

Thursday (May 20<sup>th</sup>) the School of Chemistry will be hosting a special seminar on the patenting of intellectual property in the chemical and biological sciences.

The seminar has been organised by Dr. Gavin Dixon (Manager, Innovation & Commercialisation - Health, Medicine, Science and Arts - University of Wollongong) and will be presented by two patent attorneys from Davis Collison Cave (DCC); Dr. Nigel Lokan and Dr. Gavin Recchia.

Nigel and Gavin are experts in the field and DCC is one of the premier patent law firms in Australia specialising in chemistry and biotechnology IP protection.

The seminar should be of interest to academics and students alike with a current or future interest in making sure their scientific discoveries/inventions are well protected.
