic engineering using MPLS; and wireless QoS MACs.

**ECTE994 Wireless and Mobile Communication Systems**

*Autumn Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE465, ECTE466, ECTE965, ECTE966.

**Subject Description:** The aim of this subject is to provide a detailed overview of wireless and mobile communication systems. The following topics will be covered: mobile radio channel characterisation, channel access techniques, basic spread-spectrum techniques, principles of code division multiple access (CDMA), digital mobile networks (including, GSM and third generation mobile networks). As a special case study, this subject will cover in detail the IEEE 802.11 wireless data network standard and its effective use in a campus environment for Internet access.

**ECTE997 Web Technology and Applications**

*Autumn Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** The aim of this subject is to provide a detailed overview of web technologies and applications. The following topics will be covered: real-time streaming technologies; embedded Internet devices; web-based intelligent agent technology; web-application case studies (such as distance and flexible delivery of multimedia education, meta catalogue services etc).

**GCT9172 Introduction to Circuits and Devices**

*Annual Wollongong On Campus*

*Spring Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE172.

**Subject Description:** This subject aims to provide students with an understanding of the behaviour of basic electrical devices and circuits as used in electrical, computer and telecommunication engineering. It will provide an introduction to electrical quantities and measurements, circuit analysis and electronic devices and circuits. The practical component will cover basic electrical measuring, recording and display instruments; characteristics and measurements of circuit elements and analogue circuits.

**GCT9202 Circuits and Devices**

*Annual Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE202.

**Subject Description:** Topics covered in this subject include: dependent sources; circuit analysis techniques; simple operational amplifiers circuit analysis; feedback; generalised and complex impedance; energy storage elements L, C; natural, forced and complete response of first and second order circuits; phasors; frequency response; Bode plots; Laplace Transform and Fourier series; and magnetically coupled circuits.

**GCT9203 Signals and Systems**

*Spring Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** ECTE203.

**Subject Description:** The aim of this subject is to provide students with an introduction to electrical signals, systems and signal processing. This subject introduces the basic concepts in signal and linear system analysis in both...
continuous-time and discrete-time domains. It covers mathematical representation of signals; convolution; time-domain analysis of linear time invariant systems (LTI); analysis of continuous-time LTI systems using Laplace transform; analysis of discrete-time LTI systems using the z-transform; Fourier analysis of continuous-time and discrete-time signals and systems; sampling and aliasing.

GCT9212 Electronics
Spring   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to provide students with an opportunity to develop an understanding of electronic circuit design using operational amplifiers as building blocks and with an ability to analyse circuits using conventional methods. Topics covered include: the use of operational amplifiers in circuits eg. inverting and non-inverting amplifiers, small signal (unity bandwidth and gain-bandwidth product) and large signal ( slew rate) frequency response of non-ideal operational amplifiers in inverting and non-inverting configurations; adders, filters/oscillators, instrumentation amplifiers, comparators, rectifiers, clippers, Analog to Digital and Digital to Analog circuits; the terminal characteristics of devices and their use in linear (amplifiers) and non-linear circuits eg. biasing and ac models (low and high frequency, characterising amplifiers, the Miller Effect and Miller Multiplier for the case of transistor circuits) for operational amplifiers and discrete circuit transistors, diodes/Zener diodes, transistors (MOSFETs, BJTs - including large signal Ebers-Moll Model); integrated transistor circuits for MOSFETs using active loads; combining devices into amplifiers eg. differential pairs, cascode and Darlington connections, Sziklai pairs, current sources and mirrors, push-pull; high frequency amplification and appropriate equivalent circuit models.

GCT9222 Power Engineering 1
Spring   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The topics covered in this subject include: typical power system loads; basic structure of a power system; electric power generation; single and three phase systems; power system equipment: transformers, switchgear and protection; installation practice: voltage drops, power factor correction, tariffs, safety, earthing, protection equipment rating; power quality; system disturbances, equipment susceptibility, improvement and instrumentation; and introductory power electronics.

GCT9233 Digital Hardware 1
Autumn   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE233
Subject Description: Topics covered in this subject include: combinational logic, simplification of logic expressions, Karnaugh maps; sequential logic, flip-flops, registers, clock, timing and synchronisation problems; sequential machines, Mealy and Moore machines, timing diagrams and state tables; and programmable logic array and programmable logic controllers.

GCT9282 Internet Systems
Autumn   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE282
Subject Description: This subject will examine Internet protocols, technologies and performance issues. In particular, the link layer technologies that underpin the Internet will be considered. Topics include: TCP/IP, IP Addressing, Address Resolution Protocol (ARP), Asynchronous Transfer Mode (ATM), Ethernet, Gigabit Ethernet, Frame Relay, Congestion Control/Flow Control. The role of various standards bodies, eg. Internet Engineering Task Force (IETF) and the International Telecommunications Union (ITU), will be examined. Laboratory exercises will illustrate the operation of key Internet protocols.

GCT9283 Internet Technology 2
Spring   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE283
Subject Description: This subject examines recent Internet developments, particularly in access systems, quality of service deployment and scalable architectures. Emerging applications, such as Internet Telephony will be studied in depth, as well as the protocols that underpin them (eg. routing). Topics include: OSPF, BGP4, Mobile IP, Simple Network Management Protocol (SNMP), Gnutella, end-to-end QoS streaming technologies, H.323 and SIP. Advanced laboratory exercises are used to illustrate the operation of various internet protocols.

GCT9301 Digital Signal Processing
Autumn   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE301
Subject Description: In this subject the following topics will be covered: review of discrete-time signals and linear time-invariant systems; digital processing of continuous-time signals; introduction to random signals, correlation and matched filtering; FIR and IIR. Digital filters and their analysis in the z- and in frequency domains; the DFT (discrete Fourier transform) and its applications; FFT algorithms; FIR and IIR digital filter design and implementation techniques; spectrum analysis and estimation using windows; and practical applications of DSP algorithms.

GCT9323 Power Engineering 2
Spring   Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE323
Subject Description: In this subject the topics of induction and d.c. machines; elements of electric motor drives; and power electronics will be covered.

GCT9331 Embedded Java Systems
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE331
Subject Description: This subject is designed to enable students to deploy Java for programming embedded systems, both with and without user interfaces. The subject will consider Java (both Micro and Standard Editions) for embedded systems. In particular, material will address embedded devices such as mobile phones, and internet aware microcontroller systems. The subject initially familiarises the students with the fundamentals of programming in Java, using appropriate IDEs (eg. Eclipse and NetBeans) and tools such as ANT. It introduces the application of Java in embedded systems concentrating on the use of J2ME and J2SE on systems that do not support the full J2SE, e.g., real-time Java enabled platforms such as TINI boards and MIDP 2.0 devices. A laboratory will provide students with guided experiments that investigate the limitations and opportunities of Java programming on restricted user devices and platforms.

GCT9333 Digital Hardware 2
Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE333
Subject Description: In this subject the following topics will be covered: computer architecture; central processing unit; memory (ROM and RAM); input/output devices; basic computer organisation; binary data and instruction codes; machine and assembly languages – instruction set; direct and indirect addressing; building computer systems from commercially available parts such as micro-processors and micro-controllers; static and dynamic memory; A/D and D/A converters; digital I/O; and serial communication integrated circuits. Students will also be required to become proficient at interfacing a micro-controller with digital hardware and writing programs to control the hardware.

GCT9344 Control Theory
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE344
Subject Description: Topics covered in this subject include: mathematical modelling of physical systems; signal flow and state space representation of systems; steady state and transient analysis; root locus; frequency response analysis using Nyquist and Bode; design of PID, lag, lead, controllers using Bode and root locus methods; and multiloop control.

GCT9363 Communication Theory
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE363
Subject Description: This subject aims to provide students with an understanding of the basics of modern communications systems. Topics covered include: baseband signalling, including transmission through band-limited channels; and band-pass signalling, incorporating digital modulation techniques.

GCT9364 Data Communications
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE364
Subject Description: Topics covered in this subject include: basics of data communications; fundamentals of computer networks; fundamentals of information theory; error correction techniques; parallel and serial communications; packet switching; layered protocols; network types and topologies (fixed and wireless); access protocols and source coding.

GHD978 Statistics in Health Research
Spring Wollongong On Campus
Spring Wollongong Distance
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE331
Subject Description: This subject is designed to enable students to deploy Java for programming embedded systems, both with and without user interfaces. The subject will consider Java (both Micro and Standard Editions) for embedded systems. In particular, material will address embedded devices such as mobile phones, and internet aware microcontroller systems. The subject initially familiarises the students with the fundamentals of programming in Java, using appropriate IDEs (eg. Eclipse and NetBeans) and tools such as ANT. It introduces the application of Java in embedded systems concentrating on the use of J2ME and J2SE on systems that do not support the full J2SE, e.g., real-time Java enabled platforms such as TINI boards and MIDP 2.0 devices. A laboratory will provide students with guided experiments that investigate the limitations and opportunities of Java programming on restricted user devices and platforms.

GCT9331 Embedded Java Systems
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE331
Subject Description: This subject is designed to enable students to deploy Java for programming embedded systems, both with and without user interfaces. The subject will consider Java (both Micro and Standard Editions) for embedded systems. In particular, material will address embedded devices such as mobile phones, and internet aware microcontroller systems. The subject initially familiarises the students with the fundamentals of programming in Java, using appropriate IDEs (eg. Eclipse and NetBeans) and tools such as ANT. A laboratory will provide students with guided experiments that investigate the limitations and opportunities of Java programming on restricted user devices and platforms.

GCT9333 Digital Hardware 2
Annual Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE333
Subject Description: In this subject the following topics will be covered: computer architecture; central processing unit; memory (ROM and RAM); input/output devices; basic computer organisation; binary data and instruction codes; machine and assembly languages – instruction set; direct and indirect addressing; building computer systems from commercially available parts such as micro-processors and micro-controllers; static and dynamic memory; A/D and D/A converters; digital I/O; and serial communication integrated circuits. Students will also be required to become proficient at interfacing a micro-controller with digital hardware and writing programs to control the hardware.

GCT9344 Control Theory
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE344
Subject Description: Topics covered in this subject include: mathematical modelling of physical systems; signal flow and state space representation of systems; steady state and transient analysis; root locus; frequency response analysis using Nyquist and Bode; design of PID, lag, lead, controllers using Bode and root locus methods; and multiloop control.

GCT9363 Communication Theory
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ECTE363
Subject Description: This subject aims to provide students with an understanding of the basics of modern communications systems. Topics covered include: baseband signalling, including transmission through band-limited channels; and band-pass signalling, incorporating digital modulation techniques.
including: Strategy formulation and implementation; e-branding; service leadership; economics and industry impacts of e-business and Internet effectiveness.

**IACT918 Corporate Network Management**
*Not on offer in 2009*

| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**Subject Description:** The subject investigates the documentation and management of telecommunications networks. Topics to be covered include: 1. Documenting the Network: requirements capture and specification, functional specification, design specification, documenting the network configuration. 2. Managing the Network: influences on the network, management architectures and standards, performance management, fault management, disaster management, managing changes in a network, cost minimisation management. 3. Corporate and Regulatory Requirements: management teams, operations and support, standards and protocols.

**IACT999 Emerging Topics in Information Technology**
*Not on offer in 2009*

| Credit Points: | 6 |
| Pre-requisites: | IACT901 plus 36 credit points @ 900 level |
| Co-requisites: | None |

**Subject Description:** This subject is concerned with the emerging issues involved in the analysis, design, development and implementation of a corporate-wide information system. Students will complete an individual project/business case related to the strategic use of IT in an organization. Students are required to apply their experience and knowledge from previous subjects, as well as a set of research methods to prepare a report and presentation. Projects will be undertaken individually and specific topics will be selected based on the student’s chosen elective stream and interests. The subject also provides students with enhanced communication and project management skills.

**INFO911 Data Mining and Knowledge Discovery**

| Spring Wollongong On Campus |
| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**Subject Description:** Introduction to Data Mining and Knowledge Discovery, Data Bases and Warehouses, Data Structures, Exploratory Data Analysis Techniques, Association Rules, Artificial Neural Networks, Tree Based Methods, Clustering and Classification Methods, Regression Methods, Overfitting and Inferential Issues, Use of Data Mining packages.

**INFO912 Mathematics for Cryptography**

| Autumn Wollongong On Campus |
| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**INFO933 Pattern Recognition**

| Autumn Wollongong On Campus |
| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**Subject Description:** This subject is designed to equip the student with an understanding of the fundamental tools required to analyse, design and implement pattern analysis and recognition systems. After a review of mathematical foundations the subject introduces data clustering, the statistical Bayesian decision theory, parameter estimation (Bayesian and maximum likelihood), linear discriminant functions, supervised and unsupervised learning.

**ISIT900 Fundamentals of Contemporary Technologies**

| Autumn Wollongong On Campus |
| Spring Wollongong On Campus |
| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**Subject Description:** This subject aims to develop academic skills relevant to postgraduate studies and to equip the student with an understanding of the fundamental tools required to analyse, design and implement pattern analysis and recognition systems. After a review of mathematical foundations the subject introduces data clustering, the statistical Bayesian decision theory, parameter estimation (Bayesian and maximum likelihood), linear discriminant functions, supervised and unsupervised learning.

**ISIT901 Information Systems Strategic Planning**

| Spring Wollongong On Campus |
| Credit Points: | 6 |
| Pre-requisites: | None |
| Co-requisites: | None |

**Subject Description:** The subject is essentially about the application of technology for competitive advantage. Throughout the subject, the spotlight will be trained on techniques and frameworks for ‘thinking strategically about a company’s technological orientation’. A wide spectrum of business and technology issues will be covered that address the problems and issues surrounding the analysis and development of an IT strategic plan.
ISIT903 Enterprise Architecture Design
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The principle purpose of architecture is to translate strategy into infrastructure. An architecture provides a blueprint for translating business strategy into a plan for IS. An infrastructure is everything that supports the flow and processing of information in an organization, including hardware, software, data, network components and their supporting staff and facilities from the application level to the inter-organisational level. This subject includes an exploration of enterprise architecture concepts, case studies and frameworks.

ISIT904 Systems Integration
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to provide students with a broad knowledge of integrating individual disparate information system into a seamless enterprise information system. The subject will examine system integration in various perspectives from social, corporate to technical solutions. The student will learn to study system integration in the context of middleware models, tools and techniques. The student will learn to apply appropriate technology for integrating a new enterprise information system into existing systems.

ISIT905 Technology Management and Innovation
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT905
Subject Description: The rapid development of information technology networks has prompted governments to develop national policies to promote the growth of services in these areas. Innovation in information technology and its effective use is now seen to underpin international competitiveness. Successful innovation policies are now central to the future viability of industry and nations alike. This subject addresses key themes such as: the importance of innovation to the economy and the firm; the links between information, information technology and innovation; and, the development of effective national policies to promote industrial innovation. Issues such as the role of multinationals, transborder data flows and research and development are discussed in this context.

ISIT906 Information Design and Content Management
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the use of information in organisations and how that information is acquired and represented using the latest information modelling techniques. The subject has a focus on the use of Web technologies to manage and access information. It addresses the growing need for systematic approaches to Content Management and document management.

ISIT908 IT Governance
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Information Technology (IT) is pervasive in today's organisations, playing a critical role in achieving business goals and enabling lower cost structures, new levels of customer service, new products, new markets and new external stakeholders. Whereas in the past IT decisions were delegated to the IT organisation, all managers are today required of not only making better IT decisions, with confidence and competence, but also implementing and monitoring IT initiatives more effectively than their competitors. This course will explore IT governance theory and practice, including decision rights and internal control frameworks, to prepare students for the globally competitive workplace.

ISIT909 Advanced Business Process Management
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: BUSS909, ISIT409
Subject Description: The subject examines the specification, customisation and usage of multimodel document management and workflow with an emphasis on the integration of systems, people and communication to improve productivity in organisations.

ISIT910 IT-enabled Supply Chain Management
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT910, ISIT905
Subject Description: Information technology (IT) enabled supply chains are transforming the modern business landscape. Lectures in this subject will show how IT is being used to create and support operational and strategic supply chain advantages. Laboratory activities will provide hands-on knowledge of the application of enterprise software (e.g., SAP), freight audit and payment software and how radio frequency identification (RFID) is being applied in supply chains around globe.

ISIT916 Organisational Issues & Information Technology
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT916, ISIT416
Subject Description: This subject aims to provide the student with an understanding of issues related to the combination of management, workers and information technology. Students will gain an appreciation of the complexity of the issues involved in decision making when people and technology are concerned. Students
will also develop an understanding across commerce and industry of the parallels that exist in the development, implementation and application of information and communication technology. Effect on organisational information flows of growth in size and complexity: the management and technological response; Information technology as a catalyst in codifying work procedures and creating new organisational structures; Hierarchical versus horizontal approaches to information management; Management theory and IT; Industrial use of IT and parallels with office sector usage. Implications of broadband networks for traffic integration and subsequent application in commerce and industry.

ISIT917 Business Intelligence and Knowledge Management

Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT917

Subject Description: This subject focuses on the importance of information as a resource, on which the knowledge base of successful organisations is dependent. While the main focus of the subject is information management within the organisation, a broader context is important. National and international issues relating to information access will be addressed. These include: standards relating to electronic storage and retrieval of electronic documents (digital archiving); legal protection for information as an economic good (for example as patents, copyright and other forms of intellectual property); and social and ethical issues (eg privacy and security) relating to information management.

ISIT918 Strategic Network Management

Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT918

Subject Description: The subject investigates the documentation and management of telecommunications networks. Topics to be covered include 1. Documenting the Network: requirements capture and specification, functional specification, design specification, documenting the network configuration 2. Managing the Network: influences on the network, management architectures and standards, performance management, fault management, disaster management, managing changes in a network, cost minimisation management 3. Corporate and Regulatory Requirements: management teams, operations and support, standards and protocols.

ISIT924 Simulation and Modelling

Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: BUSS924

Subject Description: This subject aims to introduce the concepts of systems modelling and simulation, and its role in analysing the operation characteristics of a system for supporting management in decision making. Both discrete and continuous systems modelling and simulation will be covered.

ISIT925 Strategic Network Design

Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT924

Subject Description: The subject investigates the design and implementation of a telecommunications network plan. Topics to be covered include (1) The Need for Planning and the Planning Process: planning teams, strategic planning, the network plan, security planning and implementation planning. (2) The Design Process: design teams, translating the plan into design criteria, requirements capture and specification, design requirements and criteria, choosing topographies and architectures, evaluating plans (3) The Implementation Process: implementation teams, validating implementation plans, managing people and technology, managing the implementation process.

ISIT929 Concepts and Issues in Healthcare Computing

Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS929

Subject Description: This subject examines the essential concepts of health computing, limitations of technology, issues of privacy and security, economics of healthcare computing, managing healthcare computing projects, evaluation methods in medical informatics, risk assessment in health informatics and the important issues involved in computer applications in healthcare.

ISIT930 Introduction to Health Informatics

Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS930

Subject Description: This subject covers clinical decision making and decision support systems and how health informatics and health information systems can assist. Topics include decision-making and decision-support systems in healthcare; knowledge engineering in health informatics, the reasons for the necessity of systematically processing data, information and knowledge in medicine and healthcare; benefits and constraints of using information and communication technology healthcare systems; patient management; primary care systems and knowledge management.

