Monday 1st November, 2010
12:30 – 2:00 pm
Lecture Theatre 20.4

There is no requirement to register for this presentation

Watch out for more FYE Forums on the ASD Staff Development Calendar:

There is a growing emphasis, internationally, on the assurance of learning in higher education: governments, professional bodies, employers and the community are increasingly saying “show me the learning”. The Australian federal government’s ‘standards agenda’ is likely to make this more explicit, calling on teaching and learning course and program leaders to assure and enhance graduate achievement of learning outcomes. This presentation draws on a 360-degree evidence-based approach, highlighting the opportunities and challenges associated with mapping the curriculum to see where, when and how in a degree curriculum we assess the ‘capabilities that count’ for graduate success.

Professor Beverley Oliver has had extensive experience in leading teaching and learning projects in creating and implementing eVALUate (Curtin’s online student feedback system) and Curriculum 2010 (a university-wide curriculum reform initiative which included extensive engagement with teaching staff adoption of curriculum mapping and other tools to inform curriculum review). Curriculum 2010 and eVALUate were both recognised with ALTC Citations for Outstanding Contributions to Student Learning. Professor Oliver publishes in a range of teaching and learning areas, including student evaluation, curriculum renewal, graduate employability, ePortfolios and student ownership and use of emerging devices and Web 2.0 applications.

Professor Oliver was a member of the Project Team for the recently completed ALTC Leadership Grant Building Academic Leadership Capability at the Course Level: Developing Course Coordinators as Academic Leaders. She is Project Leader for the ALTC Competitive Grant Building Course Team Capacity for Graduate Employability and an ALTC Fellow. Her Fellowship is entitled Benchmarking partnerships for graduate employability (see http://tiny.cc/boliver).