ISIT937 Information Technology Security and Risk Management

Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS937

Subject Description: This subject aims to provide students with a deep understanding of the
security, risk management and regulatory aspects of e-commerce facing businesses in the on-line business environment. Today most businesses compete in a global business environment; a sound business strategy that addresses these issues is essential. This subject covers key issues in e-commerce, including: security options, trusted authorities, secure payment systems for the Internet, the regulatory environment and Government policy; risk management and control.

ISIT938 eBusiness Technologies
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS938

Subject Description: The subject explores the technology being adopted by organisations and the various means of maximising business potential using Internet technology, including eBusiness (B2B, B2C, B2G etc.). The focus of the course is from the IT professional perspective, giving the student a feel for what is required in a commercial business environment. The technology aspects will cover both developing in house software, as well as selecting ‘best practice’ outsourced options. Comparisons are drawn between the two adoption methods, and the student is engaged by scenario role playing as part of the group assignments.

ISIT940 IT Research Methods
Autumn  Wollongong  On Campus
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: IACT940

Subject Description: This subject introduces students to research methodology. Topics include the purpose of research, formulating a research question, conducting a literature review and writing a research proposal. Students will gain an understanding of the different research methodologies, including quantitative and qualitative analysis. Students will learn how to design an appropriate research plan. Requirements for scholarly writing will also be discussed and the process of undertaking a research project will be analysed. The subject provides an introduction to the research process for students undertaking Honours and postgraduate research projects in the School of Information Technology and Computer Science.

ISIT945 Information Systems Project
Annual  Wollongong  On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Exclusions: BUSS945

Subject Description: The aim of this subject is to provide students with the opportunity to study a topic of research interest either within a staff research group in the Information Systems Discipline. The project will be completed under staff supervision and culminates in the production of a substantial written report plus other products such as computer software as appropriate to the project. The subject aims to provide students with the opportunity under staff guidance to investigate research an area or topic of interest in-depth in the IS Discipline; gain experience in the use of one or more methods, techniques and/or tools of one or more applicable research paradigms; gain experience in organising and using their time and efforts within specified constraints to produce a major piece of work in the form of a final report.

ISIT946 Project and Change Management
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: BUSS953

Subject Description: This subject provides an introduction to, and overview of, the knowledge and skills required to successfully manage computer-based systems development projects within an organisational setting. Topics and issues considered include: Information Systems project management and its organisational context; inter-organisational arrangements for e-business including B2B and B2C frameworks, project management tools and techniques; feasibility study methods; resource estimation techniques; behaviour and management of Information Systems project groups; systems development environments for professionals and end-users; quality assurance; project and system evaluation.

ISIT950 Systems Development Methodologies
Autumn  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS951

Subject Description: This subject provides an introduction to and overview of systems development methodologies for both historical and philosophical perspectives; an introduction to frameworks and issues which may be used to assess and compare different system development methodologies; an introduction to and comparison of the tools and techniques of a selection of systems development methodologies and the phases and stages of the systems development life cycle to which they are applicable and the opportunity to gain some in-depth knowledge of selected methodologies, techniques, tools, frameworks or issues via assignments.

ISIT951 Web Services and Service Oriented Architecture
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS951

Subject Description: Web Services are at the core of what is being termed the next generation of eBusiness. The term ‘Web Services’ refers to the set of standard protocols and associated technologies that enable software applications to communicate with each other across the Internet. To effectively exploit the potential of Web Services requires appropriate effort in the proper design of business processes and service architectures.

ISIT991 Special Topics in IS and IT A
Autumn  Wollongong  On Campus
Credit Points: 6
and implementation, and introduction to security issues. Graphics, networking, threads), object oriented design language, subset of Java class libraries (windowing, document OO applications. Topics will include topics in the application of information and communication technology. IT is a rapidly changing area. This subject will allow investigation into topics at the forefront of the discipline.

**ISIT992 Special Topics in IS and IT B**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** Topics will be selected from areas of interest of staff members or visiting staff members to the School. These will include topics in the application of information and communication technology. IT is a rapidly changing area. This subject will allow investigation into topics at the forefront of the discipline.

**ISIT998 Information Technology Research Report**  
Spring Wollongong On Campus  
Spring2009/Autumn2010 Wollongong On Campus  
Credit Points: 12  
Pre-requisites: IACT940 OR, ISIT940 Also see Additional Information section of this site  
Co-requisites: None  
Exclusions: None  
**Subject Description:** This subject involves undertaking a project. Where possible the projects are related to the research interests of the School and/or staff and are chosen to develop the student's research skills. Each student is required to deliver an oral seminar and to prepare a final thesis on the result of the work undertaken.

**ITCS907 Java Programming & Object Oriented Design**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: None  
**Subject Description:** This subject provides: 1. an introduction to the Java language and some of its standard class libraries 2. experience with object oriented design and implementation techniques 3. the use of UML to document OO applications. Topics will include: Java language, subset of Java class libraries (windowing, graphics, networking, threads), object oriented design and implementation, and introduction to security issues.

**ITCS937 Security, Risk Management and Control in Electronic Commerce**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** This subject aims to provide students with a deep understanding of the security, risk management and regulatory aspects of e-commerce facing businesses in the on-line business environment. Today most businesses compete in a global business environment; a sound business strategy that addresses these issues is essential. This subject covers key issues in e-commerce, including: security options, trusted authorities, secure payment systems for the Internet, the regulatory environment and Government policy; risk management and control.

**ITCS945 Multimedia Project**  
Not on offer in 2009  
Credit Points: 12  
Pre-requisites: 24 cp of subjects from Master of Digital Multimedia with >= 75% average  
Co-requisites: None  
**Subject Description:** This subject involves undertaking a project in an area of multimedia. Projects will be closely aligned to the content of the subjects in the Master of Multimedia, and related to the research interests of the staff. They will be chosen to develop the student's research skills. Each student will deliver a seminar on a recent paper in the area of their project. Also, each student will prepare a final thesis and deliver a multimedia seminar about the work undertaken.

**ITCS949 Industry-based Information Technology Project**  
Not on offer in 2009  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** This subject requires that students combine an industry-based working environment with their academic studies, i.e., students will synthesise materials drawn from other subjects within the degree currently being studied; they will apply this synthesis to an in-depth investigation of a complex problem; and they will devise or recommend creative and appropriate solutions to the problem. This will typically take the form of undertaking a substantial industry-based Information Technology project related to their employment within the Information Technology sector. The projects are to be closely aligned with current developments in Information Technology, ideally associated with project development or management. Project proposals from students must identify the area of study, and show how this relates to the course and why it is important; describe a plan for conducting the project, including consideration of appropriate methodology and techniques; and describe the anticipated results and products. Students are required to deliver an oral seminar and to prepare a final thesis on the result of the work undertaken. An academic supervisor will be appointed for each student, who will maintain frequent contact with the student throughout the project.

**ITCS950 Patterns for eBusiness**  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** This subject explores advanced "pattern-oriented" approaches to the design and development of eBusiness solutions. The 'Patterns for eBusiness' initiative provides a conceptual framework that can be exploited at all stages in the eBusiness software lifecycle. In particular, this conceptual framework and vocabulary bridges the communications gap between business analysts and systems developers seeking to devise integrated solutions for eBusiness.
MATH902 Solution to Differential Equations By One-Parameter Groups
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: One-parameter groups and Lie series, linear ordinary differential equations, first and second order ordinary differential equations, linear and non-linear partial differential equations.

MATH941 Financial Calculus
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with MATH317
Subject Description: MATH941 is designed to develop practical skills in numerical and computational mathematics to solve problems that have no analytic solution. Various numerical techniques, such as Newton's iteration method, finite difference and finite element methods, for solving algebraic as well as differential equations are discussed. Methods that are particularly of interest for finance problems such as the Monte Carlo method and the binomial method are also studied.

MATH942 Numerical Methods in Finance
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: Not to count with MATH321
Subject Description: MATH942 is designed to develop practical skills in numerical and computational mathematics to solve problems that have no analytic solution. Various numerical techniques, such as Newton's iteration method, finite difference and finite element methods, for solving algebraic as well as differential equations are discussed. Methods that are particularly of interest for finance problems such as the Monte Carlo method and the binomial method are also studied.

MATH943 Practitioners' Seminars
Annual Wollongong On Campus
Spring 2009/Autumn 2010 Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: MATH943 is designed to allow students enrolled in Master of Financial Mathematics to develop a knowledge base for the state-of-the-art technology and skills required in business and finance. Leading experts in industry relate first-hand experiences of problems and techniques that arise in the financial industry. Students will be required to attend each seminar and discuss the topics presented.

MATH972 Advanced Topics in Applied Mathematics B
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics will be selected from the areas of interest of staff members or visiting staff members of the School.

MATH973 Advanced Topics in Pure Mathematics A
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics will be selected from the areas of interest of staff members or visiting staff members of the School. These may include topics in Analysis, Algebra, Logic or Number Theory.

MATH974 Advanced Topics in Pure Mathematics B
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Topics will be selected from the areas of interest of staff members or visiting staff members of the School. These may include topics in Analysis, Algebra, Logic or Number Theory.

MATH977 Advanced Topics in Mathematics A
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: MATH188

MATH978 Advanced Topics in Mathematics B
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: MATH188

MATH980 Preliminary Topics in Mathematics A
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A selection of topics will be available from time to time to serve as preliminary material in the Master of Mathematics.
MATH981 Preliminary Topics in Mathematics B
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A selection of topics will be available from time to time to serve as preliminary material in the Master of Mathematics.

MATH982 Preliminary Topics in Mathematics C
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: MATH188

MATH989 Project Part 1
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: MATH188

MATH990 Project Part 2
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: MATH188

MATH991 Project
Annual Wollongong On Campus
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None

MCS9102 Information Systems
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS905
Subject Description: This subject will have 3 integrated strands: a) an overview of all the major Information Systems found in a typical business b) an introduction to essay and report writing at University level c) laboratory exercises to develop skills with office automation tools (e.g. Word, Excel, Access). Strand a) covers systems such as finance, HR, payroll, inventory, sales, CRM, SCM, ERP etc.It also introduces the Systems Development Lifecycle, several systems analysis and design techniques, and basic database concepts

MCS9103 Algorithms and Problem Solving
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces the basic concepts of algorithms and their relationship to data structures and problem solving. This subject emphasises problem solving techniques leading to the development of algorithms rather than their implementation or a formal mathematical treatment of algorithms. Topics include sorting, searching and counting problems and the principal algorithms used in their solution. Common approaches to algorithm development and analysis will be examined.

MCS9114 Procedural Programming
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS901
Subject Description: This subject introduces the procedural approach to program design and implementation. Covers basic language constructs for defining variables of built-in types, flow control constructs and simple I/O. Explores functional decomposition as a design technique, and the implementation of functions. Introduces simple user-defined data types and aggregates.

MCS9124 Applied Programming
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: MCS9114 & MCS9103
Co-requisites: None
Exclusions: ITCS902
Subject Description: This subject develops a thorough understanding of program design using data structures. It extends MCS9114 and presents pointers, dynamic memory management and exception handling. Other topics include implementation of Sorting and Searching Algorithms including the use of typedefs, void pointers and indexes to generalise algorithms; Implementation of data structures: queues, stacks, linked lists, dequeues, trees; Use of arrays as an implementation structure - hashing, radix sort, heaps and Heapsort; Random Access files and internal I/O; Testing of programs: black and white box testing, and the use of debuggers; Use of multi-file organisation in encapsulation and data hiding, with make files; These concepts will be treated through formal lectures, tutorials, assignments and laboratory sessions employing an object oriented language.

MCS9201 Professional Practice & Ethics
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: ITCS908
Subject Description: This subject provides students with a real-world approach to Information and Communication Security Issues. Both managerial and technical aspects are addressed. The subject will cover the need for security, professional and regulatory considerations, security technology, physical security, information security, and personnel issues. Students will be required to engage in problem solving activities that apply the principles learned in the subject, and will also be required to acquire knowledge of current practice and technologies.

MCS9203 Algorithms and Data Structures
Autumn Wollongong On Campus
Credit Points: 6
Pre-requisites: MCS9124 or ITCS902
Co-requisites: None
MCS9204 Object and Generic Programming in C++

**Subject Description:** Approaches to analysing algorithm complexity, introduced in earlier subjects, will be reviewed. The use of abstract data types as a design technique, and their implementation in solutions to problems, will form a large part of the subject. The concept of efficient code and ways to measure efficiency (both empirically, by timings, and theoretically) will be studied.

**Exclusions:** ITCS903

**Credit Points:** 6

**Pre-requisites:** MCS9124 or ITCS902

**Co-requisites:** None

**Subject Description:** This subject develops a thorough understanding of the object-oriented approach and introduces such object concepts as encapsulation, inheritance, polymorphism and runtime binding. This is complemented by an introduction to object-oriented design, with UML representations at the program level. Templates are introduced as a method of achieving generalisation. Container classes and the Standard Template Library are presented as examples of generic programming.

**MCS9205 Software Development Methods & Tools**

**Exclusions:** Not to count with ITCS903

**Subject Description:** This subject provides an introduction to the process of design and analysis of software. Students will receive a formal introduction to the software design process and techniques, pattern design and reuse, as well as general approaches of interface design. A UML supporting tool will be used for practice of object oriented development approach.

**Credit Points:** 6

**Pre-requisites:** MCS9124

**Co-requisites:** None

**Exclusions:** ITCS917

**MCS9206 Markup Languages**

**Exclusions:** ITCS201 or ITCS206

**Subject Description:** XML (eXtensible Markup Language) can be regarded as a language for creating other languages. In this capacity XML has rapidly become ubiquitous in very many diverse areas of IT and is now regarded as an essential core area of knowledge for every IT practitioner. The primary aims of this subject are to enable students to acquire practical proficiency in exploiting XML and to be able to explain the relevance of XML for many IT and Business contexts. In addition to being a new area of study, by studying XML students can extend or re-enforce their understanding of related study areas, e.g., the students can develop their understanding of data modelling and object-orientation (via XML schemas and XML transformations). As a secondary aim (a minor but relevant part of the subject) the subject will provide a basic practical proficiency in manipulating HTML and hence construction of elementary web pages.

**MCS9212 Interacting Systems**

**Subject Description:** The subject develops an understanding of the operating system and tools from a programmer's viewpoint. Topics covered include the file system, processes, communication and tools. In particular, access, security, organisation, operating system effect on performance of a program, support, control; process and interaction, inter-process communication; use of shell scripts and commands to enhance problem solving; tools for development process; program paradigms: parallel, distributed, etc.

**Exclusions:** ITCS909

**Credit Points:** 6

**Pre-requisites:** (MCS9102 or ITCS905) and MCS9124

**Co-requisites:** None

**MCS9213 Java Programming and Applications**

**Exclusions:** ITCS907

**Subject Description:** This subject provides: 1. an introduction to the Java language and some of its standard class libraries; and 2. experience with object oriented design and implementation techniques. Topics covered will include: use of a Java Integrated Development Environment, Java language, subset of the standard Java class packages (Standard Edition: windowing, graphics, TCP/IP networking, threads, database access, applet, media), security issues with portable code, Java 'Micro Edition' (ME) and its associated packages and applications. Development of applications for different environments.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** MCS9124

**MCS9235 Database Systems**

**Subject Description:** This subject investigates three major areas of modern database systems: 1. design of relational databases 2. programming of relational databases 3. concurrency control and data recovery in database systems. Topics will include: Introduction to conceptual database modelling; Principles of relational database model; Structured Query Language (SQL) and its procedural extensions (PL/SQL, Embedded SQL, JDBC); Database server programming; Normalisation of relational databases; and Transaction management and recovery in database systems.

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**MCS9301 Information and Communication Security**

**Subject Description:** This subject provides students with a real-world approach to Information and Communication Security Issues. Both managerial and technical aspects are addressed. The subject will cover the need for security, professional and regulatory considerations, security technology, physical security, information security, and
personnel issues. Students will be required to engage in problem solving activities that apply the principles learned in the subject, and will also be required to acquire knowledge of current practice and technologies.

**MCS9303 Social Informatics and the Workplace**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: None  
Subject Description: The impact of IT in the workplace extends far beyond the computer. This subject explores the issues of employee monitoring, outsourcing and business practices, equality and ethics, from the perspectives of employer and employee. From real world examples, this subject draws on current issues in these areas to enable students to explore issues that are likely to be faced upon entering employment.

**MCS9315 Database Design and Implementation**  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject investigates the process of relational database design starting from conceptual database design, through logical database design up to and including physical database design, database tuning and administration. The topics will include conceptual database design based on Object Modelling Technique, methodologies for conceptual design, view integration, logical database design, database normalization and de-normalization, physical database design, generation of database applications, database tuning, design of distributed database systems.

**MCS9317 Database Performance Tuning**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The subject addresses the performance problems of relational database systems. In particular, it presents optimisation of query processing in relational database systems, performance tuning of database applications, transaction processing in database systems, optimisation of transaction processing, performance tuning of relational database servers, performance tuning of three tier database applications. Laboratory classes demonstrate the techniques used for elimination of performance problems in database systems. Oracle 9i database management system is used for demonstration purposes and all practical work in the subject.

**MCS9318 Software Engineering Practices & Principles**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: CSCI518, CSCI425, CSCI925  
Subject Description: This subject examines the current state of software engineering both as an academic discipline and as a profession. The subject focuses on issues of requirements engineering, system procurement, and professional practice, and through case studies, the subject considers reasons for the failure and success of various software engineering projects. Topics which may be covered include: Requirements Elicitation, Functional and Non-Functional Requirements, Design Patterns and Refactoring, Reverse Engineering, Software Quality Assurance, Analysis and Verification of Specification and Design, Examples of Formal Techniques in Software Engineering.

**MCS9319 Distributed Systems**  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject introduces basic concepts of inter-networking and distributed systems. Physical communications media are introduced, then the focus shifts to network protocols (TCP/IP), then client-server model and the sockets interface. Other topics to be covered include network addressing and security (firewalls). Real-world programming examples from Unix and Windows-NT environments will be presented. Students will undertake laboratory exercises on Linux-based PCs.

**MCS9322 Systems Administration**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject will cover the practical and theoretical aspects of system administration. The various resource areas which have to be managed will be discussed and examined, and the possible methods of monitoring and controlling them in various systems will be investigated. The features unique to both single processor and networked systems will be investigated.

**MCS9323 Artificial Intelligence**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject reviews the main components of Artificial Intelligence research including knowledge representation, reasoning, natural language understanding, and perception. Focuses on Expert Systems and the computational models they embody. Introduces the programming languages Lisp and Prolog.

**MCS9324 Human Computer Interface**  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject examines the design evaluation and implementation of interactive computing systems for human use (HCI) and the major phenomena surrounding them. Also considered are joint performance of tasks by humans and machines, structure of human machine communication, social and organizational interactions with machine design,
human capabilities to use machines including their learnability as well as algorithms and programming of the interface itself, engineering concerns that arise in designing interfaces, the process of specification design and implementation of interfaces and design tradeoffs.

**MCS9330 Operating Systems**
- **Spring** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** MCS9212
- **Co-requisites:** None
- **Exclusions:** CSC1231

**Subject Description:** This subject develops a thorough understanding of the principles and concepts of modern computer operating systems. Topics covered will broadly include: process management, resource allocation, OS kernel, memory management, concurrency and file systems. Specifically the subject will include discussions on, process concept, synchronisation, concurrency control, threads, inter-process communication, deadlock prevention, and detection, micro and monolithic kernels, multi-tasking, interrupt handling, system and user processes. System calls, problems of allocation, protection and sharing, memory mapping schemes, CPU scheduling algorithms, real-time scheduling, naming and directory schemes, disk space allocation, file protection and access control and operating system security.

**MCS9337 Organisation of Programming Languages**
- **Spring** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** MCS9124
- **Co-requisites:** None

**Subject Description:** This subject develops an understanding of major programming paradigms including imperative, functional, logical, object-oriented, and procedural paradigms. Introduces formal language specification. Covers language definition and syntax; data types and data structures, control structures and data flow; run-time considerations; and interpreted languages.

**MCS9361 Cryptography and Secure Applications**
- **Autumn** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** (CSCI204 or CSCI213) plus 6cp of 200-level CSCI subjects
- **Co-requisites:** None

**Subject Description:** This subject develops the skills and knowledge necessary to identify and address security problems in a variety of simple communication models. Topics covered include: Classical cryptology, Modern secret key cryptography including block (DES, AES) and stream ciphers (RC4), security properties (authentication, integrity, confidentiality, availability), public key cryptography (knapsacks, RSA, Elgamal, DSS, Elgamal), digital signatures (RSA, DSS, Elgamal), hashing (birthday paradox, Merkle-Damgard construction), MACs, Weak management (PKI, certificates, key establishment/exchange/transport, Diffie-Hellman), Identification protocols, Privacy preserving (mix-nets), Secret sharing. Applications studied include some of email security, SET, E-payment, E-voting, Fair exchange.

**STAT901 Modern Inference**
- **Autumn** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Introduction to the use of a statistical software package; bootstrap methods; Monte-Carlo methods; permutation tests; nonparametric density estimation; the sign, Kruskal-Wallis and Spearman tests and extensions of them.

**STAT902 Advanced Data Analysis**
- **Not on offer in 2009**
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** A selection of topics from: Regression model building and checking; Causal modelling; Cluster analysis; Multi-dimensional scaling; Log-linear models; Generalised linear models; Time series methods; Principal components, Factor analysis; Canonical correlations; Statistical computer packages.

**STAT903 Survey Design and Analysis**
- **Spring** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Survey methods - survey development; Cluster and multi-stage sampling; Repeated and longitudinal surveys; Non-sampling errors; General methods of variance estimation; Small area estimation; Non-response adjustment; Analysis of complex survey data; Report writing.

**STAT904 Statistical Consulting**
- **Spring** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Project management; Client liaison; Problem identification; Consulting ethics and principles; Sources of data; Choosing design and analysis procedures; Common problems in statistical consulting; Setting sample size - power calculations; Consulting case studies; Report writing.

**STAT905 Time Series**
- **Not on offer in 2009**
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Prediction theory; Linear models: identification, estimation, diagnostic checking; Multivariate models.

**STAT906 Experimental Design**
- **Autumn** Wollongong On Campus
- **Credit Points:** 6
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** The general linear model; Complete and incomplete block designs; The construction of optimal block designs; Factorial designs and fractional factorial designs; Response surface methodology.
STAT920  Stochastic Methods in Finance  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Subject Description: STAT920 covers necessary probabilistic concepts and models such as linear stochastic models, nonlinear stochastic models and nonlinear chaotic models used in finance. Topics discussed in this subject also include martingale methods, stochastic processes, optimal stopping, the modeling of uncertainty using a Wiener process, Ito's formula as a tool of stochastic calculus, fundamentals of stochastic differential equations and the applications of these methods to finance.

STAT921  Multiple Regression and Time Series  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: STAT332  
Subject Description: STAT921 is an advanced course covering relationships between variables and the analysis of observational studies and designed experiments. Topics covered include multiple linear regression, non-linear regression, generalised linear regression, ARIMA models, forecasting of time series and Box-Jenkins' approach.

STAT922  Statistical Inference and Multivariate Analysis  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: STAT333  
Subject Description: STAT922 covers inference (estimation and hypothesis testing) in both one and many dimensions. Topics covered include transformations, maximum likelihood and minimum variance unbiased estimation, the likelihood ratio, score and Wald tests, vector random variables, the multivariate Normal distribution, principal components analysis, factor analysis and discriminant analysis.

STAT923  Applied Probability and Financial Risk  
Autumn Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
Exclusions: STAT304  
Subject Description: This subject develops the stochastic models required for decision making under uncertainty in finance, economics and actuarial statistics. Stochastic models include processes in both discrete time (random walk, Markov chains) and continuous time (birth and death processes, Gaussian processes). The applications focus on the measurement, management and control of risk and its consequences. Particular topics include gambler's ruin, log-normal price models, Value at Risk (VaR) measures and Markowitz portfolio selection.

STAT943  Statistical Quality Control 2  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: MATH188  
Co-requisites: None  

STAT955  Sample Surveys and Experimental Design (With Project)  
Autumn Wollongong On Campus  
Credit Points: 8  
Pre-requisites: STAT232, or STAT252 at Credit level or better, or STAT151 at Credit level or better, or PSYC232 at Credit level or better, or ECON121 at Credit level or better, or (STAT131 and STAT231 both at Credit level or better)  
Co-requisites: None  
Exclusions: Not to count with STAT335 or STAT355.  
Subject Description: Experimental designs: completely randomised, randomised complete block, Latin Square, factorial; the analysis of the data arising from these designs. Steps in conducting a sample survey; methods such as simple random sampling and stratified sampling, number raised and ratio estimation. Statistical computing is an essential part of this subject. Project: Students will undertake a project that relates the work of this subject to an investigation in their field of major interest.

STAT971  Preliminary Topics in Statistics A  
Autumn Wollongong On Campus

Doctor of Philosophy
Testamur Title of Degree: Doctor of Philosophy
Abbreviation: PhD
Home Faculty: Law
Duration: 3 years full-time or part-time equivalent
Total Credit Points: 48 per annum
Delivery Mode: Supervised individual research
Location: Wollongong
UOW Course Code: 201
CRICOS Code: 028400J

Overview
Doctor of Philosophy (PhD) candidates undertake in-depth research in order to make an original contribution to the body of knowledge in law.

Entry Requirements / Assumed Knowledge
Candidates should have an undergraduate degree from a recognised institution with Honours Class II, Division 2 or above. Candidates who do not possess such a degree may be permitted to demonstrate capacity for research, for example by first completing a Special Research Paper in Law, and should contact the Faculty of Law’s Associate Dean (Research).

Course Requirements
Candidates are required to satisfactorily complete a major thesis to the value of 48 credit points per annum.

Overview
This course provides law graduates with the opportunity to complete, through a flexible learning delivery mode, the admission requirements to practise as a solicitor in New South Wales, Australia.

Entry Requirements / Assumed Knowledge
Students should have a University of Wollongong LLB degree, a Diploma in Law from the Legal Practitioners Admission Board or a law degree from an accredited tertiary institution, including the successful completion (pass level) of the equivalent of the University’s skills training and legal profession studies subjects (ie, skills training, conveyancing, litigation practice and professional responsibility/ethics).

However, students who have not completed equivalent subjects as described above will have appropriate skills training in the Graduate Diploma in Legal Practice program offered by the Faculty of Law at the University of Wollongong.

Course Requirements
Students are required to satisfactorily complete all coursework and professional experience components of the Practical Legal Training Course.

Course Program

*Students who have completed the subject LLB396 Professional Practice as part of the LLB at UOW are required to enrol in LLB847.
Professional Recognition
The Legal Practitioners Admission Board recognises this course for graduates applying for admission as legal practitioners in New South Wales.

Other Information
International law graduates should first contact the Legal Practitioners Admission Board for directions as to what requirements they must meet in order to qualify for admission in New South Wales. They may be required to complete some additional law studies and it is usual to complete these before commencing the practical legal training requirements.

*These subjects are compulsory for students who intend to enrol in the Master of Transnational Crime Prevention.

Credit Towards Other Courses
Students who successfully complete this program are guaranteed entry into the Master of Transnational Crime Prevention.
SUBJECT DESCRIPTIONS

CMP 901  Strategy and Sea Power
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The course will cover the following issues: the history of international ocean management regimes; the 1982 Law of the Sea Convention; the Law of Armed Conflict of the Sea; the international legal regulation of marine resources; the protection of the marine environment; and law and order at sea.

CMP 902  Law of the Sea
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The subject will cover the following: the history of international ocean management regimes; the 1982 Law of the Sea Convention; the Law of Armed Conflict of the Sea; the international legal regulation of marine resources; the protection of the marine environment; and law and order at sea.

CMP 903  Australian Maritime Power
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The course deals with the historical evolution of Australian maritime power from a naval perspective. Topics covered include: international politics; the age of the sea; the development of national oceans policy; regional maritime policy issues in the Asia-Pacific; maritime and security arrangements in the Asia-Pacific region; Australia’s maritime science and technology plan; co-operative arrangements for regional maritime surveillance and maritime transport.

CMP 904  Maritime Regulation and Enforcement
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The course focuses on the specific enforcement and regulatory powers, and responsibilities of states in the various maritime zones of jurisdiction, i.e. the territorial sea, the EEZ, continental shelf and high seas. Relevant policy and legal considerations in the development and enforcement of maritime jurisdiction will be covered.

CMP 905  Legal Regulation of Shipping
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The course addresses the legal and regulatory frameworks relevant to shipping. It comprises two main elements: 1. The International Regulatory Framework, including: the Law of the Sea Convention; the role of the IMO; IMO related conventions; regional regulatory frameworks; and the arrest and detention of ships. 2. The Australian Domestic Regulatory Framework, including: the constitutional framework; the administrative framework; the Navigation Act; marine insurance; and salvage.

CMP 906  Comparative Oceans Policy
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The course analyses policy implications of increased sea use, comprising the following aspects: the conceptual basis for an integrated national ocean policy; the integration of national sectoral interests such as marine industries and other stakeholders; integrating ocean and coastal management; Australia’s Oceans Policy; ocean policy developments in other parts of the world; and regional cooperation and management of shared ocean space, especially within the Southeast Asia.

CMP 907  Maritime Security Law and Policy
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Maritime Security Law and Policy addresses the emerging international policy and regulatory framework being developed and implemented in response to post-9/11 maritime security threats. It also examines selected regional and national regulatory measures, including Australia’s policy and legislative responses and relevant American measures. Topics to be covered include: the Law of the Sea Convention; the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation 1988 (SUA Convention), including the Protocol for the Suppression of Unlawful Acts Against the Safety of Fixed Platforms Located on the Continental Shelf 1988 (and the 2005 Protocols to each); the International Ship and Port Facility Security (ISPS) Code; International Maritime Organization guidelines on combating piracy; regional responses by organizations such as APEC and the ASEAN Regional Forum; PSI and bilateral U.S. ship-boarding agreements; the Container Security Initiative and C-TPAT (U.S.); Australian responses such as JOPC, AMIS and new legislation; shortcomings and implementation challenges of new regulatory requirements; and emerging developments and technologies, such as long-range identification and tracking (LRIT) of vessels.

CMP 908  Contemporary Maritime Issues in the Asia-Pacific Region
Autumn Wollongong On Campus
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This course deals with the leading maritime issues in the Asia-Pacific region, including: maritime territorial disputes (South China Sea, Taiwan, East China Sea, Kuriles); piracy/
sea robbery; archipelagic sea lane passage; military operations in the EEZ; confidence-building; naval cooperation and competition; and maritime terrorism.

**CMP 909 International Marine Environmental Law**

*Not on offer in 2009*

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** The subject covers International marine environmental law and conventions, including Part XII of the Law of the Sea Convention and Agenda 21; the specific concerns with, and importance of, the marine environment; important international conventions impacting upon the use and protection of the marine environment, and the domestic and international legal and policy implications of those conventions; the state of world and regional fisheries, and the legal and political efforts to sustain fish stocks.

**CMP 910 Selected Topic in Maritime Studies**

- **Autumn:** Wollongong Distance
- **Spring:** Wollongong Distance

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** 10,000 word research paper in an approved topic in maritime studies.

**CMP 911 Research Project in Maritime Studies**

- **Autumn:** Wollongong On Campus
- **Spring:** Wollongong On Campus

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** 10,000 word research paper in an approved topic in maritime studies.

**CMP 912 Minor Thesis in Maritime Studies**

- **Autumn:** Wollongong On Campus
- **Spring:** Wollongong On Campus

- **Credit Points:** 16
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** 20,000 word minor thesis in an approved topic in maritime studies.

**CMP 913 Integrated Marine and Coastal Management**

*Not on offer in 2009*

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** The subject covers: 1. The processes and importance of marine and coastal environments. 2. Marine and coastal resources, ecological systems and ecosystem services. 3. The factors involved with integrated coastal zone management. 4. Planning for integrated management: roles, components, parties and processes.

**CMP 914 International Fisheries Law**

- **Spring:** Wollongong On Campus

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**CMP 915 Marine and Coastal Resources Management**

*Not on offer in 2009*

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** The subject addresses: 1. Fisheries allocation and property rights and stakeholders; 2. Implementation instruments and national policy considerations; 3. National enforcement regimes; 4. Dispute settlement and litigation; 5. Ecological assessment of fisheries.

**LAW 804 Research into Current Issues in Judicial Administration**

*Not on offer in 2009*

- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** Research project taken March-November to produce a report of 10,000 words on original research into judicial administration in a court or tribunal system familiar to the student. Possible topics: evaluations, needs analysis, feasibility studies in case management, or specific court programs, e.g. conferences, arbitration, roles of judicial and other staff, client services, legal aid, judicial independence. Project supervised by a member of the Faculty or someone suitably qualified outside the Faculty.

**LAW 805 Judicial Administration**

*Not on offer in 2009*

- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** MATH188

**LAW 806 Workflow Management in the Courts**

*Not on offer in 2009*

- **Credit Points:** 12
- **Pre-requisites:** None
- **Co-requisites:** MATH188

**LAW 810 Law in Society**

*Not on offer in 2009*

- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**Subject Description:** This subject explores the nature of law and its relationship to society. It provides an introduction to the sources and authority to legal rules, the nature of legal institutions and practices, legal materials, reasoning and terminology. It also illustrates how the theory and practice of law may
differ and the way in which the skills of lawyers can help to mediate this difference. Aspects of substantive law will be used to illustrate general principles.

**LAW 811 Law of Contract**
Not on offer in 2009
Credit Points: 8
Pre-requisites: LAW 810
Co-requisites: None
Subject Description: The study of the modern law of contract as it has developed in Australia. Particular areas of focus include formation of contract; vitiating factors; privity; identification and construction of terms; breach of contract; and remedies. Emphasis is placed upon students developing skills in the application of legal principles to factual situations through the analysis of cases and hypotheticals.

**LAW 902 Research Project A**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The student shall propose a research project for approval by the Dean.

**LAW 903 Research Project B**
Not on offer in 2009
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: The student shall propose a research project for approval by the Dean.

**LAW 904 Research Project C**
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The student shall propose a research project for approval by the Dean.

**LAW 905 Research Project D**
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: The student shall propose a research project for approval by the Dean.

**LAW 906 Judicial Administration**
Not on offer in 2009
Credit Points: 12
Pre-requisites: First degree in any discipline
Co-requisites: None
Subject Description: This subject is the first of 4 court management subjects in the Graduate Diploma. It provides the foundation for the study of court management. The subject integrates principles of judicial administration with those of management, chosen for their particular relevance to the functions of the court manager.

**LAW 907 Court Management II- Processes of Dispute Resolution**
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Concepts of adjudication, arbitration, conciliation and mediation as dispute resolution procedures; the nature of the litigation process; relationship of arbitration, conciliation and mediation to litigation; involvement of courts in procedures other than litigation; evaluation of effectiveness of dispute resolution procedures.

**LAW 908 Workflow Management in the Courts**
Not on offer in 2009
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Principles and practical application of case management in reducing delay and providing efficient management in courts. Considers methods of establishing and evaluating case management programs. Examines principles and practical application of management information systems in courts.

**LAW 909 Research into Current Issues in Judicial Administration**
Not on offer in 2009
Credit Points: 12
Pre-requisites: None
Co-requisites: None

**LAW 910 Introduction to Law**
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None

**LAW 911 Introduction to Natural Resources Law**
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: LAW 910
Subject Description: Ownership of natural resources; the implications of the Commonwealth/State Division of legislative powers for natural resources regulation; the historical development and structure of natural resources law; overlaps between regulatory authorities; forward planning and development control; environmental impact assessment law; the law relating to pollution and waste disposal.

**LAW 912 International Law**
Not on offer in 2009
Credit Points: 8
Pre-requisites: LAW 910 and LAW 911
Co-requisites: None
Subject Description: The nature of international law and how international law is made and enforced. The strengths and weaknesses of international law in regulating State behaviour. The domestic implementation of international law.
LAW 913 Resources Decision-Making  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: LAW 910 and LAW 911  
Subject Description: Bureaucratic decision making processes; cost-benefit analysis; risk assessment; environmental impact assessment; public participation in decision-making processes; the role of the courts and adversarial methods of dispute resolution; public inquiries and other alternative forms of dispute resolution; scientific and legal forms of proof.

LAW 914 Mining Law  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LAW 910 and LAW 911  
Co-requisites: None  
Subject Description: Ownership of minerals; the distinction between mining and extractive industry; exploration and mining titles under the mining and coal mining legislation; the relationship between mining legislation and environmental planning and assessment legislation; industrial health and safety law and the mining industry.

LAW 915 Commercial Aspects of Resources Development  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LAW 910 and LAW 911  
Co-requisites: None  
Subject Description: Legal structures for resources projects (joint ventures, etc); financing resources projects (including investment regulation; taxation and stamp duty); legal aspects of resource marketing.

LAW 916 Energy Law I  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The law relating to oil and gas exploration, production and transportation, including onshore and offshore exploration and production titles, royalties, pipelines and oil pollution. The law relating to the mining and use of uranium.

LAW 917 Energy Law II  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The law relating to electricity generation and transmission, including monopolisation and privatisation, the relationship between transmission and supply authorities, pollution control, pricing arrangements and cogeneration. The law relating to renewable energy resources, including rights of access to wind and sun.

LAW 918 Law of Land and Nature Conservation  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The law relating to the use and conservation of native vegetation, including special conservation areas, forestry in State forests and on privately owned land, agricultural land clearing, the law relating to the protection and exploitation of native fauna, including habitat conservation, regulation of commercial exploitation and endangered species legislation. The law relating to land degradation.

LAW 919 Water Resources Law  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The law relating to the regulation of the marine environment. The obligations of States under the United Nations Convention on the Law of the Sea 1982, and other Conventions, to protect and preserve the marine environment. Port State's and flag State's responsibilities and powers of enforcement over the marine environment. The law relating to land degradation.

LAW 920 Local Government and Natural Resources  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The development of local government in Australia. The law relating to the constitution, functions and powers of local government in terms of the ability of local government to assess and control development on private land and council land. Relations between local and higher levels of Government. The law relating to environmental planning and assessment by local government authorities. The financial context in which local government operates. The role of local government in regional context.

LAW 921 Marine Resources Law  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LAW 910 and LAW 911  
Co-requisites: None  
Subject Description: The legal regulation of the resources of the sea under the United Nations Convention on the Law of the Sea 1982 and its associated instruments, in particular, living resources in the exclusive economic zone (fisheries), non-living resources on the continental shelf (hydrocarbons); high seas fishing, sea-bed mining and ocean thermal energy. Analysis of domestic issues in the implementation of the international regime, within a multiple use conceptual framework.

LAW 922 International Maritime Environmental Law  
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: Rules of international law dealing with the regulation of the marine environment. The obligations of States under the United Nations Convention on the Law of the Sea 1982, and other Conventions, to protect and preserve the marine environment. Port State's and flag State's responsibilities and powers of enforcement over the marine environment.
vessels. Pollution control in zones of sovereignty and sovereign rights; pollution control on the high seas and in the Area. Marine biodiversity protection.

**LAW 923 The Law of the Sea**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** LAW 910 and LAW 911
- **Co-requisites:** None
- **Subject Description:** The evolving law of the sea from an historical perspective. The 1982 United Nations Convention on the Law of the Sea (LOSC) and its associated instruments. Maritime zones of jurisdiction and the navigational regime under (LOSC). The major factors influencing the development of the law of the sea; the various interests involved in the law of the sea and how LOSC attempts to balance these interests.

**LAW 924 International Environmental Law**
*Autumn Wollongong On Campus*
- **Credit Points:** 8
- **Pre-requisites:** LAW 910 and LAW 911
- **Co-requisites:** None
- **Subject Description:** The relevant legal rules at the international level designed to protect the global environment. The historical development of these rules and the institutional framework within which they are made and enforced. The weaknesses of international environmental law, focusing on problems of domestic implementation.

**LAW 925 Biodiversity Conservation and the Law**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** LAW 910 and LAW 911
- **Co-requisites:** None
- **Subject Description:** Analysis of the United Nations Convention on Biological Diversity, with particular reference to in-situ conservation of biological diversity and access to genetic resources. The relationship between the Biodiversity Convention and other international conventions concerned with the conservation and sustainable use of nature. Strategies available for domestic implementation of the in-situ conservation provisions. Ownership of genetic resources in relation to royalty issues. State regulation of access to genetic resources. Indigenous peoples and biodiversity conservation.

**LAW 926 Comparative Environmental Law**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** LAW 910 and LAW 911
- **Co-requisites:** None
- **Subject Description:** A comparison of the varying legal instruments developed by countries to implement environmental policy. The implementation of international environmental obligations within domestic law, emphasising the range of approaches adopted.

**LAW 927 Natural Resources Law Review**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** Approval of the Co-ordinator
- **Co-requisites:** None
- **Subject Description:** Commissioning and editing of academic papers contributed to the Australasian Journal of Natural Resources Law and Policy, a biannual published by the Faculty of Law and distributed worldwide.

**LAW 928 Special Studies in Natural Resources Law**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** A study in depth of a selected area of Natural Resources Law.

**LAW 929 Special Studies in Environmental Law**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None
- **Subject Description:** A study in depth of a selected area of Natural Resources Law.

**LAW 930 Research Project in Natural Resources Law**
*Not on offer in 2009*
- **Credit Points:** 24
- **Pre-requisites:** 48 credit points at 900 level from the Natural Resources Law & Policy course
- **Co-requisites:** 48 credit points at 900 level from the Natural Resources Law & Policy course
- **Subject Description:** Content as arranged.

**LAW 933 Special Studies in International Environmental Law I**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**LAW 934 Special Studies in International Environmental Law II**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**LAW 936 Research Project in International Environmental Law**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

**LAW 950 Foreign Investment Law in the People’s Republic of China**
*Not on offer in 2009*
- **Credit Points:** 8
- **Pre-requisites:** None
- **Co-requisites:** None

- **Subject Description:** An analysis of the laws and procedures regulating foreign investment in, and trade with, the PRC. This subject will examine those laws relating to joint ventures and other forms of foreign investment; revenue and finance law including taxation,
customs duties and exchange control; foreign trade including compensation trade, technology transfer and intellectual property; and dispute resolution.

**LAW 951 Taxation Policy and Practice**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A detailed examination of the law relating to selected aspects of business organisations, including the law relating to the nature and formation of partnership, mergers and takeovers, insider trading and securities.

**LAW 953 Studies in Taxation**  
Not on offer in 2009  
Credit: 6  
Pre-requisites: None  
Co-requisites: None

Particular topics include delegated legislation, ministerial responsibility, statutory corporations and administrative tribunals. Crown proceedings; and the statutory and common law procedures which may be invoked to counter allegations of maladministration or illegality including the Administrative Appeals Tribunals; judicial review and ombudsmen.

**LAW 960 Legal Studies For Professionals**  
Spring Wollongong On Campus  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A detailed examination of the law relating to selected aspects of business organisations, including the law relating to the nature and formation of partnership, mergers and takeovers, insider trading and securities.

**LAW 961 Selected Legal Topics in Management**  
Not on offer in 2009  
Credit Points: 6  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** A detailed examination of the law relating to selected aspects of business organisations, including the law relating to the nature and formation of partnership, mergers and takeovers, insider trading and securities.
concepts of property. Issues selected will be discussed in the context of particular areas of law. The emphasis will be on philosophical issues in criminal law.

**LAW 969 Longational Health and Safety Law**

*Autumn Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** This subject is concerned with the study of the legal regime governing health, safety and welfare of people at work in New South Wales. Its focus will be the Occupational Health and Safety Act 2000 and the Occupational Health and Safety Regulations 2001.

**LAW 970 Banking and Financial Institutions Law**

*Autumn Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** Bachelor of Commerce specialising in Finance or approval by the Head of Department

**Co-requisites:** None

**Subject Description:** The legal framework establishing, controlling and regulating financial institutions, including the Reserve Bank, banks, money market dealers and securities. The law dealing with financial money market instruments, particularly bills of exchange, promissory notes and cheques. Legal basis of the relationship between financial institutions and their clients. The law of securities - nature and types of securities; capacity and authority of borrowers entering transactions; remedies available to secured lenders.

**LAW 975 Environmental Compliance**

*Not on offer in 2009*

**Credit Points:** 8

**Pre-requisites:** Approval by the Co-ordinator

**Co-requisites:** None

**Subject Description:** The need for improved compliance with natural resources standards is generating new approaches to regulatory design going beyond command and control. The range of regulatory instruments is rapidly growing to include property rights and individual transferable quotas; load based licensing; emissions trading systems; eco-labeling and certification processes; pollutant inventories; and procurement codes. In relation to voluntarily undertaken responsibilities, study includes private sector self regulation agreements; environmental management systems and audits, public reports and other information disclosure.

**LAW 980 International Business Law**

*Spring Wollongong On Campus*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Exclusions:** LAW 319 or LLB 319

**Subject Description:** This subject will contain some selected legal and regulatory framework of international business. Special emphasis will be given to the legal issues related to drafting contracts, and rights and obligations of parties to a business transaction under the current legal regime governing international business. The topics may include; introduction to international and comparative law relevant to international business; formation and interpretation of international contracts for goods and services; transportation of goods; international protection of intellectual property; role of national governments and international organisations in international business; formation, operation and regulation of international business entities; and resolution of international commercial disputes.

**LAW 987 Special Topic in Law - A**

*Not on offer in 2009*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** A special topic to be selected from any area of commercial law. The selection will be made by the Sub-Dean taking into account the expertise of academic staff, including visiting staff, and the interest of students.

**LAW 988 Special Topic in Law - B**

*Not on offer in 2009*

**Credit Points:** 6

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** A supervised research paper of no more than 10,000 words. Information may be obtained from the Postgraduate Co-ordinator or Sub-Dean regarding the research essay.

**LAW 993 Research Essay**

*Autumn Wollongong On Campus Spring Wollongong On Campus*

**Credit Points:** 8

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** A supervised research paper of no more than 10,000 words. Information may be obtained from the Postgraduate Co-ordinator or Sub-Dean regarding the research essay.

**LAW 994 Legal Research Proposal**

*Autumn Wollongong On Campus*

**Credit Points:** 8

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** LAW 993 or equivalent

**Subject Description:** This subject will provide students with the skills to develop a research proposal suitable for research at Master's level, and to choose an appropriate methodology for carrying out the research. It will explore the range of approaches available to legal researchers at a time when legal research is in a considerable state of flux. Traditional approaches based on detailed analysis of case law and legislation will be compared and contrasted with socio-legal approaches which rely on theoretical and methodological inputs from other disciplines. In particular, the relevance of empirical research to the issues of implementation and law reform, both qualitative and quantitative, will be examined. After completing the subject, students will be in a position to pursue more detailed studies in relation to their methodology of choice.

**LAW 998 Major Thesis**

*Not on offer in 2009*

**Credit Points:** 48

**Pre-requisites:** A degree in law with Honours Class II or equivalent.

**Co-requisites:** None

**Subject Description:** Content as arranged.

**LAW 999 Special Research Paper in Law**

*Not on offer in 2009*
Informatics

Law

Health & behavioural

issues and developments most relevant at start up and

Then we adopt a timeline approach focusing on those

marketplace and relevant public policy considerations.

into focus. We begin with an overview of the cyber-

brings the interests of suppliers consumers and regulators

management needs for achieving business success. This

developments that e-commerce gives rise to. The main

Exclusions: LAW317, LLB317

Credit Points: 6

LAW8311 Lawyers and Legal Ethics

Not on offer in 2009

Credit Points: 6

Pre-requisites: None

Co-requisites: None

Subject Description: Content as arranged.

LAW9302 Law of Business Organisations

Spring Wollongong On Campus

Credit Points: 6

Pre-requisites: LAW960

Co-requisites: None

Exclusions: LAW 302 Law of Business Organisations

Subject Description: This subject considers the key

features of the different legal structures which people

might adopt for their business and voluntary activities.

The legal regulation of a partnership and a company

incorporated under the Corporations Act 2001 (Cth),

are considered in depth. Practical applications of

the law, and public policy dimensions, are addressed

throughout. Specific topics covered include: choice of

form of business organisation; partnership (formation,

internal and external relations, partnership property

and dissolution); and corporations law, including

registration, regulation, financial reporting and auditing,

promoters and pre-registration contracts, internal

and external relations, company finance, duties of

directors and officers, member's rights, options available

in cases of financial difficulty, and winding-up.

LAW9317 E-Commerce Law

Spring Wollongong On Campus

Credit Points: 6

Pre-requisites: 24 credit points of

Master of Electronic Commerce

Co-requisites: None

Exclusions: LAW317, LLB317

Subject Description: The subject explores some of

the more significant legal and regulatory issues and

developments that e-commerce gives rise to. The main

perspective is that of the on-line business and its risk

management needs for achieving business success. This

brings the interests of suppliers consumers and regulators

into focus. We begin with an overview of the cyber-

marketplace and relevant public policy considerations.

Then we adopt a timeline approach focusing on those

issues and developments most relevant at start up and

once the business opens for on-line trading. Start

up introduces intellectual property law, privacy and

transactional security issues and responses. On-line

trading raises identity, contract, consumer protection,

payment systems and jurisdictional issues and responses.

Finally, we turn to an area for special study. Students

will be invited to select that area, for example from

among the issues and developments relating to the

infrastructure constituting the cyber-marketplace.

LAW9380 Law for Environmental Managers

Spring Wollongong On Campus

Credit Points: 8

Pre-requisites: 72 credit points in a discipline

other than Law or enrolled in MEnvSc

Co-requisites: None

Exclusions: LAW334 or LAW380

Subject Description: The goal of this subject is to

enable students to develop a basic, critical understanding

of the law in relation to ecologically sustainable

development in Australia, with an emphasis on biodiversity

conservation. It covers Commonwealth and NSW

jurisdictions. It focuses on environmental law and policy

making, including statutory planning instruments,

assessment of development proposals and opportunities for

appeal, new conservation mechanisms such as offsetting,

on-reserve management and the role of the Courts.

LEGL940 Transnational Organised Crime

Not on offer in 2009

Credit Points: 8

Pre-requisites: LEGL 911 International Criminal Law

Co-requisites: None

Subject Description: All students will undertake a

common core module on the analysis and structure of

transnational organised crime, including the sociology

of the development of such crime. Thereafter, students

will choose one case study on serious organised crime

to be selected from Terrorism, Banking Fraud, Firearms

Trafficking, Narcotics, People Trafficking, Environmental

Crimes. Examples and case studies will be provided by

relevant experts from Government and Commerce.

LEGL950 Transnational Crime Prevention

Research Project

Not on offer in 2009

Credit Points: 8

Pre-requisites: 24 credit points of LEGL subjects

Co-requisites: None

Subject Description: Students will research and

write a dissertation of approximately 10,000 words,

on a subject selected by the student and approved by

the subject coordinator. The student should approach

the topic from an international and comparative law

perspective drawing together different threads of the

Master of Transnational Crime Prevention (MTCP)

program undertaken by the student in light of the

students experience and background. Where appropriate,

assistance from external experts is encouraged.

LEGL951 Special Studies in Transnational

Crime and Prevention

Not on offer in 2009

Credit Points: 8
LEGL956 Major Research Project - Transnational Crime Prevention  
Subject description: This subject permits the inclusion in the Master of Transnational Crime Prevention (MTCP) program of an in-depth study of a particular aspect of transnational crime prevention within the specialisation of a visiting expert, which would otherwise not be offered by the Faculty.

Pre-requisites: None  
Co-requisites: None  
Credit Points: 12
globalising world is examined as are the mechanisms created by states to limit state failure, terrorism and criminal activities such as money laundering and the smuggling of drugs, people and arms. Also examined is the creation of the International Criminal Court and its record in the apprehension of those responsible for genocide and crimes against humanity.

**LEGL960 Issues in Transnational Organised Crime**

*Subject Description:* This subject considers organised crime in transnational context focusing on the environment that has led to the development of transnational organised crime groups. By examining such groups, their structures and lines of communication and risk management strategies they employ to achieve their objectives, greater awareness of the effectiveness of international and governmental crime prevention policies and other initiatives is reached. Consideration is given to potential future initiatives and directions in the prevention and investigation of transnational organised crime.

**LEGL961 Minor Research Project - Transnational Crime Prevention**

*Subject Description:* Students will research and write a dissertation of approximately 7,000 words, on a subject selected by the student and approved by the subject coordinator. The student should approach the topic from an international and comparative law perspective drawing together different threads of the Master of Transnational Crime Prevention (MTCP) program undertaken by the student in light of the students experience and background. Where appropriate, assistance from external experts is encouraged.

**LEGL962 Special Studies in Transnational Crime**

*Subject Description:* This subject affords students the opportunity to engage with a visiting expert in that expert's area of specialisation, enabling students to gain further insights into transnational crime issues. The student will demonstrate an understanding of a specialised subject in the context of transnational crime prevention, analyse the strengths and weaknesses within the selected topic and conduct independent research to achieve the outcomes and objectives of the subject.

**LEGL963 Terrorism and Counterterrorism**

*Subject Description:* This subject will cover historical origins and evolution of modern terrorism; ideologies and strategies of terrorist organisations; motivations for joining and the radicalisation process; terrorism and the media; major terrorist organisations and their life cycles; chemical, biological, radiological and nuclear terrorism; terrorist support networks; analytical tools for effective threat assessment; current and future trends and strategies to prevent and counter the threat.

**LEGL964 Transnational Financial Crime**

*Subject Description:* The subject focuses on the financial system, both domestically and internationally, the payments systems that underpin the financial system, financial crimes and abuses that involve those systems and methods of regulating, protecting and strengthening the financial system. It is intended to assist students in critically evaluating the role of the financial system, the influence of various social, political and economic factors that impact on the use and misuse of that system, and allow the students to develop ideas to strengthen the financial system against financial crime.

**LEGL965 Issues in Transnational Security**

*Subject Description:* Transnational security issues can be described as non-military threats that stretch across international borders and threaten the political and social foundations of nations and the safety and security of their inhabitants. Transnational security threats include terrorism, maritime piracy, arms trafficking, illegal migration, infectious disease and environmental degradation, among others. Increasingly security arrangements are being developed through inter-governmental or multilateral organisations. How the transnational community monitors and responds to these threats is a major challenge in the 21st century security environment.

**LLB 843 Professional Practice**

*Subject Description:* The subject includes: Professional Responsibility and Competent Practice; Problem Analysis; Dispute Resolution; Cross-cultural Communication; Electronic Research; Writing and Drafting and Professional Experience Program. Students attend on-campus for an introductory session and thereafter meet the requirements of the Professional Experience program in law-related employment or in a placement arranged...
by the Practical Legal Training Unit. The requirements of this subject are not completed until all components of professional experience and assignments are completed.

**LLB 844 Practice Management**
- **Annual**: Wollongong Flexible
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Spring2009/Autumn2010**: Wollongong Flexible

**Credit Points**: 8

**Pre-requisites**: Bachelor of Laws degree or equivalent

**Co-requisites**: LLB843 or LLB396

**Subject Description**: This subject will introduce students to the statutory and professional requirements in relation to clients’ Trust monies and securities, and to principles of practice management including computerised accounting and recording systems, costing, risk management and related matters. The subject contains three inter-related modules: Trust and Office Accounting; and Law Office Management.

**LLB 845 Conducting Litigation**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible

**Credit Points**: 16

**Pre-requisites**: Bachelor of Laws degree or equivalent

**Co-requisites**: (LLB396 or LLB843) and LLB844

**Subject Description**: The subject includes: Litigation Strategy; Civil Litigation Practice; Criminal Law Practice; Family Law Practice and Advocacy workshop.

**LLB 846 Commercial and Property Practice**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible

**Credit Points**: 16

**Pre-requisites**: Bachelor of Laws degree or equivalent

**Co-requisites**: (LLB396 or LLB843) and LLB844

**Subject Description**: The subject includes: Commercial Planning; Revenue Implications; Real Property Transactions; Commercial Contracts; Trusts, Wills and Estate Planning; Probate and Estate Administration; Small Business Practice. The subject provides an overview of particular aspects of commercial and property transactions, and related matters which affect clients in planning their business and personal affairs.

**LLB 847 Professional Experience**
- **Annual**: Wollongong Flexible
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Spring2009/Autumn2010**: Wollongong Flexible

**Credit Points**: 0

**Pre-requisites**: Bachelor of Laws degree or equivalent

**Co-requisites**: LLB396 Professional Practice

**Exclusions**: LLB843 Professional Practice

**Subject Description**: As part of the GDLP students must complete 80 days of professional experience. Some of this is acquired by Wollongong LLB students as part of the subject LLB311/LLB190 Lawyers and Australian Society. Apart from engaging in professional experience in locations and of the type specified in the LLB843 guidelines, there are no classes or assignments involved other than to submit a reflective report on conclusion of the experience.

**LLB 910 Introduction to Law**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**LLB 911 Introduction to Natural Resources Law**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**Subject Description**: Ownership of natural resources; the implications of the Commonwealth/State division of legislative powers for natural resources regulation; the historical development and structure of natural resources law; overlaps between regulatory authorities; forward planning and development control; environmental impact assessment law; the law relating to pollution and waste disposal.

**LLB 913 Resources Decision-Making**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**LLB 914 Mining Law**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**LLB 915 Commercial Aspects of Resources Development**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**LLB 916 Energy Law 1**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**Subject Description**: The law relating to oil and gas exploration, production and transportation, including onshore and offshore exploration and production titles, royalties, pipelines and oil pollution. The law relating to the mining and use of uranium.

**LLB 917 Energy Law II**
- **Not on offer in 2009**
- **Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**Subject Description**: The law relating to electricity generation and transmission, including monopolisation and privatisation, the relationship between transmission and supply authorities, pollution control, pricing arrangements and cogeneration. The law relating to renewable energy resources, including rights of access to wind and sun.

**LLB 918 Law of Land and Nature Conservation**
- **Not on offer in 2009**

**Credit Points**: 8

**Pre-requisites**: None

**Co-requisites**: None

**Subject Description**: The law relating to pollution and waste disposal.

**Subject Description:** The law relating to the use and conservation of native vegetation, including special conservation areas, forestry in State forests and on privately owned land, agricultural land clearing, the law relating to the protection and exploitation of native fauna, including habitat conservation, regulation of commercial exploitation and endangered species legislation. The law relating to land degradation.

---

**Subject Description:**
The law relating to environmental planning and assessment by local government authorities. The role of local government in regional context.

---

**Subject Description:** A comprehensive survey of the law relating to the use, protection, and conservation of natural resources, including compensation, punishment, restitution and coercion. The Remedies component of this subject explores the major legal and equitable remedies available in a civil action. These judicial remedies are considered according to the particular purpose or goal that they are intended to achieve, including compensation, punishment, restitution and coercion.

---

**Subject Description:**
An analysis of the law and procedures regulating foreign investment in and trade with the PRC. This subject will examine those laws relating to: joint ventures and other forms of foreign investment; revenue and finance law including taxation, customs duties and exchange control; foreign trade including compensation trade, technology transfer and intellectual property; and dispute resolution.

---

**Subject Description:** An introduction to the location and use of primary legal materials, including the use of computers in retrieving legal material; observation of legal practice in courts and elsewhere; analysis of legal documents; development of clear, concise and simple styles of presenting ideas and arguments in writing; citation of legal materials.

---

**Subject Description:**
An introduction to the substantive law of contract. Using the casebook method, students study the legal principles governing the formation, performance and discharge of contracts. Topics covered include the requirements for a valid contract (agreement, consideration and intention to create legal relations), finding and interpreting the terms of a contract, the impact of vitiating factors (such as misrepresentation, mistake, undue influence, duress and unconscionability), the operation of the doctrines of privity and frustration, and the consequences of performance, defective performance or non-performance of a contract.
LLB9301 Evidence  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9210  
Co-requisites: None  
Subject Description: Students will be introduced to the rules relating to the sources and admissibility of evidence in civil and criminal trials. Topics will include the burden and standard of proof; the examination of witnesses; credibility, character and tendency evidence; documentary evidence; and the rules in relation to opinion evidence, hearsay, confessions and admissions; illegally obtained evidence; discretions and warnings.

LLB9302 Law of Business Organisations  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9210  
Co-requisites: None  
Subject Description: The subject introduces the central concerns of a law of organisations, and of the law of business organisations, and the public policies informing the development of the Australian legal response. The range of organisations available for business and non-business purposes and their legal regulation are overviewed. Partnerships and companies and their legal regulations are considered in depth, including current policy issues.

LLB9303 Family, Children and Welfare  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: The subject examines the legislative framework and common law principles applicable to both the legal recognition of relationships and the resolution of disputes arising from the breakdown of those relationships. Areas covered include: marriage; divorce; nullity; disputes in relation to children under the Family Law Act, 1975 (Cth); property and maintenance disputes for both married and non-married couples; child support and child maintenance; family violence under state and federal legislation; international abduction. The subject also looks at the related areas of state child welfare proceedings and adoption. The course examines what ‘family’ means today and the challenges our legal system faces in dealing with this fluid concept and recognizing diverse family structures and relationships.

LLB9305 Property and Trusts A  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9210  
Co-requisites: None  
Subject Description: Consideration of the notion of property and interests in property; the distinctions between ‘real’, personal and intangible’property; legal and equitable interests in property and the notion of title; the notion of ownership; legal protection of property interests. The relationship of landlord and tenant; easements and covenants.

LLB9306 Property and Trusts B  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100 Introduction to Legal Systems  
Co-requisites: None  
Subject Description: This subject addresses a range of fundamental issues in jurisprudence, revolving around the nature of law, the basis for legal authority, the scope and limits of law, and the relationship between law, morality and values such as justice, liberty and autonomy.

Pre-requisites: LLB9305  
Co-requisites: None  
Subject Description: The modern law of real property, including Torrens title, mortgages and co-ownership. Legal and equitable principles relating to the validity of gifts. The law of express trusts, including the powers and obligations of trustees, and remedies of the beneficiary for breach of trust.

LLB9307 Law of Torts  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: After a general introduction to legal and policy issues surrounding tort law, students will commence with a study of the torts of trespass, nuisance and the action on the case for wilful injury. Students will then spend the bulk of our time considering the principles governing liability in negligence. Finally, students will consider the impact of statute law on common law tort principles, in particular the recent attempts to limit civil liability.

LLB9308 Public Law A  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: The notion of the state and state power; limitations on state power; the constitutional structure of the Australian nation-state; the notion of division and separation of powers; mechanisms of accountability and control of government officials, including access to government information, the Ombudsman, merits review tribunals and judicial review.

LLB9309 Public Law B  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9308  
Co-requisites: None  
Subject Description: Division of power between Commonwealth and State legislatures; the structure and powers of State and Commonwealth governments, with special emphasis on the limitation of the legislative power of the Commonwealth; the place of the judiciary and judicial review of legislative and executive power; Commonwealth and State fiscal powers; express and implied constitutional rights; constitutional change; the Constitution and Indigenous Australians.

LLB9312 Legal Theory  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100 Introduction to Legal Systems  
Co-requisites: None  
Subject Description: This subject addresses a range of fundamental issues in jurisprudence, revolving around the nature of law, the basis for legal authority, the scope and limits of law, and the relationship between law, morality and values such as justice, liberty and autonomy.
LLB9320  Commercial and Consumer Contracts  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The special rules relating to common commercial contracts, such as contracts of agency, contracts for the sale of goods, insurance contracts, and contracts of carriage; statutory restrictions on contracts.

LLB9321  Banking Law  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9210  
Co-requisites: None  
Subject Description: LLB321 Banking Law is designed to develop in students a sound understanding of the law governing financial institutions in Australia, and the manner in which these institutions are regulated. The relationship between financial institutions and their customers will be examined, along with the impact of recent technological developments on this relationship and on the business of banking. The law dealing with cheques and other negotiable instruments will be discussed in detail. The issue of security for transactions with financial institutions will be analysed, along with the position of banks as creditors when a customer becomes bankrupt.

LLB9330  Law of Employment  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9210  
Co-requisites: None  
Subject Description: An overview of the rights and duties of individual employers and employees under common law and selected legislation, including: formation, content and termination of the contract of employment; implied duties of employers and employees; remedies at common law; unfair dismissal legislation; statute-derived employment conditions; unfair work contracts; occupational health and safety.

LLB9331  Intellectual Property Law  
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: This subject provides an overview of the field of intellectual property law commencing with an analysis of the 2 major and oldest forms of intellectual property - copyright and patents. The course then moves on to the methods of protecting business reputation both at common law/equity, and through the registration of trade marks. Other more recent forms of intellectual property are also covered, such as plant breeder's rights, designs and circuit layouts.

LLB9332  Labour Regulation  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject examines the legal regulation of work and labour relations in Australia. After analysing ideas and methods underpinning regulation of the 'labour market' by law, the current system under the Workplace Relations Act (Workchoices amendments) will be studied by reference to the history of labour regulation in Australia (common law, compulsory arbitration), comparisons with other countries, and international law under the International Labour Organisation. The subject will study regulation of institutions and relationships, standard minimum pay and conditions, grievance and dispute resolution (including unfair dismissal), individual and collective bargaining and agreements, regulation of trade unions, law of strikes and industrial action. Students will be assessed in this subject on their critical analysis and evaluation of complex issues, with a group research presentation, an individual research essay and a final exam.

LLB9334  Environmental Law  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: LLB9100  
Subject Description: The goal of this subject is to enable candidates to develop a critical understanding of the law in relation to environmental regulation and management in Australia, with particular emphasis on NSW, including the limitations of legal instruments in achieving environmental policy objectives, the assessment of development proposals and the role of the Land & Environment Court.

LLB9335  Anti-Discrimination Law  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: An analysis and appraisal of laws prohibiting discrimination in Australia on various grounds, including: sex, marital status, race, disability, age, sexual preference and transgender. Laws prohibiting harassment and vilification will also be examined. The subject includes exploration of the aims and social context of anti-discrimination legislation, as well as related concepts such as equal opportunity, social justice and affirmative action. Examination of processes for complaints, dispute resolution and enforcement, and powers of investigative and adjudicatory bodies.

LLB9336  Regulation of Business  
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
Subject Description: This course is concerned with the law controlling the sale and distribution of products and services, credit, restrictive trade practices and other aspects of the commercial environment. It examines the relation of production and consumption in the economy and the law, the policies and legal rules intended to protect consumers, and legal remedies and institutions which are designed to offer assistance to consumers. Consumer protection is related to business regulation and restrictive trade practices (competition law) since both these areas seek to supplement and support market and other mechanisms which ensure that consumers get the goods and services that they want, at a fair price, and without risk of injury or deception. There is also an examination of consumerism as a world-wide
phenomenon with specific emphasis on the international consumer movement and consumer rights as well as anti-competitive concerns about intellectual property in the context of the multilateral trading system of the WTO.

**LLB9337 Comparative Studies in Law**
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: LLB9100  
**Subject Description:** A comparison of the French civil law with the common law of England and Australia, with the objective of developing an appreciation of different legal systems and approaches.

**LLB9338 International Trade Law**
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: A Law degree  
Co-requisites: None  
**Subject Description:** Public and private law aspects of international trade and investment, including contracts, transport, insurance and the settlement of international commercial disputes, the role of the World Trade Organisation, its regime of trade regulation and dispute resolution mechanisms, multilateral agreement on trade in services, and the financing of international transactions.

**LLB9341 Revenue Law**
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** Revenue Law, or taxation law, is one of the highly technical fields of law bringing together economic, accounting and financial concepts into a legal construct for the determination of how the costs of good government are to be shared among the members of society. Taxation pervades everyone’s life in some way, whether in the form of income tax, for instance, or some form of consumption or other tax. LLB9341 is confined to the Income Tax Assessment Act (1936/97), the Fringe Benefits Tax Assessment Act and associated legislation. These fields alone provide more than enough content for a one semester subject, but are essential for those students seeking registration as CPAs or Chartered Accountants after completing their degree.

**LLB9343 International Law**
Autumn  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** Sources of international law; the relationship between domestic law and international law; the law of treaties; the structure of the international legal system; statehood, state jurisdiction, state responsibility, nationality and refugees.

**LLB9344 Indigenous Peoples and Legal Systems**
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
**Subject Description:** This subject is an introduction to the relationship between Indigenous and non-Indigenous laws and legal systems in Australia. It considers the nature and status of Aboriginal and Torres Strait Islander laws, and explores some of the specific legal issues of current relevance to Indigenous peoples in Australia. Topics include the impact of European colonisation, over-representation in the criminal justice system, land rights and native title, recognition of Aboriginal law, and self-determination.

**LLB9348 Media Law**
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
**Subject Description:** The media plays an increasingly significant role in informing and constituting our society. The subject studies the main areas of Australian law that particularly affect the media and the diverse and competing public policy considerations that do or might justifiably underlie and shape that law.

**LLB9349 Feminism and Law**
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LLB9100  
Co-requisites: None  
**Subject Description:** This subject introduces the major themes in feminist thought and modes of contemporary feminist scholarship and applies them to law, legal institutions and the practice of law in Australia. It provides a foundation for future analysis of substantive and procedural law by students and subjects the institutions of law and their practitioners to scrutiny from a feminist perspective.

**LLB9350 Special Study in Law A**
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: None  
**Subject Description:** An indepth study of a selected area of law.

**LLB9362 Advanced Revenue Law**
Not on offer in 2009  
Credit Points: 8  
Pre-requisites: LLB9341  
Co-requisites: None  
**Subject Description:** In this subject, students will be exploring selected aspects of income tax, capital gains tax, fringe benefits tax, the new goods and services tax and state taxes. The course is run on an intensive basis and features presentations from tax professionals, the Australian Tax Office, and the NSW Office of State Revenue.

**LLB9365 International and Comparative Intellectual Property Law**
Spring  Wollongong  On Campus  
Credit Points: 8  
Pre-requisites: None  
Co-requisites: LLB9100  
Exclusions: LAW365, and LLB365  
**Subject Description:** The subject will examine fundamental IP issues under the provisions of the
major IP conventions, as well as domestic law of certain countries in Asia and the Pacific. Topics may include: the interface between IP protection and international trade; IP rights and parallel importation; the civil law concept of droit d’auteur (‘author’s right system’) compared with ‘copyright’ in common law jurisdictions; IP evolving in cyberspace and access to and use of information technologies; the patenting of biotechnological products and processes, as well as socio-economic and ethical implications of biotechnological patenting; the protection of plant varieties and access to genetic resources and traditional knowledge; the patenting of pharmaceuticals and the problems relating to accessibility to medicines; the developing importance of geographical indications; the interface between competition law and IP law; protection of well-known marks; a comparative examination of the common law and civil law concepts of passing off and unfair competition; and WIPO Development Agenda.

LLB9395 Legal Research and Writing
Not on offer in 2009
Credit Points: 2
Pre-requisites: None
Co-requisites: None
Subject Description: An introduction to the location and use of primary and secondary legal materials, including the use of computers in retrieving legal material; citation of legal materials.

LWPD900 Prosecutorial Practice
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: LWPD923
Subject Description: This subject provides a thorough introduction to the prosecutorial office and the unique responsibilities and ethical obligations attaching to it, both in theory and as applied in practice, for example as in the consideration of charges and pleas, leading exculpatory evidence, jury selection etc. Students will also learn about the key relationships between the prosecutor and other entities, such as the Court, witnesses, defence, media and police.

LWPD901 Applied Criminal Law
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject complements Advanced Criminal Evidence by examining commonly encountered, and frequently complex, issues of the substantive criminal law. To prosecute or undertake criminal defence effectively, students must understand not only the laws of evidence but also the substantive criminal laws relevant to the crime(s) charged and available defences. Criminal law as taught at the undergraduate level introduces basic working principles such as mens rea, actus reus etc. This subject seeks to build on these fundamental understandings by considering how these principles apply in more complex fact situations, as may be raised in cases of alleged party liability and inchoate offences.

LWPD902 Advanced Criminal Evidence
Autumn Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: A sound knowledge of the laws of evidence is fundamental to prosecuting. This subject seeks to expand upon undergraduate teaching by examining in greater detail the laws of evidence as they specifically apply in the criminal context. A detailed treatment of prosecution relevant aspects of criminal evidence including: the oath; unsworn evidence; competence and compellability; judicial notice; rule in Browne v Dunn; real evidence; exhibits; probity v prejudice test; multiple accused / charges and admissibility; hostile/refractive witnesses; the ultimate issue; hearsay and exceptions; inferences/circumstantial evidence; best evidence rule; ‘accomplice’ testimony; privilege; similar fact; character evidence; corroboration; previous convictions; statements made in presence of accused; admission by action; lies and false alibi; motive.

LWPD906 Criminal Defence in Practice
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: LWPD901 Applied Criminal Law and LWPD902 Advanced Criminal Evidence
Subject Description: This subject provides a thorough introduction to criminal defence practice. Students will learn the unique responsibilities and ethical obligations attaching to defence counsel, both in theory and as applied in practice. Students will also learn about the key relationships between defence counsel and other entities, such as the Court, witnesses, prosecution, media and police.

LWPD907 International Law & Criminal Jurisdiction
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the relationship between international law and criminal jurisdiction. Topics include: the recognised sources of international law; the relationship between international and domestic law; the distinctions between international and transnational law and between prescriptive and enforcement jurisdiction; the legally accepted justifications and uses for extraterritorial jurisdiction and the complexities of universal jurisdiction; the roles of mutual legal assistance and extradition; the jurisdiction of international criminal tribunals; sovereign and diplomatic immunity; and military as compared to civilian criminal jurisdiction in the context of terrorism trials.

LWPD908 International Developments in Civil Rights
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: The law enforcement v civil
rights balance see-saws with societal attitudes and with advancements in technologies available to the State and countering technologies available to the citizen. This balance is examined in light of security measures introduced since the attacks on the US on September 11, 2001 with particular focus on Australia’s counter terrorism legislation. Also examined are relevant international civil rights instruments and significant decisions of specialist bodies such as the European Court of Human Rights and of eminent domestic courts of final appeal.

**LWPD909 Studies in Transnational Crime & Transnational Criminal Law**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: This subject examines the structure and operations of key organised criminal and terrorist networks as well as their common modus operandi. Specific topics include the deleterious effects of corruption and the trafficking routes of drug, people and arms traffickers. Additionally, this subject examines the principal international responses to these networks, including the international conventions against drugs, trafficking, corruption and organised crime, their protocols and the international agencies established to enforce them.

**LWPD910 Cooperation in International Criminal Justice**
- **Spring**: Wollongong Flexible
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: This subject examines the political imperatives that govern the operation of mutual legal assistance and transnational cooperation. Theories of international cooperation are discussed before an examination of cooperation in criminal matters. The subject considers where cooperation is and is not forthcoming from states and some of the explanations about why states act in the ways they do. The subject deals with legal issues but is taught from a political viewpoint, concentrating on the realpolitik of international relations. Particular issues addressed are state security and how it affects cooperation in criminal justice and specific cases of bilateral and multilateral cooperation in prosecuting the perpetrators of genocide, political crime, drug trafficking, human trafficking and other crimes. It deals both with UN international criminal tribunals and the other bodies created by states to control or manage crime and to prosecute criminals.

**LWPD911 Introduction to Common Law Criminal Justice Systems**
- **Not on offer in 2009**
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: This subject covers the historical evolution and modern content of the common law’s criminal justice processes and principles. Areas covered include separation of powers, the doctrine of stare decisis, processes of judicial reasoning, the roles of the prosecutor, defence counsel, judge and jury and the criminal justice process. The criminal justice process is exemplified by tracing a criminal prosecution from charging through to sentencing.

**LWPD912 Prosecuting International Humanitarian Law**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: As attested by the creation of the International Criminal Court, international humanitarian law is of ever increasing significance. Moreover, International Humanitarian Law is enforceable, and is being enforced, through both international and domestic courts. This subject examines not only the substantive laws that comprise International Humanitarian Law but also the critical aspect of enforcement. Topics include: The Geneva Conventions; War crimes; Crimes against humanity; Goals of International Criminal Justice; Competing models for delivery of International Criminal Justice: international tribunals and courts; hybrid bodies; domestic prosecutions; truth and reconciliation commissions.

**LWPD913 Prosecuting Cybercrime**
- **Autumn**: Wollongong Flexible
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: Cybercrime poses unique challenges to law enforcement and prosecution. Cybercriminals are easily conferred, ‘virtual anonymity’. Their crimes frequently span multiple jurisdictions. Criminal laws developed for the ‘real world’ may be inapplicable to cyberspace. Encryption and other technological advances frequently stymie criminal investigation – yet efforts to counter the cybercriminal’s tools-in-trade raise valid civil liberties and privacy concerns. The gathering of digitally stored information often entails highly technical procedures that, upon any ensuing prosecution, will require explication to the court. This subject addresses the unique challenge of cybercrime, the range of responses available and the techno-legal knowledge required to successfully prosecute cybercrime offences.

**LWPD914 Comparative Criminal Justice**
- **Autumn**: Wollongong Flexible
- **Spring**: Wollongong Flexible
- **Credit Points**: 6
- **Co-requisites**: None
- **Subject Description**: Domestic prosecution has an ever-expanding international dimension. Prosecutions of foreign nationals, extraditions, reliance upon mutual legal assistance arrangements and off-shore tracing of criminal proceeds are becoming commonplace. The imperatives of cross-border law enforcement cooperation are such that prosecutors must come to understand the operation of foreign criminal justice systems. Moreover, international criminal tribunals are ascending both in stature and, through their shaping of international human rights norms, legal significance. These tribunals are a multi-jurisdictional melting pot of procedure and substantive law.
This subject compares what may be very loosely termed the ‘Adversarial’ and ‘Inquisitorial’ systems as well as those systems founded upon Shari’a law. The criminal process and, in particular, the specific role of the prosecutor within the inquisitorial and Shari’a systems is examined.

**LWPD916 Prosecuting Transnational Economic Crime**

*Subject Description:* This subject provides students with an understanding essential to the prosecution of modern economic crime by examining the anti-money laundering and proceeds of crime environment. The subject includes money laundering typologies and the use of corporate structures, financial arrangements and financial facilities, tax evasion and tax havens in the context of money laundering. International arrangements and developments intended to reduce the incidence of money laundering are also examined. In addition, the subject considers proceeds of crime issues by examining civil and conviction based confiscation and associated procedures. The subject will look at restraining orders and other procedures intended to locate, restrain and forfeit assets subject to proceeds of crime proceedings. The subject seeks to both impart highly practical knowledge relevant to the prosecution of economic crime and an awareness of related issues.

**LWPD917 Military Prosecutions**

*Subject Description:* This subject entails a study of military laws and processes. Subjects include: the evolution of military law; procedure in Defence Force Magistrate hearings, Board of Inquiry and General and Field Courts Martial; the functions of convening authorities; the roles and responsibilities of Judge Advocates, Director Army Legal Services and Defence Force Magistrates; conflicts of interest; appeals processes; legal concepts of mens rea in the context of laws governing disciplined forces; defences available in military law; analysing Terms of Reference; the impact of developments in international human and civil rights law; jurisdiction and the incorporation and application of civilian laws; the principles governing the reception of evidence in military hearings and the application of principles applied in civilian courts.

**LWPD918 Technical & Forensic Evidence**

*Subject Description:* This subject introduces students to those forensic sciences and technical practices most commonly encountered in criminal trials and provides insights as to how derived evidence is commonly presented. The dominant themes are DNA analysis and forensic psychiatry. Lesser emphasis is placed on pathology, crime scene interpretation (including blood pattern interpretation), the analysis of prints and marks and forensic imaging, (including comparative imaging in ballistics and finger/foot/shoe prints). Class matching & statistical analysis is also discussed in these contexts.

**LWPD919 Special Studies in Prosecutions**

*Subject Description:* This subject permits the inclusion of an in-depth study of a particular aspect of prosecutions that is within the specialisation of a visiting or resident expert and that otherwise would not be offered. Subject content is dependent upon the specialisations of visiting experts.

**LWPD920 Prosecutions Research Project**

*Subject Description:* This subject affords students the opportunity to complete a substantial piece of academic writing and to explore particular areas of personal interest or relevance. Students will research and write a dissertation of approximately 12,000 words together with a briefing précis on a subject selected by the student and approved by the subject co-ordinator. The student should approach the topic from an international and comparative law perspective drawing together different threads of the Masters of Laws (Prosecutions) program in light of the student’s experience and background. The dissertation must approach the area constructively and make recommendations for reform, legislative, institutional or otherwise. Assistance from external experts is encouraged.

**LWPD921 Expert Evidence**

*Subject Description:* Effective prosecution entails an understanding of the laws governing the reception of expert evidence. Expert evidence, in turn, poses unique challenges in terms of advocacy. This subject examines these legal issues and teaches students techniques for leading expert evidence and cross-examining expert witnesses. It does this in the context of forensic science.

**LWPD922 Research Paper in Prosecutions**

*Subject Description:* This subject affords students the opportunity to complete a substantial piece of academic writing relevant to prosecutorial practice and to explore particular areas of personal interest or relevance. Students will submit a proposal on and then research and write up a dissertation of approximately 12,000 words on a subject selected by the student and approved by the subject co-ordinator. Assistance from external experts is encouraged.
LWPD923 Prosecutorial Practice
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: LWPD921
Subject Description: This subject focuses primarily upon the legal issues surrounding the reception of expert evidence and teaching students how to lead expert evidence to cross-examine expert witnesses. It also covers emerging issues of expert witness immunity, liability to disciplinary processes, the development of Codes of Conduct plus the emergence of new positive duties of objectivity, independence and intellectual integrity.

LWPD924 Court Practice
Not on offer in 2009
Credit Points: 6
Pre-requisites: LWPD903
Co-requisites: LWPD904 Advocacy Practicum
Subject Description: A trial is more than a forum for the clinical application of the laws of evidence to evidence itself. Rather, the criminal trial is a dynamic process practised within a constrained environment and entailing strategic decisions as to, for example, the evidence to be adduced, how it is to be adduced and what pre-trial applications might be useful. This subject teaches the technical and strategic aspects of the criminal lawyer’s work in trial and at the sentencing stage. Role of judge and jury; jury selection and sequestering; the opening address; using the expert witness; prior inconsistent statements; adoption of out of court statements; hostile and refractory witnesses; ‘giving evidence’ through questioning and other improper modes of examination; hypothetical questions; agreed facts; order of witnesses; interpreters; technology in the courtroom; ‘ aids’ for the jury; using the transcript; avoiding appealable error; considerations on summing up and defence closing addresses; judicial bias; verdict delay and instructions to the jury; majority verdicts. Principles and types of sentencing; the prosecutor at sentencing; the totality principle; ‘ taking into account’ and sample charges; reports for the court.

LWPD925 DNA for Lawyers
Autumn Wollongong Flexible
Spring Wollongong Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: DNA Technology has emerged as the most important scientific contributor to the criminal justice system of the past two decades. Developments in the technology and associated disciplines (maths, statistics, microbiology) and the prospect of a major new pathway (SNIP) cement the present and future place of DNA in the criminal process. It is a complex area and one that counsel must understand intimately in order to present or attack it. This subject gives to the science of DNA technology the degree of depth and breadth needed to ensure students have a balanced understanding of its several aspects.

LWPD926 Experts and their Evidence
Not on offer in 2009
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Exclusions: LWPD921
Subject Description: This subject provides a thorough introduction to the prosecutorial office and the unique responsibilities and ethical obligations attaching to it, both in theory and as applied in practice, for example as in the consideration of charges and pleas, leading exculpatory evidence, jury selection etc. Students will also learn about the key relationships between the prosecutor and other entities, such as the Court, witnesses, defence, media and police.

MPOL901 National Dimensions of Maritime Policy
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject introduces students to the field of maritime policy, providing an overview of conceptual approaches and analytical tools used in public policy analysis as well as an introduction to major substantive areas of national maritime policy. Participants are encouraged to adopt a broad inter-disciplinary perspective to policy analysis. Areas considered include defence, marine industry, marine science and technology, offshore resource development, integrated coastal management, coastal surveillance, shipping and port development and oceans policy. The subject compares Australia’s experience with other advanced international countries, and pays attention to the Asia Pacific.

MPOL902 International Issues in Maritime Policy
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: Examines maritime policy issues in an international context. In doing so, it deals with the history of humanity’s usage of the sea and the foreign policy implications of maritime policy. It analyses international issues and actors including the legal framework and theories of maritime power, strategy and co-operation, with particular attention to international regimes with maritime application, including environmental, fishing and other resources, trade, shipping, ports, and illegal activities regimes.

MPOL911 Maritime Transport 1: International Shipping
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject focuses on the structure and operations of the international shipping market. It examines the determinants of supply and demand for shipping and the factors which have been, and are, responsible for changes in the market. It looks at individual submarkets; freight rates and the pricing of shipping services. It pays close attention to recent developments in shipping including containerisation, hub and feeder operations and intermodalism, with particular regard for issues relevant to Australia and the Asia-Pacific.
MPOL912 Maritime Transport II: Port Development
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject deals with the strategic development of ports. It assesses a number of approaches to the way in which ports are planned; and pays particular attention to the concepts of competitive efficiency and competitive advantage. It examines issues of port performance, port pricing and port investment policies. The subject reviews recent developments in Australian port development policy and in the development policies of ports in New Zealand, Southeast Asia and the Pacific Region.

MPOL920 Marine Environmental Management
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides a comprehensive overview of the scientific basis of marine environmental management. It adopts a multidisciplinary approach to the scientific understanding of how major marine ecosystems work and shows how an appreciation of such knowledge leads to the development of appropriate management strategies for these systems. The systems covered include estuaries, reefs, coastal wetlands and lagoons. The science of radioactive and other hazardous waste management is discussed. Case studies from Australia, South-East Asia and the Pacific Islands are included.

MPOL921 Marine Environmental Planning
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject presents material necessary for a comprehensive overview of the status and development of maritime environmental planning in government and industry. Following an introduction to the principles of environmental planning, staff from a wide range of organisations make presentations on the mechanisms, difficulties and benefits of current planning activities in Australia. Reference is made to activities in other countries and to the global situation.

MPOL931 International Maritime Environmental Law
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject uses as its conceptual framework sovereignty and sovereign rights. Students will be introduced to the concept of Port State and Flag State responsibilities and powers; pollution controls in zones of jurisdiction, marine resource conservation, pollution control on the high seas; pollution control in the Area; the role of international and regional institutions within the subject's conceptual framework and the effectiveness of current marine environmental protection rules.

MPOL932 The Law of the Sea
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the evolving law of the sea from an historical perspective; examines maritime zones of jurisdiction (internal waters; territorial sea; contiguous zone; the exclusive economic zone; the high seas; the continental shelf and the Area); navigational regimes (transit passage, innocent passage, archipelagic sea lanes passage); maritime boundary delimitation and marine resources law (fisheries and oil/natural gas).

MPOL941 History and Politics of Sea Power
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject reviews the evolution of theories of sea power and maritime strategy from the early theorists of the nineteenth century to contemporary post-Cold War tacticians. It addresses the relationship between ideas about the use of naval force and the actual history and politics of maritime power, including the ideas of geopoliticians from Admiral Alfred Thayer Mahan and Sir Halford Mackinder through Nicholas Spykman and the planners of Total War to post-Cold War experts like Colin S. Gray. It relates these theorists’ work to the emergence of naval force and counterforce in the modern world, including use and development of sea power in peacetime.

MPOL951 Selected Topics in Maritime Policy (I)
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides students with the opportunity to undertake a closely supervised programme of study, including reading and other appropriate forms of research, in an approved, specialist area of Maritime Policy.

MPOL952 Selected Topics in Maritime Policy (II)
Not on offer in 2009
Credit Points: 8
Pre-requisites: None
Co-requisites: None
Subject Description: This subject provides students with the opportunity to undertake a closely supervised programme of study, including reading and other appropriate forms of research, in an approved, specialist area of Maritime Policy. (This subject covers a different range of topics from those covered in MPOL 951 Selected Topics in Maritime Policy (I).)

MPOL960 Research Project in Maritime Policy
Not on offer in 2009
Credit Points: 16
Pre-requisites: Honours at a minimum level of II(i) in an appropriate discipline involving study of maritime
policy OR achievement of a minimum of a Credit in each of MPOL901 and MPOL902 PLUS prior submission and approval of a detailed, written research proposal.

**Co-requisites:** None

**Subject Description:** A detailed analysis of a significant aspect of or issue in maritime policy, drawing on research into relevant primary and other sources, bodies of theory, methodological questions and/or comparative materials. Enrolment requires the prior approval of the Course Co-ordinator and may depend on the availability of appropriate sources and suitably qualified staff.

---

**MPOL961 Research Project in Maritime Policy**

*Not on offer in 2009*

**Credit Points:** 16

**Pre-requisites:** Honours at a minimum level of II(iii) in an appropriate discipline involving study of maritime policy OR achievement of a minimum of a Credit in each of MPOL901 and MPOL902 PLUS prior submission and approval of a detailed, written research proposal.

**Co-requisites:** None

**Subject Description:** A detailed analysis of a significant aspect of or issue in maritime policy, drawing on research into relevant primary and other sources, bodies of theory, methodological questions and/or comparative materials. Enrolment requires the prior approval of the Course Co-ordinator and may depend on the availability of appropriate sources and suitably qualified staff.

---

**MPOL970 Major Thesis in Maritime Policy**

*Not on offer in 2009*

**Credit Points:** 48

**Pre-requisites:** (Bachelor’s degree with Honours in an appropriate discipline involving study of maritime policy with a grade of 2(i) or better) or (MA MPOL with a minimum credit average)

**Co-requisites:** None

**Subject Description:** The subject consists of research, including preparation of a detailed proposal outlining objectives, methodology and sources, for an original, substantial contribution to scholarship. The thesis subject, which must be approved before enrolment, concerns an aspect (or aspects) of maritime policy, broadly defined. The research will generally be multi- or inter-disciplinary. Students will be required to attend and present work-in-progress papers to a regular postgraduate seminar series.
Faculty of Science

Member Units
School of Biological Sciences
School of Chemistry
School of Earth and Environmental Sciences

Courses Offered
Doctor of Philosophy
- Biological Sciences
- Chemistry
- Environmental Science
- Geography
- Geology
- Physics*
Master of Science – Research
- Biological Sciences
- Biotechnology
- Chemistry
- Geography
- Geology
- Medicinal Chemistry
- Physics*
Master of Environmental Science – Research
Master of Environmental Science – Advanced
Master of Environmental Science
Master of Arts (Geography)
Master of Science
- Biotechnology
- Environmental Biology
- Chemistry
- Coastal Planning and Management
- Medicinal Chemistry
- Medical Radiation Physics*
- Geology
- Human Geography
- Physical Geography
Graduate Diploma in Science
- Biological Sciences
- Chemistry
- Human Geography
- Physical Geography
- Geology
- Physics*
Graduate Certificate in Spatial Science
* Refer to the Faculty of Engineering

For tuition fee information please see the following:
International - www.uow.edu.au/prospective/international/fees/
Doctor of Philosophy

Testamur Title of Degree: Doctor of Philosophy
Abbreviation: PhD
Home Faculty: Science
Duration: 3 years full-time or part-time equivalent
Total Credit Points: 48 per year
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 201
CRICOS Code: 001243F (Lab), 020192K (non-Lab)

Overview
Candidates complete a major thesis and undertake a research project arranged in consultation with an appropriate member of staff, and approved by the Head of School, before enrolment. Doctoral theses must make a major original contribution to scientific knowledge in the chosen area of research.

Entry Requirements / Assumed Knowledge
An Honours degree of at least four years duration in a relevant discipline at Class II, Division 2, or higher (or equivalent).

Course Requirements
Candidates complete a Doctoral dissertation of approximately 60,000 – 80,000 words in length.
Students enrol in the appropriate major thesis subject.

Disciplinary Areas Available
- Biological Sciences
- Chemistry
- Environmental Science
- Geography
- Geology
- Physics*

*Refer to Faculty of Engineering

Other Information
For further information contact the Faculty of Science Office, Room 41.258, or telephone (02) 4221 3530.
Specific enquiries should be directed to the appropriate Academic Unit: School of Biological Sciences (02) 4221 3013, School of Chemistry (02) 4221 3509 or School of Earth and Environmental Sciences (02) 4221 3721.

Master of Science - Research

Testamur Title of Degree: Master of Science - Research
Abbreviation: MSc-Res
Home Faculty: Science
Duration: 1.5 years full-time or part-time equivalent
Total Credit Points: 72
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 1304
CRICOS Code: 042532B, 042534M (Geography)

Overview
Courses provide for the specific needs and interests of students wishing to obtain experience in a modern research program.

Entry Requirements / Assumed Knowledge
Minimum entry requirement is a Bachelor degree with a major study in the relevant discipline.

Course Requirements
The course consists of 72 credit points to be completed in a maximum time of two years (four sessions), as follows:
- 24 credit points of coursework; and
- 48 credit point research project.
Students entering with a degree at the level of at least a Bachelor Honours Class II, Division 2 may be awarded the 24 credit points of coursework as advanced standing based on prior research training.

Students undertaking the 24 credit points of coursework will select appropriate postgraduate subjects from those offered in the discipline in consultation with the Head of School or the Postgraduate Coordinator.

For detailed possible coursework subject programs, consult the Master of Science by coursework degree in the relevant discipline.

Disciplinary Areas Available
- Biological Sciences
- Biotechnology
- Chemistry
- Geography
- Geology
- Medicinal Chemistry
- Physics*

* Refer to Faculty of Engineering

Other Information
For further information contact the Faculty of Science Office, Room 41.258, or telephone (02) 4221 3530.
Specific enquiries should be directed to the appropriate Academic Unit: School of Biological Sciences (02) 4221 3013, School of Chemistry (02) 4221 3509 or School of Earth and Environmental Sciences (02) 4221 3721.

Overview
This program involves a major project in one of the many research areas of environmental science available in the Faculty. The research project will provide information for improved understanding of how ecosystems work, for solving environmental problems of immediate concern and to assist policy makers in developing new strategies and legislation for environmental management. This degree provides the opportunity for students to contribute to this work by undertaking a major research project in one of the areas of environmental science within the Faculty.

Entry Requirements / Assumed Knowledge
A degree with Honours in environmental science, science or engineering at a level of at least Class II, Division 2, or a Master of Environmental Science or Master of Science with credit average, or equivalent qualifications or appropriate publications and work experience.

Entry must be approved by the Coordinator and, if thesis work is being supervised by staff from an Academic Unit, the Head of that Unit.

Course Requirements
The course consists of 72 credit points to be completed in a maximum time of two years (four sessions), as follows:
- a 48 credit point research project (THES924 Thesis); and
- a maximum of 24 credit points of subjects, chosen from the Environmental Science postgraduate schedule in consultation with the Coordinator of Environmental Science.

Special Note: Students entering with an Honours degree at the level of at least Bachelor Honours Class II, Division 2, or a Master of Environmental Science degree (or equivalent) will normally be awarded advanced standing for the 24 credit points of coursework, except for candidates with no background in environmental science who will be required to complete ENVI922 Scientific Basis of Environmental Management (12 credit points).

2009 Postgraduate Handbook 367
Master of Environmental Science Advanced

Title of Degree: Master of Environmental Science Advanced
Abbreviation: MEnvScAdv
Home Faculty: Science
Duration: 2 years full-time or part-time equivalent
Total Credit Points: 96
Delivery Mode: Face-to-face
Starting Session(s): Autumn and Spring
Location: Wollongong
UOW Course Code: 1412
CRICOS Code: 048589C

Overview
This degree is aimed primarily at international students, and combines research and coursework to provide a two-year (or part-time equivalent) degree for Science and Engineering graduates or others, with a limited undergraduate background in the environmental science area.

Entry Requirements / Assumed Knowledge
Bachelor degree in Environmental Science, Science, Applied Science, Agriculture, Forestry, Veterinary Science or Engineering, or equivalent tertiary qualifications and/or professional experience. Students must consult with the Coordinator of Environmental Science for approval of overall entry.

Course Requirements
Candidates must complete the three core subjects plus a Thesis of either 24 or 32 credit points plus elective subjects to total 96 credit points, as set out below.

Master of Environmental Science

Testamur Title of Degree: Master of Environmental Science
Abbreviation: MEnvSc
Home Faculty: Science
Duration: One year full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn and Spring
Location: Wollongong
UOW Course Code: 1500
CRICOS Code: 026171M

Overview
This program is designed for applicants who wish to extend their knowledge of science relating to the environment, by studying areas not covered in their undergraduate Science or Engineering degree (including environmental policy, planning and management).

Entry Requirements / Assumed Knowledge
Completion of a recognised Bachelor Degree in: Environmental Science; Science; Applied Science; Agriculture; Forestry; Veterinary Science or Engineering (or equivalent qualifications and/or professional experience).

Alternative Entry Criteria: The person would be required to have been working in a position for at least five years which, if they left, would be filled by an appropriately qualified graduate. Normally a written statement from a suitably qualified person, usually a senior manager with a strong science background, is required as confirmation of the necessary skills.

Course Requirements
Students will undertake a program of at least 48 credit points comprising two compulsory subjects, and optional subjects selected from the subjects listed below and approved by the Coordinator of the degree.

Overview

This coursework degree is designed for candidates who wish to extend their grounding in Geography beyond the undergraduate level. It also provides an alternative route to subsequent PhD studies for students who do not possess a BA (Honours) degree.

Entry Requirements / Assumed Knowledge

Normally a Pass Bachelors degree of at least three years' duration in a relevant discipline (with at least three third year level subjects in the discipline) or a similar tertiary qualification, with relevant work experience, as approved by the Head of School.

Course Requirements

Candidates must complete 48 credit points of 900-level subjects, as set out below, as approved by the Course Coordinator. Students may be required to complete additional credit points if their disciplinary background is deemed unsatisfactory.

Geography

The following coursework subjects have been devised by the School of Earth and Environmental Sciences to meet the needs of students who wish to proceed to the postgraduate level in Geography to enhance their qualifications in an area without undertaking a research project.

The subjects have been grouped in two strands which reflect the major research strengths in Geography within the School of Earth and Environmental Sciences.

• Physical Geography and Environments
• Human Geography and Environments

Students with a satisfactory background in Earth and Environmental Sciences complete subjects to the value of 48 credit points chosen from either of the two programs, in consultation with the Course Coordinator. Other students may be required to complete subjects to a value of 72 credit points.

Master of Science
Testamur Title of Degree: Master of Science
Abbreviation: MSc
Home Faculty: Science
Duration: 1.5 full-time or part-time equivalent
Total Credit Points: 72
Delivery Mode: Face-to-face
Starting Session(s): Spring
Location: Wollongong
UOW Course Code: 574_9 (574A)
UAC Code: NA
CRICOS Code: TBA

Overview
This coursework degree is designed for candidates who wish to extend their grounding in a particular science discipline beyond the undergraduate level. It also provides an alternative route to subsequent PhD studies for high performing students who do not possess a Bachelor of Science (Honours) degree. Students who graduate from this degree would be expected to obtain jobs in relevant industries, research institutes and government departments in both Australia and overseas.

Entry Requirements / Assumed Knowledge
Normally a Pass Bachelors degree of at least three years' duration in the relevant discipline (with at least three third year level subjects in the discipline) or a similar tertiary qualification, with relevant work experience, as approved by the relevant Masters Coordinator or Head of School.

Course Requirements
Students in the Master of Science complete a common core of 24 credit points and a Major Study of 48 credit points.

Common core subjects
Subject Session Credit points
SCIE911 Fundamentals of Science Communication Spring 6
SCIE912 Fundamentals of Science Practice Spring 6
SCIE913 Fundamentals of Science Data and IT Spring 6
SCIE914 Current Questions in Science  

**Major Study Areas**

- Biotechnology
- Chemistry
- Coastal Planning and Management
- Environmental Biology
- Geology
- Human Geography
- Medicinal Chemistry
- Physical Geography

**Other Information**

For further information regarding any of the Master of Science majors please contact the Faculty of Science Office, 41.258, or telephone (02) 4221 3530.

Web site: www.uow.edu.au/science

**Master of Science (Biotechnology)**

The Master of Science (Biotechnology) is designed for graduates who seek knowledge and technological expertise in specific areas of cell and molecular biology, which are the basis for modern biotechnological research and development. Students complete 48 credit points of subjects as listed below chosen in consultation with the Biotechnology Masters Coordinator.

<table>

**Optional Subjects**

The following subjects may be substituted for one or more of the core subjects after consultation with the Biotechnology Masters Coordinator.

- BIOL983 Research Methods in Biotechnology Autumn 12
- BIOL991 Major Research Project Autumn, Spring 24
- BIOL992 Literature Review Autumn, Spring 12
- BIOL993 Research Project Autumn, Spring 12

The Coordinator of this Major is Dr Ren Zhang, School of Biological Sciences, Room 35.124B.

**Master of Science (Chemistry)**

This program is designed for applicants from industry or education who wish to extend their grounding in chemistry theory beyond the undergraduate level. It also provides an alternative route to subsequent PhD studies for students who do not possess a BSc (Honours) degree. Students complete 48 credit points from in the following subjects, as approved by the Course Coordinator.

Or 900- level subjects from other academic units subject to the approval of the Heads of those units and the Masters Coordinator

Note: Students cannot enrol in subjects where they have completed the equivalent 300- level subjects at this University.

The Coordinators of this Major are Professor William Buttemer, School of Biological Sciences, Room 35.G19C (Autumn Session) and Associate Professor Ron West, School of Biological Sciences, Room 35.G11 (Spring Session).

Master of Science (Geology)

The following coursework subjects have been devised by the School of Earth and Environmental Sciences to meet the needs of students who wish to proceed to the postgraduate level in Geology to enhance their qualifications in an area without undertaking a research project.

Students complete subjects to the value of 48 credit points chosen from the subjects listed below, in consultation with the Course Coordinator.

<table>
<thead>
<tr>

</table>
The Degree Coordinator is Professor John Morrison, School of Earth and Environmental Sciences, Room 19.G012.

Master of Science (Human Geography)

The following coursework subjects have been devised by the School of Earth and Environmental Sciences to meet the needs of students who wish to proceed to the postgraduate level in Human Geography to enhance their qualifications in an area without undertaking a research project.

Students complete subjects to the value of 48 credit points chosen from the subjects listed below, in consultation with the Course Coordinator.

Subjects Session Credit Points
EESC904 Advanced Geographic Information Science Spring 12
EESC905 Advanced Remote Sensing Autumn 12
EESC910 Advanced Social Spaces: Rural and Urban Spring 12
EESC914 Fundamentals of Spatial Science Autumn or Spring 12
EESC916 Coastal Population Studies Autumn 12
EESC917 Advanced Spaces, Places and Identities: Qualitative research design Autumn 12
EESC918 Advanced Environmental and Heritage Management Spring 12
EESC950 Advanced Topic A Annual, Autumn, 12 or Spring

The Degree Coordinator is Professor John Morrison, School of Earth and Environmental Sciences, Room 19.G012.

Master of Science (Medicinal Chemistry)

This coursework program provides vocational training in medicinal chemistry, an area where there is currently a high demand for graduates. The program consists of special coursework in medicinal chemistry and a small research project.

Students complete 48 credit points of coursework from the following subjects, as approved by the Course Coordinator.

Subjects Session Credit Points
Discipline-specific subjects (24cp):
CHEM930 Introduction to Medicinal Chemistry Annual, Autumn, 12 or Spring
CHEM944 Advanced Topics in Medicinal Chemistry Autumn 12
Plus two subjects (24cp) selected from:
CHEM914 Advanced Analytical Chemistry Autumn 12
CHEM964 Elucidating Molecular Structure Autumn 12
CHEM992 Bioinformatics and Biological Chemistry Spring 12
CHEM993 Advanced Organic Synthesis and Reactivity Spring 12
Possible substitutions:
CHEM915 Advanced Chemistry Laboratory Project Annual, Autumn, 12 or Spring
CHEM919 Literature Report in Chemistry Annual, Autumn, 12 or Spring

The Coordinator of this Major is Associate Professor Paul Keller, School of Chemistry, Room 18.222.

Master of Science (Physical Geography)

The following coursework subjects have been devised by the School of Earth and Environmental Sciences to meet the needs of students who wish to proceed to the postgraduate level in Physical Geography to enhance their qualifications in an area without undertaking a research project.

Students complete subjects to the value of 48 credit points chosen from the subjects listed below, in consultation with the Course Coordinator.

Subjects Session Credit Points
EESC901 Advanced Plate Tectonics, Macrotopography and Earth History Autumn 12
EESC902 Advanced Coastal Environments: Processes and Management Spring 12
EESC903 Advanced Fluvial Geomorphology and Sedimentology Autumn 12
EESC904 Advanced Geographic Information Science Spring 12
EESC905 Advanced Remote Sensing Autumn 12
EESC912 Advanced Soils, Landscapes and Hydrology Spring 12
EESC914 Fundamentals of Spatial Science Autumn or Spring 12
EESC950 Advanced Topic A Annual, Autumn, 12 or Spring
Graduate Diploma in Science

Testamur Title of Degree: Graduate Diploma in Science
Abbreviation: GDipSc
Home Faculty: Science
Duration: 1 year full-time or part-time equivalent
Total Credit Points: 48
Delivery Mode: Face-to-face
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 682
CRICOS Code: 007042M

Overview
The Graduate Diploma in Science provides graduates with the opportunity to acquire competence in a particular area of science at a sufficiently advanced level, to enable them to either proceed with further study or to update, broaden or intensify their knowledge and skills in the discipline.

The diploma will be found useful by international students, and by students either without a full major in a discipline at undergraduate level, or who completed their first degree some years ago.

The majors available are:
• Biological Sciences
• Chemistry
• Geography
• Geology
• Physics*

* Refer to the Faculty of Engineering

Entry Requirements / Assumed Knowledge
A relevant undergraduate degree of at least three years’ duration, or a similar tertiary qualification with relevant work experience.

Course Requirements
Candidates select subjects to the value of 48 credit points from the Undergraduate Science Schedule of subjects and must seek approval from the relevant Head of School, who may also specify other required subjects.

Other Information
For further information contact the Associate Dean, Associate Professor Paul Carr - Faculty of Science Office, Room 41.259, telephone (02) 4221 3172, email: pcarr@uow.edu.au.
Specific enquiries should be directed to the appropriate Academic Unit: School of Biological Sciences (02) 4221 3013, School of Chemistry (02) 4221 3509 or School of Earth and Environmental Sciences (02) 4221 3721.

Graduate Certificate in Spatial Science

Testamur Title of Degree: Graduate Certificate in Spatial Science
Abbreviation: GCertSpatialSc
Home Faculty: Science
Duration: One year part-time
Total Credit Points: 24
Delivery Mode: On Campus
Starting Session(s): Autumn or Spring
Location: Wollongong
UOW Course Code: 682
CRICOS Code: 007042M

Overview
The aim of this course is to provide students with a theoretical basis for, as well as practical experience in, applying geospatial technologies (Geographic Information Science or Remote Sensing, and to a lesser extent, GPS) within an environmental problem solving context using industry standard software.
Entry Requirements / Assumed Knowledge

A Pass Bachelors degree of at least three years’ duration in any Science or Information Technology related specialisation (including Geography) or a similar tertiary qualification, with relevant work experience, as approved by the Head of School

SUBJECT DESCRIPTIONS

BIOL970 Advances in Conservation Biology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject examines the science behind modern conservation biology, integrating ecology, ecological genetics and legislation. Emphasis is placed on understanding ecological and genetic principles, mastering laboratory and field skills and elementary mathematical modelling, and then placing these in the context of current legislation and other conservation instruments. Students use these skills and knowledge to assess a recent issue in conservation biology, as a critical review of methodology and conclusions.

BIOL971 Advanced Topics in Marine and Terrestrial Ecology
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Introduction to ecology - levels of organisation (individual, population, community, ecosystem). Experiments in ecology - their design, analysis and interpretation. Biotic interactions: competition, herbivory, predation, mutualisms. Disturbance, catastrophe and community structure and function. Behavioural ecology: innate vs learned behaviours and their effects on individual fitness, demography and community structure. Factors affecting species richness. Literature review and project proposal examining contemporary research in ecology (tailored to the specialisations of MSc students enrolled in the subject).

BIOL972 Ecological and Evolutionary Physiology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None

BIOL980 Biotechnology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Recombinant DNA technology and genetic engineering of micro-organisms, plant cells and animal cells. Expression, production and purification of recombinant proteins, cytokines and hormones. Fermentation technology and industrial scale-up. Applications of Biotechnology to the fields of human therapeutics, agriculture and diagnostics. Bioinformatics, ethical and patent issues of Biotechnology.

BIOL981 Molecular Cell Biology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject covers many specific aspects of cell biology, including cell and tissue structure, protein sorting mechanisms, secretion, membrane transport, energetics, signal transduction, apoptosis, cellular and molecular genetics of development, the cell cycle and cancer. In addition, focused lab-based practicals are offered which will provide an understanding of the techniques used for studying cell biology. These include: cell and organelle isolation and analysis, growth of various cell types in aseptic culture, observation and manipulation of cellular functions and cell surface labelling and protein blotting. Lastly, students undertake a 6 week research project (4 hours/week) which expands skills and experience with cell culture and studies of cell differentiation and function.

BIOL982 Infection and Immunity
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: Completion of a suitable science or related undergraduate degree
Co-requisites: None
Subject Description: This is a coursework subject intended to provide students at MSc level with an understanding of leading edge aspects of microbial pathogens, the immune system, and the ways in which the immune system defends the body against pathogens. The overwhelming majority of students undertaking this subject are enrolled in the MSc(Biotechnology) degree, and take this as one of four subjects required for the degree. This subject will survey the major groups of microbial pathogens before examining the multiple facets of the immune system in humans. The interactions between pathogens and the immune system will be explored, both in theory and as an integrated part of the practical exercises. Technological advances in immunology and immunochemistry that have made major impacts on modern biotechnology will also be studied, including monoclonal and ‘humanized’ antibodies, and recombinant vaccines.

BIOL983 Research Methods in Biotechnology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None

**BIOI984 Applied Bioinformatics**

Spring: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** A revolution is underway in Biological Sciences due to the impact of Genomics, Transcriptomics and Proteomics. These new technologies have transformed Biology from a data-poor to a data-rich science. Bioinformatics is concerned with the utilisation of this new data. Bioinformatics will be explored in lectures and computer-based practicals. Databases for nucleic acid and protein sequences, structures and other parameters of biological molecules, plus linkages to the scientific literature, will be used to extract information, compare and analyse biological data. Each student will prepare a literature research paper and deliver a seminar on a relevant aspect of Bioinformatics.

**BIOI991 Major Research Project**

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Summer 2009/2010: Wollongong On Campus

**Credit Points:** 24

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** The student will undertake a research project on a topic in Biology and present a research report and seminar on a topic chosen by the supervising staff. The research can be undertaken in collaboration with industry or another recognised institution.

**BIOI992 Literature Review Project**

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Summer 2009/2010: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Under the supervision of staff (nominated by the Masters Coordinator) the student will survey the biological literature and present a written report and a seminar on a topic chosen by the supervisory academic.

**BIOI993 Research Project**

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Summer 2009/2010: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Under the supervision of staff (nominated by the Masters Coordinator) the student will undertake a research project and present a written report and a seminar on a topic chosen by the supervising staff.

**CHEM910 Research Skills Training**

Annual: Wollongong On Campus

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Spring 2009/Autumn 2010: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** Appropriate degree. Compulsory for all students undertaking an MSc in Chemistry by coursework.

**Co-requisites:** None

**Subject Description:** This subject provides training in generic research skills such as data interpretation and analysis, library skills, literature evaluation, quality control and assurance, and Occupational Health and Safety. In addition, students will carry out directed studies in topics of advanced chemistry, chosen to complement their research interests, in discussion with the course Co-ordinator.

**CHEM914 Advanced Analytical Chemistry**

Autumn: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** None

**Co-requisites:** None

**Subject Description:** Chemical analysis is an essential part of solving problems in many scientific disciplines. In addition to its application to problem solving, analytical chemists are also interested in improving the way chemical analysis is performed, by making it faster, cheaper, more sensitive and less susceptible to interference. As a result, a vast array of instrumental methods has been developed, each one having its own strengths and weaknesses in a given application. In this subject, our interest is not in the numerical results of chemical analyses, but rather how we obtain these numbers and evaluate their reliability. The principles underlying common instrumental methods will be discussed in lectures, specifically: the measurement technique; instrument development and components; application of the instrument to analysis; and advantages and limitations of the instruments. The accompanying laboratory component will provide an opportunity for hands-on experience with analytical instrumentation.

**CHEM915 Advanced Chemistry Laboratory Project**

Annual: Wollongong On Campus

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Spring 2009/Autumn 2010: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** Appropriate degree.

**Co-requisites:** None

**Subject Description:** Under the supervision of a staff member appointed by the Head of School, students will undertake a laboratory project and present a written report, poster and a seminar on a topic chosen by the supervising staff member.

**CHEM919 Literature Report in Chemistry**

Annual: Wollongong On Campus

Autumn: Wollongong On Campus

Spring: Wollongong On Campus

Spring 2009/Autumn 2010: Wollongong On Campus

Summer 2009/2010: Wollongong On Campus

**Credit Points:** 12

**Pre-requisites:** Appropriate degree.
Students will present their findings by means of a report. For a research problem in biomolecular science to solve. This may take the form of a pollution or environmental research, given a research problem in environmental chemistry and related analytical techniques. The exact course of study will vary on the student's interests. It may include modules of study of atmospheric processes and their chemistry; water and soil chemistry and analysis; environmental sampling; instrumental analysis; Quality Control/Quality Assurance/Total Quality Management. In addition, students undertake a small project in which they are given a research problem in environmental chemistry to solve. This may take the form of a pollution or remediation/disposal problem or data to analyse. Students will present their findings by means of a report.

**CHEM930 Introduction to Medicinal Chemistry**

*Subject Description:* This subject covers chemical aspects of the design, physiological activity and metabolism of therapeutic/diagnostic drugs. The theoretical component covers: cellular targets for drug action (theoretical aspects and case studies), an overview of approaches to drug discovery, structure-activity relationships and computer-aided methods of physicochemical properties and drug action, stereochemistry/chirality and drug action, drug metabolism, drug resistance, pro-drug strategies and organic and inorganic medicinal agents. In addition a guest lecturer from a pharmaceutical company will give a 2 hour lecture on current issues and strategies for successful drug design, research and marketing. Students will also undertake electives on ‘advanced’ medicinal chemistry topics. Laboratory: The subject also includes a 13 week (3 hr/week) laboratory component which involves organic synthesis (combinatorial peptide synthesis, sulphonamide synthesis), characterisation techniques (nmr, UV/Vis, mass spectrometry, infrared spectroscopy), enzyme inhibition studies, and anti-bacterial testing.

**CHEM940 Contemporary Topics in Biomolecular Chemistry**

*Subject Description:* This unit covers chemical aspects of drug action (theoretical aspects and case studies), an overview of approaches to drug discovery, structure-activity relationships and computer-aided methods of physicochemical properties and drug action, stereochemistry/chirality and drug action, drug metabolism, drug resistance, pro-drug strategies and organic and inorganic medicinal agents. In addition a guest lecturer from a pharmaceutical company will give a 2 hour lecture on current issues and strategies for successful drug design, research and marketing. Students will also undertake electives on ‘advanced’ medicinal chemistry topics. Laboratory: The subject also includes a 13 week (3 hr/week) laboratory component which involves organic synthesis (combinatorial peptide synthesis, sulphonamide synthesis), characterisation techniques (nmr, UV/Vis, mass spectrometry, infrared spectroscopy), enzyme inhibition studies, and anti-bacterial testing.

**CHEM944 Advanced Topics in Medicinal Chemistry**

*Subject Description:* This is a specialist subject in aspects of medicinal chemistry and related areas. Topics can include: structure-based ligand design (including computer-aided drug design); structure-pharmacological property relationships; synthesis and applications of radiopharmaceuticals; drug stability and formulation; toxicology and metabolism; advanced synthetic chemistry (including asymmetric synthesis and chiral drugs); bioactive natural products and drug development (including medicinal plant studies), toxicology and advanced proteomics.

**CHEM950 Contemporary Topics in Analytical and Environmental Chemistry**

*Subject Description:* This unit gives students a good grounding in modern aspects of environmental chemistry and related analytical techniques. The exact course of study will vary depending on the student's background and interests. It may include modules of study of atmospheric processes and their chemistry; water and soil chemistry and analysis; environmental sampling; instrumental analysis; Quality Control/Quality Assurance/Total Quality Management. In addition, students undertake a small project in which they are given a research problem in environmental chemistry to solve. This may take the form of a pollution or remediation/disposal problem or data to analyse. Students will present their findings by means of a report.
treatment of molecular symmetry is also included. Applications of these methods to organic, inorganic, biological and gas-phase systems are covered.

**CHEM991 Intelligent Materials and their Applications**

Spring Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: CHEM991 is designed to provide students with an introduction to materials chemistry. It examines a variety of different classes of both traditional chemical materials such as organometallic compounds and typical synthetic polymers, as well as more modern materials including nanotubes, nanoparticles and inherently conducting polymers. In addition students learn how other novel materials, including molecular machines, can be prepared by using weak intermolecular forces to form assemblies of molecules (supramolecular chemistry).

**CHEM992 Bioinformatics and Biological Chemistry**

Spring Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: CHEM992 is divided into three lecture strands of approximately equal length: (i) Bioinformatics, (ii) Biological macromolecules (proteins and nucleic acids) - structure and function, and (iii) Proteomics. In the practical course, bioinformatics will be explored in computer-based tutorials and practicals. Databases for nucleic acid and protein sequences, structures and other parameters of biological molecules, plus linkages to the scientific literature, will be used to extract information and to compare and analyse these data. Proteomics and protein and nucleic acid structure will also be investigated via computer-based practicals. In the laboratory, the sequence of a dipeptide will be determined and structure/function aspects of the protein, lysozyme, will be analysed. In addition, students will use their background in the knowledge of the structure of DNA and the ways in which drugs bind non-covalently with double-stranded DNA to investigate the stoichiometry of the binding of the minor groove binding drug, 4',6-diamido-2-phenyl indole (DAPI), to various DNA sequences. The use of the molecular visualization program, Rasmol.

**CHEM993 Advanced Organic Synthesis and Reactivity**

Spring Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject introduces students to the theory and practice of modern organic chemistry. Topics covered include: Reactive intermediates (generation, determination, reaction) such as free radicals, carbens, and arenes; Stereochemistry and enantioselective synthesis; NMR, spectroscopy; including NMR, theory and practical applications, spectra acquisition and interpretation, and physical detection of stereochemistry by NMR; Synthesis of carbocyclic compounds; Heterocyclic synthesis: reactions and applications of common heterocycles; Molecular modelling: hands-on experience with computer modelling.

**CHEM994 Environmental Chemistry and Climate Change**

Autumn Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: The environment depends on complex interactions of chemical, physical and biological processes. These can be both natural and anthropogenic in origin and change with time. In this subject the chemical aspects are highlighted in strands including atmospheric chemistry, aquatic chemistry and soil chemistry. This subject also investigates methods for assessing the chemical state of the environment.

**EESC901 Advanced Plate Tectonics, Macrotopography and Earth History**

Autumn Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Exclusions: Not to count for credit with GEOS923  
Subject Description: This subject is concerned with the theory of plate tectonics and its role in the formation of Earth structures and topography. Large-scale processes are examined in relation to the controls of topography and bathymetry. Relationships between plates and ocean basins, continental margins, continental interiors and sedimentary basins are evaluated. Earth structure is examined along with earthquakes and deformation (stress, strain, faulting and folding). Earth history is considered in relation to past mountain belts, continents and oceans. Practicals are a series of tutorials designed to reinforce the material covered in lectures. Field work consists of up to two field trips.

**EESC902 Advanced Coastal Environments: Processes and Management**

Spring Wollongong On Campus  
Credit Points: 12  
Pre-requisites: None  
Co-requisites: None  
Subject Description: This subject examines sedimentary and ecological processes on the coast. Coastal management is considered from geomorphological and ecological perspectives. Topics include the morphology and development of coastal landforms, particularly estuaries, deltas, chiene and beach-ridge plains, beaches and dunes, and coral reefs. Emphasis is placed on interpreting Holocene morphostratigraphy and morpho-dynamics, reconstructing sea-level changes and the effect of sea-level changes on coastal environments, and on understanding longer-term ecological and geomorphological processes.

**EESC903 Advanced Fluvial Geomorphology and Sedimentology**

Autumn Wollongong On Campus  
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Rivers play a dynamic role in shaping the Earth’s landforms (geomorphology), constructing sedimentary sequences of economic importance (sedimentology), and presenting flood and erosion hazards, all of which greatly influence human use of the Earth’s surface. This subject examines processes forming and modifying contemporary drainage basins, interprets fluvial sedimentary records and relates changes in these records to variations in climate and depositional environment. Particular attention is given to human modification and the management of river systems.

EESC904 Advanced Geographic Information Science
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: EESC914 or equivalent
Co-requisites: None
Subject Description: This subject builds upon the concepts and software skills developed in EESC914 to develop your ability to act as an independent problem-solver, ready to use GIS either for further research or in a job setting. Over the semester you will build this ability by working together as a class to complete a real-world GIS project from ‘start to finish’. You will work in teams during lectures to design the project based on relevant examples from the academic literature. You will work independently in the practical sessions to carry out the analysis for the project. At the end of the semester, you will produce a report of project results in the form of an article for submission to a journal. For the final exam, you will describe a research plan for a GIS project in your own area of interest. You will then follow this up with an intensive targeted literature review to further develop the research plan.

EESC905 Advanced Remote Sensing of the Environment
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: EESC914 or equivalent
Co-requisites: None
Subject Description: Remote sensing is an important tool for monitoring and modelling the condition and dynamics of terrestrial, aquatic and atmospheric environments. Biophysical information extracted from images may be used in many ways, as image or thematic maps, directly in decision making, as estimates of biophysical variables or integrated with other spatial information systems for further analysis and display. This subject is a logical progression from EESC904, the latter having not only provided the student with an introduction to the theory and practice of geospatial technologies, but basic knowledge of remote sensing principles. EESC905 emphasises digital image processing for analysis of remotely sensed imagery, including airborne and satellite multispectral and hyperspectral data. Practical sessions will involve a progression of common analysis techniques and tutorials. Concepts and skills acquired will be sequentially applied in these sessions.

EESC909 Dung, Death and Decay: modern scientific methods in archaeology
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Students will be exposed to the methods and applications of four key components of archaeological science: geoarchaeology, geochronology, geochemistry and bioarchaeology. Students will learn how to use modern scientific methods to assess how archaeological deposits formed and may have changed over time; when archaeological objects were made and other events of interest took place; what human occupants of these sites ate and drank, and other aspects of their life histories (e.g. migration patterns); and what kinds of environments these people inhabited, including the diversity of fauna and flora and the climates under which they lived and died.

EESC910 Advanced Social Spaces: Rural and Urban
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject requires postgraduate students to critically assess how geographers and others have theorised the global and national processes that shape the social, economic and spatial characteristics of Australian regions. Students will build upon insights from previous study to explore how contemporary urban and rural landscapes have been formed and how they are constantly being reshaped. They will draw upon theoretical perspectives including political economy and post-structuralism to explore varying accounts of these socio-spatial processes. Examples such as industry restructuring, rural/urban mythology and the development of Australian regional towns and cities will be used to make connections between processes at the various scales and specific aspects of Australian urban and rural life. Through workshops and assignments, students will further develop skills and knowledge in areas such as media analysis and the use of census and other data sources. In addition, students will complete an essay in which they evaluate theoretical perspectives on a topic chosen in conjunction with the subject co-ordinator. Contact hours include fieldtrips to farms and country towns. Fieldtrip schedules may include 2 one day fieldtrips. Fieldtrips are run in lieu of other classes such as lectures and tutorials.

EESC911 Advanced Isotope Geochemistry
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Topics include sample preparation; mass spectrometry; applications of both radiogenic and stable isotopic systems; geochronology modelling; petrogenetic modelling.

EESC912 Advanced Soils, Landscapes and Hydrology
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: The interdependence of landform, hydrology and soil, together with time and place, are the major factors influencing landscape evolution. This subject examines denudation of highlands; survival of ancient landscapes; climatic and geomorphic controls on landforms; erosion; weathering processes and the formation of soils, laterites, siltretes and calcrites; soil surveying; environmental records of lakes; groundwater and surface-water processes and chemistry; dating of land-surfaces and groundwater; the hydrological cycle.

EESC914 Fundamentals of Spatial Science
Autumn Wollongong On Campus
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to provide students at the MSc level with a comprehensive introduction to the theory and practice of dealing with geospatial technologies, collectively termed 'spatial science'. Spatial science draws upon concepts, tools and skills from several other related disciplines (primarily geography, cartography and computer science) and technologies (GIS, remote sensing, GPS). Students enrolling in this subject will have no prior background in this area. Thus, they will require the same basic knowledge and skill development at the start of the subject as the undergraduate students (attending same lectures and practicals). However, towards the end of the semester (once the knowledge and skills have been obtained), they will be asked to conduct an extensive literature review and use it, combined with all they have learned throughout the semester, to develop a professionally written proposal for a spatial science project in their area of interest. This report will take several weeks of dedicated time to complete and is heavily weighted (40%) in the assessment of the subject.

EESC916 Coastal Population Studies
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject is designed to introduce students to a range of demographic issues that are globally, nationally and locally significant. The lecture content is designed to enable students to critically study how geographers analyse population issues and how this analysis overlaps with other disciplines. Practical classes are centred around core skills in population data management for coastal regions, social and Identities: Qualitative research design

EESC917 Advanced Spaces, Places and Identities: Qualitative research design
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: The lecture content is designed to enable postgraduate students to build upon their geographical knowledge by critically studying how geographers have conceptualised space/place. Drawing upon different approaches, this subject investigates the connections that have been made between place making processes and identity including gender, ethnic, sexual, tourist and national identity. The approaches drawn upon include structuralism and post-structuralism. Underpinning the design of the workshops is the objective that students will learn qualitative research skills. In these workshops, students are encouraged to gain proficiency in three areas: qualitative research, team-work and presentation skills. Employers often seek postgraduate students with demonstrated skills in these three areas. This subject is designed to enable postgraduate students to develop these skills.

EESC918 Advanced Environmental and Heritage Management
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject presents advanced geographic perspectives on environmental and heritage management. We examine environmental and cultural values and how they are translated into practice to protect and manage landscapes, places, resources and ecosystems. Consequently, the subject will consider definitions of concepts such as environment, nature and heritage as well as legislative and policy frameworks in Australia and overseas. These themes will be pursued through studies of issues such as indigenous land and heritage management, wilderness identification and management, catchment management and restoration of ecosystems and the built environment. The subject is suitable for practitioners seeking to update their academic knowledge as well as for postgraduate students wanting to further develop their applied research skills.

EESC921 Advanced Environmental Geology
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: Topics include the relationship between mining operations and communities; downstream pollution problems; mineralogical composition and types of associated dusts; composition of mine waters and waste residues; environmental impact studies; alienation of resources; conflicts of interest in mining operations.

EESC950 Advanced Topic A
Annual Wollongong On Campus
Spring Wollongong On Campus
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will consist of a library and/or laboratory study on some topical aspect of earth and environmental sciences equivalent to one half of full-time study.
Remote sensing of land and biological resources. Emphasis will be given to geomorphological processes, on human induced changes to these natural systems. Coastal, river, water and soil managements focusing on ecosystems. Assessment is directed through the practical work, report writing, etc.). The subject content is determined following a consideration of the individual student's background and needs.

**Exclusions:** Not to count for credit with ENVI920

The subject covers topics designed to give students a comprehensive overview of the scientific basis of environmental management. The subject will adopt a multi-disciplinary approach to the scientific understanding of how major ecosystems work and show how an appreciation of such knowledge leads to the development of appropriate management strategies for these systems. While there will be some emphasis on the Australian situation, much of the material is applicable in any country. The systems to be covered include estuaries, reefs, coastal wetlands, forests, large and small catchment areas, and semi-arid areas. In addition, the science of the management of hazardous wastes (including radioactive materials) will be discussed. Case studies from Australia, South-East Asia and the Pacific Islands will be included.
ENVI923 Environmental Planning
Autumn Wollongong On Campus
Credit Points: 12
Pre-requisites: Must be enrolled in Environmental Science Postgraduate program or MSc (Coastal Planning)
Co-requisites: None
Exclusions: Not to count for credit with ENVI921
Subject Description: This subject presents material necessary for a comprehensive overview of the status and development of environmental planning in government and industry. In the subject, students are introduced to the principles of environmental planning. This is followed by presentations from staff from a wide range of organisations involved in environmental planning. Students learn from academic staff and environmental practitioners, the mechanisms, difficulties and benefits of current planning activities in Australia. While there is some emphasis on the Australian situation, reference to activities in other countries is also included, in addition to aspects of the global situation regarding environmental planning.

ENVI930 Thesis
Annual Wollongong On Campus
Autumn Wollongong On Campus
Spring Wollongong On Campus
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 24
Pre-requisites: None
Co-requisites: None
Subject Description: A research topic in an area of environmental science will be selected by each candidate after consultation with the degree co-ordinator. The thesis will be supervised by staff from the appropriate unit(s).

ENVI931 Thesis
Annual Wollongong On Campus
Spring2009/Autumn2010 Wollongong On Campus
Credit Points: 32
Pre-requisites: None
Co-requisites: None
Subject Description: A research topic in an area of environmental science will be selected by each candidate after consultation with the degree co-ordinator. The thesis will be supervised by staff from the appropriate unit(s).

MARE973 Advanced Topics in Fisheries and Aquaculture
Spring Wollongong On Campus
Credit Points: 12
Pre-requisites: None
Co-requisites: None
Subject Description: This subject will provide an overview of fisheries biology and aquaculture (vertebrate and invertebrate) including the diversity of Australian and international fisheries and their key challenges; relevant ecological issues (population dynamics, transport processes, stock identification); predictive modelling, fisheries management; secondary impacts of fisheries; the diversity of aquaculture; case studies in aquaculture; ecological impacts, potential for enhancement of fisheries. Literature review examining contemporary research in ecology (tailored to the specialisations of MSc students enrolled in the subject).

SCIE911 Fundamentals of Science Communication
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to ensure that all students entering the Master of Science are aware of, and have opportunity to develop competency in, the types and level of language communications necessary for successful engagement in science subjects at UOW. Students will examine and produce various types of communication that learning (and assessing learning) in science depends on, including spoken and written reports for specific audiences. Reports will be based on published information, student lab notes and/or other data. The emphasis is on the development of practical skills in finding, using and re-purposing various types of scientific information, in using academic English and in teamwork, as well as on understanding the design and marking criteria of assessment tasks encountered throughout the degree program.

SCIE912 Fundamentals of Science Laboratories
Spring Wollongong On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to ensure that all students entering the Master of Science develop the level of competency in laboratory procedures necessary for successful engagement in various science subjects. It involves a series of intensive laboratory workshops, which build students’ competency in basic laboratory practices, manipulations and calculations, as well as common protocols and procedures they will meet in more advanced laboratory classes. The emphasis is on the development of dissection and accessing resources. It will include the observation and collection of molluscs in a variety of habitats, including the rocky shore, estuarine and rainforest environments. Literature examining contemporary research in molluscs will also be reviewed (tailored to the specialisations of MSc students enrolled in the subject). This subject is offered in alternate years and will next be offered in Summer Session 2009/2010.
of practical competencies in conducting science
laboratories, as well as deepening students’ understanding
of the management, instrumentation, OH&S, data
recording, analysis and presentation procedures that
are standard in Australian science laboratories.

SCIE913  Fundamentals of Science
Data and IT
Spring  Wollongong  On Campus
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: This subject aims to ensure that
all Master of Science students are competent users of the
software upon which the processing and presentation
of data depends, (eg Word, Excel and PowerPoint). It
also aims to ensure students are active participants in the
online environment upon which effective learning in
UOW science subjects depends (eg Vista’s navigation,
online discussions, quizzes and assignment submission).
It will provide adequate opportunity and guidance
for students to develop confidence in preparing and
presenting a range of spoken and online communications.
Together with the other foundation level subjects, it
grounds students in the basic understanding and good
habits that will enable them throughout their degree
program to actively engage in a learning community
and continuously reflect upon their learning.

SCIE914  Current Questions in Science
Autumn  Wollongong  Flexible
Summer 2009/2010  Wollongong  Flexible
Credit Points: 6
Pre-requisites: None
Co-requisites: None
Subject Description: Taking a cross-disciplinary
approach, this subject introduces students to some of
the major issues currently debated in the scientific
community, examining their social impact, and
demonstrating the value of considering science
problems from multiple and international perspectives.
Through four discipline-focused modules (eg Physics,
Chemistry, Biology and Earth and Environmental
Sciences), topics covered range from Planetology,
Smart Chemistry and Genetic Engineering to Climate
change and its global impact - the range representing
current research interests of Faculty staff. Each module
exemplifies research questions and findings of wide
general interest and current importance, and illustrates
how science is used to deal with various problems. The
focus throughout is on the need for a collaborative,
multi-disciplinary approach to the investigation of
major environmental, social and technological issues.
